PROCEEDINGS AND DEBATES OF THE 112<sup>th</sup> CONGRESS, FIRST SESSION

## SENATE—Wednesday, December 7, 2011

The Senate met at 11:30 a.m. and was called to order by the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York.

### PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O mighty God, our hope for years to come, thank You for giving us this day to use for Your glory. From the morning Sun until the going down of the same, Your blessings provide us with confidence that our future is brighter than our past.

Today, as we remember Pearl Harbor and a day of infamy, we praise You for giving so generously to this Nation. Lord, You shower us with blessings without regard to our worthiness or importance. As we respond to Your blessings, infuse our lawmakers with a spirit of hope and purpose that they may do Your will in these challenging times. May Your spirit sustain them as they labor so that justice will roll down like waters and righteousness like a mighty stream.

Amen.

### PLEDGE OF ALLEGIANCE

The Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York, led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

### APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. INOUE).

The legislative clerk read the following letter:

U.S. SENATE,  
PRESIDENT PRO TEMPORE,  
Washington, DC, December 7, 2011.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby

appoint the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York, to perform the duties of the Chair.

DANIEL K. INOUE,  
President pro tempore.

Mrs. GILLIBRAND thereupon assumed the chair as Acting President pro tempore.

### RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

### SCHEDULE

Mr. REID. Madam President, following leader remarks, the Senate will be in a period of morning business, with Republicans controlling the first 30 minutes and the majority the second 30 minutes.

As a reminder to all Senators, culture has been filed on the Cordray nomination. That vote is expected tomorrow morning.

### PEARL HARBOR

Mr. REID. Madam President, 70 years ago today the attack on Pearl Harbor changed our country forever. It also hardened our resolve to become a better, stronger nation, and that we have become.

An example is the USS *Nevada*, a great battleship that epitomizes the resiliency of our country. While in the port of Oahu on December 7, 1941, the battleship *Nevada* was hit by many bombs and a torpedo. Sixty American sailors died. Less than a year later, that great battleship returned to service and served valiantly for our country during World War II.

Today we honor the living Pearl Harbor veterans for their courage and sacrifice. Here in the Senate we refer to our Medal of Honor winner DAN INOUE, and Senator AKAKA, and FRANK LAUTENBERG. All three served in World War II.

We also remember the nearly 2,400 Americans who lost their lives that

day and the hundreds of thousands more who made the ultimate sacrifice during World War II. These servicemembers are heroes. They set a fine example for the men and women who protect our freedoms today, and none of us will ever forget their courage.

### PAYROLL TAX CUT

Mr. REID. Madam President, the Republicans like to claim they are the party of the tax cuts, but as Democrats propose more tax relief—we propose it every day for working families—Republicans every day are showing their true colors. They only support tax cuts that benefit the rich.

Speaker BOEHNER and Senator MCCONNELL say they agree with Democrats, that we should prevent a \$1,000 tax hike on middle-class families. A person running for President, Mitt Romney, agrees that we should extend the payroll tax cut. The former Speaker who is running for President, Newt Gingrich, says we should extend the payroll tax cut. But it has become clear that the caucus, led by the Speaker and by the Republican leader—that those they lead don't seem to be following them. Tea party Republicans oppose our plan to cut taxes for nearly every American family. But Republican leaders recognize that taking \$1,000 out of middle-class pockets during these hard times is political suicide.

There are papers all over the country, but take this one as an example. "GOP Is Split On Payroll Tax Cut. Objections To Surtax On Rich." Remember, the surtax is on the second million dollars that people make. On the first million dollars, not a penny. On the second million dollars, the bill that we are going to vote on—probably Friday here, maybe Thursday—has a surtax for people's second million dollars of income of less than 2 percent.

The headlines go on to say "Opposition Could Give Obama a 2012 Issue." Obama doesn't need a 2012 issue. Middle-class Americans do not need a tax increase. That is what this is all about.

It is very clear that there is a bitter division in the House with House Republicans. As you know, they were supposed to send us a bill today—or was it yesterday? They finally acknowledged late yesterday they could not send us anything. They cannot get an agreement even among the Republicans. They don't reach out to the Democrats at all. They want to do it with a majority of the majority, and they cannot get anything done.

So it seems to me, faced with this rebellion in the two caucuses, Republican leaders have two options: They can work with us to forge a compromise that will pass or they can move even further to the right to appease the tea party, because that is what this is all about. As we have seen before, when faced with a choice between the middle class and the tea party, Republicans will choose the tea party every time. We have seen before, when faced with a choice between the middle class and the richest of the rich, the Republicans choose the richest of the rich.

#### CONSUMER FINANCIAL PROTECTION BUREAU

Mr. REID. Madam President, tomorrow the Senate will vote on whether to move forward with confirmation of Richard Cordray, the nominee to head the Consumer Financial Protection Bureau, which is part of the Dodd-Frank bill.

The one thing that came out of that legislation—and certainly we understood with the financial meltdown that took place on Wall Street—is the banks need more control, not less. We also learned during that long debate that the American consumer had no protection whatsoever. The legislation we passed created the Consumer Financial Protection Bureau.

My Republican colleagues have signaled they are going to block Cordray's nomination but not because he is unqualified. You would think that if someone wanted to vote against him, it would be because he is too liberal, he is too conservative, he is too rich, he is too poor, he doesn't have the proper education, whatever you could come up with to find justification for voting against this man. That is not what they have done. For the first time I can ever remember—and my staff did research on this last night—for the first time in Senate history the Republicans are poised to block a qualified nominee solely because they don't like the Federal agency he will lead.

The Senate Republicans have no problem with Mr. Cordray. He has bipartisan support and a long history of fighting unfair practices by financial predators. Instead, Republicans are trying to cripple the new consumer agency altogether by depriving it of a director. Their attempts to hamstring the consumer watchdog will leave

Americans vulnerable to scams and rip-offs that are going on as we speak and have gone on in the past. It is shameful that Republicans would leave consumers in the dark about the risk they face when making financial decisions, and they are doing it only to try to change a law that is the law of this land.

#### AFFORDABLE CARE ACT

Mr. REID. Finally, my first elected job, many years ago, was to an organization called the Southern Nevada Memorial Hospital. It was the largest hospital in the State. It was the largest hospital district. People ran at-large from Clark County, the Las Vegas area, and I was elected to that. It was my first elected job. When I took that job, there was no Medicare. In that hospital, when someone came who was old and did not have money, someone had to sign for them—a husband, a wife, father, mother, brother, sister, neighbor; someone signed. If that person did not pay after agreeing to pay, we had a large collection agency and we would go after those people. It was very difficult sometimes to collect that money, difficult in the sense it was hard to do, but, more importantly, it was difficult to do because you hated to go after people to pay these large hospital and doctor bills.

Medicare came into being before I left my job. It changed. Prior to Medicare, 40 percent of the seniors who came into that hospital had no insurance, and that is where they had to look to their friends and neighbors and relatives to take care of that bill. Today, after Medicare is the law of the land, virtually every senior citizen has the ability to go into a hospital anywhere in America.

For all of these many years, going on five decades, Medicare has been improving and extending the lives of seniors. The Affordable Care Act, legislation that my Republican colleagues tend to denigrate, Obamacare—let's talk a little bit about Obamacare today, the Affordable Care Act.

One thing that bill did is it extended the life of Medicare for 12 years. Medicare would stay strong for future generations and for retirees. That is one reason we passed that legislation.

Health care reform today is helping seniors by beginning to close the doughnut hole, the infamous doughnut hole for prescription drugs for seniors. This year; that is, 2011, because of the legislation we passed, Obamacare, more than 2.5 million Medicare recipients, including thousands of Nevadans, saved about \$600 each on prescription drugs. That amounts to about \$1.6 billion, thanks to this legislation. For some seniors on fixed incomes, those savings prevented difficult choices between literally food and medicine.

We also had a provision in that legislation that people could get wellness

checks, screenings, and a checkup. More than 24 million seniors this year got free physicals because of health care reform. That is progress of which America can be proud.

#### RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

#### PEARL HARBOR

Mr. McCONNELL. Madam President, as the majority leader has noted, today is the 70th anniversary of the Japanese attack on Pearl Harbor. I have certainly had the opportunity, and many Members of the Senate may have as well, of visiting World War II era veterans when they come to Washington on what are called the honor flights, where veterans groups raise the funds to get these World War II vets up here to see the World War II Memorial. It is a great inspiration to see these members of the "greatest generation" who, indeed, saved America during World War II.

I remember in particular talking to an elderly gentleman—obviously they are all elderly at this point—who was at Pearl Harbor that day, and his describing the horror of the experience. So whether these World War II veterans served in Pearl Harbor or in Europe or in the Pacific theatre, we certainly remember their extraordinary contribution to saving this country, and today in particular.

For our parents' generation, they always remembered exactly where they were when they heard about the attack. For most of us, we remember exactly where we were when we heard about the Kennedy assassination, that moment that is seared in your memory of some extraordinary event; and, of course, for younger people, the 9/11 attack. Everybody remembers exactly where they were, and millions of Americans saw the second plane go into the second building in real time. But today we remember the attack, and we express our admiration and respect for the "greatest generation."

#### KEYSTONE XL PIPELINE

Mr. McCONNELL. Madam President, today the President welcomes Canadian Prime Minister Stephen Harper to the White House, and I would like to take the opportunity to say that I hope the Prime Minister is able to convince President Obama to reverse his recent decision to delay the Keystone XL Pipeline.

The President has said repeatedly that jobs are his top priority. He says he wakes up every morning thinking about how he can create jobs. Yet here

is the single greatest shovel-ready project in America ready to go, and for some reason he is suddenly not interested.

I have a question: How is it that when it comes to taxpayer-subsidized jobs that may or may not materialize, the President tells us we can't wait, we have to do it tomorrow, but when it comes to private sector jobs that are ready to go immediately, he is in no rush? It doesn't make any sense, particularly when we look at some of the President's past statements.

Here are a couple of examples. President Obama said earlier this year:

For those—just to give a background to folks, there are these tar sands in Canada that can produce oil. There is talk about building a pipeline into the United States to import that oil.

This is the President. He said:

I will make this general point, which is that, first of all, importing oil from countries that are stable and friendly is a good thing.

That is the President, and I agree with him.

The President also said earlier this year—a statement of the obvious:

We're still going to have to import some oil.

Boy, are we.

And when it comes to the oil we import from other nations, obviously we've got to look at neighbors like Canada and Mexico that are stable and steady and reliable sources.

That was the President earlier this year.

So the President has correctly said, in my view, that he favors importing oil from allies and neighbors. Here is a project that would enable us to do that and do a lot more of it and create thousands of jobs in the process. What is the problem?

Last Friday, Americans woke up to the news that for the 34th month in a row, the unemployment rate in this country has stood above 8 percent—a period of joblessness not seen since the Great Depression. The least they can expect from Washington is that we will not stand in the way of people who want to hire. Yet that is exactly what they are getting from this President when it comes to this pipeline. This project has been under review for years—3 years—including two exhaustive environmental evaluations. By all accounts, the State Department was ready to give it the green light by the end of this year—this month.

What happened? Well, it appears Presidential politics got in the way. The President started getting heat from the environmental activists he is counting on to stuff envelopes next year, so he conveniently put off the decision until right after next year's election.

So if this episode tells us anything, it is that the President is clearly more concerned about getting himself re-

elected next year than getting somebody in Montana or Kansas or South Dakota or Missouri a job today. He is so determined to keep his liberal base happy, he is even willing to go against the labor unions that, by the way, are enthusiastically in favor of beginning this project right now.

What have they had to say about it? Well, the Teamsters put it this way:

The Keystone Pipeline project will offer working men and women a real chance to earn a good wage and support their families in this difficult economic climate.

That is Jimmy Hoffa.

The AFL-CIO:

For America's skilled craft construction professionals, any discussion of the Keystone XL project begins and ends with one word: JOBS.

The AFL-CIO further said:

As many as 500,000 indirect jobs via a strong economic multiplier effect . . . without one single dollar of government assistance.

Isn't this what we are looking for? It doesn't cost the government anything. It creates jobs immediately. This is what we are looking for.

The Brotherhood of Electrical Workers:

At a time when jobs are the top global priority, the Keystone project will put thousands back to work and have ripple benefits throughout the North American economy.

Laborers' International Union of North America had this to say: This is "not just a pipeline, but is a lifeline"—not just a pipeline, but a lifeline—"for thousands of desperate working men and women."

So what do we have here? We have a privately funded project that labor leaders are saying their members want up and running. But the President says this one can wait. Despite what he has said about importing oil from allies, despite what the labor unions say, the President wants to delay these jobs until after his election.

It is not just the unions and the Republicans who are asking for this project to move forward. Let's take a look at what some of the Democrats in Congress have said about it. There was a letter from 22 House Democrats to President Obama on October 19 of this year, and I will just read a few excerpts: "America truly cannot afford to say no."

Further in the letter:

Mr. President, America needs the Keystone XL Pipeline.

Further in the letter:

The Department of State's Final Environmental Impact Statement reaffirmed the findings of the two previous environmental impact statements, namely, that the Keystone XL Pipeline will have no significant impact on the environment.

Further in this letter from the 22 Democrats to the President they said:

This represents a true shovel-ready project that would directly create 20,000 high quality domestic manufacturing and construction

jobs for Americans who are desperately seeking employment.

That is 22,000 directly working for the pipeline. I have already described the spin-off benefits—the other jobs that would be created as a result of it.

Senator BAUCUS—right here in the Senate—Senator BAUCUS said:

We need to put Montanans back to work and cannot afford further delays to the Keystone XL pipeline.

Senator TESTER said:

It should not have to wait 14 months for an up-or-down decision.

The Montana Senators have it right. Americans can't wait for the next election. They want their jobs now—right now.

So it is my hope that Prime Minister Harper is able to convince the President to change his mind.

Congressional Republicans and Democrats stand ready to move forward on this project. We are prepared to do all within our means to get the Keystone XL Pipeline approved. There is literally no time for delay.

The ACTING PRESIDENT pro tempore. The majority leader.

Mr. REID. I ask that we now move to morning business.

#### RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

#### MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period of morning business with Senators permitted to speak therein for up to 10 minutes each, with the first hour equally divided and controlled between the two leaders or their designees, with the Republicans controlling the first 30 minutes and the majority controlling the next 30 minutes.

#### MIDDLE CLASS TAX CUT ACT OF 2011—MOTION TO PROCEED

Mr. REID. Madam President, I now move to proceed to Calendar No. 251, S. 1944.

The ACTING PRESIDENT pro tempore. The clerk will report the motion.

The assistant legislative clerk read as follows:

Motion to proceed to the bill (S. 1944) to create jobs by providing payroll tax relief for middle class families and businesses, and for other purposes.

#### CLOTURE MOTION

Mr. REID. I have a cloture motion at the desk.

The ACTING PRESIDENT pro tempore. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

## CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the motion to proceed to Calendar No. 251, S. 1944, a bill to create jobs by providing payroll tax relief for middle class families and businesses, and for other purposes:

Harry Reid, Robert P. Casey, Jr., Richard J. Durbin, Charles E. Schumer, Carl Levin, Debbie Stabenow, Kent Conrad, Joseph I. Lieberman, Dianne Feinstein, Jeff Bingaman, Tim Johnson, Daniel K. Inouye, John F. Kerry, Max Baucus, Daniel K. Akaka, Richard Blumenthal, Kirsten E. Gillibrand.

Mr. REID. I ask unanimous consent that the mandatory quorum under rule XXII be waived.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## MORNING BUSINESS

Mr. REID. I ask unanimous consent that we resume morning business under the previous order; further, that morning business be extended until 6 p.m. this evening with Senators permitted to speak for up to 10 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from North Dakota.

Mr. HOEVEN. Madam President, I ask unanimous consent to enter into a colloquy with my Republican colleagues during our morning business time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## NORTH AMERICAN ENERGY SECURITY ACT

Mr. HOEVEN. Madam President, I rise this morning to discuss the North American Energy Security Act in a colloquy with my colleagues. Joining me will be our leader, Senator MITCH MCCONNELL of Kentucky, Senator KAY BAILEY HUTCHISON of Texas, Senator JOHNNY ISAKSON from the great State of Georgia, Senator MIKE JOHANNIS from Nebraska, and Senator JIM INHOFE of Oklahoma. We are here to discuss a very solutions-oriented piece of legislation. It is about creating jobs. It is about creating energy security for our Nation. It is about good environmental stewardship. It is about all of these things and more.

We want to take this opportunity to discuss the legislation and encourage—to urge—our fellow colleagues to join with us to create jobs and opportunity for the American people. In a nutshell, this legislation clears the way for the Keystone XL Pipeline, which is a 1,700-mile pipeline that will run from Alberta, Canada, all the way down to the gulf coast region of the country, down to the refineries in the United States.

This blue line shows the route of the Keystone XL Pipeline. This red line shows an existing pipeline, the Keystone Pipeline, which was built very recently by TransCanada. It provides almost 600,000 barrels a day of crude to the United States. The Keystone XL Pipeline would provide more than 700,000 barrels a day of crude oil to our refineries. In addition, it will also haul domestic crude from States such as North Dakota and Montana.

It will put 100,000 barrels a day of our own light, sweet, domestic crude into the pipeline to bring it down for our needs in the country. It will also bring oil from places such as Cushing, OK, where we currently have backlogs to the refineries, as well. So it is also about moving oil within our country as well as bringing Canadian crude to the United States and to our refineries.

I mentioned it is a job creation bill. As our leader said just a minute ago, just the construction alone will put 20,000 workers on the job—20,000 workers on the job—just constructing the pipeline. The Perryman Group out of Waco, TX, has indicated more than 250,000 jobs. It is a huge job creator.

I yield to our leader, Senator MCCONNELL.

Mr. MCCONNELL. If the Senator will yield on that point, it is my understanding, and is it not correct, that these are not jobs sometime in the future but these are, in fact, jobs that just as soon as the President would sign off on this, this project is ready to go. We don't have to borrow any—the government doesn't have to borrow any money and they don't have to try to stimulate anything. This is a project, as I understand it, I would ask my friend from North Dakota, that is literally shovel ready and will not cost the government a penny?

Mr. HOEVEN. This is a project that is absolutely ready to go and will not cost the Federal Government one penny. It puts 20,000 workers on the job right away.

The hurdle was the route through Nebraska, but we have now worked with the State of Nebraska. They have had a special session. They have set up a process to clear that part of the route. Our legislation says within 60 days after passage of this bill the route is deemed approved. That is after 3 years of process through the EPA.

So we are ready to go. We have addressed the issues. We can put these people on the job now if we can get the Presidential approval.

Mr. MCCONNELL. In fact, I would say to my friend, the Senator from Nebraska is on the Senate floor with us right now. He could further underscore that the people of Nebraska, having now satisfied the concern they had earlier about location, seem to be ready to go.

Mr. JOHANNIS. Madam President, I appreciate the opportunity to respond

to the leader's comment and his question. The leader is absolutely right. The people of Nebraska, through their elected officials, have worked with the company building this pipeline in that they have resolved their differences.

The reason I support this legislation and have decided to be a cosponsor of the legislation is that this legislation respects the Nebraska process. It says there will be a process in Nebraska where we will site the pipeline in the best place. This legislation says that is fine. But what this legislation also acknowledges is, on the entire rest of the pipeline outside of the State of Nebraska, this is ready to be built today.

The President of the United States has had 3 years of background study and extensive environmental study, as the leader has pointed out, and nothing is going to change outside of the State of Nebraska. So work can begin today. There is just one person holding up that work. That is the President of the United States. With the stroke of a pen, he can turn this project loose. It will respect what is going on in Nebraska. Workers can be hired, the pipeline can be built, and those jobs can be literally provided today.

So I support this legislation. I am proud to be here this morning to say that and to thank the Senator from North Dakota, the minority leader, and all others who have worked with us to solve this problem. The problem is solved. We are ready to create the jobs. It is my hope the President will announce that he is ready to proceed to create these jobs for American workers.

Mr. MCCONNELL. Could I ask one further question of either or both of the Senators—and Senator ISAKSON as well.

I understand there is a suggestion that there may be political concerns on the President's part, and we all know that most environmental groups are very much on the Democratic side. But is it not the case that there are a number of unions in the country—most of which, certainly, do not support Republicans anywhere I know—that also feel passionately about this issue and would like to get to work? Is that not the case?

Mr. HOEVEN. I ask Senator JOHANNIS, would he like to respond?

Mr. JOHANNIS. I have worked on this issue for a number of months—actually, a couple of years. Here is the situation: Unions are ready to go to work. I talk to the locals in Nebraska on a regular basis, and they talk about unemployment numbers that are staggering, in the double-digits, which, in our State, is remarkable because we have an unemployment rate of 4.2 percent.

The unions are ready to go to work, bringing their skills and their talents to bear. The leader's observation is absolutely right.

For the environmentalists, on the other hand, it is not the pipeline, it is not the location, it is that they do not want the tar sands development to occur. So the President is on the horns of a dilemma. Part of his base, the unions, are saying: Create the jobs. There is already a pipeline. Let's go out there and do this in the most environmentally sensitive way we possibly can.

On the other hand, the environmentalists are saying: No, Mr. President. They have circled the White House. They have done all of these things. Well, the President solved this dilemma he finds himself in, in my judgment, by announcing he would just delay this until after the election.

Mr. McCONNELL. Could I ask the Senator from Nebraska a further question?

It strikes me—correct me if I am wrong—that America not going forward does not prevent this from happening, just in another country. And a good option for the Canadians might well be to just ship this product to China. Is that not correct?

Mr. JOHANNIS. Well, in response to the leader's question, the Canadian Government has already indicated that if the United States is not a reliable purchaser and transporter of this commodity, they will have to look to other parts of the world, for example, China, to sell this product.

This will not stop the development in that area. In fact, it will push the development to a part of the world where the refinery process might take place with fewer environmental standards and, therefore, cause more environmental problems than if we build this pipeline and solve it. That is why from the very beginning I have said: Look, I am not opposed to the tar sands development. I am not even opposed to the pipeline in our State, now that we have solved the problem.

As I said, there is one person who can create these jobs today. That is the President of the United States. With the Prime Minister with the President, it would be a perfect opportunity to say: We do not have to wait until after the election. Let's create these jobs today. Let's put Americans to work.

Mr. McCONNELL. Just one final observation, and then I am going to leave the colloquy to all the rest of my colleagues. But it strikes me—and I wonder if my colleagues agree—this is about as close to a no-brainer as we will ever run into in America. There is no government money.

Mr. HOEVEN. I would ask Senator ISAKSON to join us at this point. He is here specifically to talk a little bit about the issue with oil sands development and China. So Senator ISAKSON, and then certainly Senator HUTCHISON as well.

Mr. ISAKSON. I thank Senator HOEVEN for the recognition, and I thank the leader for his remarks.

I just want to confirm what the leader just said by quoting from two recent articles. The first is from an article about Minister Oliver, who is Canada's Minister of Natural Resources, on his trip to Shanghai. Here is his quote:

My mission to China is clear. I have come to raise awareness of the strength of Canada's natural resource sectors—as both an outstanding source of quality products and an attractive destination for investment.

Let me read one other quote that occurred shortly after that speech was made by the Canadian Minister of Natural Resources:

A unit of China Petrochemical Corp., [known as] Sinopec, agreed to buy Daylight Energy Ltd., a Canadian oil and natural-gas producer, for 2.2 billion Canadian dollars . . .—China's second [purchase and second] foray into Canada's oil patch in [the last year].

So to confirm what the leader has said, and to confirm what Senator HOEVEN has acknowledged, this is not something we might fear happening later on. This is something happening now. If we default on the Keystone XL Pipeline now, we are giving a wide open year for the Chinese to come back to Canada, make those investments, tie down that oil, and encourage that pipeline to go—not to Houston, TX—but to Vancouver, Canada, and then on ships to China.

I ask unanimous consent that the full text of both of these articles be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Natural Resources Canada, Nov. 9, 2011]  
MINISTER OLIVER PROMOTES CANADIAN ENERGY IN CHINA

"My mission to China is clear. I have come to raise awareness of the strength of Canada's natural resource sectors—as both an outstanding source of quality products and an attractive destination for investment," said the Honourable Joe Oliver, Canada's Minister of Natural Resources, while speaking today at the Canadian Chamber of Commerce in Shanghai.

The Minister has been in Beijing and Shanghai this week meeting with senior government officials and leaders of Chinese companies.

Minister Oliver met with Vice Premier Li Keqiang and discussed the role of investment and trade in energy and mineral resources in contributing to Canada's long-term strategic partnership with China. He also signed an agreement with the President of the Chinese Academy of Sciences, Professor Bai Chunli, to expand cooperation on science and technology in earth sciences and natural resources.

Over the last few days, Minister Oliver has held meetings with major Chinese energy companies including Sinopec, China National Offshore Oil Corporation and Petrochina to discuss Canada's enormous energy resources and attractive investment climate.

"As reaffirmed today in the International Energy Agency's 2011 World Outlook, global energy demand is expected to increase by one third from 2010 to 2035," said Minister Oliver. "Given that Canada is also projected

to be an ever-increasing contributor to global energy supply, our Chinese investors recognize the importance of getting into the Canadian energy market right now."

The Minister discussed the Government of Canada's key strategic policy of diversifying Canadian energy markets and participated in a joint Canada-B.C. event with Canadian and Chinese industry officials to promote exports to China.

Minister Oliver met with Vice Chair Zhang Xiaoli of the National Development and Reform Commission on strengthening Canada's long-term strategic partnership with China through two-way trade and investment in energy and natural resources.

While in Shanghai, the Minister also toured the Jinqiao Wood Townhouse Demonstration Project, where he underlined the many benefits of Canadian wood-frame construction expertise for China.

This demonstration project is one of several in China funded by the Government of Canada to showcase the low-carbon, environmentally friendly and energy-efficient properties of wood-frame construction, and to assist China in meeting its national goals of reducing carbon emissions in new housing projects.

Minister Oliver continued to highlight the phenomenal growth in exports of wood products when he met with Vice Minister Qiu Baoxing, Ministry of Housing and Urban Rural Development, as well as with British Columbia Premier Christy Clark and Pat Bell, BC Minister of Jobs, Tourism and Innovation, to discuss trilateral cooperation on wood-frame housing in China.

Minister Oliver will now continue on to Tokyo and Sendai, Japan.

[From the Wall Street Journal, Oct. 10, 2011]

SINOPEC DEEPENS CHINA'S PUSH INTO CANADIAN OIL PATCH  
(By Edward Welsch)

A unit of China Petrochemical Corp., or Sinopec, agreed to buy Daylight Energy Ltd., a Canadian oil and natural-gas producer, for 2.2 billion Canadian dollars (US\$2.12 billion)—China's second big foray into Canada's oil patch in recent months.

In July, Cnooc Ltd. agreed to pay just over \$2 billion for bankrupt OPTI Canada Inc., in a rare move by a Chinese company to swoop in and swallow an entire company instead of tiptoeing in with a minority stake.

In the North American energy sector, in particular, Chinese companies have been wary of political fallout if they are seen as acting too aggressively in a sector that many consider to be strategic.

But the two recent moves suggest sensitivities in Beijing may be easing somewhat—at least regarding business in Canada. The federal government in Ottawa and its semiautonomous provincial counterparts have long welcomed foreign investment in the Canadian oil patch, which includes vast conventional oil and natural-gas reserves, but also the much more capital-intensive, oil-sands developments of northern Alberta.

Canadian companies, with relatively small domestic capital markets to fall back on, have relied on foreign investment—including from China—though more often that has come in the form of minority stakes in companies, or joint ventures in certain capital-intensive projects.

Last year, for instance, Sinopec bought ConocoPhillips' 9 percent stake in its large Syncrude oil-sands project in northeastern Alberta for \$4.65 billion.

Recently, some Canadian politicians and businessmen have expressed new wariness over big foreign deals.

Ottawa rejected Australia-based BHP Billiton Ltd.'s \$39 billion attempt to buy Potash Corp. of Saskatchewan Inc. last year. The Canadian government said the deal wouldn't bring enough economic benefit. However, a campaign against the takeover launched by the local government of Saskatchewan generated significant support from regional politicians and the public.

The Sinopec-Daylight deal will face the same sort of government review that other significant foreign deals undergo, including a federal sign-off. But it isn't expected to garner the same sort of scrutiny as the BHP-Potash bid.

Potash holds a significant chunk of the world's reserves of potash, a critical raw material in fertilizer. Critics used that market dominance to argue that Potash was a strategic asset that should remain in Canadian hands.

Daylight, meanwhile, is a relatively small energy competitor—one of scores of Canadian companies that hold just a thin slice of the country's overall petroleum reserves.

Daylight produces light oil and natural gas from properties in northeast British Columbia and northwestern Alberta. The company produced just 37,000 barrels of oil equivalents in the second quarter. But Daylight has accumulated a significant undeveloped land position in the emerging liquids-rich Duvernay shale-gas play in Alberta.

Sinopec is laying down a sizable premium for the deal. In a statement Sunday, Daylight, based in Calgary, said that Sinopec had agreed to buy the company for C\$10.08 a share, representing a premium of 43.6 percent over the 60-day weighted average price of the stock ending Oct. 7.

"We believe this transaction with [Sinopec] recognizes the highly attractive asset portfolio and exceptional team that we have assembled," said Anthony Lambert, the president and chief executive of Daylight, in the statement.

Barclays Capital advised Sinopec on the transaction. Canaccord Genuity Corp. advised Daylight.

Mr. HOEVEN. I thank Senator ISAKSON and ask the Senator if he has any more he wants to add. I know the Senator has to leave and is on a tight timetable.

Mr. ISAKSON. Just to thank the Senator for his leadership; the Senator's leadership on this issue has been outstanding.

Mr. HOEVEN. I thank Senator ISAKSON and thank him for being here.

I will turn to Senator HUTCHISON from Texas.

We have actually 40 Senators already on this legislation—40 Senators. It is bipartisan. This is something we absolutely need to move on. I spoke with the Canadian Ambassador today, Ambassador Doer. He talked about how they are already looking at Western routes to send this oil to China.

So this oil is going to be produced. It is going to be produced. The question is, Does it come to the United States and help us reduce our dependence on Middle Eastern oil? Does it come here and create thousands of jobs or do we send it to China where there will actually be more emissions because it will be refined in refineries that produce higher emissions?

We will also have the emissions of shipping product all around the world, not only shipping this oil to China but then we are going to continue to have to ship oil from places such as the Middle East and Venezuela. So we actually increase CO<sub>2</sub> emissions without this project.

Now, in Texas, of course, we have refineries, and Senator HUTCHISON is here to talk about just how important it is we bring this product down to our refineries in the gulf coast region.

Mrs. HUTCHISON. I thank the Senator from North Dakota because Senator HOEVEN has been a leader on this issue, knowing how important this find is, and how much more capacity we will have for affordable energy in our country if we can extend the pipeline.

This is a pipeline that is not just starting from Canada into the United States. The Keystone Pipeline was started in 2008. The initial line moves 590,000 barrels of oil per day from northern Alberta to points in Cushing, OK, and Patoka, IL. The XL extension—which is what we are talking about that is being held up by the State Department—is currently under review. It would expand the system by 700,000 barrels per day—so more than double what we are getting already—and bring the line further south to Texas.

Well, now, why is that important? It is because 25 percent of the refinery capacity in America is in Texas. It is in the gulf coast of Texas. That is where the refiners are. We are talking about producing now more affordable energy for all the consumers in our country by bringing it straight down and having it refined and sent back out to all points in America. Otherwise, what my colleagues have just been talking about—Senator ISAKSON and Senator HOEVEN—is that we will see Canada export this to other countries, whether it be China or other countries, and eventually it is going to be coming back into the United States much more expensively to be refined in Texas and sent out.

So specifically for Texas, it would put our State's 26 refineries into probably 24 hours' of business, which means lots of jobs in Texas. That 25 percent of U.S. production is approximately 5 percent of worldwide capacity. So we are talking about lowering the price of energy throughout our country and the world.

It would produce an estimated \$2.3 billion in new spending and generate more than \$48 million in new tax revenue for my state alone. It would result in 700,000 barrels of oil a day, as I have said. We know the Canadian find—the sands that have been found there—is the third largest capacity, next to Saudi Arabia and Venezuela, in recoverable oil in the world. So we have the third largest reserve in Canada and we know we have the ability to bring that oil down, have it refined,

and go out to the United States because dependence on the Middle East and North Africa has certainly led to price spikes. Venezuela is certainly not a reliable partner right now and supply interruptions threaten our economy and our national security.

So the Keystone XL Pipeline would certainly be a boom to Texas and Texas jobs. But more than that, it is going to benefit every consumer of energy in America. It will more than double what we can buy from Canada, and think of the reliability of our Canadian relationship. The reliability of our trade and our relationship with our neighbor to the north, Canada, is among the most solid we have in all of the globe.

It is essential we build this pipeline. As the leader said earlier, this is a no-brainer—as close as you can get to a no-brainer for building our economy, creating jobs, and creating more tax revenue that will bring down the deficit we have heard so much talk about on the other side—but this would do it the old-fashioned way: by giving people the ability to provide for their families and contribute to the economy of our country.

That is the way we want to see increased revenue in this country: with more jobs and paying taxes, not collecting benefits because they cannot find work. It is right here, and it does not cost the government a dime because it is private investment that will bring this oil to the refineries and put it back out to the United States.

I urge the President of the United States to go to the State Department and say: Let this go. In lieu of urging the President, we have a bill that was started by Senator HOEVEN, with 40 sponsors, that will tell the President: Now is the time—it is long past due time—for us to create the jobs in this country that are not going to be taxpayer funded, that are going to be privately funded. They are going to create cleaner, better, cheaper, more efficient energy; and they are going to create jobs which people want in this holiday season and on into the future years.

So I thank my colleague from North Dakota for giving us this chance to tell the American people we have an answer to jobs and to bringing down the deficit and increasing revenue the way people want to: by providing for their families and paying taxes with the money they are earning. It is a win for everyone. I thank the Senator from North Dakota for leading this effort.

Mr. HOEVEN. I thank the Senator from Texas. Senator HUTCHISON is, as usual, not only eloquent but has hit the nail on the head. Looking across our country from North Dakota to Texas to Oklahoma, across our country we need these jobs. This is the way to get them, and we can get them now. We need our President to act.

This legislation is a solutions-oriented bill.

It is about job creation. It is about energy independence. It is about good environmental stewardship. We need to do it. I would like to now turn to my esteemed colleague from the State of Oklahoma, Senator INHOFE, who is the ranking member on Environment and Public Works. He has a tremendous background in energy, as does Senator HUTCHISON. I would turn to Senator INHOFE for his comments.

Mr. INHOFE. I do appreciate that. Sometimes we stand on the floor and we talk about jobs. But here is the evidence, Oklahoma has a big dog in this fight. Not only do we have Cushing—when the Senator from North Dakota talked about Cushing, that is Cushing, OK, right there on his map. That is kind of a choke point in this pipeline. They all kind of converge. There is no way of getting down to Texas without getting through what we have in Oklahoma.

But more so, if you do not think this is a jobs bill, you have a very famous Oklahoman working in your State. I would say Harold Hamm is probably the No. 1 producer out there today. I have talked to him. Do you know what his biggest problem is in North Dakota? His biggest problem is he cannot find anyone to work. They are full employed up there. What better evidence is there that this solves the problem—that this is a jobs bill—than the jobs in North Dakota?

I think there is something sadly lacking in this debate, though; that is, that this is just an extension of what this administration has been trying to do. They have been trying to kill fossil fuels from the very beginning. Let me quote Alan Kruger, who is chair of the President's Council of Economic Advisers. He says: "The administration believes that it is no longer sufficient to address our nation's energy needs by finding more fossil fuels." He wants to kill fossil fuels.

Steven Chu, the Energy Secretary said: "Somehow we are going to have to figure out how to increase the price of oil to be equal to that in Central Europe." That is \$8 a gallon. He is trying to wean us off fossil fuels. We cannot run this machine called America without it.

I only wanted to mention that, and I appreciate the Senator from North Dakota talking about the Environment and Public Works Committee. It has been an effort of this administration through the backdoor, through regulation, to do away with fossil fuels. The boiler MACT—MACT, by the way, means Maximum Achievable Controlled Technology.

By increasing the emission requirements on boilers and on utilities, we are talking about around \$83 billion a year of cost. Compare that to the cap and trade. Cap and trade right now is—and we have gone through this on the floor with all these bills trying to have

cap and trade and the greenhouse gases and all that. The cost of that is between \$300 and \$400 billion a year. That is more than all the other regulations combined.

It is all aimed at one thing. What is that one thing? To stop fossil fuels. Of course, when we talk about my State of Oklahoma being kind of the choke point, as the Senator has pointed out in his chart over there, I say to my good friend from North Dakota, we have done an analysis of jobs just in my State of Oklahoma. By the construction of the Keystone XL, that would be 14,000 new jobs just in Oklahoma—just in my State—and an increase of personal income by \$847 million.

So this is a huge thing that we have in my State of Oklahoma. Cushing just happens to be the crossroads. That is where they all come together. They are clogged up now. As the Senator pointed out, they cannot do anything. Their hands are tied because they are in total capacity right now.

It should be a no-brainer. But the problem is there is one man, as the Senator from Nebraska said, one man can make this a reality, the President of the United States. He has made it very clear he does not want to do anything to help fossil fuels in America. It is a political problem we have.

Mr. HOEVEN. If I may, I would like to ask the esteemed Senator from Oklahoma to talk for a minute on the subject of how we create that environment that gets job creation going. I think this project is a perfect example of what we are talking about. We have to create an environment—a legal, tax and regulatory environment—that empowers private investment, not government spending but private investment, to get job creation going.

Here we have a regulatory issue, where we just—TransCanada has worked for 3 years to meet the environmental process. Most recently, the problem was in Nebraska, the Sand Hills area of Nebraska, the Ogallala aquifer. But now we have come up with a solution to make sure we deal with that issue. So we have cleared that process.

That means this project is ready to go as we have just described. Leader MCCONNELL just a minute ago talked about how the labor unions strongly support this project. I can go through that whole list as well. In addition, the U.S. Chamber of Commerce says: Let's go. We support this project. So we have 40 Senators, bipartisan, labor unions, Chamber of Commerce.

Here is another interesting statistic. This example is such a good example of what we are talking about. I ask the Senator from Oklahoma to maybe expand on the point. But the U.S. Chamber of Commerce last year released a study identifying 351 stalled energy projects nationwide costing the

American economy \$1.1 trillion in lost income impact, and nearly 2 million jobs annually.

My point is this: We have to find a way to empower private investment to get job creation going. The esteemed Senator from Oklahoma is ranking member on Environment and Public Works. He sees this every day. But without more government spending, the secret to unlocking jobs in this country is to empower the investment. I would ask if the Senator from Oklahoma can address that for just a minute because I think this project is such a perfect example of what we are talking about.

Mr. INHOFE. It is, and this is something that is understood. The term a "no-brainer" has been used several times because we do not have to think this through. One of the problems I have had—back when Republicans were a majority, I chaired the Environment and Public Works Committee. That has jurisdiction over the Environmental Protection Agency, which has been making every effort to overregulate, to the extent—we know everybody knows of the spending crisis we have, the deficit and the debt and all that. They do not understand the overregulation actually costs us more than all these fiscal issues combined.

I mentioned just a few of those. I can recall, before the Senator from North Dakota was in this body, back during the Kyoto treaty—in the Kyoto treaty, they were trying to get this through to have a type of cap and trade, something that they said somehow greenhouse gases were going to cause catastrophic global warming and all that. That went down the tubes. Then they started introducing legislation to do the same thing. Then we had—and I appreciate the honesty of Lisa Jackson, who is the Administrator of the Environmental Protection Agency, when she came out and said: No, if we were to have this strictly in the United States, it is not going to reduce the emissions.

This is kind of a long way around. The point I am trying to make is, it is very difficult for people to understand. Just the cap and trade this administration is trying to do through regulations, because they could not do it through legislation, is going to end up having the same effect: kill fossil fuels. That is what they are trying to do.

But the point the Senator from North Dakota is making is that is kind of complicated. That is hard to understand. This is not. This is already out there. As I mentioned, just in my State of Oklahoma alone, 14,000 new jobs. Who would be against it? The only ones against it are people who do not want to keep this machine running in America because they know they cannot do it without fossil fuels.

Maybe someday that will be different. It is not different today. The

way to get it down, to bring it down, is through this pipeline. I am very selfish. It is not just the country; I have 20 kids and grandkids right there in Oklahoma who are depending on us doing what we are supposed to be doing.

Mr. HOEVEN. I thank the esteemed Senator from Oklahoma. He is so right. That is what it is all about. It is about putting people back to work. It is about American ingenuity, private investment. It is about getting this economy going.

We have to find ways to save dollars, to reduce the spending that has gotten out of control. But a big part of getting out of the deficit and the debt is getting people back to work and getting this economy rolling. We are talking about a project that will create 20,000 construction jobs right upfront, 250,000 permanent jobs, \$600 million in State and local tax revenues.

The PRESIDING OFFICER (Mr. FRANKEN). The Senator's time has expired.

Mr. HOEVEN. This is a project that reduces our dependence on oil from the Middle East. This is a project that provides better environmental stewardship, as we have described. This is a project where we need to move forward. This body needs to be about solutions. This is a solution. We need to act.

I yield the floor.

The PRESIDING OFFICER. The Senator from Rhode Island.

#### RICHARD CORDRAY NOMINATION

Mr. WHITEHOUSE. Mr. President I come to the floor to speak in support of President Obama's nomination of Richard Cordray, from Ohio, to be the Director of the Consumer Financial Protection Bureau. He is a former attorney general, former solicitor general, and former State treasurer of Ohio.

He is unquestionably well qualified to take on the position for which he has been nominated. Unfortunately, we are stuck in a Republican filibuster of Mr. Cordray's nomination. Sometimes there is a hidden ulterior motive around here. In this case, there is a stated ulterior motive: to weaken the new agency's power to protect consumers.

Republican obstruction of Mr. Cordray's nomination has nothing to do with Mr. Cordray himself. Former Republican Senator and current Ohio attorney general Mike DeWine has called Mr. Cordray very well qualified for this job. Just last month, eight Republican attorneys general colleagues of his joined 29 Democratic attorneys general in writing to Leaders REID and MCCONNELL with their support for Mr. Cordray's nomination.

Mr. Cordray has been endorsed by groups as varied as the AFL-CIO, the Credit Union National Association, the National Fraternal Order of Police, and the AARP. But notwithstanding wide-

spread bipartisan support on Main Street, Senate Republicans are seeking to prevent Mr. Cordray from taking office as a service to Wall Street.

As one Republican member of the Senate Banking Committee said: "My colleagues and I stand by our pledge that no nominee to head the CFPB will be confirmed by the U.S. Senate regardless of party affiliation without basic changes to the Bureau's structure."

What are these basic changes? The basic changes the Republicans have demanded include: making the agency subject to the budgetary influences of Congress, which given the way Congress is behaving is a way of allowing the influences of Wall Street to come through and control it, and also replacing the Director's position with a board that would ensure that Wall Street is represented.

These are not constructive changes. These are an attempt to weaken a regulator designed to protect consumers. I hope my Republican colleagues will re-evaluate their filibuster of Mr. Cordray's nomination. But in the event they do not, let's take a moment to review the consequences for the American people.

As many of our constituents know, in Rhode Island and in Minnesota, we established the CFPB in the Wall Street Reform and Consumer Protection Act as a new agency to protect American consumers from misleading and potentially ruinous financial products. After the subprime mortgage catastrophe, the logic behind that is pretty clear. We designed this new agency to be for mortgages, credit cards, student loans, debt collection, credit reporting—what the Consumer Product Safety Commission is for toaster ovens, toys, baby strollers, batteries, and swimming pools.

Harvard law professor Elizabeth Warren first proposed such an agency, and I was very proud to cosponsor Senator DURBIN's original Financial Product Safety Act of 2009, which was the first bill to bring Professor Warren's idea to the Senate.

We designed the CFPB to investigate consumer financial products and gave it the power to make rules ensuring that financial products are transparent and fair, including, for the first time, providing Federal oversight of previously unregulated loans and financial services from nonbank financial institutions. Those institutions are often the ones that get regular Americans in deep and unexpected trouble because of tricks and traps in those contracts.

When you look at the length and the amount of fine print in consumer contracts and when you look at the extent to which different traps and tricks get hidden in all that fine print in order to catch consumers in things they weren't aware of and would not accept if they had been aware of them, the reason for

this oversight is obvious to most Americans. Indeed, it is my contention that Americans in today's society are the most bedeviled group of humans in history by fine print. Everywhere you go, you find fine print filled with tricks and traps that fool you, that kick up your interest rate or give away rights that you have. So what we want is a little bit of a fair shot and a straight deal for the American consumer.

Under the temporary direction of the Treasury Secretary, the Consumer Financial Protection Bureau is actually already up and running. It is now regulating the largest banks in the country—those with over \$10 billion in assets—as well as credit unions. Unfortunately, its authority to protect consumers from these other financial products will be unclear until there is a Director, which may be another motive for blocking a Director.

The Consumer Financial Protection Bureau is already out there looking out for American consumers to make sure big banks and credit unions are playing by fair rules, but it has not yet been able to regulate the nonbank companies, such as mortgage services, the private student loan lenders, debt collectors, payday lenders, and credit reporting agencies. While the Senate Republicans filibuster this nominee—a very qualified nominee, an indisputably qualified nominee—some of the worst financial actors in the country remain unaccountable for their deceptive and harmful practices. Predatory lenders near military bases continue to charge our servicemembers effective interest rates of up to 800 percent. Private student lenders continue to withhold clear information about repayment terms from young students taking out these loans. Debt collectors continue to bully and harass those who are on the edge of bankruptcy. So-called payday lenders continue to dupe senior citizens into taking out loans bearing triple-digit interest rates.

This is the status quo Senate Republicans are preserving by blocking Mr. Cordray's nomination. Consumer protection against these kinds of practices should not be a partisan issue. I really hope our colleagues across the aisle at least allow us to have an up-or-down vote on this nomination. The majority rules, so let's vote and let's go.

Every day that Republicans continue their obstruction, Americans from all walks of life—from students, to senior citizens, to our men and women in uniform—will continue to be subjected to unchecked and unregulated deceptive financial products. They will continue to be prey for predatory loan instruments.

Abusive lending practices that strip wealth from communities and purchasing power from consumers continue to hold back our struggling economy. Let's confirm Mr. Cordray so that he can begin the hard work of leveling

the playing field for the American consumer and help ordinary Americans get a straight deal in our increasingly complex economy. I hope we will be able to do that.

I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. BLUMENTHAL. Mr. President, I am honored to join and associate myself with the remarks made by my colleague from Rhode Island, who has expressed forcefully and eloquently the reasons that I believe Richard Cordray should be confirmed in his nomination as Director of the Consumer Financial Protection Bureau.

This country faces a continuing financial crisis. We see it on the job lines, in the streets, and in our communities. That crisis can be traced to the same abuses that this new agency was created by the Congress to fight.

The laws are good laws. They are designed to protect consumers from those abuses and problems that led to this financial crisis. But the laws are dead letter, or meaningless, unless they are enforced vigorously and rigorously, unless consumers are protected not just in word but in deed. That is the reason we should confirm Richard Cordray as the Director of the CFPB.

The people in this agency are doing good work. They have the authority now to supervise some of the biggest banks, credit unions, and other financial institutions, but they need a Director to oversee the work of nonbank financial institutions, such as independent payday lenders, nonbank mortgage lenders, nonbank mortgage servicers, debt collectors, credit reporting agencies, and private student lenders.

Lest anyone think these are abstract or potential problems, they have only to look to their neighbors and friends who are struggling to stay in their homes, seeking to pay their debts, and facing every day the continuing abuses in these areas. The bad actors may be among a minority of actors in this area, but they cannot be counted unless Richard Cordray is confirmed. I know from my experience that consumer protection laws are meaningless to ordinary Americans, as they are to citizens of Connecticut, unless there is vigorous enforcement of these laws.

Richard Cordray will bring to this job a unique set of qualifications. He has been involved at the local and State levels in working closely with community banks and credit unions, as well as other financial institutions, as a State and county treasurer. He understands the important role they play in small towns and communities. He knows how to work with institutions and the businesspeople who run them. He is realistic and sensible. He has common sense. He has had a positive experience—hands on—working at the local and State level.

I have worked with him personally as an attorney general, worked collaboratively with him—indeed, helping to start the investigation of the mortgage service abuses that have led to a nationwide inquiry and, hopefully, will lead to a nationwide solution. I know him to be a practical and sensible person who knows how to listen. Richard Cordray knows how to listen to people who are affected by the rulings he may make, the policies he may implement, and the people whom he may hire. Indeed, his nomination was praised by a former U.S. Senator and current attorney general, Mike DeWine, a Republican who defeated him in 2010.

Republicans in this body have made this issue a partisan one. It should not be. There is nothing partisan about debt collectors or mortgage services or others who may abuse the trust of consumers. There is nothing partisan about people who become victims of the abusive practices that continue, which we need the CFPB to counter. There is nothing partisan—or should be nothing partisan about this individual, Rich Cordray, who has dedicated his life to protecting ordinary men and women against the financial abuses the CFPB is designed to fight.

Blocking his nomination is, very simply, a way to stop the CFPB from ending abuse. It may be articulated in a variety of ways, using words such as “accountability,” “rulemaking,” “structure,” or “authority” as terms that are at issue. But the fact is that his nomination cries out for confirmation simply to implement the important laws that this body has passed, laws that remain dead letter as long as they are not enforced.

The men and women who are working in this agency now, under the leadership of Raj Date, are doing the best they can. They are making a difference. They are protecting, for example, our veterans. Holly Petraeus, who is head of the division in the agency designed to protect our veterans, is doing great work in that area. She deserves our support; she needs and merits our support. She and others in that agency need and deserve the support of this Congress and this body in confirming Rich Cordray.

I have worked with Rich Cordray. I know him as a man, as a public official, as a nominee. We will be losing a uniquely qualified person for this job if we fail to do the right thing and protect consumers from the continuing abuses of this industry.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CASEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. UDALL of New Mexico). Without objection, it is so ordered.

#### PAYROLL TAX CUT

Mr. CASEY. Mr. President, I rise to speak about the issue of the payroll tax and the tax cuts we are trying to enact, very similar to what we did last year when Democrats and Republicans came together at the end of the year, right before the holiday season, and said, we have to take action now to make sure we are doing everything possible to jump-start the economy.

One of the elements of that agreement last year—and, again, it was bipartisan—was a cut in the payroll tax. Just so people understand my point about this tax—and I will deal only with the employee side—we know that employees in the United States, when they make their payroll tax payment, it is 6.2 percent of their earnings. Last year we cut that from 6.2 to 4.2. It was the right thing to do and it had a positive impact. What I am trying to do now—and, again, I think this is bipartisan—is to not just do that again, but we want to cut it even more so that we can reduce it in half, so instead of paying 6.2, an individual would pay 3.1.

This is a very basic idea, and what we are trying to do are two basic things. No. 1 is to give folks out there more take-home pay—kind of dollars in the pocket. Last year, it was roughly \$1,000 per worker. The impact on a family—the positive impact of that—is very significant. This year, we hope it will be greater. We hope we can enact something where the take-home pay savings are increased, depending on how one argues it, almost \$1,500. Instead of being \$900 or \$1,000, for some folks it can be \$1,500 or \$1,400 or somewhere in that range.

The second point on this is peace of mind. We ought to take action here in a bipartisan way—and every once in a while we get this right—that will say to people, we are trying to do our best to understand what you are up against. We are trying to take actions here that will lead to economic growth and job creation.

One of the actions we can take is making sure we reduce the payroll tax so folks out there have more money in their pocket—more take-home pay—as they head not just into the holiday season but as they head into the new year in 2012. So it is about take-home pay and peace of mind.

We have made some progress in the last couple of months, when we consider where we have been and in trying to dig our way out of this great recession. Unfortunately, the progress we have made is far too modest, and the economic recovery right now is still very vulnerable, very fragile—pick your word, there are lots of ways to describe it. We need this tax cut to boost consumer spending.

A lot of the business folks I talk to in Pennsylvania, when I ask them if they want to hire, or if they want to increase their payroll, say, I want to, but I can't. I say, why can't you? They say, there is not enough demand out there. So one of the best ways—maybe the best way—to create demand in our economy is to have folks have more take-home pay.

As you can see from this chart on my left, when we look at the quarters, starting right here, we see minus 6.7 percent. That is the first quarter of 2009. Eventually, we have gotten to the point where we have started to have some growth. We have had nine straight quarters of GDP growth. But that is not enough—not nearly enough. It is movement in the right direction, but it has been barely positive, as you can see, even if you look at just the last year. This .04 is the first quarter of 2011. So even though we had almost 4 percent of good growth back in a couple of quarters in 2009 and into 2010, in the last three-quarters of 2011, we had .4 percent growth, 1.3 percent growth, and 2.0 percent growth.

What we have to do now is make sure the fourth quarter is stronger, as best we can, and we need to make sure, by the actions we take here, that 2012 is much better. We need to ensure we have stronger growth, and putting \$1,500 of additional earnings into the pockets of 160 million workers, as I said before, will help substantially. I think that number should be repeated. When we talk about cutting the payroll tax in half and putting more take-home pay in people's pockets, we are talking about affecting 160 million workers in the United States.

Economists across the board have told us why this is so important. They have reported the payroll tax cut will create jobs and increase GDP—increase those numbers I referred to on the chart—and that failing to extend the tax cut will slow growth and lead to fewer jobs. Mark Zandi, of Moody's Analytics—one of the economists both parties have quoted over many years—estimates that not extending the current payroll tax cut—meaning allowing the payroll tax to go back up to the 6.2 percent, not cutting it in half—would reduce gross domestic product growth by .5 percent in 2012.

So instead of having positive growth, he is saying that if we don't enact and extend the payroll tax cut from last year, at a minimum we would be losing a half point of growth. That would be devastating to this economy.

Goldman Sachs has said similar things. They put the negative impact on GDP growth at as much as two-thirds of 1 percent in 2012. Most economists are in that range in terms of the adverse impact. RBC Capital Markets concludes that the hit to GDP next year of failing to act would be a full 1 percent.

So you have economists saying half a percent adverse consequence, two-thirds maybe, but at least among others saying a full percentage point. That would be devastating when we need to see growth at above 2 and hopefully even above 3. But that has been very hard to reach in the last couple of months.

I put this chart up on my left to highlight what Mark Zandi said. Here is his warning when discussing what could happen on the current payroll tax cut in effect right now, the 4.2 level that we are at right now from the cut from last year:

We'd be in recession right now without it.

That is what he said about what we did last year in a bipartisan way. I would hope we could end this year on a high note, on a bipartisan note, and make sure we cut the payroll tax again and put more take-home pay in people's pockets.

Then here is Mark Zandi talking about if we don't extend, what could happen into the near future:

We'll likely go into recession.

So says Mark Zandi. We can't afford to do that. The payroll tax cut has helped sustain the economic recovery this year, and it will strengthen the economy in 2012 if we reduce it again.

My bill not only extends it but increases it so that the per worker take-home pay increase, instead of being around \$1,000, would be approximately \$1,500.

We also know that cutting the tax leads to job growth. We know this from our experience, and we know this from recent history. At the end of 2010, Congress enacted the current payroll tax, cutting it from 6.2 to 4.2, and it took effect at the beginning of the year.

As we look at private sector job growth in 2011, we can see some of the impact of the cut. As we can see on the chart, if you look at the first couple of bars—even if you can't read the smaller print here—this depicts starting in January of 2011 what was the monthly change in private payrolls, meaning private sector job growth. January was only 94,000, not that great of a month in January 2011. But look at February: 261,000 private sector jobs added. Look at March: 219,000 private sector jobs added. And then April: 241,000. So you had an average of about 240,000 private sector jobs growing in those 3 months. When we got to May and June, of course, a lot of things happened which took that number way down. It slowed for a lot of reasons. One of them was the spike in oil prices, another was the effect on gas prices, and, finally, the earthquake in Japan had a terrible effect on our economy.

I am wrapping up here, but I want to make one more point about this. The American people are looking at us right now, watching what we do, and they are saying basically two things to

us—at least the people in Pennsylvania, to me. They ask me one basic question: What are you doing to grow the economy and create jobs? What are you doing as an individual Member of the Senate? One of the ways I can respond affirmatively and positively is to say we have come together to reduce the payroll tax even more than we did last year to help you in your bottom line, so you have more take-home pay for you and your family.

The second thing they ask is, what are you doing to try to bring people together, to try to reach a bipartisan consensus? We have all got to try to do that in our own way. This is about take-home pay and peace of mind. We need this tax cut in place to boost consumer spending, to create jobs, and accelerate economic growth.

I want to conclude with one thought about Social Security, because I know it has been raised by a number of folks the last couple of days.

I ask unanimous consent to have printed in the RECORD a letter addressed to Secretary of the Treasury Geithner and Director, Office of Management and Budget, Jacob Lew, dated December 6, 2011. It is signed by Steven C. Gross, Chief Actuary of the Social Security Administration.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOCIAL SECURITY ADMINISTRATION,  
OFFICE OF THE CHIEF ACTUARY,  
Baltimore, MD, December 6, 2011.

Hon. TIMOTHY F. GEITHNER,  
*Secretary of the Treasury, Washington, DC.*  
Hon. JACOB J. LEW,  
*Director, Office of Management and Budget, Washington, DC.*

DEAR MR. GEITHNER AND MR. LEW: We have reviewed the language in the "Middle Class Tax Cut Act of 2011" (S. 1944), introduced yesterday by Senator Casey. We estimate that the enactment of this bill would have a negligible effect on the financial status of the Old Age and Survivors Insurance and Disability Insurance (OASDI) program in both the near term and the long term. We estimate that the projected level of the OASI and DI Trust Funds would be unaffected by enactment of this provision.

Section 2 of the bill would make the following changes for payroll tax rates and OASDI financing: (1) for wages and salaries paid in calendar year 2012 and self-employment earnings in calendar year 2012, reduce the OASDI payroll tax rate by 3.1 percentage points, (2) transfer revenue from the General Fund of the Treasury to the OASI and DI Trust Funds so that total revenue for trust funds would be unaffected by this provision, and (3) credit earnings to the records of workers for the purpose of determining future benefits payable from the trust funds so that such benefits would be unaffected by this provision. For wage and salary earnings, the 3.1-percent rate reduction would apply to the employee share of the payroll tax rate. For self-employment earnings, the personal income tax deduction for the OASDI payroll tax would be 66.67 percent of the portion of such taxes attributable to self-employment earnings for 2012. Other sections of the bill

would have no direct effects on the OASDI program.

Sincerely,

STEPHEN C. GOSS,  
Chief Actuary.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CASEY. Mr. President, I ask unanimous consent for 2 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASEY. The point of this letter is very simple. I won't read the whole letter, but here is the pertinent part of this letter from the Social Security Administration.

We estimate that the projected level of the OASDI and DI Trust Funds would be unaffected by enactment of this provision.

What he is talking about there is Social Security would be unaffected. The trustee said last year the same thing. I won't add all this to the RECORD, but read the one sentence. This is page 33 of a report from last year:

Therefore, this payroll tax cut is estimated to have no financial impact on these same trust accounts.

So it is abundantly clear that there is no impact on Social Security and, secondly, it is abundantly clear that passing a payroll tax cut again will boost job growth, strengthen the economy, grow the economy, and give American families some measure of peace of mind as we head into the holidays and head into the year 2012.

Mr. President, I yield the floor.

#### ATF'S LANNY BREUER

Mr. GRASSLEY. The Alcohol, Tobacco, Firearms is a division of the Justice Department. I have been investigating Alcohol, Tobacco, Firearms' Operation Fast and Furious for almost 11 months now. It is past time for accountability at the senior levels of the Justice Department. That accountability needs to start with the head of the criminal division, Lanny Breuer. I believe it is time for him to go, and I wish to explain why I have come to that conclusion.

The Justice Department denied, in a letter to me on February 4, 2011, that ATF had ever walked guns. Mr. Breuer had been consulted in the drafting of that erroneous letter of February 4, this year.

On May 2, 2011, rather than acknowledging the increasingly obvious facts and apologizing for its February letter, the Justice Department reiterated its denial on May 2, this year, the same denial of February 4th.

Thus, when the Justice Department revealed on October 31 of this year that Breuer had known as far back as April 2010 about gunwalking at ATF, I was astounded. That was a shocking revelation.

The controversy about gunwalking in Fast and Furious has been escalating steadily for 10 months now. The Jus-

tice Department had publicly denied to Congress that ATF would ever walk guns. Yet, the head of the criminal division, Mr. Breuer, knew otherwise and said nothing. He knew the same field division was responsible for walking guns in a 2006-2007 case, and that case was called Wide Receiver.

But the real shock was how Mr. Breuer had responded within his own department when that earlier gunwalking was first brought to his attention in April 2010. He didn't tell the Attorney General. He didn't tell the Attorney General's Chief of Staff. He didn't tell the Deputy Attorney General. He didn't tell the inspector general. Instead, he simply told his deputies to meet with ATF leadership and inform them of the gunwalking:

... so they know the bad stuff that could come out.

Later, his deputy outlined a strategy to:

... announce the case without highlighting the negative part of the story and risking embarrassing ATF.

Think about that. In that case, saving face was more important than the bad policy.

For 18 months, the embarrassing truth about ATF gunwalking in Wide Receiver and Breuer's knowledge of it was successfully hidden. It only came out because of the congressional investigation into gunwalking in Fast and Furious.

The public outrage over Fast and Furious comes from the average American who cannot understand why their very own government would intentionally allow criminals to illegally buy weapons for trafficking into Mexico.

Next week, it will be 1 year since Border Patrol Agent Brian Terry was murdered by bandits armed with guns as a direct result of this policy of letting guns walk. The Terry family, and all Americans who sympathize with their loss, are rightfully outraged and astonished at their very own government doing such a thing. Yet, when Mr. Breuer learned of a case where ATF walked guns in a very similar way, all he did was give ATF a heads up. There seems to be a vast gulf between what outrages the American people and what outrages Lanny Breuer.

Mr. Breuer showed a complete lack of judgment by failing to object to the gunwalking that he knew about in April 2010, 9 months before I was ever aware of Fast and Furious. If Mr. Breuer had reacted to gunwalking in Wide Receiver the way most Americans reacted to gunwalking in Fast and Furious, he would have taken steps to stop it and hold accountable everyone involved. Consequently, Fast and Furious might have been stopped in its tracks and Brian Terry might be alive.

When Mr. Breuer came before the Senate Judiciary Subcommittee on Crime and Terrorism the day after

those revelations, I gave him a chance to explain himself. I listened to what he had to say. He told us that he:

... thought that ... dealing with the leadership of ATF was sufficient and reasonable.

Clearly, it was not sufficient. Mr. Breuer even admitted as much, saying:

I regret that I did not alert others within the leadership of the Department of Justice to the tactics used in Operation Wide Receiver when they first came to my attention.

He regrets not bringing gunwalking in Wide Receiver to the attention of the Attorney General. But what about bringing it to the attention of Congress? He didn't even step forward to express his regret until e-mails that detailed his knowledge were about to be produced under congressional subpoena.

It is astounding then that it took the public controversy over Fast and Furious to help the chief of the criminal division realize that walking guns is unacceptable. Yet he had had 9 months after the February 4 letter to step forward, correct the record, and come clean with the American public. He had 18 months, after learning of gunwalking in Wide Receiver, to put a stop to it and hold people accountable. He failed to do so.

During his testimony, I asked him pointblank if he reviewed that letter of February 4 before it was sent to me. His misleading answers to these questions formed the basis for my second reason for calling on Mr. Breuer to resign. He responded that he could not say for sure but suggested that he did not review the letter. He said, "[A]t that time, I was in Mexico dealing with the very real issues that we are all so committed to."

Last Friday, the Justice Department withdrew their February 4 letter to me because of its inaccuracies—and the word "inaccuracy" is their word. The Department also turned over documents under subpoena about who participated in the drafting and the reviewing of the letter. One can imagine my surprise when I discovered from documents provided Friday night that Mr. Breuer was far more informed during the drafting of that letter than he admitted before the Judiciary Committee. In fact, Mr. Breuer got frequent updates on the status of the letter while he was in Mexico.

He was sent versions of the letter four times. Two versions were e-mailed to Mr. Breuer on February 4, after he returned from Mexico, including the version of the letter that was ultimately sent to me that day. At that time, he forwarded the letter to his personal e-mail account. Mr. Breuer's Deputy also sent him two drafts of the letter while he was in Mexico, and he also forwarded one of those to his personal e-mail account. We do not know whether he did that in order to access it on a larger screen than the Government-issued BlackBerry or whether he

engaged in any further discussion about the letter in his nongovernment e-mail account. However, we do know, in response to the draft received in Mexico, he wrote to one of the main drafters of the letter: "As usual, great work."

The Justice Department excluded Breuer's compliment about the context of the draft from the set of e-mails it released to the press on Friday, before they released those documents to this Senator.

That evening, Mr. Breuer submitted answers to written questions. He wrote:

I have no recollection of having [seen the letter] and, given that I was on official travel that week and given the scope of my duties as Assistant Attorney General, I think it is exceedingly unlikely that I did so.

So as late as last Friday night, Mr. Breuer was still trying to minimize his role in reviewing the letter, despite all the evidence to the contrary. Why would Mr. Breuer say "great work" to a staffer about a letter he claimed he had not read?

It is not credible that someone such as Mr. Breuer would forget about his involvement in a matter such as this. Mr. Breuer's failure to be candid and forthcoming before this body irreparably harms his credibility. His complete lack of judgment and failure to deal with gunwalking when he first learned of it in April 2010 was bad enough, but this is the final straw. Mr. Breuer has lost my confidence in his ability to effectively serve the Justice Department. If he cannot be straight with the Congress, he doesn't need to be running the Criminal Division. It is time to stop spinning and start taking responsibility.

I have long said the highest ranking individual who knew about gunwalking and Operation Fast and Furious needs to be held accountable. That standard applies no less to officials who knew about gunwalking in Operation Wide Receiver. Gunwalking is unacceptable no matter when it occurred. Documents made clear that Assistant Attorney General Breuer was the highest ranking official in the Justice Department who knew about gunwalking in Operation Wide Receiver. He did nothing to correct the problem, alert others to the issue, take responsibility or even admit what he knew until he was forced to do so by the evidence. Therefore, I believe the Attorney General needs to ask for Mr. Breuer's resignation or remove him from office if he refuses. If Mr. Breuer wants to do the honorable thing, he would resign.

I am not somebody who flippantly calls for resignations. I have done oversight for many years, and in all that time I don't ever remember coming across a government official who so blatantly placed sparing the agency embarrassment over protecting the lives of citizens. He has failed to do his job of ensuring that the government

operates properly, including holding people accountable.

Because of that, Mr. Breuer needs to go immediately. Anything less will show the American people the Justice Department is not serious about being honest with Congress in our attempt to get to the bottom of this.

In regard to my attempt to get to the bottom, just last night the Justice Department sent a letter refusing to provide several Justice Department staff for transcribed interviews. The letter explicitly goes back on the assurances I received when I consented to proceed with the confirmation of three senior Justice Department officials, which I had held up to get an agreement to get the information Congress is entitled to.

One of my conditions for agreeing to proceed with those nominations was that officials who agreed to voluntary interviews in this investigation would have either a personal lawyer present or a Department lawyer present but not both. I personally met with the Attorney General, and he had the conditions listed on a piece of paper in front of him. It looked as if he had read it and was familiar with it. Yet he never objected to that condition.

Dozens of witness interviews have been conducted under that understanding with no problem. The only difference is that instead of ATF witnesses, we are now seeking to interview Justice Department witnesses. What is good for the goose is good for the gander. There is no reason to change the rules in the middle of the game. I was relying on the Attorney General and other officials at the Department to honor their agreement. Apparently, that is not going to happen.

Fortunately, Chairman ISSA has the ability to require the witnesses to appear via subpoena if they refuse to appear voluntarily under conditions that the Department previously agreed to with me. I am confident he will do that if it becomes necessary, and I will take whatever steps I have to take in the Senate to encourage the Department to reconsider and stick to its original agreement.

I yield the floor.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

#### THE CORDRAY NOMINATION

Mr. CARPER. Mr. President, I am delighted to stand before you on this Delaware Day, 2011. This is the anniversary of the day when, on December 7, 1787, Delaware became the first State to ratify the Constitution. For 1 week, Delaware was the entire United States of America. We opened up things in Pennsylvania and New Jersey, eventually New Mexico. For the most part, it has turned out well, especially the New Mexico part. We are happy to be here to celebrate this day with all our colleagues.

Later today, Senator COONS and I will return to regale our colleagues with more about what we started all those years ago and how it has turned out.

I wish to fast forward, if I could, though, to 2008. As the Presiding Officer will recall, during the aftermath of the 2008 financial crisis on Wall Street, one question which Congress repeatedly asked itself was: What can we do to prevent future harm from reaching Main Street? What can we do to prevent future harm from reaching Main Street?

This theme continued as we considered and ultimately passed in 2010 comprehensive financial regulatory reform regulation, which fortunately the majority of us, including myself, supported, the legislation now known as the Dodd-Frank law.

While none of us were able to agree on each of the elements of the Dodd-Frank law, and while some of my colleagues did not support it in the end, most of us could agree we needed to do more to help protect American families and businesses from bad actors.

As a result, the Consumer Financial Protection Bureau was created. For the first time in history, one agency would be charged with overseeing consumer protection for Main Street Americans within the financial industry.

In July of this year, 5 months ago, Richard Cordray was nominated to be Director of the Consumer Financial Protection Bureau. Richard Cordray served for many years as the president pro tem of the Delaware State Senate before retiring roughly 10 years ago—a man now probably in his mid-70s. I was shocked to hear he had been nominated to head this new agency. It turns out it is another Richard Cordray. This Richard Cordray had been the attorney general of Ohio for a number of years. He was well regarded. He helped protect consumers, investors, retirees, and business owners to ensure that Americans on Main Street got a fair deal. At the time of his nomination, he was leading the Consumer Financial Protection Bureau's enforcement efforts. Mr. Cordray, former AG, is someone who has been intimately involved in getting the new bureau stood up and running and who brings key expertise to the table.

When we first passed the law, I suggested to the President, to Secretary Geithner, and others—I said I think there are three models they could choose from to pick someone to nominate to head this new bureau. No. 1, they could pick an academician; No. 2, they could pick somebody who has been a regulator or, in this case, attorney, an Attorney General; and the third, I said they might want to try to find somebody in the private sector who has run a significant financial service company but had a great, impeccable record, that of a "white hat"

for consumer protection, for looking out for consumers, somebody who believes one can do well and do good at the same time. I thought those were the models. The administration looked at people in all three categories, including the latter one and ultimately decided, within the Consumer Financial Protection Bureau, they had Mr. Cordray. He had a good track record, and he was the person the President wanted to nominate. I think he has made a very good choice.

I talked to a number of my colleagues who sat in on hearings where he testified on his nomination and for the most part got good reviews from Republicans and Democrats here.

As my colleagues and I debate this nomination and ask ourselves if he qualified to do the job, I think the answer is yes. My colleagues on the Senate Banking Committee agreed, and 37 attorneys general from across the country, both Republican and Democratic, agreed.

However, today's debate has not been about whether Mr. Cordray is qualified to do this job; instead, the debate has focused on the structure of the new Consumer Financial Protection Bureau. In May of this year, 44 of my colleagues from the other side of the aisle sent a letter to the President saying they would block any nominee until structural changes are made in the new agency. This is before the President ever nominated Mr. Cordray. My colleagues want to see changes made such as replacing the Director with a board structure and subjecting the Bureau to the appropriations process. My colleagues, 44 colleagues in any event, pointed out that these structural changes would model the Bureau after already-existing agencies, while some of my other colleagues have also made the point that there are already existing agencies not subject to the appropriations process, such as the FDIC and the Federal Reserve.

What we have is a disagreement, one where colleagues on both sides of the aisle have what I believe are legitimate points. The Consumer Bureau was created in Dodd-Frank through a series of compromises. Rarely is any compromise perfect. The Presiding Officer and I have been involved in enough compromises over the years to know if, in the end, neither side is fully satisfied with the compromise, maybe we struck a pretty good balance, and I think that is the case here.

But the point of the Bureau is to put the consumer first, and I will be the first to admit that there is no such thing as a perfect law. I assume my colleagues who are here and back in their offices and at committee hearings would agree with that. If there are aspects to Dodd-Frank that can be tweaked and approved, we ought to do that. But at the end of the day, we must put financial protection of con-

sumers above our disagreements and our personal preferences.

The longer we continue to constrain the Bureau by denying it a leader and only discussing the structural changes that some Members would like to see made, the greater the disservice to consumers across America. The Bureau's authority was created so that it would not just be limited to banks since those institutions are already regulated, as are credit unions and bank-holding companies. The Bureau's authority is supposed to extend to nonbanks as well, nonbanks which provide a form of financial service, such as payday lenders and debt collectors.

Prior to Dodd-Frank, nonbank entities were subject to little, if any, Federal supervision. Yet their reach and use across our country is widespread. As a result, many unscrupulous actors were able to exploit loopholes and harm American consumers. That is not to say all payday lenders or all debt collectors are unscrupulous actors. They are not. They are not all out there to exploit the loopholes. But too many of them do, and they do so without the kind of supervision they should receive.

However, without a Director in place, the Consumer Financial Protection Bureau does not have the authority to supervise these very entities. This drastically undermines the very spirit in which the Bureau was created. It is not just the consumers who are harmed but our small community institutions as well. These community institutions want to see a level playing field where they can compete and where everyone plays by the rules. Consumers and businesses need certainty, and they need predictability. I hear that almost every day, especially from businesses. Without certainty, without predictability in a whole wide range of areas, we will continue to see our economic recovery hindered.

I think I have shared with the Presiding Officer a story that is germane today to this discussion, and it goes back to 7 or 8 years ago when I was working on clean air legislation to try to reduce the emission of sulfur dioxide, nitrogen dioxide, mercury, carbon dioxide, issues that we debate from time to time in the Committee on Environment and Public Works where we serve.

I remember one day we had seven or eight utility CEOs in from across the country to discuss the merits of different legislative proposals. Finally, one crusty old CEO of a utility down south said to me: Look, here is what you should do. You should figure out what the rules are going to be, use some common sense, give us a reasonable amount of time to comply with them, and get out of the way. That is what he said. I thought those were words of great wisdom, and not just for clean air legislation but also today.

We cannot afford to drag this disagreement out in perpetuity. We must empower this Bureau to look out for Main Street as was envisioned with the creation of the Bureau. We may have to look at the idea of a commission-based structure, and I would love to sit down with my colleagues from the other side of the aisle and discuss that option if the former General Cordray's nomination continues to be blocked later this week.

Right now we have the ability to move forward and to stand by our words and by the spirit of the law. We need to look out for every American with a mortgage, credit card, and those looking to send their kids to college. I hope my colleagues will join me in supporting Mr. Cordray's nomination. It is the right thing to do, and it is our opportunity to show the American consumers that we are putting them first, ahead of partisan politics, by governing as we were meant to do in the first place.

I see Senator WEBB of Virginia has joined us on the Senate floor. I will close, before turning it over to him, on a little brighter note. It is a gloomy day in our Nation's Capital. It has been raining, sometimes pretty hard. When I was walking up here from the train station it was.

I want to go back and talk about the issue of uncertainty and lack of predictability. I think the greatest impediment to getting our modest economic recovery going and turning it into a robust economic recovery is to address so much of the uncertainty and lack of predictability. It revolves around a bunch of issues. Can we demonstrate to those who question our ability to find the middle to reach across the aisle? Can we demonstrate the ability to govern? Are we able to demonstrate through an approach much like the Bowles-Simpson Deficit Commission plan the ability to get us back on the right track in terms of reducing our debt?

What is going to happen with the health care law? Is it going to be deemed constitutional or unconstitutional? What about the Tax Code? What is going to happen in a year from now, and what will happen to all of these tax provisions that expire at the end of this month? There is a lack of certainty and a lack of predictability, and we need to deal with that.

I want to mention two or three promising signs before I close. We have new job numbers for the month of November. The unemployment rate dropped down to 8.6 percent. Before we stand and celebrate that, there are still a lot of people we know who don't have a job and are looking for a job. A lot of people stopped looking for a job, and that is one of the reasons that number has dropped.

Here is the good news: There were about 120,000 private sector jobs created last month. About 100,000 jobs

were created the month before and roughly 200,000 jobs the month before that. So that is roughly 140,000 jobs per month. We are actually starting to see growth occurring not just over a couple of months, but now for well over a year there has been private sector job creation. It is not the numbers that we like, but it is in the right direction.

The other thing we are seeing is a growth and rebirth of revitalization occurring in the manufacturing sector of our economy. Some of you may know that we have something called a manufacturing index. If it sits at 50, it means the manufacturing sector is not growing, and it is not shrinking. I think it has been over 50 for about 25 consecutive months.

We are seeing a resurgence of manufacturing in this country, which encourages me to believe that what the President is trying to do, to double exports over a 5-year period of time, is not just a pipe dream. It is something that might just happen. It is aided by the three free-trade agreements that we passed in the last month or two.

On those happier notes, I want to say thank you, Mr. President, for allowing me to talk about some leadership that is needed and the willingness to compromise if we cannot get Mr. Cordray confirmed this week.

I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

#### PEARL HARBOR DAY

Mr. WEBB. Mr. President, 70 years ago today at 0745 in the morning in Hawaii—where it is now about 0840 in the morning—our country was attacked at Pearl Harbor bringing us into World War II. It was a war that had been ongoing in Europe for more than 3 years, and in Asia, in different forms, for a much longer period, probably 7 to 8 years.

This began a national effort that was historically unprecedented in its unity and in its vigor in which the United States astounded the world in terms of its capacity to respond to this attack on many different fronts. Our economic production was staggering by 1943. Our production schedule included 125,000 aircraft, 75,000 tanks, 35,000 anti-aircraft guns, and 10 million tons of merchant shipping.

During the course of that war, the productive capacity of this country gave our allied forces more than half of all of its armaments, including 86 percent of the armaments that were used in response to the Japanese attack on Pearl Harbor.

I rise today to express my thanks and my appreciation to the men and women of that generation who stepped forward and responded to the call of service in this period. During World War II more than 16 million Americans stepped forward to serve our country. In that pe-

riod more than 400,000 of them died, including 291,557 who were killed in action. Another 670,846 were wounded in action. Out of those 16.1 million, today about 1.7 million World War II veterans remain alive. They are carrying the torch and the memory of this larger group who stepped forward and served and became known as the “greatest generation.”

It is my profound pleasure and, quite frankly, my duty to remember all of them today. Among those 16 million who served, nearly 8 million were able to take advantage of the World War II GI bill. It was my honor to have introduced a similar GI bill on my first day in the Senate in 2007. Within 16 months, our body and the other body had come together to agree on an educational package that would allow those who served since 9/11 to have the same chance at a first-class future as those who served during World War II. It is a program that will pay their tuition, buy their books, and give them a monthly stipend.

On this day of remembrance, for those who served during World War II, we should also remember that for every dollar that was spent on the World War II GI bill, our Treasury received \$7 in tax reimbursements because of the ability of the “greatest generation” to have successful careers and to contribute to our economy.

So today I would just like to say, as one of many of us here who are the next generation from the “greatest generation,” how thankful I am for the service they gave and for the example they set when they returned from war. For many of us—me—they were our parents, they were our mentors, they were our role models, they were our leaders as we ourselves matured into leaders. They taught us how to love our country. They taught us how to value the notion of service. Their legacy is in every area of our society today.

We honor them and we should resolve, all of us, to continue in the traditions that were imbued in us by their sacrifices and the example they set when they returned from a most difficult war.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CARDIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MUST-PASS LEGISLATION

Mr. CARDIN. Mr. President, I take this time because we are in the last, we hope, few days before we adjourn for the holidays. There are certain pieces of legislation we must get done before

we leave town. We call these the must-pass bills that we have to make sure are enacted before Congress adjourns for the year.

One, of course, is what President Obama has been talking about. We need to deal with the payroll tax issue. We don't want to see middle-income families finding that on January 1 their paychecks—the actual amount of money they take home—are reduced. During this economic time, we want to make sure the money remains constant, and we don't want to see additional burdens placed on middle-income families.

We all know we have to deal with the Medicare extenders, including the physicians problem. We have a flawed system for reimbursing physicians that causes a substantial reduction in rates physicians receive—a 27-percent reduction. That would affect not only the fairness of our reimbursement system to our doctors, but it would also affect the access Medicare patients have to physicians. So we need to absolutely take care of that issue.

We have the Omnibus appropriations bill. I certainly hope that is going to be an appropriations bill so we can give some predictability through the remainder of this fiscal year. We have to get that done before we adjourn for the holidays.

We also need to pass the tax extenders. I know the Presiding Officer has been very actively involved in the energy extenders, knowing full well the importance not only to New Mexico but to our entire country. Those extenders need to be passed because, if not, we lose jobs. This involves the ability to move forward with sustainable energy projects that will mean jobs in our communities and energy self-sufficiency for America.

But I wish to take this time to talk about another must-pass bill before we adjourn for the year; that is, the extension of the unemployment insurance. It is absolutely essential that we get that done before Congress adjourns for the year.

I think we have to make it clear that this extension will mean providing the same number of weeks of unemployment insurance for those who are currently in the system—those who have lost their jobs—that we have had for the last couple of years for those who have been caught up in this economic downturn. We are not extending beyond what the unemployed have already received. So we are basically extending the current policy because we are still in a very difficult economic circumstance.

For every job that is open, there are four people who apply for it. So it is very difficult for someone who is unemployed to be able to find employment. As I know and as the Presiding Officer knows, if a person is unemployed and looking for work, it is much more difficult.

For all of those reasons, the right thing to do is to acknowledge that the number of weeks of benefits should not be reduced at this period, that those who are currently in the system who have lost their jobs should be able to get the same number of benefits that earlier unemployed people were able to get during this economic period. That is what this legislation would do.

Unemployment insurance is an insurance program. During good times, we pay more into the system. During economic downturns, we take the money out of the system. It is countercyclical so that we help our economy as well as help our families.

This is the right thing to do. This is the only lifeline for many families. This represents their ability to be able to put food on the table for their families or to keep their home from going into foreclosure or to pay their rent or to take care of their family needs. This is the right thing to do from the point of view of families who have been caught up in this economic period.

It also, by the way, would affect millions of our families. Over the next year, if we were not to extend the unemployment insurance benefits, it is estimated that 6 million families would be denied their full benefits that they are receiving currently—6 million families—and each one is a family in our community who would be adversely affected.

It also helps our economy. Mark Zandi, who was the economic adviser for then-Presidential candidate Senator McCain, said that for every dollar we put out into the economy for unemployment benefits, we get back \$1.61 in our economy. The multiplier effect of unemployment compensation is positive to our economy. So, once again, when we are trying to stimulate job growth, this helps us. How does it help us? The people who receive unemployment benefits visit our local shops, our small businesses in our communities, keeping our economy moving, keeping our path forward to job growth.

For all of those reasons—for the fact that it is the right thing to do for families and for what the intent of unemployment insurance is all about—it is the right thing for us to do because it helps our economy. This must be on our list of must-pass legislation. We have to get this done before we adjourn for the year.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from Hawaii.

#### PEARL HARBOR DAY

Mr. INOUE. Mr. President, today is December 7, 2011. Seventy years ago, something happened in Pearl Harbor. I shall never forget that day because it was a Sunday, and, as were many Americans, I was preparing to go to church. I was putting on my necktie

and having a good time listening to delightful Hawaiian music. Suddenly, at about this time—1:55 p.m. here—the disc jockey in charge of that program began screaming, yelling into the mike. He was saying: “The Japanese are bombing Pearl Harbor!” He kept on repeating that. For a moment, I thought it was a repeat or replay of Orson Welles, which my colleagues will recall was the program that was a mighty hit in the United States.

The disc jockey kept on doing this for about 5 minutes—no music, just screaming—so I decided to take my father out on the street and look toward Pearl Harbor. We could see these black puffs, and then we knew what was happening. Suddenly, while watching these black puffs of explosions, we could hear a rumble just overhead, and there were three aircraft. They were pearl gray in color, and they had red dots on the wings. I knew what was happening, and I thought the world had just come to an end. Just about 2,400 American sailors and soldiers and noncombatants died that morning.

I was a young man of 17 at that time, but I was also a volunteer medical aid man. We had a little aid station—a temporary one—set up by the elementary school called Lunalilo. So I rushed there to respond to the call of duty, and I stayed there for about a week taking care of the wounded and the dead, because we also maintained a morgue on the school premises.

I became familiar with the cost of war—not the full cost, but I knew what was happening. The war was much more than just blood and guts. We have an extraordinary Constitution. We have an extraordinary set of laws. But throughout the history of mankind—not just the history of the United States but the history of mankind—war has always provided some justification for leaders to set aside these laws. For example, on just about Christmas Eve of 1941, about 3 weeks after December 7, the U.S. Government made a decision, and that decision was to provide a new designation for all Japanese residing in the United States. Citizens and noncitizens, such as my father, were given the new designation, which was 4-C.

As the Presiding Officer knows, 1-A means you are physically fit, mentally alert, and you can put on a uniform; 4-F means something is wrong with you; and 4-C is the designation for an “enemy alien.” Just imagine that—an enemy alien. This was used as one of the justifications to round up over 120,000 Japanese, most of them Americans of Japanese ancestry, and place them into these internment camps. There were 10 of them throughout the United States in very desolate areas—Arkansas, Arizona, Utah, out in the deserts. Their crime was they were “enemy aliens.” None of them had committed any crime. Investigation

after investigation disclosed that. No sabotage, no espionage, no assault—nothing. They were rounded up and placed into these camps, which were described by our government as concentration camps. Yes, it was unconstitutional, but our leaders felt the war was a justification to set aside the Constitution and set aside the laws.

Well, many of us—especially the young ones—were very eager to demonstrate to our neighbors and to our government that we were loyal, that we wanted to do our part in this war, and, if necessary, put our lives on the line. We petitioned the government. Finally, after about a year of petitioning, President Roosevelt issued a statement saying: Americanism is not a matter of blood or color. Americanism is a matter of heart and soul. He said: OK, form a volunteer group. And that was done. We trained in Mississippi and we did our best.

The 100th Battalion, the 442nd Regimental Combat Team were assigned to do our battles in Europe. We fought in Italy and France. We started off the war with about 6,000 men. At the end, over 12,000 had gone through the ranks. So you can imagine the casualty rates. We had about 10,000 Purple Hearts for all the wounds they received. We were told that these two units became the most decorated in the history of the United States.

Yes, the bombing of Pearl Harbor 70 years ago began a period of my life when I became an adult and, I hope, a good American. It is something I will never forget. It changed my life forever.

Something of interest at this moment: 20 years ago, when we decided to make it a national event—the 50th anniversary of the bombing of Pearl Harbor—on that morning, the President was there. The Secretary of Defense, the Secretary of War, the Secretaries of the Interior Department, State Department—all of the important people of the United States were in attendance.

In preparation of this, we took a poll, about 6 months before December 7, and the poll was among high school seniors, well-educated young boys and girls. The question was a very simple one: What is the significance of December 7, 1941?

Mr. President, I am sad to report to you that less than half could respond. Most of them thought it was a birthday of some President or some historic date of some nature, but they could not recall what it was.

On this 70th anniversary, I wonder, if that poll were taken again, What would be the outcome?

Well, I hope we will remember December 7. I hope we will remember 9/11. That was just a few years ago. But people are beginning to forget 9/11, as well as forgetting December 7.

If December 7 is going to teach us anything, it should be that we must remain vigilant at all times—not just to avoid war but vigilant among ourselves so we would not use this as a justification to set aside our most honored document, the Constitution. I hope it will never happen again.

Mr. President, I thank you very much for this opportunity.

I yield the floor.

The PRESIDING OFFICER (Mr. CARDIN). The Senator from Arizona.

Mr. McCain. Mr. President, I am very moved by the words of the Senator from Hawaii—not only his words but the example he has set for all Americans of heroism and sacrifice and service to his country, and a most valued Member of the U.S. Senate but, more importantly, a genuine American hero.

I thank the Senator from Hawaii for his continued service and his continued inspiration to all Americans, especially those who are serving in the military today.

Mr. Reid. Mr. President, would my friend yield for a brief statement.

Mr. McCain. I would be glad to yield.

The PRESIDING OFFICER. The majority leader.

Mr. Reid. Mr. President, I, like my friend from Arizona, compliment my friend from Hawaii. But I think it speaks volumes to hear Senator John McCain talk about a hero. It is a hero talking about a hero. Far too rarely do we recognize these people whom we have the opportunity to serve with here in the U.S. Senate.

When I came here with Senator McCain—we came at the same time—we had a lot of people who were war veterans. It is not the case anymore. But I so appreciate John McCain—a certified, unqualified hero—standing and talking about Dan Inouye being a hero. This says, I repeat, volumes coming from someone who is a hero himself.

I have such admiration for both of these men. For someone who has never served in the military, to have the pleasure of being able to serve and work together with these two men will be something I will remember the rest of my life.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. McCain. Mr. President, I am deeply touched by the kind and undeserved words of my old friend of many years, the distinguished majority leader. We have had our spirited combat and our agreements, but we share a commitment—the two of us—for the betterment of this Nation.

I also remind my friend from Nevada what he already knows, but I remind him, it does not take a great deal of talent to get shot down. I was able to intercept a surface-to-air missile with my own airplane, which will not go down in the Aviation Hall of Fame, not

to mention the several aircraft I destroyed at taxpayers' expense in previous times.

So I thank my dear friend from Nevada, as well, for his kind words.

The PRESIDING OFFICER. The majority leader.

Mr. Reid. Mr. President, I appreciate the humility of my friend. I have heard him say words to this effect before. The fact is, what he did after the plane went down is what we all will remember. As long as our country is the country it is, we will always remember what happened after that plane went down, what John McCain did, setting an example for the world and certainly his country.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. McCain. Mr. President, I ask to speak in morning business.

The PRESIDING OFFICER. The Senator is recognized.

#### RUSSIA

Mr. McCain. Mr. President, I rise to speak about Russia, and to review—particularly, in light of the recent election in Russia and the relationship we have—the state of what this administration has trumpeted as a so-called reset of U.S.-Russia relations, especially in light of the flawed Duma election that occurred this weekend, and in light of my strong belief that the growing demand for dignity and uncorrupt governance that has defined the Arab world this year may impact Russia as well.

Let me once again make clear that I am not opposed to U.S. engagement with Russia. I am not opposed to working consistently in good faith with Russia to find more ways to improve our relationship. To the contrary, we must continue to actively seek ways to cooperate with Russia in mutually beneficial ways. It is in our national interest to do so. And whatever can be said about the administration's policy toward Russia, no one can accuse them of a lack of sincerity and diligence in trying to increase cooperation with Russia.

I would simply ask, What has been accomplished? What has been the result of the administration's good-faith desire for a so-called reset of relations with Russia? The answer, I am afraid, is precious little. Yes, there have been some areas of progress, but even those minor steps may now be getting rolled back.

There has been a lot of news recently pertaining to our relationship with Russia and Russia's future development, which my colleagues may have missed. It is very important to spend some time today and review these new developments.

Let's start with the issue of missile defense.

My colleagues will remember the debate we had here last year over the

ratification of the New START treaty. In that debate, we spent a lot of time discussing the Russian threat to withdraw from the treaty if the United States took any further steps to build up its missile defense capabilities. Specifically, the Russian Government stated that the New START treaty “may be effective and viable only in conditions where there is no qualitative or quantitative build-up in the missile defense system capabilities of the United States of America.” The Russian Government stated that in the ratification of the treaty. They went on to say that if those conditions were not met, Russia would exercise its right to withdraw from the treaty.

Many of us felt strongly at the time, and feel strongly now, that it was a mistake to ratify a treaty on which the two signatories had two completely antithetical positions about the implications of that treaty, particularly as it pertains to one of our most vital national security programs—our missile defenses. Some of us thought and argued at the time that the United States should not voluntarily sign up to a treaty that would likely be used by the Russian Government as a source of political pressure and blackmail to get us to make concessions on our missile defenses.

Well, here we are, 1 year later, and let's review some of what the Russian Government has been saying and doing in this regard.

On November 23, we read an article from Bloomberg entitled “Russia Prepares to ‘Destroy’ U.S. Shield.” This is what it said:

Russian President Dmitry Medvedev ordered the military to prepare the capability to “destroy” the command structure of the planned U.S. missile-defense system in Europe.

Russia may also station strike missiles on its southern and western flanks, including Iskander rockets in the Kaliningrad exclave between Poland and Lithuania, both members of the North Atlantic Treaty Organization and the European Union, Medvedev said on state television today.

“I have ordered the armed forces to develop measures to ensure, if necessary, that we can destroy the command and control systems” of the U.S. shield, Medvedev said. “These measures are appropriate, effective and low-cost.”

On the same day, we read the following in an article in the New York Times entitled “Russia Elevates Warning About U.S. Missile-Defense Plan in Europe.” I quote from the article:

Russia will deploy its own missiles and could withdraw from the New Start nuclear arms reduction treaty if the United States moves forward with its plans for a missile-defense system in Europe, President Dmitri A. Medvedev warned on Wednesday.

“I have set the task to the armed forces to develop measures for disabling missile-defense data and control systems,” Mr. Medvedev said. . . .

But it was Mr. Medvedev's comments about the New Start treaty, put into effect this year, that suggested a darkening tone in

what has been a steady drumbeat of warnings out of Moscow in recent days over the plans for a missile-defense system based in Europe.

"In the case of unfavorable development of the situation, Russia reserves the right to discontinue further steps in the field of disarmament and arms control," Mr. Medvedev said in a televised address from his residence outside Moscow. "Given the intrinsic link between the strategic offensive and defensive arms, conditions for our withdrawal from the New START treaty could also arise," he said.

If all this were not troubling enough, we then read on November 28 an article from a Russian state news agency entitled "Russia's NATO Envoy to Visit China, Iran, Over Missile Defense." Here is what was reported:

Russian envoy to NATO Dmitry Rogozin will visit China and Iran in mid-January to discuss a U.S.-backed global missile defense network.

"We are planning to visit both Beijing and Tehran soon under the Russian president's directive, to discuss the planned deployment of a global missile defense network," Rogozin said during a roundtable meeting at the lower house of the Russian parliament.

On November 28, the Russian Government went even further, not just using the New START treaty to try to blackmail us into weakening our missile defenses but threatening to cut off NATO's supply routes into Afghanistan as well, which was another area of limited progress that the administration hailed as part of its so-called reset policy. This is how the Wall Street Journal described it last Monday in an article entitled "Russia Considers Blocking NATO Supply Routes."

Russia said it may not let NATO use its territory to supply troops in Afghanistan if the alliance doesn't seriously consider its objections to a U.S.-led missile shield for Europe, Russia's ambassador to NATO said Monday.

If NATO does not give a serious response, "we have to address matters in relations in other areas," Russian news services reported Dmitri Rogozin, ambassador to NATO, as saying. He added that Russia's cooperation on Afghanistan may be an area for review, the news services reported.

So let me summarize: After being assured that the New START treaty would contribute to the improvement of U.S.-Russia relations, and that the Russian Government would not use the treaty against us as blackmail, we are now in a situation where the President of Russia is threatening to deploy ballistic missiles to destroy U.S. missile defense systems in Europe; where he is openly threatening to withdraw his government from the New START treaty if the United States does not make unacceptable concessions on its missile defense programs; and where the Russian Ambassador to NATO is threatening to cut off NATO's supply routes to Afghanistan and planning to visit China and Iran with the purpose of deepening Russia's cooperation with those governments against U.S. missile defenses.

I think it is safe to say that the effect to date of the New START treaty on the U.S.-Russia relationship is rather less positive than originally advertised. The problems in our relationship with Russia go well beyond missile defense, as important as that is. In recent months, as the Assad regime in Syria has slaughtered roughly 4,000 of its own citizens who are seeking a democratic future, what has been the Russian Government's response? With the help of China, Russia has been absolutely shameless in blocking any serious action in the United Nations Security Council, including by vetoing a toothless security resolution that would not have even imposed sanctions but merely hinted at the possibility of sanctions. At the same time, while the Assad regime's bloody rampage has continued against the Syrian people, the Russian Government has continued to serve as its primary supplier of weaponry. In fact, last week in a story entitled "Russia Delivers Missiles to Syria," AFP reported that despite the brutal violence of the Assad regime, and over Israel's strenuous objections, Russia delivered 72 supersonic cruise missiles to the Syrian Government worth at least \$300 million.

Then there is Russia's continued interference in the sovereign territory and internal affairs of the Republic of Georgia, a country that the Russian military invaded in 2008 and continues to occupy to this day. Two weeks ago there was a Presidential election in the breakaway state of South Ossetia, which is part of Georgia's sovereign territory. But when Moscow's preferred candidate was overwhelmingly defeated in those elections, the supreme court of this Russian proxy state declared the results illegal and nullified the vote. Russian parliamentarians applauded.

Finally, there is the unfortunate issue of Russia's backsliding on human rights and democracy. A few months ago, President Medvedev announced, as we all know, that he would step aside in Russia's election next year so that Vladimir Putin could once again run for the Presidency. Some see this as a sign that Putin will come back. I object to that characterization, because I do not believe Putin ever left. He has been running things in Russia with no less informal power than he had as President.

Not surprisingly, over the past 3 years, the state of human rights and freedom in that country has gotten no better. In fact, things have gotten worse. Perhaps the clearest evidence of this fact is the tragic and heart-breaking case of Sergei Magnitsky, a Russian tax attorney working for an international company, Hermitage Capital, that had invested in Russia. Magnitsky did not spend his life as a human rights activist or an outspoken critic of the Russian Government. He

was an ordinary man. But he became an extraordinary champion of justice and the rule of law in a Russia where those principles have lost nearly all meaning.

What Magnitsky uncovered was that a collection of Russian Government officials and criminals associated with them colluded to defraud the Russian state of \$230 million. The Russian Government, in turn, blamed the crime on Hermitage Capital and threw Magnitsky in prison in 2008. Magnitsky was detained for 11 months without trial.

Russian officials, especially from the interior ministry, pressured Magnitsky to deny what he had uncovered, to lie and recant. But he refused. He was sickened by what his government had done and he refused to surrender. As a result, he was transferred to increasingly more severe and more horrific prison conditions. He was forced to eat unclean food and drink unclear water. He was denied basic medical care even as his health continued to deteriorate. In fact, he was placed in even worse conditions until, on November 16, 2009, having served 358 days in prison, Sergei Magnitsky died. He was 37 years old.

The Magnitsky case shined a light on the tragic realities of human rights abuses in Russia today, and the overwhelming cruelty and injustice that Magnitsky endured has made it impossible for the government and the people of Russia to ignore. Even the Public Oversight Commission of the City of Moscow for the Control of the Observance of Human Rights in Places of Forced Detention, a Russian organization empowered by Russian law to independently monitor the country's prison conditions, concluded the following in a report this year:

A man who is kept in custody and is being detained is not capable of using all of the necessary means to protect either his life or his health. This is a responsibility of a state which holds him captive. Therefore, the case of Sergei Magnitsky can be described as a breach of the right to life. The members of the civic supervisory commission have reached the conclusion that Magnitsky had been experiencing both psychological and physical pressure in custody, and the conditions in some of the wards . . . can be justifiably called torturous. The people responsible for this must be punished.

The case of Sergei Magnitsky is but an extreme example of a problem that is all too common in Russia today, the flagrant violations of human rights and the rule of law committed by the Russian Government and its allies outside of government. We have seen the problem in the show trial of Mikhail Khordokovsky, which I would remind my colleagues was unfolding at the exact same time that this body was debating the ratification of the New START treaty last December.

After the Russian Government stole Khordokovsky's oil company, it then turned around and charged him for the

crime. Even more absurdly, as he was nearing the end of his 8-year prison sentence, the Russian state then charged him again for virtually the same crime. Before the judge had even handed down his verdict, Prime Minister Putin said, Khordorkovsky "should sit in jail." And lo and behold, that is exactly what the judge ultimately ruled, sentencing Khordorkovsky to 5 additional years in prison on top of the 8 years he had already served.

Earlier this year, not surprisingly, Khordorkovsky lost his appeal of this ruling. In a report released this year, Freedom House concluded that the cases of Magnitsky and Khordorkovsky:

Put an international spotlight on the Russian state's contempt for the rule of law. . . . By silencing influential and accomplished figures such as Khordorkovsky and Magnitsky, the Russian authorities have made it abundantly clear that anyone in Russia can be silenced.

The violations of human rights in Russia also extend to the deep and worsening problem of corruption, which perhaps as much as any other issue mobilizes the frustration and anger of the Russian public. In its annual index of perceptions of corruption, the independent organization Transparency International ranked Russia 154th out of 178 countries. That means that Russia is perceived as more corrupt than Pakistan, Yemen, and Zimbabwe. The World Bank considers 122 countries to be better places to do business than Russia. I would point out that one of those countries is the Republic of Georgia, which is ranked 12th by the World Bank.

When we consider the pattern of corruption and abuse the Russian Government has perpetrated over many years, it is not surprising to see the outpouring of anger and dissatisfaction that Russian voters expressed in this weekend's parliamentary elections. Unfortunately, the conduct of that election and especially its aftermath has only validated the growing frustration that Russians feel for their rulers. Before the ballots were even cast, a noted Russian election monitoring organization called Golos was subjected to intimidation, harassment, political pressure, and fines. The subsequent election has been criticized by impartial international observers, including the Organization for Security and Cooperation in Europe, which documented in its preliminary assessment numerous irregularities and other efforts by the government to sway a vote in its favor.

Instances of ballot stuffing have been documented. For example, in Chechnya, it was reported that 99 percent of the population participated in the election and 99.5 percent of them voted for Putin's party. That seems a little suspicious, especially considering that the Putin government has waged years of bloody warfare in Chechnya.

Despite the fact that the recent Duma election fell short of international standards and violated Russia's law, substantially fewer Russian voters chose to cast their vote for Putin's party, including in its stronghold and home base of St. Petersburg. This frustration has subsequently poured into the streets where Russian citizens have peacefully sought to demonstrate against the recent election fraud. The Russian Government has responded, in turn, by arresting hundreds of opposition leaders, democracy and human rights activists, journalists, and other members of civil society, including Boris Nemtsov, Alexey Navalny, and Ilya Yashin. Those men and women are exercising universal human rights and fundamental freedoms which should not be a crime in any country.

I call on the Government of Russia to release every Russian citizen who is unjustly detained for political purposes and to clarify the whereabouts and conditions of those individuals.

Mr. President, throughout this year, I have said that the demand for dignity, justice, and democracy that is shaking the Arab world to its foundations will not be confined to that one region alone. It will spread. It will inspire others. It will demonstrate to others that the frustrations, indignities, and lack of hope they may feel today need not be the realities they endure tomorrow. They can change those realities. They can change their destiny. They can change their countries. And it appears that message may be resonating with the people in Russia. We should hope that it does resonate and resonate in a peaceful manner, because we agree with a growing number of Russians who clearly believe they deserve better. They deserve a government that respects and responds to their aspirations for a better life. They deserve the power to freely elect their own leaders.

The political development of Russia is more than an issue of moral principle for the United States. It is closely tied to our national interests. We have seen in the past that when autocratic governments feel they are losing legitimacy among their people at home, they try to demonize others, both in their country and beyond it, and redirect their public's anger against imaginary enemies. We have seen how the Putin government has done this in the past. We have seen its attempts to paint the United States and our NATO and other allies as enemies of Russia and to lash out against us in the hope of mobilizing public support at home. This is why the growing pattern of confrontation from the Russian Government that we have seen in recent months—over missile defense, resupply efforts into Afghanistan, and other issues—should be so concerning to us and why we must understand that the

actions of the Russian Government cannot be separated from its character. In fact, as Russia's Government grows less tolerant of its own people's rights at home, we should not be surprised if it treats us the same way.

As I have said before, I believe we need greater realism about Russia, but that is not the same as pessimism or cynicism or demonization. I am ultimately an optimist, and I often find sources for hope in the most hopeless of places.

One year ago, after languishing in prison for 7 years and facing the near certainty of enduring many more, Mikhail Khordorkovsky spoke before his sentencing about the hopes of the Russian people as they watched his trial. He said:

They are watching with the hope that Russia will after all become a country of freedom and of the law. Where supporting opposition parties will cease being a cause for reprisals. Where the special services will protect the people and the law, and not the bureaucracy from the people and the law. Where human rights will no longer depend on the mood of the tsar, good or evil. Where, on the contrary, the power will truly be dependent on the citizens and the court, only on law and God. For me, as for anybody, it is hard to live in jail, and I do not want to die there. But if I have to, I will not hesitate. The things I believe in are worth dying for.

That there are still men and women of such spirit in Russia is cause for hope. And eventually—maybe not this year or next year or the year after that but eventually—the Russian people will have a government that is worthy of their aspirations, for equal justice can be delayed and human dignity can be denied but not forever.

I yield the floor.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUE. Mr. President, I thank my most distinguished friend from Arizona for his generous, warm, and friendly remarks. They mean a lot to me. I will never forget them. I thank the Senator very much.

Mr. AKAKA. Mr. President, I rise today in observation of the surprise attack that the Empire of Japan launched on the U.S. military bases in Hawaii 70 years ago. The attack was concentrated on the Pearl Harbor Naval Base, where over 2,400 courageous sailors, soldiers, and marines lost their lives. Each year, close to 1½ million people from across the country and around the world visit the memorials at Pearl Harbor to remember the events of December 7, 1941, and how the world was changed forever on that day.

As the Sun rose over Pearl Harbor today, solemn prayers were offered and large crowds gathered to honor the sacrifice made by so many of our brave young men and women.

The National Park Service and the Navy Region Hawaii are hosting the 70th Anniversary Pearl Harbor Day Commemoration at the Pearl Harbor

Visitor Center to recognize those who bravely survived the attacks and to remember the thousands more who gave their lives in service to their country that day.

Representative CHARLES WILLIAM "BILL" YOUNG from Florida will be representing Congress at the commemoration ceremony accompanied by William Muehleib, the president of the Pearl Harbor Survivors Association, and approximately 100 survivors of the attacks, including 8 who were aboard the USS *Arizona*, which lies enshrined at the bottom of Pearl Harbor today. The USS *Oklahoma*, BB 37, Memorial Executive Committee will dedicate a rose granite memorial marker at the National Memorial Cemetery of the Pacific at Punchbowl to honor the memory of the approximately 355 USS *Oklahoma* sailors who perished but were never individually identified. The remains of two servicemembers will be interred at the USS *Utah* and the USS *Arizona* so they may again join their shipmates in accordance with their wishes. And the Hawaii Air National Guard will fly F-22 Raptors over the memorial sites at Pearl Harbor and Hickam Air Force Base in honor of the fallen.

I want to recognize and thank the National Park Service and Navy Region Hawaii for their diligent work and dedication to ensuring that the legacy of the thousands of servicemembers who perished that day lives on through the memorials that stand solemnly at Pearl Harbor. They have done an outstanding job conveying the unwavering spirit of those who, in the face of perilous odds, stood their ground and fought back against the Japanese attack to save the lives of their brothers in arms. The efforts of these organizations have helped to make sure that our country will never forget the tragic loss that all Americans felt as news of the attack spread across the Nation.

We must continue to remember the acts of heroism, bravery, and sacrifice that followed the attack. Our country fought in the name of justice to preserve our Nation's sacred freedoms. And we must also recognize and thank the courageous men and women of our Armed Forces today who are still fighting in the name of those same freedoms. I urge the citizens of this Nation to recall that it was the collaboration of a country and the sacrifices made by ordinary men and women who rallied in defense of freedom, liberty, and the great promise of our democracy that preserved our Nation's freedom and liberty. It is in that spirit of coming together to save our country that has always produced the strongest results and made our country great.

Mr. President, I ask my Senate colleagues to join me in prayer and remembrance for the men and women who died in Pearl Harbor and those who are still fighting overseas today.

May God bless all of those who have served to protect our shores, and God bless America.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

(The remarks of Mr. SANDERS pertaining to the introduction of S. 1960 are printed in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. SANDERS. With that, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURBIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### FOR-PROFIT COLLEGES

Mr. DURBIN. Mr. President, in the school year 2009-2010, the U.S. Department of Education provided \$132 billion in grants and loans to students. That was up from \$49 billion in 2001—a dramatic increase in Federal aid to education. A large part of the increase can be traced to one particular type of school: enrollment at for-profit colleges. That has grown faster than any other sector.

Currently, about 10 percent of the students pursuing education after high school attend for-profit schools—for-profit colleges and different training schools that offer certification in certain skills and certain professions, 10 percent. But that 10-percent portion of students in America account for 25 percent of all the Federal aid to education. In other words, dramatically more money is going to those students than those attending other schools after high school.

When it comes to the student loan defaults, where college students borrow money to go to school and then fail to pay it back, for-profit school students account for 44 percent of the student loan defaults in America. Again, 10 percent of the students, 25 percent of the Federal aid to education, and 44 percent of student loan defaults are attributable to for-profit schools.

The industry is dominated by 10 publicly traded for-profit companies. Of those 10 companies, they enroll almost half the students in for-profit schools. So it is dominated by the big players. The largest, of course, the Apollo Group, University of Phoenix, at one point had over 450,000 students enrolled nationwide, more than the combined enrollment of all the Big Ten colleges and universities—a big player when it comes to higher education and a big player when it comes to Federal aid to education. The Apollo Group, University of Phoenix, receives more money than any other college in America, far

and away. None are even close. The next two schools, when it comes to Federal aid to education, are also for-profit colleges.

While Federal spending on student aid has seen a huge increase, there has been very little accountability when it comes to these for-profit schools. Worse yet, almost no information has been available about whether the students are actually learning and finding work in their respective fields after graduation.

In June of last year, Senator TOM HARKIN—who has joined me in this effort to look closely at for-profit schools across America—added his name to a letter we sent to the Government Accountability Office to study the outcomes for students attending for-profit colleges. The report has been formally released. For-profit colleges serve—and one could argue they target—primarily low-income, nontraditional, and minority students.

For-profit colleges often claim the reason more of their students can't find jobs and the reason more of their students default on student loans is because they are trying to provide education to students whom others will not accept. That is their explanation for higher debt levels and higher default rates and poorer student outcomes. Senator HARKIN and I wanted to ask the Government Accountability Office straight out to take a look at the different students in terms of their income and background and compare outcomes—for-profit schools versus public universities and private schools. Our question was: What does the research show about graduation rates, employment outcomes, student loan debt, and default rates for students at for-profit schools compared to those at nonprofit and public schools, taking into consideration different student backgrounds.

When looking at student debt, one study by the GAO found that 99 percent—99 percent—of for-profit college students took out loans, almost all of them. What is the comparison? Seventy-two percent of those attending public colleges took out loans, with 83 percent of those attending private, nonprofit colleges.

When it comes to student loans, the for-profit colleges lead all types of schools and universities in the number of students who are taking out loans. The GAO found that for-profit college students have higher rates of unemployment when it is all over. When it comes to loans and debts, students at for-profit colleges fare much more poorly than their peers attending nonprofit or public institutions. Students at for-profit colleges took out more student loans and they generally had higher loan debt.

Let me tell you about one of those students who contacted our office. His name is Jacob Helms. He attended a

for-profit, online school to earn a bachelor of computer science degree in videogame design. When he enrolled, he was a little bit apprehensive because of the cost. You see, this for-profit, online school told him he had to take about nine classes a year and each class would cost him \$1,500. Jacob was concerned about the cost, but the school told him: Don't worry about it. The loans you have to take out will cover your entire education.

With that assurance, Jake enrolled 4 years ago. After about 4 years of attending courses year-round, Jake reached the maximum direct loan amount for independent undergraduate students. He had borrowed \$57,500. The problem was, he wasn't finished. He hadn't completed his required courses. He had just run out of the ability to borrow any more money from the government. Jake is \$57,500 in debt. He has no degree and no job prospects. He says all he wants to do is move forward and start a career—his original goal. Jake says the school will provide him with no assistance or alternative other than to drop out with a debt, no diploma, and no job.

In fact, Jake didn't even know he had reached the maximum level on his Federal direct loan limit. He was withdrawn from online classes with no explanation and finally determined that since he could no longer borrow money from the Federal Government—he was at the top, with \$57,500—they didn't want him. When he inquired, the school told him he had run out of money. With an annual income of less than \$25,000 and no other way to pay the tuition, Jake dropped out. He says the school's attitude was very clear: We got our money; we are done with you.

Jake is not alone. Student debt has outpaced credit card debt. Imagine that. In October of last year—13 months ago—for the first time in history, the total amount of student loan debt is greater than credit card debt in America. In 2009, the average debt nationally for students at for-profit colleges was well above those who attended other institutions. Students at for-profit colleges graduated with an average debt of \$33,000. At public universities, the average was \$20,000. At private nonprofits, the average was \$27,600.

There are very few penalties for schools where students incur huge amounts of debt and can't repay their loans. More than three in four—that is 76 percent—of young adults say college has become harder to afford in the past 5 years. Nearly as many—73 percent—say graduates have more student debt than they can manage.

It was interesting to see with this Occupy movement—which had many different causes, in many different cities—that the one recurring theme, particularly from the younger people who were there, was we have to do some-

thing about student loan debt. Students across America, those who have attended colleges and universities, understand that debt and the burden it places on their lives. These students have to put off buying homes, starting families, and other major life decisions because of their debt.

Sadly, many students are not informed about the loans they are taking out. They do not know the difference between a direct loan and a private loan, but they should. The one critical difference is this. It wasn't that long ago in America where people could borrow money from the Federal Government to go to college and beyond and then declare bankruptcy, so we changed the law. We said: That is not fair. They can't borrow this money from the Federal government and then refuse to pay it. So student loans from the government were no longer dischargeable in bankruptcy.

I thought there was some sense and justice to that decision. We had cases that were reported of students literally finishing medical school and declaring bankruptcy before they went into practice so they didn't have to pay their student loans. That was unacceptable and unfair and it can no longer be done. Just a few years ago, we changed the law again and said private college student loans—those are loans from the university and not from the government—were also not dischargeable in bankruptcy. What does that mean? It means, if a student has incurred a debt or if one has signed on to their son or daughter's college debt, they are on the hook. They will have to pay that off or else.

We asked some of the Federal agencies: Are you concerned about student loan default? They gave a very cold answer. They said: No. We will get our money because we will be watching for the rest of that person's life. Every time they think they are going to receive a Federal income tax refund, we will take the check. If necessary, we will take their Social Security checks too. That shows this student loan debt can haunt them for a lifetime.

We recently had an e-mail from a young man. It was heartbreaking. He told a story of going to one of the for-profit colleges in the Chicago area and he ended up coming out of college with \$90,000 in debt, a worthless diploma and no job. His parents signed a note. Because of the penalties and interest which accumulated after he had finished his education, his debt was now up to \$124,000. Both his parents had decided they could no longer afford to retire, as they had planned. They had to keep working to pay off their son's student loan for an education that turned out to be worthless.

I wish that was the only example I knew of, but we have been receiving more and more examples just like it. There is no way in this circumstance

for this student to consolidate loans, lower interest rates or pay off the balance.

Sadly, many students are not informed about the loans they take out. They do not know the difference between direct loans and private loans. They do not know this aspect of nondischargeability in bankruptcy. Private loans are even more burdensome. You see, when a person takes out a government student loan, after a period of time—because of some of the decisions made by President Obama and by this Congress—they can be at least limited in their exposure of how much they have to pay each year, 10 percent of their income, with certain qualifications—10 percent, no more. After 10 years, should they take a job as a teacher or nurse, some of their government student loan debt can be forgiven.

This is not true on the private side. The money loaned to a student by the school, for example, or by some other institution other than the government is not subject to these benefits or limits. Students wrack up unmanageable amounts of debt, then can't repay their loans or discharge their private student loans in bankruptcy.

In September, the Department of Education released the fiscal year 2009 national student loan default rates. It is a measurement of how many students default on their student loans, and it gives us a view of the overall burden of college on students. The rates of students attending for-profit colleges continue to soar well above the rates for students at private and public colleges—4.6 percent of students who attend private schools defaulting on their loans. But students who attend for-profit schools default at a rate almost 3½ times as high, at 15 percent. That is dramatically higher if they attend for-profit schools. Because their debt is higher, their likelihood of a job is much less.

This says more about the institutions than it says about the students. Yet there are no repercussions for schools with high default rates, unless—under new regulations from this administration—they have 25 percent default rates for 3 consecutive years. This is unacceptable.

The recent GAO study recognizes we have few measures to determine the quality of education students receive. One measure we do have is that students at for-profits continue to go deeper and deeper into debt even though most of them don't graduate. Of students who began their education at for-profit schools in the 2003–2004 school year, only 15 percent had obtained a bachelor's degree by 2009. Again, for-profit schools, over a period of 6 years, graduate 15 percent.

What about other schools? Sixty-four percent of students at public colleges graduated in that 6-year period of time,

and 71 percent at private colleges obtained a bachelor's degree. That is a huge difference. A 15-percent graduation rate at for-profit schools means students, many of them, are deeply in debt by a margin of almost 6 to 1 are not graduating. They don't end up with a diploma. They have the debt, they have no diploma, and some of them end up with a worthless diploma.

The recent Department of Education regulations are starting to work. They are cracking down on aggressive recruiting practices. Students are thinking harder about where they enroll in schools. In some cases, students are avoiding for-profit colleges. Every high school student in America should read the summary of the Government Accountability Office report on for-profit schools before they even consider enrolling in one of those schools.

Some of the schools are starting to ask questions on their own about the way they do business, and they have come to me—many of these schools—pleading with me, saying: You are just talking about the bad guys. We are the good guys.

Well, prove it. Prove it. Make certain that students are getting an education that is worthwhile. Don't sink them with debt. Stand by them when it comes to finding a job or at least be mindful of what that debt means to their lives.

More needs to be done to educate families, high school teachers, and high school counselors about the choices students face. I hope these companies will continue to examine their practices, and I hope the Department of Education is going to continue monitoring the schools and the way they operate.

Let me tell you about one such operation, the Career Education Corporation. I know about this school because its former CEO came and met with me in my office in Chicago and then appeared at a hearing, pleading with me to give special consideration to his for-profit schools, which were different and better and shouldn't be lumped into the category of these schools that are exploiting young people coming out of high school. I listened to him and basically said: Well, I will pay attention to the way this turns out.

This gentleman, whose name is Gary McCullough, resigned as the CEO of Career Education Corporation on November 1 after it was reported that his school had misrepresented its placement rates for its graduates.

Career Education Corporation is an Illinois-based company with over 100,000 students nationwide. If you have not heard of Career Education Corporation, you may have heard of some of the names of its schools. I saw one of them on a bus in Chicago advertising for more students, and it is a familiar name to people who have followed the culinary side of business for a long

time: Le Cordon Bleu. They bought that name, and they named one of their schools Le Cordon Bleu. We will teach you how to be a superchef, an Iron Chef, whatever chef you want to be. But it turns out that they were not only failing to educate and train the students, but the students couldn't get jobs, and the students were deep in debt.

When Mr. McCullough ended up resigning as CEO of Career Education Corporation, they found out that only 13 of their 49 health, education, and art design schools—13 of 49—met the 65-percent minimum placement rate for the reporting period. They had falsified their numbers, and now they are under investigation. They should be. We need to get to the bottom of it. If they are lying to the students, something has to happen.

First, they shouldn't be qualified for Federal student loans or Pell grants. If they are not graduating students into jobs, then they ought to be held to higher standards. And the students shouldn't be misled into believing that if they can get a Federal loan at a school, it has to be a good school.

Secondly, there has to be some standard for accreditation. There obviously is little or no accreditation accountability at this point. You can't expect a high school student or his parents to be able to look at a school from the outside or look at the Web site and decide whether it is any good. There have to be some standards for performance and excellence when it comes to these for-profit schools—for every school, for that matter.

Finally, if this school loses its accreditation, particularly in the programs where it has failed to graduate students, I think this school and this corporation should be held accountable for the student loans that have been incurred by these students. They didn't know they were signing up to go to an unaccredited school. Their debt is very real; their diploma is a phony. So it is time for these schools to be held accountable.

I am sure there are many for-profit schools that offer a good education, but there are certainly many that are exploiting students today. They are so good at marketing, you can't avoid them, whether it is on the Internet or television. They are everywhere, everywhere you turn, particularly in low-income communities. They are offering "college" to many students who can't get into a regular college or university. These students feel they are finally going to get their chance. Little do they know that all these for-profit schools are looking for is the money they can bring to them. When it is all over, they are deep in debt with no job and no place to turn.

What is our responsibility? Remember, we put \$132 billion a year into Federal aid to higher education. It is time

for us to make sure the schools that receive them for the students are real schools, are graduating students and preparing them for a good life and a good job.

#### NOMINATION OF RICHARD CORDRAY

Mr. DURBIN. Mr. President, experts blame credit default swaps and collateralized debt obligations for the financial crisis. The fact is, these complicated financial products were based on mortgages sold to families who couldn't afford them, credit cards with hidden fees, and loans targeted to low-income individuals with up to 400 percent interest rates. The financial regulators ignored their responsibility to protect consumers from these predatory practices. Because there was not one regulator solely responsible for consumer protection, the financial regulators pointed their fingers at the other guy when the system collapsed. Consumers lost \$17 trillion in household wealth and retirement savings almost overnight.

That is why a bipartisan group of 60 Senators voted last year to consolidate consumer protection authority into one agency: the Consumer Financial Protection Bureau. The CFPB was given new responsibilities to oversee nonbank actors who deal in payday loans, prepaid cards, student loans, and credit reporting.

Mr. President, 200 million Americans rely on credit reporting agencies when they make a big purchase and sometimes when they apply for a job. An estimated 20 million people use payday lenders to make ends meet. I wish they didn't, but they do. Many of them face up to 400 percent interest rates to obtain these short-term loans. Four million Americans have prepaid debit cards. As more companies use these types of products instead of checks or direct deposit, it is expected that over \$670 billion will be loaded into prepaid cards in the next few years. More than \$10 billion in private student loans is given to students, who then face up to 15 percent interest rates. I talked about a few of them in an earlier statement.

Tens of millions of Americans relying on nonbanks for their financial needs will go without protection unless the Consumer Financial Protection Bureau has the resources it needs to help American consumers and a Director.

Earlier this year, President Obama nominated Richard Cordray to be Director of the Consumer Financial Protection Bureau. He was recruited to lead the Enforcement Division and now is being asked to move up and take over the directorship. Before joining, he served as Ohio's attorney general, recovering billions of dollars in pension funds on behalf of retirees and taking on the predatory lenders. Mr. Cordray

saw firsthand how the failure to enforce Federal consumer protection laws related to mortgages affected Ohio residents. He has a strong grounding, working with both consumer advocates and the financial sector. He is an excellent choice, and I strongly support his nomination.

Unfortunately, Mr. Cordray is asking to head up a consumer protection agency which, to paraphrase a former colleague on the floor, the banks hate like the devil hates holy water. The idea that we would give authority to an agency to watch these financial institutions—payday loan operations and the rest—to make certain they don't exploit American consumers drives these banking interests wild. They have done everything they can to stop him from becoming Director and to cut the money available for his Bureau. They don't believe there should be consumer protection. Let the buyer beware. They don't care, at the end of the day, if innocent people suffer across America. But they should.

My colleagues claim there won't be any real checks on his power if Mr. Cordray is given this position, but he is subject to an annual audit by the GAO; he has to report to Congress biannually; is subject to private sector independent audit; monitored by the inspector general of the Federal Reserve; the Comptroller General is required to annually audit the financial transactions of the Bureau; and is subject to the Regulatory Flexibility Act, the Paperwork Reduction Act, the Congress Review Act, and the Administrative Procedures Act, to name a few. The Financial Stability Oversight Council that includes members from across the financial sector can review and overturn CFPB regulations. No other agency is subject to having regulations under its own jurisdiction overturned. But that isn't enough for the special interests that hate the Consumer Financial Protection Bureau. These are the same players who helped create the financial crisis that devastated our economy.

Despite all these measures to ensure congressional oversight, those who couldn't kill the CFPB outright are determined to destroy its ability to act. And now, as we finally start to recover from this economic crisis, the same special interests are protesting efforts to require the disclosure of credit card fees, for example. The same banks that made billions from selling homes to families who couldn't afford them are refusing to modify mortgages so families can stay in their homes. They don't want to change the structure of the CFPB; they want to destroy its ability to protect America's consumers and families. They want to go back to the days of "heads I win, tails you lose," back to the days when we didn't have to worry about a regulator enforcing consumer protection laws.

The CFPB structure is similar to other financial regulators. The Office of the Comptroller of the Currency has been led by one individual with congressional oversight for over 100 years, for example. The Federal Housing Finance Agency, which oversees Fannie Mae and Freddie Mac, is also led by a single Director with congressional oversight. Yet both financial regulators have avoided the political outcry we are hearing about the Consumer Financial Protection Bureau.

Really, what we are seeing, I am afraid, is a partisan effort to block a well-qualified nominee. Many intelligent, decent, and hard-working Americans volunteer to contribute as appointed public servants. They are well qualified, but all too often these days, they can't get through the Senate. This has serious consequences on all Federal agencies and our judiciary.

Yesterday, we saw an incredibly astonishing Republican filibuster of the nomination of Caitlin Halligan to serve in the D.C. Circuit Court of Appeals. The fact is, those voting against her nomination couldn't come up with a good reason. She had been found by the ABA to be unanimously "well qualified," she had an amazing resume, and she was rejected on a filibuster initiated by the Republican side. That is unfortunate.

I would just say to my Senate Republican colleagues that I think Richard Cordray has the background and experience to lead this agency. He should be given a chance. I know the banks aren't happy that anybody is watching them. These financial institutions—payday lenders and the rest—would rather do their business without anybody looking over their shoulders.

Holly Petraeus is the wife of General Petraeus. She has been working with the Consumer Financial Protection Bureau to stop the exploitation of men and women in military service. She came by my office to talk about what this agency is doing to protect these families. Sadly, some of these families are exploited so badly that they are forced out of the military and have to be discharged. We don't want that to happen. We don't want it to happen to American families who unsuspectingly find themselves lured into financial arrangements that are totally unfair.

Richard Cordray is competent, qualified, and an honorable public servant. He deserves an up-or-down vote. We are going to have that vote probably tomorrow, and I hope he will be confirmed and given an opportunity to lead this important agency.

Mr. President, I yield the floor.

Mr. THUNE. Mr. President, I ask unanimous consent that when I complete my remarks, the Senator from Wyoming, Mr. BARRASSO, be allowed to follow me.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### KEYSTONE XL PIPELINE

Mr. THUNE. Mr. President, the President of the United States has said repeatedly that he makes jobs his top priority, he wakes up every morning thinking about what he can do to create jobs and how he can create jobs. Yet we have the greatest shovel-ready project in the country right in front of us, and when it comes to that particular project, for some reason the President is suddenly not interested. I think we have to ask the question of why that is. I think there are probably a number of reasons, most of which have to do with politics and not the economy and not jobs because clearly this is a subject on which there is no debate when it comes to the job-creation potential there, the impact it would have on the economies of multiple States in our country and what it would do for the issue of energy security.

The project to which I am referring is the Keystone XL Pipeline. The Keystone XL Pipeline is a project that has been under review now for the better part of 3 years. In fact, there have been two environmental studies. If you look at all of the due diligence that has been done, it has clearly been reviewed, it has been analyzed, it has been studied, and it has been scrutinized. It has gotten to the point now where it is time to move forward, time to make a decision on this.

Ironically and I think sort of surprisingly to a lot of people, recently the administration said they are not going to decide this now, for 18 months. They are going to put it off for 18 months—interestingly enough, from a timing standpoint, until after the next election. I think it is unfortunate that is the case because, again, if your No. 1 priority is job creation, you have one here ready to go today that could be under construction, and it would immediately create 20,000 jobs in this country, and it would create \$7 billion of investment and a lot of revenue for State and local governments, many of which desperately need it.

In my own State of South Dakota, the Keystone XL Pipeline would traverse my State of South Dakota as the oil that comes from the oil sands area up in Canada makes its way down to the refineries and other parts of the country, comes through South Dakota, and just in our State alone that would be about \$½ billion of economic activity, meaning hundreds of jobs and revenue for a lot of State and local governments.

This project in my State, like so many States where it comes through, where it impacts—there have been a number of opportunities for people to be heard, to get their input made on this. It has been going on now for 3 years. You finally get to a point where you have to say it is time to make a decision one way or the other. Clearly,

my view on this is that this is a project that should move forward. But one way or the other, the President of the United States and his administration ought to be acting with some finality on this subject now, not waiting 18 months, not waiting until after the next election because it is politically expedient to do that, but making a decision now. Why is that? Because, if it does not get done here, that oil from the oil sands area in Canada will go somewhere else and some other country around the world will benefit from that. It will not be the United States, it will not be refineries here in this country, it will not be the citizens of America—who have a good relationship with our neighbor to the north. Canada is our biggest single trading partner. We do about \$640 billion of bilateral trade every single year with Canada. It makes a lot of sense, if you are thinking about energy security, if you are worried about the dangerous dependence that we have on other countries around the world for our energy needs, that if we are going to get energy we get it from a country with which we have a good relationship, a country that is friendly and a country with which we do a tremendous amount of trade.

If we cannot move forward, it is going somewhere, probably to Asia, probably to China. China will get the benefit. The citizens of China will get the benefit of this project rather than having the American people benefit from all this project would entail if we could get it approved here.

But we ought to at least make a decision. We have all these discussions in this country, all the rhetoric coming from the other side about how it is so important that we create jobs in this country. Yet the administration seems willing to disregard that and say we are going to make what is clearly a political decision and put this off for 18 months until after the next election.

I think it is interesting to note what some are saying about this, and frankly even what the President himself has said as recently as last April about the importance of getting energy from countries that are stable and friendly. This is something the President said:

Importing oil from countries that are stable and friendly is a good thing.

That is something the President of the United States said as recently as last April. There is a letter that went from 22 congressional Democrats to the President, telling him that America needs the Keystone XL Pipeline. Twenty-two Democratic Members of the House of Representatives weighed in on this issue. We have had Democratic Senators here as well who weighed in with the administration and weighed in publicly and said this is an important project that needs to be completed.

You even have the labor unions. Traditionally you would think of them as

part of the President's political base. What are they saying about this? The AFL-CIO said:

For America's skilled craft construction professionals, any discussion of the Keystone XL Pipeline project begins and ends with one word: JOBS.

That is what the AFL-CIO is saying. Laborers' International Union of North America says it is:

... not just a pipeline, but it is a lifeline for thousands of desperate working men and women.

You have bipartisan support here in Congress. You have the working people, the organizations of this country that represent working people, weighing in saying this is a project that needs to be approved, that would create jobs, that would address some of the economic angst we are feeling in this country, and here we are faced with this unnecessary delay.

We have legislation that has 40 cosponsors in the Senate. It was introduced last week. Many of our colleagues have taken the lead: Senator HOEVEN of North Dakota, Senator JOHANNIS from Nebraska, Senator MURKOWSKI, Senator BARRASSO, who is here on the floor, and others who believe so strongly in the issue of economic growth, job creation, energy security, national security, that we have introduced a bill that would allow this project either, No. 1, to move forward or to have to provide a rationale why it would not move forward. It is pretty simple, straightforward legislation. It would allow 60 days from enactment of the legislation for a decision to be made about the permit, one way or the other. Either it gets permitted or, on the contrary, the President gives an explanation as to why it should not be permitted. But at least we get a decision made so there is some economic certainty for the people behind this project, the people who are making this investment, about whether it is going to go forward.

One thing we hear over and over from small businesses across this country—and large businesses, job creators—is we need economic certainty. We cannot continue to operate in this complete cloud of economic uncertainty if we are going to put investment out there and create the jobs that go with that investment.

Mr. President, 700,000 barrels a day is the equivalent of what we get daily from Venezuela. If we could get 700,000 barrels of oil today from Canada, a friendly neighbor to the north, or 700,000 barrels from Venezuela or any other countries from which we import oil, it seems so logical and such a no-brainer for us to be able to trade and interact and to have this economic relationship with Canada on this particular project. It does come across that way, as I said, in many parts of the Dakotas and Montana. It would encourage greater oil production here in

this country as well, because you have the Bakkan Reserve in North Dakota and Montana which we would be able to access for this pipeline to be able to get some of their energy to refiners around this country. It is an "all of the above" domestic energy strategy: More domestic oil, more alternative fuels, more innovation. It is all these things we need when we talk about energy security. But clearly in this case, for some unexplained reason, the administration has concluded that this project should not go forward.

There was a concern raised earlier on about the State of Nebraska and the route the pipeline was taking. That issue has been addressed. The leaders in Nebraska—Senator JOHANNIS and the Governor of Nebraska—have come together behind an alternative route which I believe was agreeable to the company, TransCanada, so you can no longer hide behind that and use that as a shield. The legislation we are introducing would make, of course, this subject to States rights and having States such as Nebraska intervene and work with the company to find this alternative route. It also would ensure and require strong environmental protections in the legislation. So that issue is something the legislation has addressed.

More than anything else, what it does is it at least forces some action. It at least says we are going to be serious about job creation in this country or we are not. We are going to support a shovel-ready project that could create 20,000 jobs and start immediately or we are not. All this rhetoric and all the hot air that comes from people here in Washington, DC, about wanting to create jobs, this is putting it to the test. This is where you have to put up or shut up when it comes to whether you are serious about creating jobs in this country.

I hope my colleagues here in the Senate on both sides of the aisle—because I believe this is a bipartisan issue—will work with us to advance this legislation. There is some thinking that perhaps the House of Representatives, the other body, may include it in some legislation they send us that could be coming this way in the not too distant future.

If that is the case, I hope we will pick that up and act on it because if we are serious and mean what we say about job creation in this country, there is no better way than to put some certainty behind this project. Again, it would be one thing if this had not been studied and overstudied and evaluated and analyzed and scrutinized—but it has, over and over again, now for the better part of 3 years. Mr. President, 700,000 barrels of oil today from Canada and the Bakkan region in North Dakota and U.S. refineries or 700,000 barrels of oil to some other place around the world that will benefit from it and, just as

important if not more important, 700,000 barrels of oil the United States will have to import from some other country around the world that perhaps is not nearly as friendly as our neighbors to the north.

This is not complicated. This is a pretty straightforward issue and one where I don't think there is anything but support from the States that are impacted by this, anything but support from the leadership, political leadership at the State level and local levels. I am not suggesting there is—there is no project that has unanimous support. There are people who oppose this as there are people who oppose almost anything that happens in this country. But the huge majority of people I think in the States that are impacted see this for what it is—a positive, forward-looking project that would address so many of the important priorities for this country right now: economic growth, job creation, energy security, national security, addressing some of the needs the State and local governments have for additional revenue. All these issues are addressed with regard to this project.

It is mystifying as to why the President of the United States and his administration would put this decision off until 18 months from now after the next election, other than purely and simply political reasons and motivations. That is wrong for the American people. It is wrong for this project. It is wrong for jobs. It is wrong for the economy. I hope this body, the Senate, will take steps to rectify that by putting a date certain out there by which this project is at least acted on, at least decided, at least permitted or not permitted—hopefully permitted—so these jobs can be created and we can get this economic activity underway in these many States.

I yield the floor.

The PRESIDING OFFICER (Mr. MERKLEY). The Senator from Wyoming.

#### A SECOND OPINION

Mr. BARRASSO. Mr. President, I come to the floor today as I have so many times since the President's health care bill was signed into law, with a doctor's second opinion. I do that because I practiced medicine in Wyoming, taking care of families from around the State for about a quarter of a century.

When I talk to patients at home and I talk to people on the street, when I talk to folks all around my State and around the country, what I hear they want from a health care law was an opportunity to have the care they need from the doctor they want at a cost they can afford. But what we have gotten in this country through this administration and this health care law is a law that is bad for patients, in my opinion; bad for providers, the nurses

and doctors who take care of those patients; and terrible for American taxpayers. So I come to the floor again with a second opinion today because I am thinking about job creation.

We just heard about the Keystone XL Pipeline and the opportunity there with a shovel-ready project to get people back to work. I am reminded what former Speaker of the House NANCY PELOSI claimed after the health care law was passed. She said it would "create 4 million jobs." She went on to say "400,000 jobs almost immediately."

As we all know, that prediction never came true. In fact, the nonpartisan Congressional Budget Office said the health care law will actually encourage some people to work fewer hours or to withdraw from the labor market altogether.

This past week when the employment statistics came out we saw that over 300,000 Americans have withdrawn from the labor market altogether.

It is interesting that about the same time the health care law was signed, March 2010, Senator CHUCK SCHUMER, the New York Senator, claimed on "Meet the Press":

... as people learn about the bill, and now that the bill is enacted, it's going to become more and more popular.

In fact, this health care law is less popular now, today, December 2011, than it was at the time it was signed into law.

We look at all of these predictions that never came true. It has been 20 months. The health care law's popularity remains low. The law is in front of the Supreme Court to deal with the constitutionality of this government going into the homes of American people, telling them they must buy a product. It is clear that Washington Democrats and the President have miscalculated. They made promise after promise to the American people. They asked families, they asked businesses all across the Nation, to trust them. The President promised that if you like what you have, you can keep it. The American people know that promise has been broken. The President said that premiums, health care premiums or insurance costs for families would drop by \$2,500 per family per year. We know that the costs have gone up higher than if the law had never been passed in the first place.

Week after week we hear of more unintended consequences within the law, glitches that are found which show additional problems with the law and additional promises of the President being broken.

The American people know that they do not like this health care law. When you ask them do you think this health care law was passed for you or for someone else, most Americans will tell you that they think it was passed for someone else.

Today I want to talk about two specific examples of problems with this

health care law and the possible unintended consequences and some of the repercussions of the things that have happened with this health care law.

One has to do with the labor statistics that came out on December 2 of this year. They released updated payroll employment and unemployment numbers. The Bureau of Labor Statistics data actually shows that health care employment was up in November. It was up for all the wrong reasons. The problem is, the health care law's excessive mandates and burdensome regulations are prompting the health care industry to create additional administrative jobs, not caregiver jobs.

The health care law was supposed to actually work to get more doctors and more nurses and more x-ray techs and physical therapists to take care of patients, but that is not what happened. Now we see it is administrative jobs that are up, not caregiver jobs. As a matter of fact, USA Today printed a half-page article, and the title was "Health Care Jobs Grow . . . in Administration."

The article actually talked about a New Hampshire hospital, and that hospital—according to the article—was forced to eliminate 5 percent of its workforce. So we have a hospital eliminating 5 percent of the workforce after the State cut Medicaid funding last year. So here is a hospital where 5 percent of the workforce is cut. Many of those workers were nurses and other caregivers. When I hear caregivers, I think of physical therapists, radiation technologists, nurse's aides.

Yet in spite of the fact that they had to eliminate 5 percent of its workforce, they are actually still hiring. How can that be? Let's listen to what the hospital's vice president, Mark Whitney said. He said:

We need to deal with new technology, new services, new regulations, electronic health records, government reporting requirements on quality . . . a lot of this is related to the new Federal health law.

So they are eliminating nursing positions, eliminating positions of caregivers and hiring more people to push paper.

The President and the Democrats in Congress promised their health care law would expand health insurance coverage. Look at what is happening now. More and more people are pushing paper.

It is interesting that what the President and Democrats did not tell the American people is that the health care law's oppressive mandates, burdensome regulations would actually cause health care employers to lay off or stop hiring the very health care professionals needed to treat patients.

Instead, the health care employers must be hiring more clerks, more administrators, more paper pushers, all in an effort to figure out and then comply with the health care law's rules and

mandates. I do not believe that is the change most Americans wanted when they started to think about health care reform.

The second example I would like to give is from a column in the Washington Post, December 2 of this year—just a week or so ago—written by George Will. The article is titled “Choking on Obamacare.” The article talks about the health care law’s crushing insurance mandates and how those influence both small and large businesses in terms of their willingness to actually hire new workers.

When we have this kind of record unemployment, such as we are dealing with in this country, we want to have businesses hire more people, get people back to work. That is what makes America grow. That is what helps our economy, putting people back to work.

In the article, they use the example of Carl’s Jr. and Hardee’s restaurants. There are about 3,200 of those restaurants around the world. The parent company said they have created about 70,000 jobs, and they want to hire more workers. But the CEO of the company, Andy Puzder, said they cannot hire more workers because they don’t know how much they will need to spend on health care. They are planning to spend about \$18 million on health care, and they say that is just a guess.

If someone is running a business, they want to be able to figure out what their future costs are going to be, what the expenses are going to be, and they would rather have a little more predictability than just guessing. Thanks to the health care law’s complex formulas and many regulations which have not yet been released and many of the uncertainties that continue to exist, this is a company that is going to have to guess about how much they will need to spend on health care.

What business can afford to guess what one of their largest costs is going to be? They are guessing they are going to have to spend about twice the amount of money on health care as they did building new restaurants last year. So they talk about building new restaurants—and those are construction jobs and jobs for the people who work in the restaurants providing services—and they are going to end up spending twice as much on health care as building new restaurants. It doesn’t take a lot to realize that hindering a company’s ability to build new restaurants means fewer available jobs for construction workers and for service suppliers in a struggling economy.

The CEO of the company is right when he says that “employers everywhere will be looking to reduce labor content in their business models as Obamacare makes employees unambiguously more expensive.”

If we want to spur the economy and economic growth and job creation, Washington must take its shackles off

our job creators. This is just one more reason why the President’s health care law must be repealed and replaced.

I thank the Chair.

I yield the floor and note the absence of a quorum.

The PRESIDING OFFICER (Mr. BEGICH). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FRANKEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CORDRAY NOMINATION

Mr. FRANKEN. Mr. President, I rise today to strongly support Richard Cordray, the President’s nominee to be Director of the Consumer Financial Protection Bureau.

Three years ago our economy was tumbling into the deepest recession since the Great Depression. In the fall of 2008, the stock market was plummeting, unemployment was skyrocketing, and there were daily reports of yet another financial institution crumbling. Our economy was in a chaotic tailspin. That was only 3 years ago.

Today we are in a slow and tenuous recovery. Unemployment is still way too high. Millions of Americans are out of work and have been for some time. Long-term unemployment is staggeringly high. Retirement accounts are still reeling. Yet in the Halls of Congress we are dominated by discussions of our Nation’s debt and deficit. In fact, we are doing little else. These discussions are necessary. We need to tackle our deficits and our long-term debt. But as we do, we shouldn’t lose sight of how we got here.

The lessons we learned in the aftermath of the 2008 crash shouldn’t be so quickly forgotten. The crash of 2008 was driven in no small part by unfair practices in the mortgage industry which led to many consumers being trapped in loans they didn’t understand and couldn’t afford. It should come as no surprise that this was as a result of increasing deregulation of the banking industry.

So in response, Congress passed the Dodd-Frank Wall Street Reform and Consumer Protection Act. Dodd-Frank, which was passed into law last year, sought to rein in abusive practices, protect American consumers, and prevent future meltdowns. One of the bill’s centerpieces was the establishment of the Consumer Financial Protection Bureau. The CFPB is the first Federal financial regulator devoted solely to looking out for the best interests of American consumers and to do so before a crash and before any taxpayer-funded bailouts are necessary.

The CFPB’s mission is a commonsense one. The CFPB is tasked with en-

suring that consumer financial markets are fair and competitive; that consumers have clear information about financial products; that financial practices are not unfair, deceptive, or abusive; and that consumer financial regulations are improved and streamlined. The CFPB seeks to empower American consumers to make the best financial decisions for their families, and that can only help out our Nation as a whole.

Several months ago, on the 1-year anniversary of the enactment of Dodd-Frank, there was good news and bad news. The good news was that the CFPB officially opened its doors. It has already hired staff and begun some of its work. In fact, a while back I met with Mrs. Holly Petraeus, who is heading up the Office for Service Member Affairs at CFPB. She wanted to discuss a few problems that disproportionately harm members of our armed services.

We talked about ways to educate servicemembers about the potential downfalls of certain types of loans. This is exactly the type of work I am so happy that the CFPB has begun. That would be the good news.

The bad news is the CFPB still does not have a Director. Under Dodd-Frank, the CFPB cannot fully do its job until a Director is in place. It can do some things, but it will be limited until the Senate confirms a nominee. President Obama has nominated Richard Cordray. Rich is an impressive figure, and he has my full support.

Rich Cordray has been on the front lines protecting homeowners from risky and sometimes illegal practices of mortgage servicers. In 2009 he was the first State attorney general to take on a mortgage servicer for violating consumer laws.

Last year, he continued his strong record of standing up for homeowners when he represented the people of Ohio against GMAC Mortgage for signing thousands and thousands of affidavits allowing foreclosures to proceed despite the fact that nobody at the company had any knowledge of these cases. So I want Rich Cordray at CFPB to put his previous expertise to work.

During his tenure as attorney general, he also took on the credit rating agencies on behalf of Ohio’s pensioners. Because of the rating agencies’ reckless behavior, hard-working Ohioans lost over \$450 million from their pensions. Rich Cordray is exactly the kind of strong consumer advocate that CFPB needs.

Further compounding the bad news is that most of my colleagues on the other side of the aisle have vowed to oppose any nominee until the CFPB is substantially altered—literally any nominee. They claim that changes to the CFPB need to be made before they will even look at a nominee. The proposed changes supposedly rectify the unprecedented authority—unprecedented authority—granted to the CFPB

and impose real checks on that authority. In fact, the CFPB is subject to unprecedented limitations. It is the only banking regulator with rules that are subject to veto power by a group of other regulators, the only banking regulator subject to Small Business Regulatory Enforcement Fairness Act panels, and the only banking regulator with a budgetary cap.

We already have had this debate. During the consideration of Dodd-Frank last year, there were attempts to weaken the CFPB, and those attempts were defeated. Now the people who lost that debate are taking a second crack at consumers and trying to bring down this Bureau. Only this time, instead of debating on the Senate floor, they are hijacking the advice-and-consent function of the Senate. Is that a precedent that we want to set? I do not believe that is what the Founders of this great Nation conceived when they gave this function to the Senate.

I urge my colleagues instead to consider this nominee on his merits. Rich Cordray has demonstrated he is looking out for middle-class families. He is looking out for homeowners who have been scammed by mortgage servicers. He is looking out for pensioners who have lost their pensions at the hands of Wall Street recklessness. He has been endorsed by former Republican Senator and current Ohio attorney general Mike DeWine. He is exactly—exactly—the type of person we need at the helm of this critical Bureau, and this Bureau cannot do its job until he is confirmed.

I hope my colleagues will reconsider their position and instead do what is right for American consumers. I hope my colleagues will join me in supporting Rich Cordray to be the first Director of the Consumer Financial Protection Bureau.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MANCHIN). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CARPER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. HAGAN). Without objection, it is so ordered.

#### DELAWARE DAY

Mr. CARPER. Madam President, today is Delaware Day. Something very important for our State and our Nation occurred on December 7, 1787. Senator COONS is here. I ask him to take a moment and share with our colleagues what that was all about. What happened then at that Golden Fleece Tavern?

Mr. COONS. I thank the Senator for entering into this colloquy about Delaware Day. As some folks may know, if you look at the Delaware flag, as the

Senator mentioned, there is the date, December 7, 1787. That is the day 30 Delawareans, elected delegates, gathered at the Golden Fleece Tavern in Dover and voted unanimously to make Delaware the first State to ratify the U.S. Constitution. That is why our State moniker is—

Mr. CARPER. The First State.

Mr. COONS. Yes, the First State.

Mr. CARPER. The small wonder. Thirty of those guys who were there that day—I would like to say they were drinking hot chocolate. I am not sure what they were drinking at the Golden Fleece Tavern, but the outcome was a good one. For one whole week after that, Delaware was the entire United States of America. Who was next, Pennsylvania? Maybe Pennsylvania, maybe New Jersey. Then the rest followed and I think, for the most part, it turned out pretty well.

Mr. COONS. One of the things I have always been struck by is that it was 11 years before that that Delaware actually, on Separation Day, on June 15 of 1776, acted both to declare its independence from Pennsylvania and its independence from the King of England, and by doing so acted in an incredibly risky way because, of course, had the Continental Congress on July 4 not chosen to ratify the Declaration of Independence, Delaware would have stood alone, and arguably hung alone, for having taken the risk of stepping out first.

Delaware has a tradition of being first—first in declaring its independence and acting to secure its independence, and in ratifying the Constitution, which set the whole structure that ended the debate over the Articles of Confederation and moved toward the Federal system, one where we look to each other as States and look to this government for the provision of and the securing of our liberty through the balance of justice and liberty that we rely on so much. What else are we doing to celebrate this great day?

Mr. CARPER. The Constitution that was ratified that day—the thing about it is that it is the most enduring Constitution of any nation on Earth, the most copied or emulated Constitution of any nation on Earth as well, and a living document that provides for us to change and update as time goes by. It is remarkable, the role we played in getting the ball rolling in this great country of ours.

I want to go back to July 1776, if I can. Not far away from the Golden Fleece Tavern, there was a guy named Caesar Rodney, who rode his horse. Does the Senator want to share that story?

Mr. COONS. That made it possible for our delegation to be represented in Philadelphia and for us to commit to the Declaration by breaking a tie between the other representatives of Delaware in the Continental Congress.

Mr. CARPER. If you look at the back of the Delaware coin, you might say why is Paul Revere on the back of that coin? Well, that is not Paul Revere, that is Caesar Rodney riding the horse from Dover to Philadelphia. For people who are familiar with Dover Air Force Base, where big planes come in—the C-5s and C-17s that fly all over the world—as you come in on the approach, the runway heading north-northeast to land, you are very close to flying over an old plantation house where a guy named John Dickinson used to live. There is a John Dickinson high school in Delaware, which was named after him. He was also a guy who was involved in the Constitutional Congress and also involved in the Declaration of Independence, and the penman of the Revolution. So if you think about it, there at the Golden Fleece Tavern, the Constitution was ratified. Caesar Rodney, from Dover, departing from not far from there, casts the tie-breaking vote for the Declaration of Independence, and the penman of the Revolution, growing up in what is now the Dickinson plantation. There is a lot of history there, especially for a State that doesn't have a national park.

Mr. COONS. Although we have a senior Senator who is tireless in his effective advocacy of our State.

Mr. CARPER. Maybe we can do something about that with the Senator's help and that of Congressman CARNEY, and our colleagues in the Senate and the House—and maybe including the Presiding Officer from North Carolina. In closing, believe it or not, the economic value of national parks is actually charged for every one of our States.

The most visited sites in the United States among tourists from foreign countries are our national parks. The economic value to the State of North Carolina—I was told last year—from their national parks was \$700 million. Not bad.

Mr. COONS. If I might, later today we are having our first Delaware Day reception in one of the Senate buildings. It is a way for us to promote and celebrate what is great about Delaware.

One of the things I treasure most about Delaware is our unique political culture—a culture that focuses on consensus, on reasoned compromise, on bringing folks together across from what is, in some other places, a sharp partisan divide to find reasonable, principled paths forward to tackling the challenges that face our State. It is that consensus, commonsense approach I know my senior Senator brought to his two terms as Governor and has brought to the Senate. Our Congressman, who was on national television this morning with a Republican co-sponsor of an initiative, has also made that a hallmark of his tenure. I know our Governor has as well.

I wanted to suggest that one of the things that makes Delaware unique, special, valued, and first isn't just our agricultural products, it isn't just our great and enjoyable food products, and it isn't just our unique history in the beginning of our country but it is also how we continue to find ways to build bridges across the divide that so many Americans watch us in the Congress wrestling with at this moment and that I think, in our home State, we have managed to find a good path forward.

Mr. CARPER. Madam President, we call this the Delaware way. As my colleague from Delaware knows, whenever I run into people who have been married a long time—50, 60, 70 years—I ask them what is the secret to being married so many years. They give some funny answers, but they also give some very pointed answers. One of the best answers I have heard—and I hear it over and over—as the reason why they have been married such a long time is because of the two Cs. I say: What are the two Cs? They say, “Communicate and compromise.”

I would suggest that is what we do pretty well in our State. It is not only good advice for creating an enduring marriage, but it would also be good advice for us in this body, in this town, to do a better job—both parties—at communicating and compromising. We show, I think every day, in our State, if we do those things, take that seriously, the result is pretty good. We could get a better result here if we keep that in mind.

With that, I think we have said our piece. It is Delaware Day, one more time, and may the spirit of Delaware and the Delaware way permeate this place as well.

I have enjoyed being with my friend and colleague in this colloquy.

Mr. COONS. I thank my colleague.

Mr. CARPER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HARKIN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### NOMINATION OF RICHARD CORDRAY

Mr. HARKIN. Madam President, I have come to the floor on numerous occasions this year to discuss the distressed state of America's middle class. In fact, in our committee, we have had a series of hearings looking at the state of the middle class and what is happening to the middle class in America. In recent decades, our Nation's once secure middle class has struggled in the face of stagnant wages, declining

job security, rising indebtedness, and disappearing pensions, not to mention sharply higher costs for health care, education, food, and energy.

It wasn't always this way. In the three decades after World War II, America's middle class grew rapidly. Incomes rose steadily as the middle class secured its fair share of the expanding national wealth. The Federal Government invested generously in infrastructure building, innovation, and education, vastly expanding opportunity for people to move into the middle class. America became a more equal, fair, and just society, built on a solid bedrock of a strong middle class.

I am an example of that. My father had an eighth grade education. He was a coal miner. My mother was an immigrant with very little formal education. Yet their three children were able to go to good schools, get good jobs, and get an education. All three of their children graduated from Iowa State University, a great land grant college, because it didn't cost very much and we could afford to go there and we were able to enter the middle class from those humble beginnings.

But beginning in the 1970s, much of that progress started to come to a halt. Our manufacturing base declined, and the U.S. economy became increasingly dominated by financial markets and Wall Street—a trend that was accelerated by ill-advised deregulation. Soaring profits and sky-high salaries attracted more of our Nation's best and brightest to pursue careers in finance at the expense of engineering, teaching, and public service.

Wall Street bankers were emboldened by deregulation. They were incentivized by huge salaries and bonuses to take ever greater risks, and they devised ever more exotic and risky investment schemes. As we all know, in 2008, this frenzy of greed and recklessness culminated in the catastrophic meltdown of our Nation's financial system. This economic crisis was a hammer blow to our already struggling middle class. The value of Americans' homes and retirement accounts plummeted, millions lost their jobs or were forced into foreclosure, and hopes for the future dimmed.

In the wake of this financial crash, with its pervasive damage to the middle class, the American people demanded action to rein in the worst abuses of Wall Street and to prevent a replay of 2008. This led to the Dodd-Frank Wall Street Reform and Consumer Protection Act—let me repeat that, the Wall Street Reform and Consumer Protection Act—the most sweeping reform of our financial system since the Great Depression. For hundreds of millions of American consumers in their everyday lives, no aspect of this law is more important and transformative than the creation of the Consumer Financial Protection Bu-

reau. Again, read the words of the legislation. It is the Wall Street Reform and Consumer Protection Act. Therefore, a big part of the bill was to build in consumer protections, and one of those was to create the Consumer Financial Protection Bureau.

I have come to the floor in strong support of the nomination of Richard Cordray to be Director of this Consumer Financial Protection Bureau. The idea behind this bureau is very simple. We need a cop on the beat looking out for the best interests of consumers who use financial products, just as we have regulators looking out for the financial health of banks.

A strong Consumer Financial Protection Bureau will ensure consumers are not lured into debt through hidden fees, for example. It will simplify disclosures and reduce paperwork so consumers aren't faced with mountains of paperwork they can't understand. It will oversee providers of consumer credit, such as payday lenders, which for years have acted like banks without facing any kind of banking regulation. Additionally, as student debt surpasses credit card debt as the largest source of consumer debt—which has already happened, by the way, that student debt right now is larger than credit card debt—this Consumer Protection Bureau can play a critical role in helping families better understand the increasing challenges of facing a college education and financing it as well as bringing some sanity to the private student loan marketplace.

Finally, a key function of the Consumer Financial Protection Bureau will also provide help to our veterans through the Office of Service Member Affairs. Sadly, too often our servicemembers fall victim to abusive financial traps upon their return home. The Bureau has made an outstanding choice for leadership of this office with the selection of Mrs. Hollister Petraeus. But cynically, my Republican colleagues have chosen to protect the unscrupulous lenders that prey on military families. They would rather neuter the entire agency, have no Director, than to fully empower Mrs. Petraeus to protect military personnel and their families from all forms of predatory lending activities.

These steps are essential elements of helping to tilt the scales of our economy back into balance so that once again we put the interests of the 99 percent of Americans who use financial products ahead of the 1 percent who profit from them.

I was deeply disappointed when our Republican colleagues voted against the Wall Street reform bill that should have been overwhelmingly a bipartisan bill. But now the bill is law, and guess what. My Republican friends are doing everything in their power to prevent it from doing its important job.

Earlier this year, 44 Republican Senators served notice that they would not

confirm anyone—let me repeat, they would not confirm anyone—to the position of Director unless structural changes are made to the Bureau that would effectively take away its ability to stand up for consumers. The changes they have demanded are unfair and unreasonable. No other independent financial regulator has its rules subject to veto by other regulatory agencies. To suggest that the only regulator with a primary mission to protect everyday hard-working Americans should face unprecedented levels of oversight simply does not make sense. Once again, the Republicans have brazenly put the interests of Wall Street, payday lenders, and unscrupulous mortgage lenders ahead of the interests of Main Street consumers.

To restore the American economy to its place, we need a financial system that works for them. This means a financial system where consumers choose services based on a full and transparent understanding of the costs of those services. But absent a Director, the Consumer Finance Protection Bureau won't be able to supervise payday lenders, debt collectors, or private student lenders. They won't be able to make it easier for the good actors in the financial system—our community banks, for example, or our credit unions—to compete against those who are making a large profit by unfairly taking advantage of unsuspecting consumers.

Richard Cordray is a superb choice to serve as the first Director of this Bureau. As attorney general of Ohio, he was a strong and fair advocate for consumers. His work has earned him the endorsement of bankers, CEOs, and civil rights leaders across the State of Ohio. He is a public servant of the highest caliber who deserves to be given the opportunity to lead this critically important Bureau.

As a matter of fundamental fairness to hard-working Americans on Main Street, we need an effective, evenhanded Consumer Financial Protection Bureau. Mr. Cordray deserves the opportunity to lead this new Bureau.

I call upon my Republican colleagues, at long last, to put the interests of consumers ahead of the interests of those whose reckless pursuit of profits and bonuses have caused so much harm to our society and economy. I call upon my Republican colleagues to ignore the legions of Wall Street lobbyists who are urging them to disable and, if possible, kill the Consumer Financial Protection Bureau.

Richard Cordray is a dedicated and impartial public servant who will put the best interests of American consumers first. We should give him that opportunity. I hope my colleagues will join me in strongly supporting his nomination.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Mississippi.

#### THE ECONOMY

Mr. WICKER. Mr. President, we are now as a country squarely in the middle of the Obama economy. It is a period of slow growth, persistently high unemployment, with many potential workers having abandoned the playing field and simply given up looking for work.

There is a growing awareness among our countrymen that the policies of President Obama—the policies enacted during the first 2 years of his administration under Democratic supermajorities—have made matters worse.

We have legitimate disagreements in this Capitol concerning the solutions to the problems we are experiencing with the Obama economy. My colleagues and I on this side of the aisle would enact aggressive regulatory reform, an expansive energy policy, and we would vastly limit the size and scope of the Federal Government. That is our plan, and it is a plan about which we could have genuine disagreements.

What I want to talk to my colleagues about today, though, is what I would suggest is a manufactured dispute over this issue of the extension of the payroll tax. That is an issue on which really there is a wide consensus on the Democratic side of the aisle, over here on the Republican side, and down the hall in the other body.

The President said only a few months ago that it is not wise to raise taxes on anyone during a recession. And we certainly are in a recession. In recent weeks, the President has suggested that perhaps he has abandoned this position and changed his mind and that we should perhaps raise taxes on some people even though we are still in a recession. But Republicans have consistently agreed with what the President said earlier: We are in a recession, and this is no time to raise taxes on anyone. This means we shouldn't raise taxes on the working poor. It means we shouldn't raise taxes on employees working on the assembly line or working in the retail sector. It means we should not raise taxes on job creators. We should not raise taxes on investors on whom we depend to provide the capital to create jobs. We shouldn't raise taxes on anybody because we are in a time of recession.

Let's put this into a historical context. Last December, at a time when Democrats still had supermajorities over here in the Senate, when Speaker PELOSI was still in charge in the House of Representatives with her majority there, this Congress on a bipartisan basis enacted legislation to keep in place the Bush-era tax cuts, to leave those rates in place for all Americans at whatever income level, and we also on a bipartisan basis enacted a cut in the payroll tax. This is the Social Security tax that all workers pay regardless of income, the so-called FICA taxes that you see on your pay stubs.

Last December, that tax cut dropped the payroll tax for employees from 6.2 percent to 4.2 percent. I supported that. Republicans and Democrats supported that. It is up for renewal, and there is a huge majority of Members of the House and Senate who want to renew that. The distinguished majority leader, Senator REID, however, has suggested that not only do we keep the lower rate of 4.2 percent rather than 6.2 but we actually lower that FICA tax to 3.1 percent.

We can have an extension of the current FICA tax rate. Democrats know it, the White House knows it, and the Republican conference knows it. But one problem must be addressed, and I think both parties want to address this: We need to offset the cost to the Social Security trust fund of these lower payroll tax rates. Why do we need to do this? Because when the law says we are really supposed to be taking in 6.2 percent and putting that in the trust fund to make the Social Security Program as solvent as possible and we lower that to 4.2 percent or to less, as the majority leader wants to do, it amounts to a drain on the Social Security system. I think the last thing we want to do with a weak system, which we know can't come out in the end, is to put further pressure on the Social Security trust fund. So both parties have proposed to offset, or pay for, a continuation of the payroll tax cuts.

Last week, the White House unveiled a digital clock at the top of its Web site that counts down to the date when the payroll tax cuts will expire at the end of the year. This somehow suggests that someone in this town wants the payroll tax to go back up to 6.2 percent. This is pure political gamesmanship. We can have a bipartisan solution to keep the payroll tax at 4.2 percent, but we must pay for it.

The distinguished majority leader, Senator REID, had a proposal last week not only to lower the payroll tax to 3.1 percent but to pay for it by raising taxes on someone else. This violates what the President said several months ago: We don't need to raise taxes on anyone.

We can pay for a continuation of this, as Republicans have proposed to do, by offsetting it with smart spending cuts, a freeze in Federal pay, a reduction in the Federal workforce, and means testing of some benefits at the upper income levels. We proposed this last week, but it was shot down by the majority in this body with, to me, a contrived plan to actually lower the payroll tax and shift those taxes to someone else.

We are told that this week, just like last week, we are going to have some more political theater. The majority leader will propose once again a tax increase on others so that we can keep this payroll tax cut, and we will propose a side-by-side which is essentially

the pay-for plan to keep the tax rate as it is. Both of these will fail because the majority leader intends for them to fail, and essentially we will have wasted 2 weeks at the end of this session of Congress by creating a manufactured disagreement for the sake of scoring political points.

Maybe after we get this week over with and we have had yet another week of gamesmanship, the Senate can get down to the business of passing a simple extension of the payroll rates in their current form and to offset that action with savings. There is an absolute majority in the Senate and in the House to do just that. In doing so, we can end 3 weeks of political theater with the Democrats trying to score points for 2012.

I wish we could fast-forward to next week and get this important piece of legislation done and enact a continuation of the payroll taxes that a vast majority of Republicans and Democrats support.

The PRESIDING OFFICER (Mr. WHITEHOUSE). The Senator from Louisiana.

#### NATIONAL FLOOD INSURANCE PROGRAM EXTENSION

Mr. VITTER. Mr. President, last week I came to the floor and urged all of my colleagues on both sides of the aisle to come together in a commonsense, bipartisan way and extend for a significant period of time the very important National Flood Insurance Program. That program, which is essential to the country, involves a lot of properties essential to real estate closings, to allow that important part of our economy to happen as we struggle to get out of this recession. That program would otherwise expire 1 week from this Friday.

I also wrote Senator REID that same day, as I came to the floor, urging him to support this legislation, extending this vital program, to be passed quickly, hopefully unanimously, through the Senate.

The good news is that I have reached out to many folks—Democrats and Republicans—since then, and we have continued to build consensus to do that, to make sure there is no threat of the National Flood Insurance Program lapsing yet again, as it did, unfortunately, four times in 2010—no good reason—for a total of 53 days. Every time that happens or is even threatened to happen, within a few days there is great chaos and uncertainty in the real estate market. Good closings are put off. Our economy slows down for no good reason, as we need every closing in sight to do exactly the opposite and to improve the economy. Again, the good news is that we have built consensus, and I think we have reached consensus to avoid that sort of lapse. So I return to the floor today to get that formally done.

I ask unanimous consent that the Senate proceed to the immediate consideration of S. 1958, my bill, to extend the National Flood Insurance Program well into next year, to May 31, which I introduced earlier today.

The PRESIDING OFFICER. The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1958) to extend the National Flood Insurance Program until May 31, 2012.

There being no objection, the Senate proceeded to consider the bill.

Mr. VITTER. Mr. President, I know of no further debate on this measure. I will have a few closing comments after we formally pass it, but I urge its passage.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall the bill pass?

The bill (S. 1958) was passed, as follows:

S. 1958

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. EXTENSION OF THE NATIONAL FLOOD INSURANCE PROGRAM.

(a) PROGRAM EXTENSION.—Section 1319 of the National Flood Insurance Act of 1968 (42 U.S.C. 4026) is amended by striking “September 30, 2011” and inserting “May 31, 2012”.

(b) FINANCING.—Section 1309(a) of the National Flood Insurance Act of 1968 (42 U.S.C. 4016(a)) is amended by striking “September 30, 2011” and inserting “May 31, 2012”.

(c) REPEAL.—The Continuing Appropriations Act, 2012 (Public Law 112-36; 125 Stat. 386) is amended by striking section 130.

Mr. VITTER. Mr. President, I ask unanimous consent the motion to reconsider be considered made and laid upon the table and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. VITTER. Mr. President, in closing, I thank everyone, on both sides of the aisle, who worked in a very commonsense way to get this done. Again, sort of the worst case scenario is what we all experienced in 2010. Four different times in 2010 the program actually lapsed, a total of 53 days. More times than that it came within a few days of lapsing and created great uncertainty in the real estate market.

We do not need any of that. We have been trying to struggle out of a recession and a very bad economy which has been led by a real estate downturn. We need every good closing we can get. Giving the market this certainty over a week before it would otherwise expire is very good as we try to create that certainty and build a better economic climate.

I am happy we came together in a commonsense bipartisan way to extend the National Flood Insurance Program, as is, to May 31. Let me also say in closing I strongly support a full 6-year reauthorization of the program. I have worked on that bill with many others in the relevant Senate committee, the Senate Banking Committee. We have reported a good bill out of committee. I want to get that to the Senate floor and merge it and compromise it in some reasonable way with the House reauthorization.

We need a full-blown 6-year reauthorization of the program with significant reforms. That was obviously not going to happen between now and a week from Friday. It is obviously not going to happen a month or two into the new year. So we needed to create the certainty this extension will create as we continue to work on that full reauthorization.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senator from Washington.

Mrs. MURRAY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MIDDLE CLASS TAX CUT ACT

Mrs. MURRAY. Mr. President, I come to the floor this evening to urge my colleagues to support legislation to extend and expand the payroll tax cut on which middle-class families across America depend. Last week Democrats brought a bill to the floor that would have not only accomplished this goal for our workers, it would have also cut the payroll tax for half of our Nation's employers and eliminated it entirely for businesses who were making new hires.

To pay for this proposal, Democrats proposed a small surtax on millionaires and billionaires; that is, people who are earning more than \$1 million a year. In order to extend and expand the critical tax break for middle-class families and small businesses owners, we thought it right to call on the wealthiest among us—those who can afford it—to pay just a little bit more at a time when a vast majority of Americans are struggling.

Our bill set up a choice, and we thought it was an easy one: Do you vote to extend critical tax cuts for middle-class families or do you vote to protect the wealthiest Americans from paying one penny more toward their fair share?

Unfortunately, almost every Senate Republican chose to side with the richest Americans and filibuster our middle-class tax cut bill. In a surprising

development, their leadership's own bill to simply extend the middle-class tax cuts while protecting the wealthiest Americans was opposed by the majority of Republicans.

Republicans spent months on the Joint Select Committee on Deficit Reduction saying that the tax cuts for the wealthiest Americans should be made permanent, that the wealthiest Americans and biggest corporations should get even deeper tax cuts, the tax cuts for the rich should not be paid for and should be simply added to the deficit, and that a pledge made to a Republican lobbyist named Grover Norquist gave them no choice but to support tax cut extensions.

So I have to say I am truly disappointed to see, once again, that this apparent concern for tax cuts only seems to extend to millionaires and billionaires. Now that a break for the middle class is on the verge of ending in a few short weeks—potentially causing deep harm to our weak economy—those Republicans who fought tooth and nail for tax cuts for the rich are nowhere to be found. In fact, many of them are actively opposing it.

Republicans seem to be operating under the backwards economic principle that only tax cuts for the richest Americans and biggest corporations are worth fighting for. In fact, they have a name for that group of people. They call them the job creators. They believe the only ones who create jobs in America are the rich, and they claim the tax cuts and loopholes they fight for that benefit the wealthy will somehow trickle down to the rest of us.

Well, that is wrong. We know the Republican economic policy has failed us. It was this kind of thinking that turned a surplus into a deficit, that brought our economy to its knees, that failed our middle class and allowed the wealthiest Americans to amass record fortunes, paying the lowest tax rates in decades. It is the wrong way to go. Americans know it and our country has the scars to prove it.

A constituent of mine named Nick Hanauer recently published an op-ed in Bloomberg Businessweek that speaks to this point exceptionally well. Nick is a businessman. He is a venture capitalist in Seattle. He helped to launch more than 20 companies, including amazon.com, and he has a deep understanding of 21st-century jobs and the innovation economy.

Nick wrote that it is not tax cuts for the rich that create jobs—and I want to quote him. He says:

Only consumers can set in motion a virtuous cycle that allows companies to survive and thrive and business owners to hire. An ordinary middle-class consumer is far more of a job creator than I ever have been or ever will be.

He advocates ending the tax breaks for the rich and using some of that savings to give average working families a

break and put more money in their pockets. Nick's logic is clear, and it makes economic sense. It is in line with what the American public believes, and it is exactly why this middle-class tax cut needs to pass.

So while I strongly supported our last bill that would have extended and expanded this tax cut on both workers and employers, it was clear that Republicans were not going to drop their filibuster. So we are back now with a compromise.

Republicans claim to be concerned that our bill was too big, so we scaled it back. They didn't like the surcharge on the wealthiest Americans, so we cut it down significantly and we made it temporary. To make it even more acceptable, we included spending cuts that both sides said were acceptable as well as their proposal to make millionaires ineligible to receive unemployment insurance and food stamps.

The compromise that is before us is fully paid for. It extends and expands payroll tax relief for millions of middle-class families in our country. It will create jobs and provide a critical boost for this economy at a time when we desperately need it.

So I continue hoping that our Republican colleagues will be as focused on tax cuts for the middle class as they are for the wealthiest Americans and largest corporations. I hope they stand with us to pass this critical legislation in time for the holidays because that is what American families want.

I thank the Chair.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MERKLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CORDRAY NOMINATION

Mr. MERKLEY. Mr. President, tomorrow we will be voting on whether to close debate on the nomination of Richard Cordray as Director of the Consumer Financial Protection Bureau. This vote can be framed in terms of his qualifications, but that would be a mistake because folks on both sides of the aisle have noted he is exceptionally qualified for this position. He is a graduate of Michigan State University, of Oxford University, and the University of Chicago Law School, where he was editor in chief of the University of Chicago Law Review.

In addition, he has held a number of public positions with honor and distinction as State representative, as Ohio's treasurer, as Ohio attorney general. Indeed, as Ohio's attorney general, he was an aggressive advocate for

consumers. He recovered more than \$2 billion for Ohio's retirees, investors and business owners and took major steps to help protect its consumers from fraudulent foreclosures and financial predators. What a terrific resume. He is an individual who has stood up for retirees, business owners, and investors. He has said fraud will not be tolerated. We will seek it out and we will penalize it and we will end it. In other words, it is exactly the resume of someone we would want to head a consumer financial protection department or division or bureau.

Why are we voting tomorrow to end debate? Why don't we just have a unanimous consent agreement that we go to a final vote? The answer is, my colleagues across the aisle are objecting. They are objecting to a vote on his nomination not because he isn't qualified but because they want to prevent this agency from doing its job: protecting America's families against predators. I cannot think of many issues that are so important to the success of our families as making sure they are not subject to financial predators. Yet my colleagues across the aisle are opposing this nomination in order to protect the predators preying on America's families. That is just plain wrong. I hope they will change their position before tomorrow.

Let's turn the clock back to 2003. In 2003, a new type of mortgage was invented in the United States. This was a mortgage that had a 2-year teaser rate—a very favorable, low rate—so as to serve as the bait for mortgage originators to say to their clients: This is the best mortgage for you because it has the lowest rate. But what the originators didn't tell their clients was that after 2 years, that rate exploded to a very high interest rate—a predatory rate—and they couldn't get out of the mortgage because the mortgage had a little sentence in it that said they have to pay a huge penalty if they try to refinance this mortgage. That penalty was 5 or 10 percent of the value of the loan. Show me a working family in America who buys a house, puts down their downpayment, makes their repairs, gets moved in, and still has 10 percent of the value of the house sitting in the bank, able to pay a penalty so they can get to a fair interest rate after the interest rate explodes.

So this new mortgage turned the humble, amortizing, family mortgage that had been the pathway for the middle class, for millions of American families, into a predatory trap that destroyed families and that created a lot of wealth for the 1 percent who run the system in our society. Have no doubt, that 1 percent got in, in every possible way. They said: Let's package these predatory mortgages and sell them and then let's take pieces of those packages and combine them with pieces of other security packages and resell them and

then let's develop a brandnew insurance industry that insures securities. This insurance is what is often called credit default swaps or derivatives, which are fancy names for insurance on these packages and mortgages. So then they said let's thereby make them very attractive to pension funds and investors across the world. This was so successful that those who were buying the mortgages were willing to pay a huge bonus to the mortgage originators to steer families away from the very successful, humble, amortizing, fixed-rate mortgage into this predatory, exploding interest rate mortgage, all the time posing as the family's counselor, saying it is my job to do what is best for you.

Why did this predatory practice in 2003, that grew enormously over the next 4 years, continue to go on? What happened to oversight of fairness, and what happened to the agency that was supposed to shut down predatory practices? That agency was the Federal Reserve and the Federal Reserve is a very powerful organization. The Federal Reserve has two responsibilities: employment and monetary policy. Those are the traditional responsibilities, but they were given a third, which is consumer protection. Somewhere in that vast, powerful agency on the upper floor, the head of the Federal Reserve and his key advisers were hard at work on monetary policy, deciding what interest rates they would lend to our major banks, and they were hard at work, we would hope, on the employment side as well. But they seemed to have forgotten they were also responsible for consumer protection. That mission was set aside. It was put down in the basement of the building and the lights were turned off and the doors locked and they did absolutely nothing about these predatory practices that were destroying the finances of millions of Americans, that were betraying the fundamental relationship between a family and its trusted mortgage originator who was getting bonus payments for steering them into these loans. They did absolutely nothing about a number of other predatory practices.

That is why the Consumer Financial Protection Bureau was created. It doesn't have other responsibilities to distract it. It isn't going to take the fate and success of our families and lock that mission down in the basement and turn out the lights because this is the heart of why this bureau exists.

This vote tomorrow is about whether we believe in the family value of fair deals that build the success of our families or whether we believe in the 1 percent exercising full predatory practices to destroy the financial lives of Americans, destroy the financial lives of our veterans for standing up for us in war and who are often a highly targeted

group when it comes to these types of mortgage practices and these types of payday practices.

This is an important vote tomorrow. It is not a vote about the qualifications of the nominee because the nominee has the right set of skills to be highly qualified in a number of directions. It is a vote about whether, in America, one believes it should be OK to be a predator or not OK. I believe it is not OK. I believe States and the Federal Government should do all they can to make sure deals are fair, to make sure there are not conflicts of interest, to make sure there are not payments that are undisclosed to a customer, to make sure there are not hidden clauses to convince customers by their trusted advisers to sign documents which cause the destruction of families' financial lives over the next 10 to 20 years as a result of that trust. Fairness matters to the success of our families.

We should have a unanimous vote tomorrow to end this debate and get on to the final vote of whether to confirm a very distinguished and capable and honorable man who is prepared to fight for the success of American families.

I thank the Chair.

#### DEFENSE AUTHORIZATION

Mr. CASEY. Mr President, I would like to express my support for the Menendez amendment, which passed 100 to 0 and would sanction the Central Bank of Iran. I was proud to be an original cosponsor of this important legislation. The Islamic Republic of Iran has proven through its recent behavior its blatant disregard for its international commitments to the IAEA and for the universal declaration of human rights. Iran is a serious threat to the security of the United States, the Middle East, and the world.

Last month's IAEA report on Iran said that the Agency had credible information that Iran may have worked on developing nuclear weapons. This is the most damning report yet on Iran's nuclear program and has served as a wake up call to the world. The United Kingdom has responded with tough sanctions. Italy and France have expressed support for tougher measures.

This opinion has been held by many here in the Senate for a long time. That is why we in the Senate have been so persistent in our efforts to pursue tougher sanctions to isolate Iran. This is why we continue to strive to provide all the tools necessary to ensure that maximum pressure is brought to bear on the regime in Tehran.

I appreciate the administration's efforts to engage with the Iranian regime since coming into office. The administration has made serious efforts to diplomatically engage Tehran officials. But the regime has rejected requests by the United States and international community for true dialog. Regret-

fully, I do not think dialog will work with this regime.

The IAEA report was a culmination to months of events that showed Iran's brazen disregard for international norms. In October, the regime planned to assassinate the Saudi Ambassador to the United States. The Iranian regime sought to kill a senior foreign official on U.S. soil.

There must be consequences for the planned attack on the Saudi Ambassador. There must be consequences for Iran's nuclear conduct as evidenced in the new IAEA report. This amendment makes these consequences clear.

I am concerned that the administration's November 21 sanctions response is not adequate in responding to this new information on Iran's intentions. European countries, led by the United Kingdom and France, have called for sanctioning of the Central Bank of Iran. My question to the administration is this: does the IAEA report indeed reflect a turning point for U.S. policy? And if so, what should the United States do to address this looming threat? The administration's announcement of new sanctions on November 21 is a good step, but the United States must take this one step further and sanction Iran's Central Bank. If the IAEA report does not indicate that we have turned a corner with respect to this critical national security threat, I don't know what does.

This administration has taken unprecedented measures to isolate the Iranian regime. It understands the threat posed by a nuclear Iran. And while I appreciate the administration's focus on this issue at this critical juncture in history, I believe that we must do more.

This amendment would restrict U.S. financial institutions from doing business with any foreign financial institution that knowingly conducts financial transactions with Iran's Central Bank. With this amendment, we are hitting Iran where it hurts. Eighty percent of Iran's hard currency comes from crude oil sales, which depend on transactions through the Central Bank. The Central Bank of Iran is complicit in Iran's nuclear program. This amendment also has measures that would ensure that the oil markets are not affected by isolation of the Iranian oil industry. The amendment also requires the President to start a "multilateral diplomacy initiative" to convince other countries to cease oil imports from Iran.

It has become increasingly clear in the past month that the international community cannot negotiate with the current leadership in Iran, which has proven incapable and unwilling to abide by its international commitments. This was made crystal clear by the planned attack on the Saudi Ambassador, credible evidence of illegal nuclear activity in the IAEA report, and the attack on the British Embassy.

I believe that we have turned a corner in how we should regard this regime in Iran.

This means that in addition to severe sanctions, the United States should renew its support for democratic activists in Iran. Amid the remarkable change taking place across the region, the United States should clearly place itself on the side of democratic forces in Iran. Compromise with the current regime is not possible, and we, working with the international community, should work to engage fully with the democratic actors in the country. Those who ransacked the British Embassy do not represent the Iranian people. The majority of Iranians, based on the outpouring of support for the Green Movement in 2009, aspire for a different future.

We have reached a pivotal moment, and we must stand on the right side of history. We must do all that we can to prevent Iran from gaining a nuclear weapon. I am proud to have cosponsored the Menendez amendment sanctioning the Central Bank of Iran. We must make it clear that there are substantial consequences to Iran's nuclear intentions.

#### TRIBUTE TO LIEUTENANT GENERAL LOREN M. RENO

Mr. INHOFE. Mr. President, I rise today to pay tribute to an exceptional leader, superb officer, and friend, LTG Loren M. Reno, the deputy chief of staff, logistics, installations and mission support for the Air Force, as he prepares to retire after more than 38 years of dedicated and distinguished service to our Nation.

General Reno is a consummate professional and, truly, the most humble, genuine general officer whom I have had the pleasure of working with during my years in the Senate. Thankfully, I have had the opportunity to get to know him very well. We worked closely together during his two tours at the Air Logistics Center in Oklahoma City, and that relationship continued during his time back on the Air Force staff.

General Reno's accomplishments over his 38-year career have been remarkable. He is a senior navigator with more than 2,500 flying hours in the C-9, C-130, T-29, and T-43 aircraft, a master maintainer with over 24 years experience keeping the Air Force flying, and an accomplished leader of airmen. General Reno commanded two aircraft maintenance squadrons, a technical training group, and the Defense Fuel Supply and Defense Energy Support Centers, and, of course, the Oklahoma City Air Logistics Center at Tinker Air Force Base, OK.

A native of Port Jefferson, NY, General Reno graduated from Cedarville University in Ohio in 1970 and spent 4 years teaching middle school science

before attending Officer Training School. After earning his commission from OTS as the distinguished graduate and his initial training where he was also the distinguished graduate, he was assigned to the 21st Tactical Airlift Squadron in the Philippines. It was from there that he flew missions into Saigon, Vietnam, at the close of the war in 1975. His prowess as a navigator earned him selection to attend instructor training at Mather Air Force Base, CA, in 1978, where he once again graduated as a distinguished graduate. His subsequent performance as an instructor earned him the award as the Instructor Navigator of the Year in 1979.

Next, General Reno worked in legislative affairs on the Air Staff in the Pentagon and then for Air Mobility Command from 1981 to 1985. Following his staff tour, General Reno moved to Dyess Air Force Base, TX, in 1985 where he continued to shine on the ground and in the air as the chief navigator for the 773rd Tactical Airlift Squadron. It was during this assignment that he left the navigator career field and cross-trained as an aircraft maintenance officer. In 1987, General Reno took command of the 463rd Avionics Maintenance Squadron and then the 463rd Field Maintenance Squadron there at Dyess. After Air War College, he moved back to the Air Staff from 1990 to 1992, working as a program manager and as the chief of maintenance policy for the Air Force.

After two years in the Pentagon, General Reno moved back to Texas, this time to Sheppard Air Force Base, where he commanded the 396th Technical Training Group and the 82nd Training Group before moving to Fort Belvoir, VA, to work in the Defense Logistics Agency from 1994 to 1998 in positions of increasing responsibility, working on joint logistics for contingency operations and strategic programming, before being selected as the commander of the Defense Fuel Supply Center and Defense Energy Support Center.

Upon the completion of his command at the DLA in 1998, General Reno moved to my home State of Oklahoma to work at the Oklahoma City Air Logistics Center. While there, he was promoted to brigadier general and appointed as the center's deputy commander. After his first Oklahoma tour, General Reno returned to Scott Air Force Base in 2002 as the director of logistics for air mobility command. In this capacity, he was responsible for developing policy logistics plans for 14 major active air installations in the United States and 17 locations throughout the world. It was also in this position that General Reno was selected for his second star.

After this, General Reno returned to the DLA, where he served as the vice director and was responsible for providing logistics to the various military

departments and combatant commands. We were able to get him back to Oklahoma in 2007 when he returned to command the Oklahoma City Air Logistics Center, where he provided maintenance for the Air Force's KC-135s, B-1, and B-52s, as well as numerous types of aircraft engines while also commanding Tinker Air Force Base. He also helped shepherd through one of the biggest growth opportunities for the base by working with the local community to acquire an abandoned automotive plant that was located adjacent to the base. The new facility vastly increased the base's ability to accomplish the Air Force's depot maintenance mission and ushered in an era of new possibilities for Oklahoma City and the Air Force. It is this kind of performance that characterized General Reno's whole career.

Based on this performance, he was promoted to lieutenant general and sent back to the Pentagon in 2009 to be the Air Force's deputy chief of staff for logistics, installations and mission support. During that time Lieutenant General Reno demonstrated a mastery of complex issues, decisive leadership, and dedication to both mission and people. He advocated and defended over \$30 billion annually in logistics and installation programs and developed long-range strategic guidance for Air Force weapons systems, facility sustainment, military construction, and contingency support to achieve national security objectives. He led the Air Force's first-ever worldwide inventory of all nuclear components at 581 sites. This epic venture allowed the Air Force to reestablish control of more than 34,000 items valued at \$1.3 billion and was the first of many crucial logistics milestones needed to reinvigorate the nuclear enterprise, the Air Force's No. 1 priority. His leadership was invaluable to the success of the \$1 billion Expeditionary Combat Support System Program, the culmination of a decade-long effort in developing and modernizing Air Force business operations that will ultimately save the Air Force \$9 billion in supply chain costs.

Finally, as a hands-on leader and champion of airmen resiliency initiatives, he was instrumental in the creation of the Air Force's Deployment Transition Center providing a critical, strategic, physical, emotional, and spiritual respite for thousands of airmen. He provided the leadership and support to ensure outside-the-wire airmen are provided an opportunity to decompress before they return to their home station and families.

What I appreciate most about Loren is his dedication to others. He doesn't have hobbies because he works for the benefit of everyone else. He set aside hobbies like golf and instead made spending time with his children and wife his hobby. As a man of deep faith in Jesus, he sacrificed personally so he

could give extravagantly to missions and to ministry. Although General Reno's service in the Air Force will come to an end, his service to God, his family, and his country continues. I can't wait to see what's next.

On behalf of Congress and the United States of America, I thank Lieutenant General Reno, his wife Karen, and their entire family for their extraordinary commitment, sacrifice, contribution, and dedication to this great Nation during his distinguished career in the U.S. Air Force. I congratulate him on the completion of an exemplary career and wish him, his wife Karen, and their family God's speed and continued success and happiness in the future.

#### ADDITIONAL STATEMENTS

##### RECOGNIZING OLD FARM CHRISTMAS PLACE OF MAINE

• Ms. SNOWE. Mr. President, December in Maine invokes the classic images of Christmas. The wonders of children sledding down snow-covered hills and small towns enveloped in December's darkness while illuminated by the glow of twinkling lights. One of the most memorable parts of any Christmas celebration revolves around the selection and decoration of the perfect tree. Today I rise to commend and recognize the Old Farm Christmas Place of Maine, a small business that allows families throughout the Nation to enjoy the tradition of selecting and cutting down their own Christmas tree.

The Old Farm Christmas Place of Maine, located in the coastal town of Cape Elizabeth, opened in November of 2010. Jay Cox, the owner of Old Farm, purchased the historic Dyer-Hutchinson farmhouse in 2001. Built in 1790, the Old Farm stands as a testament to Maine's rich history and in 1997 was accepted into the National Registry of Historic Places. After substantial renovations to the historic property, Jay planted his first Christmas trees in the spring of 2004 on the 50-acre property. Finally, last year, with roughly 18,000 trees planted and 1,000 trees ready to be sold, Jay opened up his winter wonderland.

This small business provides a unique tree-cutting venture and invites families to experience the joy of selecting the perfect tree. At Old Farm, this is a journey that begins with a wagon ride over the farmland onto the fields where families can explore acres of the beautiful farm until they find their ideal tree. Once this perfect tree is selected, they will assist you in cutting down the tree and loading it into your car or even delivering it to local areas throughout the State. Lastly, as Maine's winters can be frigid, families can finish the experience warming themselves by the fire inside the Old Farm store while sipping delectable cider and rich hot chocolate.

Jay comes from a family of Christmas tree enthusiasts; his parents owned and operated Dun Roamin' Christmas Tree Farm in Cape Elizabeth for 25 years. That farm now makes wreaths which are sold at the Old Farm Christmas Place store. The storefront also carries several locally made Christmas decorations and ornaments to adorn households near and far, adding a new element to the traditional tree farm selection.

As opening a small business is a daunting task, Jay Cox's dedication for nearly a decade to open a Christmas tree farm and storefront reminiscent of old times and tradition is truly inspiring. I am proud to extend my congratulations to everyone at the Old Farm Christmas Place of Maine for their tremendous efforts and offer my best wishes for continued success.●

#### MESSAGES FROM THE HOUSE

At 11:35 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, without amendment:

S. 1541. An act to revise the Federal charter for the Blue Star Mothers of America, Inc. to reflect a change in eligibility requirements for membership.

S. 1639. An act to amend title 36, United States Code, to authorize the American Legion under its Federal charter to provide guidance and leadership to the individual departments and posts of the American Legion, and for other purposes.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1021. An act to prevent the termination of the temporary office of bankruptcy judges in certain judicial districts.

H.R. 2297. An act to promote the development of the Southwest waterfront in the District of Columbia, and for other purposes.

H.R. 2405. An act to reauthorize certain provisions of the Public Health Service Act and the Federal Food, Drug, and Cosmetic Act relating to public health preparedness and countermeasure development, and for other purposes.

H.R. 2471. An act to amend section 2710 of title 18, United States Code, to clarify that a video tape service provider may obtain a consumer's informed, written consent on an ongoing basis and that consent may be obtained through the Internet.

H.R. 3237. An act to amend the SOAR Act by clarifying the scope of coverage of the Act.

The message further announced that the House has passed the following joint resolution, with an amendment, in which it requests the concurrence of the Senate:

S.J. Res. 22. Joint resolution to grant the consent of Congress to an amendment to the compact between the States of Missouri and Illinois providing that bonds issued by the Bi-State Development Agency may mature in not to exceed 40 years.

At 4:34 p.m., a message from the House of Representatives, delivered by

Mr. Novotny, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 1540) to authorize appropriations for fiscal year 2012 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes, and agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoint the following Members as managers of the conference on the part of the House:

From the Committee on Armed Services, for consideration of the House bill and the Senate amendment, and modifications committed to conference: Messrs. MCKEON, BARTLETT, THORNBERRY, AKIN, FORBES, MILLER of Florida, LOBIONDO, TURNER of Ohio, KLINE, ROGERS of Alabama, SHUSTER, CONAWAY, WITTMAN, HUNTER, ROONEY, SCHILLING, GRIFFIN of Arkansas, WEST, SMITH of Washington, REYES, Ms. LORETTA SANCHEZ of California, Messrs. MCINTYRE, ANDREWS, Mrs. DAVIS of California, Messrs. LANGEVIN, LARSEN of Washington, COOPER, Ms. BORDALLO, Messrs. COURTNEY, LOEBSACK, Ms. TSONGAS, and Ms. PINGREE of Maine.

From the Permanent Select Committee on Intelligence, for consideration of matters within the jurisdiction of that committee under clause 11 of rule X: Mr. ROGERS of Michigan, Mrs. MYRICK, and Mr. RUPPERSBURGER.

From the Committee on Education and the Workforce, for consideration of section 548 and 572 of the House bill, and sections 572 and 573 of the Senate amendment, and modifications committed to conference: Messrs. PETRI, HECK, and GEORGE MILLER of California.

From the Committee on Energy and Commerce, for consideration of sections 911, 1099A, 2852, and 3114 of the House bill, and section 1089 of the Senate amendment, and modifications committed to the conference: Messrs. UPTON, WALDEN, and WAXMAN.

From the Committee on Financial Services, for consideration of section 645 of the House bill, and section 1245 of the Senate amendment, and modifications committed to conference: Mr. BACHUS, Mrs. CAPITO, and Mr. ACKERMAN.

From the Committee on Foreign Affairs, for consideration of sections 1013, 1014, 1055, 1056, 1086, 1092, 1202, 1204, 1205, 1211, 1214, 1216, 1218, 1219, 1226, 1228-1230, 1237, 1301, 1303, 1532, 1533, and 3112 of the House bill, and sections 159, 1012, 1031, 1033, 1046, 1201, 1203, 1204, 1206-1209, 1221-1225, 1228, 1230, 1245, title XIII and section 1609 of the Senate amendment, and modifications committed to conference: Ms. ROS-LEHTINEN, Mr. CHABOT, and Mr. BERMAN.

From the Committee on Homeland Security, for consideration of section

1099H of the House bill, and section 1092 of the Senate amendment, and modifications committed to conference: Mr. DANIEL LUNGREN of California, Mrs. MILLER of Michigan, and Mr. THOMPSON of Mississippi.

From the Committee on the Judiciary, for consideration of sections 531 of subtitle D of title V, 573, 843, and 2804 of the House bill, and section 553 and 848 of the Senate amendment, and modifications committed to conference: Messrs. SMITH of Texas, COBLE, and CONYERS.

From the Committee on Natural Resources, for consideration of sections 313, 601, and 1097 of the House bill, and modifications committed to conference: Messrs. HASTINGS of Washington, BISHOP of Utah, and MARKEY.

From the Committee on Oversight and Government Reform, for consideration of sections 598, 662, 803, 813, 844, 847, 849, 937-939, 1081, 1091, 1101-1111, 1116, and 2813 of the House bill, and sections 827, 845, 1044, 1102-1107, and 2812 of the Senate amendment, and modifications committed to conference: Messrs. ROSS of Florida, LANKFORD, and CUMMINGS.

From the Committee on Science, Space, and Technology, for consideration of sections 911 and 1098 of the House bill, and sections 885, 911, 912, and division E of the Senate amendment, and modifications committed to conference: Messrs. HALL, QUAYLE, and Ms. EDDIE BERNICE JOHNSON of Texas.

From the Committee on Small Business, for consideration of section 804 of the House bill, and sections 885-887, and division E of the Senate amendment, and modifications committed to conference: Mr. GRAVES of Missouri, Mrs. ELLMERS, and Ms. VELÁZQUEZ.

From the Committee on Transportation and Infrastructure, for consideration of sections 314, 366, 601, 1098, and 2814 of the House bill, and sections 262, 313, 315, 1045, 1088, and 3301 of the Senate amendment, and modifications committed to conference: Messrs. MICA, CRAVAACK, and BISHOP of New York.

From the Committee on Veterans Affairs, for consideration of sections 551, 573, 705, 731, and 1099C of the House bill, and sections 631 and 1093 of the Senate amendment, and modifications committed to conference: Mr. BILIRAKIS, Ms. BUERKLE, and Ms. BROWN of Florida.

From the Committee on Ways and Means, for consideration of sections 704, 1099A, and 1225 of the House bill, and section 848 of the Senate amendment, and modifications committed to conference: Messrs. CAMP, HERGER, and LEVIN.

The message also announced that the House disagrees to the amendment of the Senate to the bill (H.R. 2055) making appropriations for military construction, the Department of Veterans Affairs, and related agencies for the fis-

cal year ending September 30, 2012, and for other purposes, and agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon; and appoints the following Members as managers of the conference on the part of the House:

Mr. Rogers of Kentucky, Mr. Young of Florida, Mr. Lewis of California, Mr. Frelinghuysen, Mr. Aderholt, Mrs. Emerson, Ms. Granger, Mr. Simpson, Mr. Culberson, Mr. Crenshaw, Mr. Rehberg, Mr. Carter, Mr. Dicks, Mr. Visclosky, Mrs. Lowey, Mr. Serrano, Ms. DeLauro, Mr. Moran, Mr. Price of North Carolina, and Mr. Bishop of Georgia.

#### MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2297. An act to promote the development of the Southwest waterfront in the District of Columbia, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

H.R. 2405. An act to reauthorize certain provisions of the Public Health Service Act and the Federal Food, Drug, and Cosmetic Act relating to public health preparedness and countermeasure development, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

H.R. 2471. An act to amend section 2710 of title 18, United States Code, to clarify that a video tape service provider may obtain a consumer's informed, written consent on an ongoing basis and that consent may be obtained through the Internet; to the Committee on the Judiciary.

#### EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-4220. A communication from the Deputy Chief of the Pricing Policy Division, Wireline Competition Bureau, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled "Revisions to 47 C.F.R. Parts 1, 36, 51, 54, 61, 64, and 69 to Comprehensively Reform and Modernize the Universal Service and Inter-carrier Compensation Systems" (FCC 11-161) received in the Office of the President of the Senate on December 5, 2011; to the Committee on Commerce, Science, and Transportation.

EC-4221. A communication from the Assistant Secretary, Bureau of Legislative Affairs, Department of State, transmitting, pursuant to the Arms Export Control Act, the certification of a proposed amendment to a manufacturing license agreement for the manufacture of significant military equipment abroad and the export of defense articles, including, technical data, and defense services to Japan for the production of the Evolved SeaSparrow Missile (ESSM) in the amount of \$100,000,000 or more; to the Committee on Foreign Relations.

EC-4222. A communication from the Assistant Secretary, Bureau of Legislative Affairs, Department of State, transmitting, pursuant to law, an annual report relative to the Benjamin A. Gilman International Scholarship Program for 2011; to the Committee on Foreign Relations.

EC-4223. A communication from the Secretary General of the Inter-Parliamentary Union, transmitting, a report relative to the Annual 2011 Session of the Parliamentary Conference on the World Trade Organization; to the Committee on Foreign Relations.

EC-4224. A communication from the Secretary of Education, transmitting, pursuant to law, the report of a rule entitled "Family Educational Rights and Privacy" (RIN1880-AA86) received in the Office of the President of the Senate on December 5, 2011; to the Committee on Health, Education, Labor, and Pensions.

EC-4225. A communication from the Chairman, Federal Labor Relations Authority, transmitting, pursuant to law, the Authority's Performance and Accountability Report for fiscal year 2011; to the Committee on Homeland Security and Governmental Affairs.

EC-4226. A communication from the Director of Legislative Affairs, Office of the Director of National Intelligence, transmitting, pursuant to law, a report relative to a vacancy in the position of Inspector General of the Intelligence Community received in the Office of the President of the Senate on December 5, 2011; to the Select Committee on Intelligence.

EC-4227. A communication from the Deputy Assistant Administrator of Diversion Control, Drug Enforcement Administration, Department of Justice, transmitting, pursuant to law, the report of a rule entitled "Implementation of the Methamphetamine Production Prevention Act of 2008" (RIN1117-AB25) received in the Office of the President of the Senate on December 5, 2011; to the Committee on the Judiciary.

EC-4228. A communication from the Under Secretary and Director, Patent and Trademark Office, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Revision of Patent Term Adjustment Provisions Relating to Information Disclosure Statements" (RIN0651-AC56) received in the Office of the President of the Senate on December 1, 2011; to the Committee on the Judiciary.

EC-4229. A communication from the Acting Staff Director, United States Commission on Civil Rights, transmitting, pursuant to law, the report of the appointment of members to the Arizona Advisory Committee; to the Committee on the Judiciary.

EC-4230. A communication from the Assistant Attorney General, Office of Legislative Affairs, Department of Justice, transmitting, pursuant to law, the semi-annual report of the Attorney General relative to Lobbying Disclosure Act enforcement actions taken for the period beginning on July 1, 2010; to the Committee on the Judiciary.

EC-4231. A communication from the Assistant Attorney General, Office of Legislative Affairs, Department of Justice, transmitting, pursuant to law, the semi-annual report of the Attorney General relative to Lobbying Disclosure Act enforcement actions taken for the period beginning on January 1, 2010; to the Committee on the Judiciary.

EC-4232. A communication from the Director of the Regulation Policy and Management Office, Veterans Benefits Administration, Department of Veterans Affairs, transmitting, pursuant to law, the report of a rule entitled "Servicemembers' Group Life Insurance Traumatic Injury Protection (TSGLI) Program Genitourinary (GU) Regulation" (RIN2900-AO20) received during adjournment of the Senate in the Office of the President of the Senate on December 2, 2011; to the Committee on Veterans' Affairs.

EC-4233. A communication from the Secretary of Veterans Affairs, transmitting, pursuant to law, a report relative to expenditures from the Pershing Hall Revolving Fund; to the Committee on Veterans' Affairs.

### REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ROCKEFELLER, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute:

S. 1430. A bill to authorize certain maritime programs of the Department of Transportation, and for other purposes (Rept. No. 112-99).

### INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. KERRY:

S. 1949. A bill to provide for safe and humane policies and procedures pertaining to the arrest, detention, and processing of aliens in immigration enforcement operations; to the Committee on the Judiciary.

By Mr. LAUTENBERG (for himself, Mr. ROCKEFELLER, and Mr. PRYOR):

S. 1950. A bill to amend title 49, United States Code, to improve commercial motor vehicle safety and reduce commercial motor vehicle-related accidents and fatalities, to authorize the Federal Motor Carrier Safety Administration, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. SCHUMER (for himself, Mr. LEAHY, and Mr. SANDERS):

S. 1951. A bill to restore the exemption from fees for certain customs services for passengers arriving from Canada, Mexico, and islands adjacent to the United States; to the Committee on Finance.

By Mr. LAUTENBERG (for himself and Mr. ROCKEFELLER):

S. 1952. A bill to improve hazardous materials transportation safety and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. LAUTENBERG (for himself and Mr. ROCKEFELLER):

S. 1953. A bill to reauthorize the Research and Innovative Technology Administration, to improve transportation research and development, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mrs. HUTCHISON (for herself and Mr. ROCKEFELLER):

S. 1954. A bill to amend title 49, United States Code, to provide for expedited security screenings for members of the Armed Forces; to the Committee on Commerce, Science, and Transportation.

By Mr. PAUL:

S. 1955. A bill to authorize the interstate traffic of unpasteurized milk and milk products that are packaged for direct human consumption; to the Committee on Health, Education, Labor, and Pensions.

By Mr. THUNE:

S. 1956. A bill to prohibit operators of civil aircraft of the United States from participating in the European Union's emissions trading scheme, and for other purposes; to

the Committee on Commerce, Science, and Transportation.

By Mr. COBURN (for himself, Mr. SESSIONS, Mr. CHAMBLISS, Mr. BURR, Mrs. MCCASKILL, Ms. COLLINS, Mr. BEGICH, Mr. MCCAIN, Ms. AYOTTE, Mr. HATCH, Mr. PAUL, Mr. HELLER, Mr. CRAPO, Mr. COATS, Mr. ENZI, Mr. DEMINT, Mr. THUNE, Mr. RUBIO, Mr. JOHNSON of Wisconsin, Mr. LEE, Mr. BOOZMAN, Mr. HOEVEN, Mr. CORNYN, Mr. VITTER, Mr. GRAHAM, Mr. KYL, Mr. TOOMEY, Mr. MCCONNELL, Mr. RISCH, Mr. WICKER, Mr. INHOFE, and Mr. BARRASSO):

S. 1957. A bill to provide taxpayers with an annual report disclosing the cost of, performance by, and areas for improvements for Government programs, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

By Mr. VITTER (for himself and Ms. LANDRIEU):

S. 1958. A bill to extend the National Flood Insurance Program until May 31, 2012; considered and passed.

By Mr. BURR (for himself, Mrs. FEINSTEIN, Mr. CHAMBLISS, Mr. COATS, Mr. BLUNT, Mr. NELSON of Florida, Mr. WARNER, Mr. INHOFE, Mr. GRAHAM, Mr. CORKER, Mr. KIRK, and Mr. UDALL of Colorado):

S. 1959. A bill to require a report on the designation of the Haqqani Network as a foreign terrorist organization and for other purposes; to the Committee on Foreign Relations.

By Ms. COLLINS (for herself and Mrs. MCCASKILL):

S. 1960. A bill to provide incentives to create smaller American jobs; to the Committee on Finance.

By Mr. REED (for himself, Ms. SNOWE, Mr. SANDERS, Mr. BROWN of Ohio, Mr. KERRY, Mrs. SHAHEEN, Mr. WHITEHOUSE, Mr. FRANKEN, Mr. BLUMENTHAL, Mr. CASEY, Mrs. GILLIBRAND, Mr. ROCKEFELLER, Mr. LIEBERMAN, Ms. COLLINS, Mr. BROWN of Massachusetts, Ms. AYOTTE, Mr. SCHUMER, Mr. WEBB, Mr. BEGICH, and Mr. CARDIN):

S. 1961. A bill to provide level funding for the Low-Income Home Energy Assistance Program; to the Committee on Appropriations.

By Mr. DEMINT (for himself and Mr. BARRASSO):

S. 1962. A bill to make the internal control reporting and assessment requirements of the Sarbanes-Oxley Act of 2002 optional for certain smaller companies; to the Committee on Banking, Housing, and Urban Affairs.

### SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. WYDEN (for himself and Mr. MERKLEY):

S. Res. 345. A resolution expressing the sense of the Senate on the closure of Umatilla Army Chemical Depot, Oregon; considered and agreed to.

### ADDITIONAL COSPONSORS

S. 227

At the request of Ms. COLLINS, the name of the Senator from Pennsyl-

vania (Mr. CASEY) was added as a cosponsor of S. 227, a bill to amend title XVIII of the Social Security Act to ensure more timely access to home health services for Medicare beneficiaries under the Medicare program.

S. 571

At the request of Mrs. MURRAY, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of S. 571, a bill to amend subtitle B of title VII of the McKinney-Vento Homeless Assistance Act to provide education for homeless children and youths, and for other purposes.

S. 678

At the request of Mr. KOHL, the name of the Senator from Minnesota (Ms. KLOBUCHAR) was added as a cosponsor of S. 678, a bill to increase the penalties for economic espionage.

S. 737

At the request of Mr. MORAN, the name of the Senator from Missouri (Mr. BLUNT) was added as a cosponsor of S. 737, a bill to replace the Director of the Bureau of Consumer Financial Protection with a 5-person Commission, to bring the Bureau into the regular appropriations process, and for other purposes.

S. 755

At the request of Mr. WYDEN, the name of the Senator from Wisconsin (Mr. KOHL) was added as a cosponsor of S. 755, a bill to amend the Internal Revenue Code of 1986 to allow an offset against income tax refunds to pay for restitution and other State judicial debts that are past-due.

S. 1281

At the request of Mr. KIRK, the name of the Senator from Connecticut (Mr. BLUMENTHAL) was added as a cosponsor of S. 1281, a bill to amend title 49, United States Code, to prohibit the transportation of horses in interstate transportation in a motor vehicle containing two or more levels stacked on top of one another.

S. 1551

At the request of Mr. KIRK, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 1551, a bill to establish a smart card pilot program under the Medicare program.

S. 1692

At the request of Mr. BINGAMAN, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 1692, a bill to reauthorize the Secure Rural Schools and Community Self-Determination Act of 2000, to provide full funding for the Payments in Lieu of Taxes program, and for other purposes.

S. 1718

At the request of Mr. WYDEN, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 1718, a bill to amend title XVIII of the Social Security Act with respect to

the application of Medicare secondary payer rules for certain claims.

S. 1781

At the request of Mr. BINGAMAN, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of S. 1781, a bill to amend the Internal Revenue Code of 1986 to exclude from gross income amounts received on account of claims based on certain unlawful discrimination and to allow income averaging for backpay and frontpay awards received on account of such claims, and for other purposes.

S. 1798

At the request of Mr. UDALL of New Mexico, the name of the Senator from Montana (Mr. TESTER) was added as a cosponsor of S. 1798, a bill to direct the Secretary of Veterans Affairs to establish an open burn pit registry to ensure that members of the Armed Forces who may have been exposed to toxic chemicals and fumes caused by open burn pits while deployed to Afghanistan or Iraq receive information regarding such exposure, and for other purposes.

S. 1821

At the request of Mr. COONS, the name of the Senator from California (Mrs. FEINSTEIN) was added as a cosponsor of S. 1821, a bill to prevent the termination of the temporary office of bankruptcy judges in certain judicial districts.

S. 1822

At the request of Mr. HELLER, the name of the Senator from Virginia (Mr. WEBB) was added as a cosponsor of S. 1822, a bill to provide for the exhumation and transfer of remains of deceased members of the Armed Forces buried in Tripoli, Libya.

S. 1882

At the request of Mr. BINGAMAN, the name of the Senator from Minnesota (Mr. FRANKEN) was added as a cosponsor of S. 1882, a bill to amend the Federal Food, Drug, and Cosmetic Act to ensure that valid generic drugs may enter the market.

S. 1886

At the request of Mr. LEAHY, the name of the Senator from Minnesota (Ms. KLOBUCHAR) was added as a cosponsor of S. 1886, a bill to prevent trafficking in counterfeit drugs.

S. 1894

At the request of Mr. SCHUMER, the name of the Senator from Delaware (Mr. COONS) was added as a cosponsor of S. 1894, a bill to deter terrorism, provide justice for victims, and for other purposes.

S. 1903

At the request of Mrs. GILLIBRAND, the name of the Senator from South Dakota (Mr. THUNE) was added as a cosponsor of S. 1903, a bill to prohibit commodities and securities trading based on nonpublic information relating to Congress, to require additional reporting by Members and employees

of Congress of securities transactions, and for other purposes.

S. 1904

At the request of Mr. DEMINT, the name of the Senator from Idaho (Mr. RISCH) was added as a cosponsor of S. 1904, a bill to provide information on total spending on means-tested welfare programs, to provide additional work requirements, and to provide an overall spending limit on means-tested welfare programs.

S. 1925

At the request of Mr. LEAHY, the names of the Senator from Illinois (Mr. KIRK), the Senator from Illinois (Mr. DURBIN), the Senator from Wisconsin (Mr. KOHL), the Senator from Minnesota (Ms. KLOBUCHAR), the Senator from Connecticut (Mr. BLUMENTHAL) and the Senator from California (Mrs. BOXER) were added as cosponsors of S. 1925, a bill to reauthorize the Violence Against Women Act of 1994.

S. 1944

At the request of Mr. CASEY, the names of the Senator from Vermont (Mr. LEAHY) and the Senator from Michigan (Ms. STABENOW) were added as cosponsors of S. 1944, a bill to create jobs by providing payroll tax relief for middle class families and businesses, and for other purposes.

S. RES. 310

At the request of Ms. MIKULSKI, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of S. Res. 310, a resolution designating 2012 as the "Year of the Girl" and congratulating Girl Scouts of the USA on its 100th anniversary.

#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. COLLINS (for herself and Mrs. MCCASKILL):

S. 1960. A bill to provide incentives to create American jobs; to the Committee on Finance.

Ms. COLLINS. Mr. President, I rise today, along with my friend and colleague Senator MCCASKILL, to introduce legislation we believe is essential to restoring growth and creating jobs in our economy.

Our bipartisan bill is comprised of proposals in four general categories. First: taxes—we would protect American workers from payroll tax increases and preserve and provide new tax incentives for small business job creators to help spur job growth.

Second: infrastructure—we propose restoring and expanding funding to rebuild our nation's crumbling roads, bridges, and water treatment plants, adding jobs now and ensuring that the critical infrastructure needed for long-term economic growth is properly maintained.

Third: sensible regulatory reform—we focus on cutting the tangle of red-tape that is holding businesses back from expanding and adding jobs.

Fourth: job training—we propose fundamentally reforming the hodge-podge of Federal jobs training programs to focus on what really works. We also propose extending the charitable deduction for books and computers.

We would offset the cost of these proposals with a 10-year, 2 percent surtax on those with incomes of a million dollars or more, but with a "carve out" to protect small business owner-operators: our nation's job creators.

Let me discuss these proposals in further detail. With respect to taxes, Senator MCCASKILL and I believe that action must be taken quickly to extend the two percent payroll tax cut for employees that is scheduled to expire at the end of this month. Unless we do so, 159 million Americans will face a tax increase of up to \$2,000 at a time when the economy is still weak. With so many American families struggling to make ends meet, the last thing we ought to do is to allow an automatic tax increase to take effect in less than a month.

But keeping taxes steady won't be enough to get the economy going again. If we want more jobs, we must do more. That is why Senator MCCASKILL and I are proposing that the two percent payroll tax cut be extended to employers, too, on the first \$10 million of payroll. This targets small and medium-sized employers who have historically been the source of our nation's job growth.

We also extend bonus depreciation and Section 179 expensing at the current level, to encourage businesses to use this tax benefit to invest in the tools American workers need to remain the best in the world.

In the global competition for jobs, American workers go head-to-head with workers from China, India, and other countries, who are paid far less than Americans, and whose working conditions would rightly be viewed as unacceptable here in the United States.

The middle-class, the source of America's economic strength, was built by making sure American workers had the best tools in the world, so they would be the most productive workers in the world. Productivity and tools go hand-in-hand, and in the global competition for jobs, the worker with the best tools wins.

The provisions I have described will help businesses invest and keep the American worker ahead of the global competition.

There are several other tax benefits in our package. One is an innovative proposal that originated with Senators MARK PRYOR and SCOTT BROWN to generate investment in new high-tech companies. We all know how dynamic these young companies can be—a decade ago, Google was a fledgling search engine and Facebook didn't even exist. Today, Google executes billions of searches every week, and Facebook has

800 million members, and growing. Both are valued at more than \$100 billion, but most important, both employ thousands of American workers.

But without the right investment at the right time, these two companies would not exist. Nor would many other companies in the high-tech field, or the millions of jobs they have created. The tax credit we propose will help the high tech firms of the future get the support they need to get off the ground, and become a part of the American story.

It is also important to help established companies stay on the cutting edge by extending the Research and Development tax credit.

Before I go on to describe the other provisions of this bipartisan jobs bill, I would like to explain further the small business “carve out” we built into our offset. Many on my side of the aisle have voiced the concern that a surtax would fall on small businesses. I share that concern. Most of our nation’s small businesses are structured as “flow-through” entities, such as “subchapter S” corporations. These flow-through entities do not pay taxes directly, but instead distribute their income to their owners, who then pay tax on that income on their individual income tax returns.

To impose a surtax on this income as if it were the owners’ personal income would be a mistake—we would be raising taxes on our nation’s job creators at the exact same time we are trying to get our nation’s job engine started again.

If we ignore this reality, we risk taxing small businesses as if they are “the wealthy.” They are not.

We cannot impose higher taxes on flow-through income without taking money out of small businesses—money that is needed to help those small businesses invest and add jobs. That is why Senator MCCASKILL and I are proposing to “carve out” owner-operator small business income so it is not subject to the surtax.

The way we would accomplish this is to separate “active business income” from “passive business income,” tracking the passive activity rules of Section 469 of the tax code. Basically, this means that business owner-operators who “materially participate” in the running of their businesses will be protected from the surtax, while those who are passive investors will pay higher rates.

This is as it should be. Owner-operators are actively engaged in running their small businesses. They are on the front lines of our economy, and of the communities in which they live. The pass-through income that shows up on their tax returns is critical to their ability to finance investment, and grow their businesses. Left in their hands, this income will lead to more jobs and buy the tools that make American workers more productive.

Let me turn now to the other provisions of our bill.

With respect to infrastructure, our bill would provide \$10 billion to capitalize the U.S. Department of Transportation’s State Infrastructure Bank program. These banks are revolving loan funds established and administered by State DOT’s to complement traditional funding by providing loans, loan guarantees, and other forms of non-grant assistance that leverage private dollars. This one-time infusion would allow states to voluntarily utilize this additional funding, while at the same time ensuring that there is sufficient oversight, reporting and public disclosure requirements.

Additionally, my bill would provide \$25 billion in supplemental appropriations for existing highway and bridge formula programs. This funding is meant to supplement and not replace the approximately \$40 billion appropriated annually under the current Surface Transportation authorization for similar transportation programs. According to the Federal Highway Administration’s most recent estimates, every \$1 billion spent on highway construction supported approximately 30,000 jobs.

It is essential that we rebuild our nation’s deteriorating infrastructure. According to the American Society of Civil Engineers, it would cost more than \$200 billion annually to substantially improve the conditions of our nation’s roads and bridges—far more than current levels of national investment. Our legislation will not only create jobs but also bolster important road and bridge investments throughout the United States.

I am pleased to hear that the American Association of State Highway and Transportation Officials, AASHTO, a nonprofit, nonpartisan association, supports what we have proposed in our bill. These investments not only create jobs now when they are needed most, but they also address our nation’s aging infrastructure, a daunting but essential task.

There is also no shortage of sewer and drinking water infrastructure needs in states and communities across the nation. The American Society of Civil Engineers’ latest infrastructure report card gave the nation’s water infrastructure a D–, and the Environmental Protection Agency estimates \$187.9 billion in wastewater needs and \$334.8 billion in drinking water needs over the next 20 years.

To help ensure the provision of safe water, we propose providing \$800 million in additional funding to the Clean Water and Drinking Water State Revolving Loan Funds, CWSRF and DWSRF, to help ensure these critical infrastructure programs are funded at the fiscal year 2010 levels of \$2.1 billion for CWSRF and \$1.387 billion for DWSRF. Water infrastructure invest-

ments provide significant environmental, economic, and public health benefits in our states and communities.

Investment in water infrastructure also creates jobs. The National Association of Utility Contractors, for example, estimates that one billion dollars invested in water infrastructure can create over 26,000 jobs.

As I meet with businesses, a chief complaint is that regulations and red tape are preventing them from growing and adding jobs. Our bill also contains important reforms to our regulatory system by incorporating provisions I offered earlier this year as the CURB Act, which stands for Clearing Unnecessary Regulatory Burdens. These provisions are designed to force Federal agencies to cut the red tape that impedes job growth.

All too often it seems Federal agencies do not take into account the impacts to small businesses and job growth before imposing new rules and regulations. The bill we are introducing today obligates them to do so in three ways: first, by requiring Federal agencies to analyze the indirect costs of regulations, such as the impact on job creation, the cost of energy, and consumer prices.

Currently, Federal agencies are not required by statute to analyze the indirect cost regulations can have on the public, such as higher energy costs, higher prices, and the impact on job creation. However, Executive Order 12866, issued by President Clinton in 1993, obligates agencies to provide the Office of Information and Regulatory Affairs with an assessment of the indirect costs of proposed regulations. Our bill would essentially codify this provision of President Clinton’s Executive Order.

Second, our bill obligates Federal agencies to comply with public notice and comment requirements and prohibits them from circumventing these requirements by issuing unofficial rules as “guidance documents.”

After President Clinton issued Executive Order 12866, Federal agencies found it easier to issue so-called “guidance documents,” rather than formal rules. Although these guidance documents are merely an agency’s interpretation of how the public can comply with a particular rule, and are not enforceable in court, as a practical matter they operate as if they are legally binding. Thus, they have been used by agencies to circumvent OIRA regulatory review and public notice and comment requirements.

In 2007, OMB issued a Bulletin which contained a provision closing this loophole by imposing “Good Guidance Practices” on Federal agencies. This requires agencies to provide public notice and comment for significant guidance documents. Our bill would essentially codify this OMB Bulletin.

Third, our bill helps out the “little guy” trying to navigate our incredibly

complex and burdensome regulatory environment. So many small businesses don't have a lot of capital on hand. When a small business inadvertently runs afoul of a Federal regulation for the first time, that first penalty could sink the business and the jobs it supports. Our bill directs agencies to search their files to determine whether a small business is facing a paperwork violation for the first time, and to offer to waive the penalty for that violation if no harm has come of it. It simply doesn't make sense to me to punish small businesses the first time they accidentally fail to comply with paperwork requirements, so long as no harm comes from that failure.

One example of a planned onerous regulatory action by the Environmental Protection Agency is the Maximum Achievable Control Technology standards for boilers and incinerators, known as Boiler MACT. While currently being reworked by the agency, these rules could cost manufacturers billions of dollars, and potentially lead to the loss of thousands of jobs, especially in some of the hardest hit areas across the Nation. According to a recent study commissioned by the American Forest and Paper Association, implementing the rule as previously drafted could cause 36 pulp and paper mills around the country to close, putting over 20,000 Americans out of work—18% of the industry's workforce. For this reason, our legislation includes the EPA Regulatory Relief Act, which currently has 40 bipartisan cosponsors, to guarantee the 15 months the EPA itself requested, to provide the agency with the testing data needed for achievable rules and provide manufacturers with the time needed for the capital planning to comply with these very complex and expensive rules.

Maine has lost more than a third of its manufacturing jobs during the past decade, and I am wary of imposing costly new regulations that could lead to more mill closures and lost jobs. I remain committed to working with my Senate colleagues and the EPA to help ensure that the Boiler MACT rules are crafted to protect public health without harming the forest products industry, which is the lifeblood of many small, rural communities.

We must also act to reform our Federal jobs training programs. In our current fiscal climate, we need to ensure that our Federal dollars are being used as efficiently and productively as possible. The Collins-McCaskill bill requires OMB to study the consolidation of duplicative job training programs and make legislative recommendations to Congress that contemplate consolidating job training programs under a single agency. Of the savings that result from this consolidation, half will be devoted to classroom, field, and hands-on training, and the other half will be used to reduce the deficit.

In closing, Senator McCaskill and I believe this is the first comprehensive bipartisan jobs bill to be introduced in the Senate since the President's speech before the Joint Session of Congress in September. With the end of the year just three weeks away, we must take action now to protect the American public from a tax increase that will occur automatically on January 1. We must also work together to help grow the economy and add jobs. In achieving these goals, I would ask my colleagues to consider the approach Senator McCaskill and I have proposed in this bipartisan jobs legislation.

By Mr. REED (for himself, Ms. SNOWE, Mr. SANDERS, Mr. BROWN of Ohio, Mr. KERRY, Mrs. SHAHEEN, Mr. WHITEHOUSE, Mr. FRANKEN, Mr. BLUMENTHAL, Mr. CASEY, Mrs. GILLIBRAND, Mr. ROCKEFELLER, Mr. LIEBERMAN, Ms. COLLINS, Mr. BROWN of Massachusetts, Ms. AYOTTE, Mr. SCHUMER, Mr. WEBB, Mr. BEGICH, and Mr. CARDIN):

S. 1961. A bill to provide level funding for the Low-Income Home Energy Assistance Program; to the Committee on Appropriations.

Mr. REED. Mr. President, today I am introducing the bipartisan LIHEAP Protection Act, along with my colleagues Senator SNOWE from Maine and Senator SANDERS from Vermont, and many of our colleagues on both sides of the aisle. I am pleased to see such broad support for funding for this critical program even in the midst of our budget challenges.

Indeed, LIHEAP is a lifeline, providing vulnerable families with vital assistance when they need it most by helping low-income families and seniors on fixed-incomes with their energy bills.

Last year, Congress provided \$4.7 billion for LIHEAP. In an effort to control Federal spending, the Administration proposed an approximately 45 percent cut in LIHEAP funds from last year's level, down to about \$2.57 billion in 2012. The Senate and House Appropriations bills only partially restored this drastic cut, to roughly \$3.6 billion and \$3.4 billion, respectively.

These cutbacks could put our most vulnerable citizens at risk, especially as the number of households eligible for the program already exceeds those receiving assistance. Given the difficult economy and the projected rise in household energy expenditures, as much as 8 percent more than last year for those who heat their homes with heating oil according to the Energy Information Administration, it does not make sense to cut vital LIHEAP funding.

We also need to act quickly. If funding is not finalized before winter, millions of low-income households run the risk of not receiving assistance during

the coldest months when they need it most. Given the uncertainty in the full year appropriations for LIHEAP, which resulted in the release of only \$1.7 billion in LIHEAP funding to States in October, some States have already begun lowering LIHEAP grant amounts.

LIHEAP is a smart investment. For every dollar in benefits paid, \$1.13 is generated in economic activity, according to economists Mark Zandi and Alan S. Blinder.

I know we face a lot of difficult budget decisions around here, but I, along with so many of my colleagues, believe that LIHEAP should not be the place where we seek savings.

I look forward to working to provide level funding for LIHEAP for fiscal year 2012.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1961

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "LIHEAP Protection Act".

#### SEC. 2. LOW-INCOME HOME ENERGY ASSISTANCE APPROPRIATIONS.

(a) PURPOSE.—The purpose of this section—

(1) is to ensure the appropriation for fiscal year 2012 of the total amounts described in subsection (b), for payments described in that subsection, under this Act or prior appropriations Acts; and

(2) is not to require the appropriation of additional amounts for those payments, under appropriations Acts enacted after this Act.

(b) APPROPRIATION.—In addition to any amounts appropriated under any provision of Federal law, as of the date of enactment of this Act, there is appropriated, out of any money in the Treasury not otherwise appropriated, for fiscal year 2012—

(1) an amount sufficient to yield a total amount of \$4,501,000,000, for making payments under subsections (b) and (d) of section 2602 of the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621), and all of such total amount shall be used under the authority and conditions applicable to such payments under the Full-Year Continuing Appropriations Act, 2011; and

(2) an amount sufficient to yield a total amount of \$200,000,000, for making payments under section 2602(e) of the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621(e)), notwithstanding the designation requirement of such section 2602(e), and all of such total amount shall be used under the authority and conditions applicable to such payments under the Full-Year Continuing Appropriations Act, 2011.

#### SEC. 3. SENSE OF THE SENATE.

It is the sense of the Senate that—

(1) this Act should be carried out in a manner consistent with the Budget Control Act of 2011 (Public Law 112-25; 125 Stat. 240);

(2) the Secretary of Health and Human Services should continue and expedite program integrity efforts to identify best practices used by grant recipients under the Low-

Income Home Energy Assistance Program, provide training and technical assistance to such grant recipients, recommend policy changes, and assess and mitigate risk at the Federal, State and local levels, in order to eliminate any waste, fraud, and abuse in the Program and strengthen the Program so all Program funds reach the households who need them most; and

(3) every Program dollar going to waste, fraud, and abuse is a dollar not being spent as the dollar is needed or intended.

Mr. SANDERS. Mr. President, I wish to say a few words about an issue of enormous importance to the people of the State of Vermont and people all over this country; that is, the issue of making sure that in America this winter nobody goes cold, that nobody freezes to death, that children do not become ill because the thermostats in their homes are turned down so low.

The issue I am talking about is to ask for support for legislation that is being introduced by Senator JACK REED of Rhode Island and Senator OLYMPIA SNOWE of Maine which would level fund the LIHEAP program at \$4.7 billion. As most of my colleagues know, LIHEAP is the Low-Income Home Energy Assistance Program.

Here is the problem we face. We are in the midst of a horrendous recession. Unemployment is sky high. In many cases, wages are in decline, poverty is increasing, and at the same time the price for home heating oil and propane gas is going up. According to the Energy Information Administration, average expenditures for households that heat with oil or propane are forecast to be higher than in any previous winter. Heating oil prices are currently averaging about \$3.90 a gallon. So what people in the Northeast and people all over this country are looking at are the highest home heating oil prices we have ever seen, coming in the midst of a terrible recession, with unemployment high and wages in decline.

In Vermont, heating oil prices are already 34 percent higher than they were at the same time last year. It is currently \$3.82 a gallon, compared to \$2.85 a gallon last year. What is happening is that because of cuts—significant cuts—in LIHEAP funding, the average LIHEAP benefit in Vermont is 45 percent less this year than it was last year, and that is \$474 per family as opposed to \$866 last year.

One thing that has to be understood about LIHEAP is that nearly 80 percent of funding from this program goes to our citizens who are elderly, families with preschool kids, and the disabled. So the people who benefit from this program are some of the most vulnerable people in our country. Eighty percent of the funding, once again, goes to senior citizens, families with preschool children, young children, and people who are dealing with disabilities.

It is not uncommon in the State of Vermont and in other States for the temperatures to drop to 10 below zero

or 20 below zero in the wintertime. When people do not have enough funds to heat their homes or their apartments, serious problems arise.

What I want to do is take a moment to read some comments my office has received from Vermonterers all over the State who are trying desperately to stay warm this winter.

Josie Crosby, 81 years of age, of Brattleboro, VT, said this:

We will have money for one more tank. After that, I don't know.

That is a woman who is 81 years of age who has money for one more tank of oil. After that, she is not sure how they will stay warm in the winter.

A 48-year-old from Orleans County in the northern part of our State wrote this:

I was able to get 100 gallons of fuel last week, and for that I am grateful. The struggle begins now on how to stretch that fuel as long as possible. I had to buy a portable electric heater to keep halfway warm while waiting for fuel assistance. I don't even want to see how high my electric bill will be. I am an honorably discharged disabled veteran and have limited funds. I have already slashed my food bill, so what goes next? My meds, my electric service, my home?

That is from a disabled vet in the northern part of Vermont.

A 59-year-old woman in central Vermont writes:

I have been keeping my thermostat as low as I can "almost" tolerate. I bundle up in the house with several sweaters, and even a coat and hat at times. When company arrives, I am embarrassed at how ridiculous I probably appear. I am just barely squeaking through each month. I have made cuts everywhere possible, including food.

Wendy Raven, 62, from Whitingham, VT, writes:

I had to drag my bed out of my bedroom and put it in the living room, then close off the bedroom for the winter. I will have to eat even less than I do now in order to pay my fuel bills. I have done everything I can to button up the place, but now all I can do is pray I get through the winter without a bill so large it will again take me until next fall to pay it off.

Is that where we are in the United States of America—that we force people to live under those conditions?

A 31-year-old woman from Bennington, VT, writes:

We are now trying to stay warm by scraping up enough for a gallon or two of heating oil a week, and keeping the thermostat down very low. I turn the furnace off during the day when my child is in school and turn it on an hour before she gets home so that the house gets warm. We are hoping to qualify for crisis fuel assistance or we are in trouble, because there is nowhere to get the extra money needed to pay for the fuel, especially considering its continuously increasing cost. We have to choose what bills to pay each month and what ones not in order to put food on the table.

In this great Nation, in the midst of a recession, in the midst of high unemployment, in the midst of growing poverty, we as the Senate must be very clear that nobody in this country is

going to go cold this winter; that we are not going to pick up a paper in Maine or Rhode Island or Vermont or North Dakota and read that some senior citizen was found frozen to death. That is not what we are going to allow. That is why Senators JACK REED, OLYMPIA SNOWE, I, and many others are working hard so that at the very least we can level fund LIHEAP so that nobody in our country goes cold this winter.

## SUBMITTED RESOLUTIONS

### SENATE RESOLUTION 345—EXPRESSING THE SENSE OF THE SENATE ON THE CLOSURE OF UMATILLA ARMY CHEMICAL DEPOT, OREGON

Mr. WYDEN (for himself and Mr. MERKLEY) submitted the following resolution; which was considered and agreed to:

S. RES. 345

Whereas, in December 2001, the National Defense Authorization Act for fiscal year 2002 (Public Law 107-107) was signed into law, which included authorization for a 2005 round of defense base closure and realignment (BRAC);

Whereas, on February 16, 2004, Secretary of Defense Donald Rumsfeld included the closure of the Umatilla Army Chemical Depot, Oregon, as one of his recommendations for the 2005 round of defense base closure and realignment;

Whereas, on September 8, 2005, the Defense Base Closure and Realignment Commission, in its report making recommendations to the President, found that Secretary of Defense Rumsfeld's assertion that the chemical demilitarization mission at Umatilla would be complete by the 2nd quarter of 2011 was optimistic, and wrote, "An examination of status information for the depot's mission completion and subsequent closure revealed that dates may slip beyond the 6-year statutory period for completion of BRAC actions.";

Whereas, in that same report, the Defense Base Closure and Realignment Commission took the Secretary of Defense's recommendation "Close Umatilla Chemical Depot, OR" and changed it to "On completion of the chemical demilitarization mission in accordance with treaty obligations, close Umatilla Chemical Depot, OR";

Whereas, by doing so, the Defense Base Closure and Realignment Commission acknowledged that the closure of Umatilla Army Chemical Depot would happen when the demilitarization mission is completed, even if that is after September 15, 2011; and

Whereas Congress did not pass a joint resolution of disapproval with respect to the Commission's report, and the report and recommendations became law: Now, therefore, be it

*Resolved*, That, in light of the clear history, the Senate reiterates its original intent and reaffirms its direction that the closure of the Umatilla Army Chemical Depot, Oregon, and subsequent management and disposal shall be carried out in accordance with procedures and authorities contained in the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101-510; 10 U.S.C. 2687 note).

## NOTICE OF HEARING

COMMITTEE ON HEALTH, EDUCATION, LABOR,  
AND PENSIONS

Mr. HARKIN. Mr. President, I wish to announce that the Committee on Health, Education, Labor, and Pensions will meet in executive session on Wednesday, December 14, 2011, at 10 a.m. in SD-430 to mark up the following:

S. 1855, the Pandemic and All-Hazards Preparedness Act Reauthorization of 2011;

Wendy Spencer, to be Chief Executive Office of the Corporation for National and Community Service;

Deepa Gupta, to be a member of the National Council on the Arts;

Christopher Merrill, to be a member of the National Council on the Humanities;

Stephanie Orlando, to be a member of the National Council on Disability;

Gary Blumenthal, to be a member of the National Council on Disability; and  
en bloc, one hundred and seventy-eight nominations to the Public Health Service.

For further information regarding this meeting, please contact the committee on (202) 224-5375.

AUTHORITY FOR COMMITTEES TO  
MEETCOMMITTEE ON COMMERCE, SCIENCE, AND  
TRANSPORTATION

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on December 7, 2011, at 2:30 p.m. in room 253 of the Russell Senate Office Building.

The Committee will hold a hearing entitled, "Turning the Investigation on the Science of Forensics."

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMITTEE ON FINANCE

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on December 7, 2011, at 10 a.m., in room 215 of the Dirksen Senate Office Building, to conduct a hearing entitled "Drug Shortages: Why They Happen and What They Mean."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HOMELAND SECURITY AND  
GOVERNMENTAL AFFAIRS

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the Committee on Homeland Security and Governmental Affairs be authorized to meet during the session of the Senate on December 7, 2011, at 9:30 a.m. to conduct a hearing entitled "Homegrown Terrorism: The Threat to Military Communities Inside the United States."

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMITTEE ON THE JUDICIARY

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the Com-

mittee on the Judiciary be authorized to meet during the session of the Senate on December 7, 2011, at 10 a.m., in room SD-226 of the Dirksen Senate Office Building, to conduct a hearing entitled "Reauthorizing the EB-5 Regional Center Program: Promoting Job Creation and Economic Development in American Communities."

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON FINANCIAL INSTITUTIONS  
AND CONSUMER PROTECTION

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs' Subcommittee on Financial Institutions and Consumer Protection be authorized to meet during the session of the Senate on December 7, 2011, at 2 p.m., to conduct a hearing entitled "Enhanced Supervision: A New Regime for Regulating Large, Complex Financial Institutions."

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT  
MANAGEMENT, THE FEDERAL WORKFORCE,  
AND THE DISTRICT OF COLUMBIA AND THE AD  
HOC SUBCOMMITTEE ON DISASTER RECOVERY  
AND INTERGOVERNMENTAL AFFAIRS

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the Committee on Homeland Security and Governmental Affairs' Subcommittee on Oversight of Government Management, the Federal Workforce, and the District of Columbia and the Ad Hoc Subcommittee on Disaster Recovery and Intergovernmental Affairs be authorized to meet during the session of the Senate on December 7, 2011, at 2:30 p.m., to conduct a joint hearing entitled "From Earthquakes to Terrorist Attacks: Is the National Capital Region Prepared for the Next Disaster?"

The PRESIDING OFFICER. Without objection, it is so ordered.

## PRIVILEGES OF THE FLOOR

Mr. GRASSLEY. Mr. President, I ask unanimous consent that Ty Grogan, an intern of Senator DEMINT's office, be granted floor privileges for today's session of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I ask unanimous consent that Ashley Stevens and Anna Esten of my staff be granted the privilege of the floor for the duration of today's proceedings.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLOSURE OF UMATILLA ARMY  
CHEMICAL DEPOT, OREGON

Mr. MERKLEY. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 345, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 345) expressing the sense of the Senate on the closure of Umatilla Army Chemical Depot, Oregon.

There being no objection, the Senate proceeded to consider the resolution.

Mr. MERKLEY. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any related statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 345) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

## S. RES. 345

Whereas, in December 2001, the National Defense Authorization Act for fiscal year 2002 (Public Law 107-107) was signed into law, which included authorization for a 2005 round of defense base closure and realignment (BRAC);

Whereas, on February 16, 2004, Secretary of Defense Donald Rumsfeld included the closure of the Umatilla Army Chemical Depot, Oregon, as one of his recommendations for the 2005 round of defense base closure and realignment;

Whereas, on September 8, 2005, the Defense Base Closure and Realignment Commission, in its report making recommendations to the President, found that Secretary of Defense Rumsfeld's assertion that the chemical demilitarization mission at Umatilla would be complete by the 2nd quarter of 2011 was optimistic, and wrote, "An examination of status information for the depot's mission completion and subsequent closure revealed that dates may slip beyond the 6-year statutory period for completion of BRAC actions.";

Whereas, in that same report, the Defense Base Closure and Realignment Commission took the Secretary of Defense's recommendation "Close Umatilla Chemical Depot, OR" and changed it to "On completion of the chemical demilitarization mission in accordance with treaty obligations, close Umatilla Chemical Depot, OR";

Whereas, by doing so, the Defense Base Closure and Realignment Commission acknowledged that the closure of Umatilla Army Chemical Depot would happen when the demilitarization mission is completed, even if that is after September 15, 2011; and

Whereas Congress did not pass a joint resolution of disapproval with respect to the Commission's report, and the report and recommendations became law: Now, therefore, be it

*Resolved*, That, in light of the clear history, the Senate reiterates its original intent and reaffirms its direction that the closure of the Umatilla Army Chemical Depot, Oregon, and subsequent management and disposal shall be carried out in accordance with procedures and authorities contained in the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101-510; 10 U.S.C. 2687 note).

ORDERS FOR THURSDAY,  
DECEMBER 8, 2011

Mr. MERKLEY. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 9:30 a.m., on Thursday, December 8, 2011; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, and the time for the two leaders be reserved for their use later in the day; that following any leader remarks, the Senate proceed to executive session to consider Calendar No. 413, the nomination of Richard Cordray to be Director of the Consumer Financial Protection

Bureau, with the time until 10:30 a.m. equally divided and controlled between the two leaders or their designees; and that the cloture vote on the Cordray nomination occur at 10:30 a.m.; finally, that if cloture is not invoked, the Senate resume legislative session and resume consideration of the motion to proceed to S. 1944.

The PRESIDING OFFICER. Without objection, it is so ordered.

---

PROGRAM

Mr. MERKLEY. Mr. President, the cloture vote on the Cordray nomination will be held at 10 a.m. tomorrow.

Additionally, cloture was filed on the motion to proceed to S. 1944, the Middle Class Tax Cut Act of 2011. Unless an agreement is reached, that vote will be Friday morning.

---

ADJOURNMENT UNTIL 9:30 A.M.  
TOMORROW

Mr. MERKLEY. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order.

There being no objection, the Senate, at 6:03 p.m., adjourned until Thursday, December 8, 2011, at 9:30 a.m.

## HOUSE OF REPRESENTATIVES—Wednesday, December 7, 2011

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. LATTA).

### DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,

December 7, 2011.

I hereby appoint the Honorable ROBERT E. LATTA to act as Speaker pro tempore on this day.

JOHN A. BOEHNER,  
*Speaker of the House of Representatives.*

### MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 5, 2011, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties, with each party limited to 1 hour and each Member other than the majority and minority leaders and the minority whip limited to 5 minutes each, but in no event shall debate continue beyond 11:50 a.m.

### FLAWED DRAFT ENVIRONMENTAL ASSESSMENT IN PUERTO RICO

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. GUTIERREZ) for 5 minutes.

Mr. GUTIERREZ. Today I'm sending a letter to Colonel Alfred A. Pantano, the commander of the U.S. Army Corps of Engineers in Jacksonville, Florida, the district that oversees, among other things, the permitting process for the construction of a massive gas pipeline that will cross the mountains in Puerto Rico. The 92-mile gas pipeline, which does not make any sense environmentally, economically, or ethically, is moving forward in part because Colonel Pantano's office issued a Draft Environmental Assessment that clearly favors the eventual issuance of the permit.

I would like to read an excerpt from my letter:

"I was intensely angered, but sadly not entirely surprised, when I read the report issued by your office regarding the gasoducto in Puerto Rico. From the start, people in Puerto Rico have been telling me that they suspect all the regulatory oversight is nothing more than show and this process has

been assured of passage because of insider cozy relationships between the Army Corps Jacksonville staff and the very industry they are supposed to be overseeing and regulating.

"Further, having sunk millions of dollars in this project already, the ruling party in Puerto Rico's very credibility is at stake on this massive construction project going forward.

"The Draft Environmental Assessment is so slanted and flawed that it adds more evidence to the growing view that there will be no meaningful oversight for this project and no meaningful input from the residents of Puerto Rico.

"I believe your decision, Colonel Pantano, shows a complete disregard for compelling evidence demonstrating little need for the project. It shows disregard for the opinion of other Federal agencies who have looked at the project. The decision disregards evidence of potential safety hazards to the people of Puerto Rico. This woefully slanted decision also gives credence to the suggestion of impropriety in matters related to this project and the inability of the U.S. Army Corps of Engineers to oversee this project.

"I believe this process should begin again in an open and transparent manner, that the process that has led to the decision should be fully investigated, and further efforts should be supervised by new leadership. I ask for a U.S. Army Office of Inspector General investigation immediately into the relationship between the government of Puerto Rico, the Army Corps of Engineers Jacksonville office, and the power companies and its contractors.

"Lobbyists who used to work for the Army Corps of Engineers should not be allowed to line their pockets at the expense of the safety of the people of Puerto Rico. Your boss, President Obama, stated 'the cozy relationship between the regulators and the industry they regulate must come to an end.'

"I strongly support the President and agree with him completely. However, my misgivings about the pipeline project multiplied substantially when the project was abruptly removed from Army Corps' office in Puerto Rico and transferred to the Jacksonville office in Florida.

"There is clearly a cozy relationship between current Jacksonville staff that you supervise and former Jacksonville staff who now supervise and work for the private company consulted by and

hired by the government of Puerto Rico to lobby and provide technical assistance for the project."

The result: The Army Corps of Engineers appears to have adopted all the power company's wholesale argument for moving forward. What a surprise. These include ignoring the advice of other Federal agencies that do not seem to have any cozy connections and relationships to the moneyed interests behind the pipeline, including warnings from the Fish and Wildlife Service—ignored; the Environmental Protection Agency—ignored.

Finally, I point out that it is an insult to the people of Puerto Rico to have released the Army Corps' report in the manner it was released. The report is exclusively in English, whereas the common language in Puerto Rico is Spanish. English is a language that hundreds of thousands of Puerto Ricans whose lives will be directly affected by the pipeline do not speak and cannot read. How are they supposed to give advice and consent?

It is also personally insulting that the 30-day comment period occurred during the holiday season when the residents of Puerto Rico are especially focused on their family, and interestingly enough, Congress will be in recess.

The people of Puerto Rico, including those who live humbly in the mountains and those who have derived their livelihoods from the land, deserve a government that protects their interest. They deserve to know when their safety and way of life are threatened, the government will protect them. This case reveals the opposite. It reveals a government agency that ignores the warnings of other government agencies and a wealth of facts regarding safety concerns and environmental impact. It reveals a government agency that responds more to well-connected lobbyists than advocates for the people of Puerto Rico. It reveals a government agency that is doing nothing—not doing the job that it was mandated to do.

Mr. Speaker, I would like to include in the RECORD this petition, on behalf of many individuals and environmental groups from the Legal Assistance Clinic at the Law School at the University of Puerto Rico, to have the environmental assessment translated into Spanish.

ESCUELA DE DERECHO,

UNIVERSIDAD DE PUERTO RICO,

San Juan, PR, December 6, 2011.

Re Petition to Translate into Spanish the Draft Environmental Assessment, Statement of Findings, Public Notice, and Joint Permit Application for the Via Verde Natural Gas Pipeline Project, Permit Application No. SAJ 2010-02881 (IP-EWG).

Colonel ALFRED A. PANTANO,

*District Commander, U.S. Army Corps of Engineers, Jacksonville District, San Marco Boulevard, Jacksonville, FL.*

DEAR COLONEL PANTANO: The United States Army Corps of Engineers (USACE) has recently published a Draft Environmental Assessment and Statement of Findings (collectively, Draft EA) as part of its environmental review process under the National Environmental Policy Act (NEPA) for the Via Verde Natural Gas Pipeline project proposed by applicant Puerto Rico Electric Power Authority (PREPA) under permit application SAJ-2010-2881 (IP-EWG). This project involves the construction of a 92-mile natural gas pipeline that would cross the island of Puerto Rico, starting at the municipality of Peñuelas in the south coast, to Arecibo in north coast and then east to San Juan. According to the Draft EA, the purpose of the pipeline is to supply natural gas to three power plants located in the north coast. The project will have temporary and permanent impacts on 235 river and stream crossings; 1,500 acres of land; 369 acres of wetlands (including various types of important aquatic resources); the biodiversity-rich and underground water-abundant northern karst zone; private and public forested lands; natural reserves; archaeological sites; areas of critical habitat for endangered and/or threatened species; rural areas; densely populated urban areas; and coastal areas. In all, the project may affect over 40 endangered or threatened species, and will put at permanent risk the lives of over 200,000 residents. The majority of the people of Puerto Rico are against this project, as shown by various polls, the 6,000 comment letters your agency has received so far, and the public demonstrations against the project involving tens of thousands of Puerto Rican citizens. In addition, this project has been the subject of vivid presentations on the floor of Congress, as well as hundreds of news articles, including attention from the New York Times, Washington Post, and other national media. Not surprisingly, your agency has acknowledged that this project is one of very high public interest.

We are submitting this letter on behalf of various environmental groups and individuals. The conservation groups include the Puerto Rico Chapter of The Sierra Club; Center for Biological Diversity; Ciudadanos del Karso; Asociación Nacional de Derecho Ambiental; Comité Bo. Portugués Contra el Gasoducto; Comité Utuadoño en Contra del Gasoducto; Sociedad Ornitológica Puertorriqueña; Vegabajenios Impulsando Desarrollo Ambiental Sustentable; Iniciativa para un Desarrollo Sustentable; and Comité Toabajenio en Contra del Gasoducto. These groups all share a common purpose: to promote the general welfare of the communities they serve through education and capacity building of its residents concerning the adverse impacts of human activities on the ecologic balance of natural systems and the importance of restoring the environment and promoting conditions under which human beings and the environment can exist in harmony to fulfill economic, social and other needs of present and future generations.

Likewise, the individual clients of the environmental law clinics of Vermont Law School, University of Puerto Rico School of Law, and the Inter American University School of Law; and of the Puerto Rico Legal Services, Inc. support this petition as well. These individuals include Juan Cortés Lugo; Sofia Colón Matos; Luis Guzmán Meléndez; Ana Oquendo Andújar; Iván Vélez González; Francisca M. Montero Colón; Sol Maria De Los Angeles Rodríguez Torres; Iván Carlos Belez Montero; Aristides Rodríguez Rivera; Ada I. Rodríguez Rodríguez; Alex Noel Natal Santiago; Miriam Negrón Pérez; Francisco Ruiz Nieves; Silvy Jordán Molero; Ana Serrano Maldonado; Félix Rivera González; William Morales Martínez; Trinita Alfonso Vda. De Folch; Alejandro Saldaña Rivera; Dixie Vélez Vélez; Dylia Santiago Collaso; Ernesto Forestier Torres; Miriam Morales González; Fernando Vélez Vélez; Emma González Rodríguez; Samuel Sánchez Santiago; Raquel Ortiz González; Maritza Rivera Cruz; Virgilio Heredia Bonilla; Lillian Serrano Maldonado; Yamil A. Heredia Serrano; Jean Paul Heredia Romero; Pablo Montalvo Bello; Ramona Ramos Dias; Virgilio Cruz Cruz; Cándida Cruz Cruz; Amparo Cruz Cruz; Gilberto Padua Rullán; Sabrina Padua Torres; Maribel Torres Carrión; Hernán Padín Jiménez; Rosa Serrano González; Jesús García Oyola; Sucesión de Ada Torres, compuesta por Carmen Juarbe Pérez, Margarita Forestier Torres y Ernesto Forestier Torres; Maria Cruz Rivera; Cristóbal Orama Barreiro; Haydee Irizarry Medina; Miguel Baéz Soto; and Gustavo Alfredo Casaldud Torres.

We anticipate that more groups and individual citizens will join this petition in the coming days or weeks.

The purpose of this letter is to formally request that the USACE prepare a Spanish version of Draft EA and other key documents, particularly the most recent Public Notice and Joint Permit Application. In order for the public comment period to provide a meaningful opportunity for public input on a project of tremendous local interest and concern, it is important that these translations are prepared and distributed to the public *before* the commencement of the public comment period. Once the USACE provides an official Spanish version of the Draft EA and other key documents, the USACE should provide a public comment period of at least 60 days in light of the complexity and magnitude of this proposed project. In addition, we respectfully request that the USACE provide public hearings in Puerto Rico with translators available.

There are ample statutory and regulatory provisions as well as executive orders and judicial precedents which support our requests, as discussed further below. Furthermore, compliance with these requests is necessary if USACE intends to provide affected communities and interested individuals throughout the island of Puerto Rico with an adequate opportunity to comment on the project, considering that less than 19% of island residents consider themselves to be bilingual. The residents of these communities often have valuable information about places and resources that they value and the potential environmental, social, and economic effects that the proposed federal actions may have on those places and resources. NEPA and other federal statutes, regulations, and executive orders require USACE to provide concerned citizens and organizations with access to enough information to allow them to provide meaningful comments, and these laws require USACE to take their comments

into account. If the key documents to be evaluated remain available only in a foreign language, however, it will be too difficult for the affected and concerned citizens and groups alike to meaningfully and adequately comment on the project. In fact, the Draft EA and other key documents include so much technical and difficult to grasp information that even an English-speaking layperson would have difficulty reading, analyzing, and commenting in just 30 days.

Fundamental principles of environmental justice warrant that the Draft EA for a project of such magnitude must be translated in the Spanish language and that the public comment period be restarted and extended to 60 days once the Spanish version of the EA is available to the public. The USACE is bound to these principles by NEPA, the Council on Environmental Quality Guidelines (CEQ guidelines), the Executive Order on Federal Actions to Address Environmental Justice, the Department of Defense Strategy on Environmental Justice pursuant to the Executive Order, the U.S. Constitution, and other legal authorities and precedents.

Security issues also warrant a translation. The pipeline is a safety risk to various thousands of people who will live, work or commute daily near the pipeline's ROW. The Draft EA recognizes this fact when it states that "the addition of the pipeline in the community decreases public safety." Likewise the value of property might be affected depending on the proximity to the ROW of the pipeline. Basic fundamental principles of justice require that people put in harm's way or whose property, may be affected be able to read and understand the Draft EA which contains the basic findings of the USACE regarding the risks of the proposed action to their lives and property.

#### NEPA AND CEQ REGULATIONS

The Draft EA for the proposed Via Verde Pipeline project was prepared by the USACE pursuant to an environmental review process required under NEPA. NEPA's environmental review process has two major purposes: (1) for agencies to make better informed decisions; and (2) for other interested agencies and citizens alike to have an opportunity to participate and provide input in the review process. Courts have repeatedly interpreted the statute as requiring agencies to grant meaningful and adequate participation to the public by disclosing all non-exempted documentation the agency used and by allowing the public to submit comments in a process that guarantees that the agency will take into account the public's comments.

In light of these obligations, USACE has repeatedly promised that it will take into account all the comments submitted by the people of Puerto Rico. A 30-day period is not enough time to give the people of Puerto Rico a meaningful opportunity to read, analyze, evaluate and then comment on this 110-page long Draft EA for this highly complex and controversial project. Moreover, the USACE has overlooked the fundamental fact that Puerto Rico is a Spanish-speaking nation and the Draft EA, a highly technical document, and other key documents are written in the English language. If affected and concerned citizens are not able to read the key documents under review, their participation will not be meaningful and adequate as the statute requires.

Through NEPA, Congress ordered the Council on Environmental Quality (CEQ) to issue regulations governing federal agency implementation of the NEPA environmental

review process. These CEQ regulations are binding on all federal agencies. Section 1506.6 of the CEQ regulations, regarding public involvement, states that agencies shall:

(a) Make diligent efforts to involve the public in preparing and implementing their NEPA procedures.

(b) Provide public notice of NEPA-related hearings, public meetings, and the availability of environmental documents so as to inform those persons and agencies who may be interested or affected.

1. . . .

2. . . .

3. In the case of an action with effects primarily of local concern the notice may include:

(i) . . .

(ii) . . .

(iii) Following the affected State's public notice procedures for comparable actions.

(iv) . . .

(c) . . .

(d) Solicit appropriate information from the public.

(e) . . .

(f) Make environmental impact statements, the comments received, and any underlying documents available to the public . . . [emphasis added]

When a Federal provision requires "diligent efforts to involve the public", to "inform those persons [ . . . ] who may be interested or affected", and to "solicit appropriate information from the public" in a Spanish-speaking nation like Puerto Rico, regarding a project so controversial and of such a scope and magnitude as Va Verde, the only way to comply with the provision is by providing the information in the common language spoken. Likewise, in the case of an action with effects primarily of local concern, as in the case of Va Verde, section 1506.6 (b)(3)(iii) orders the agency to follow "the affected State's public notice procedures for comparable actions" which for Puerto Rico would be a draft EA in the Spanish language.

CEQ regulations offer additional reinforcement in order to guarantee an adequate public participation. For instance, section 1502.8 of the CEQ guidelines state that "[e]nvironmental impact statements shall be written in plain language and may use appropriate graphics so that decisionmakers and the public can readily understand them" [emphasis added]. Courts have interpreted this "plain language" provision as to require Federal agencies to provide the public with comprehensive information regarding environmental consequences of a proposed action and to do so in a readily understandable manner. See *Klamath-Siskiyou Wildlands Center v. Bureau of Land Management*, 387 F.3d 989 (2004), "While the conclusions of agency expert are entitled to deference, National Environmental Policy Act (NEPA) documents are inadequate if they contain only narratives of expert opinions, and the documents are unacceptable if they are indecipherable to the public"; *Earth Island Institute v. U.S. Forest Service*, C.A.9 (Cal.), 442 F.3d 1147 (2006), *certiorari denied* 127 S.Ct. 1829, 549 U.S. 1278, 167 L.Ed.2d 318 (emphasis added), "A final environmental impact statement (FEIS) must be organized and written so as to be readily understandable by governmental decisionmakers and by interested non-professional laypersons likely to be affected by actions taken under the FEIS" [emphasis added]; *Oregon Environmental Council v. Kunzman* 817 F.2d 484 (1987), "Readability requirement of Council on Environmental Quality regulation mandates that environmental impact

statement be organized and written so as to be readily understandable by governmental decision makers and by interested nonprofessional laypersons likely to be affected by actions taken under the environmental impact statement" [ . . . ] "Upon review of environmental impact statement, parties may introduce evidence concerning reading level of affected public and expert testimony concerning indicia of inherent readability. National Environmental Policy Act of 1969, §102, 42 U.S.C.A. §4332; 5 U.S.C.A. §706(2)(A, D)" [emphasis added]. See also *National Resources Defense Council, Inc. v. United States Nuclear Regulatory Comm'n*, 685 F.2d 459, 487 n. 149 (D.C.Cir.1982); *Baltimore Gas & Elec. Co. v. NRDC*, 462 U.S. 87 (1983); and *Warm Springs Dam Task Force v. Gribble*, 78 F.Supp. 240, 252 (N.D.Cal.1974), *aff'd*, 621 F.2d 1017 (9th Cir.1980). These requirements for EISs apply equally to EAs, as indicated in the CEQ regulations' use of the term "environmental documents" rather than EISs alone.

In the case of Puerto Rico, a Draft EA that is highly technical and written in the English language is "undecipherable" and not "readily understandable" in order to be properly assessed and commented by lay persons whom in their wide majority are not fluent in the English language.

#### ATTORNEY GENERAL ERIC HOLDER MUST RESIGN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Louisiana (Mr. BOUSTANY) for 5 minutes.

Mr. BOUSTANY. Mr. Speaker, U.S. Attorney General Eric Holder must resign immediately. After months of evading tough questions and giving unclear answers about Operation Fast and Furious, it now appears the Justice Department's top official has contradicted his own testimony given before Congress.

Under Operation Fast and Furious, the Bureau of Tobacco, Alcohol, and Firearms allowed "straw" purchasers to buy at least 1,400 weapons, despite the fact it knew that these weapons would likely end up in the hands of violent Mexican drug cartels. The ATF lost track of the guns after they were sold to criminals. Since then, many have been used in hundreds of crimes on both sides of the border, including the murders of a Border Patrol agent in Arizona and an immigration officer at the U.S. embassy in Mexico City.

Why did the Attorney General allow for the transfer of guns across the border without working in conjunction with Mexican authorities when he knew the ATF was unable to trace them? That's a very important question that must be answered. This botched program should never have been authorized in the first place. Attorney General Holder should resign over his failure and his evasive and contradictory testimony to the United States Congress.

#### THE REINS ACT AND MINE SAFETY

The SPEAKER pro tempore. The Chair recognizes the gentleman from

California (Mr. GEORGE MILLER) for 5 minutes.

Mr. GEORGE MILLER of California. Mr. Speaker, Members of the House, later today, the House will consider the REINS Act, which is legislation designed to make sure that in a Republican-controlled Congress, no new regulations would be put into effect, whether they deal with clean drinking water, clean air, child safety, the safety of children when they play with their toys, the drugs that so many citizens need to take to maintain their health, or occupational safety at the workplace. All of that would be destroyed under the REINS Act.

You might ask yourself what would society look like? Well, we had a preview of what that society looks like yesterday when the Mine Safety and Health Administration released its report on the Upper Big Branch mine. What that society looked like to these miners and to their families was 29 dead coal miners, because the Massey Corporation was basically allowed by its board of directors to evade the basic regulations that were in place to protect the miners.

Although the miners don't have whistleblower protections, we saw that Massey was able to intimidate the workers every day not to report safety violations, not to write up safety violations, not to report things that needed to be repaired, because the chairman of the board told them the priority was the production of coal, not the safety of the workers.

□ 1010

Produce the coal or get out is what he told them. So they were not able to participate in their own safety when they saw a violation or they saw a problem that caused danger in the mine.

They also were able to circumvent the right of the mine safety inspections in the mines because they gave advance warnings. They were told if a Federal mine inspector comes onto the property, you must give advance warning to the people in the mine so they can divert the mine inspector away from the problems in the mine, take up their time while we can fix them, or he'll run out of time to inspect the mine. There's regulations against that. There's laws against. They avoided those.

Then they kept two sets of books so that the mine regulators couldn't see the real level of violations in the mines. That's what it looks like when you don't have regulations. That's what it looks like when you don't have enforcement.

And it's the conclusion of the mine safety report that mirrors one that was done by the State government. The conclusion is that the tragic death of 29 miners and serious injuries of two others in the Upper Big Branch mine

were entirely preventable—entirely preventable—had regulations been enforced in that mine, had this company not been allowed to go rogue and ignore the regulations that are there to protect the miners' lives.

We must now understand what that means to the American public, what it means to these families.

What could have been contained, what could have been contained as a mine or a coal dust explosion or a localized methane gas explosion became an explosion that traveled 2,000 feet per second—2,000 feet per second. There is no miner that could get out of the way of that act.

And what happens at the end of that world without regulation, where you don't have to put up with paying fines, where you can clog the courts with appeals? When the Massey Company was sold, the board of directors that allowed this to happen, the executive officers that directed this to happen, the officers walked away with \$90 million in bonuses; the board of directors walked away with \$19 million in bonuses. And Don Blankenship, the CEO of the company that wrote the memo that said it's production of coal or get out, it's not safety, walked away with \$86 million.

And now get this: Don Blankenship, the CEO, now wants to go back into the coal business after killing 29 miners. And whether it's the State of Virginia or the State of West Virginia or Kentucky or anywhere else, the suggestion is that they might be able to give him a permit to open up a mine. Twenty-nine miners are dead, violations of law, a criminal corporate culture, and somebody else says that they might be able to go back into the mines.

You will not reignite the American Dream for workers in this country if you take away their rights at work. You will not reignite the American Dream for the middle class if they have no rights at work, if they're subjected to this. For these families who lost the 29 members of their families, they're crushed. They're crushed. But you can't do that by eliminating the regulations. It's the regulations in place that have saved miners' lives; but it's the avoidance of the regulations, the ignoring of the regulations, and it's the failure of this Congress to introduce tough sanctions.

When you obstruct a Federal safety investigation, it should be a felony. Somebody should go to jail. When you obstruct the right of a worker to blow the whistle on an unsafe procedure, there's got to be a strict fine for that. That's how we reignite the American Dream.

We've got a lot of work to do in this Congress, but you can't do it by stopping all regulations that protect our families, that protect our communities, that protect the workers in America today.

#### PEARL HARBOR

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. POE) for 5 minutes.

Mr. POE of Texas. Mr. Speaker, the sun was lazily rising on the horizon. It was around breakfast time on a stunning Sunday morning. It was quiet, peaceful, calm. People felt secure. There was a small tropical breeze as the American flag was being raised on a nearby flagpole.

It was this day that Luke Trahin, a 22-year-old sailor from southeast Texas, noticed large formations of aircraft darkening the glistening sky. He kept watching in awe until suddenly the aircraft broke formation, dove from the sky, and unleashed a fury of deadly, devastating bombs and torpedoes on a place called Pearl Harbor in the Pacific. It was this day, 70 years ago this morning, when Luke Trahin and his fellow sailors, soldiers, and marines saw war unleashed upon America. It was December 7, 1941.

The Japanese had caught America by surprise and took advantage of an unprepared nation. And after the smoke cleared on that morning of madness, 98 Navy planes and 64 Army aircraft were destroyed. Luke's unit, Patrol Wing One, lost all but three of its 36 aircraft. 2,471 Americans, servicemen, and civilians, were killed by this unwarranted invasion of terror from the skies.

The pride of the United States Navy, the battleships—*West Virginia*, *California*, *Oklahoma*, *Tennessee*, *Utah*, *Maryland*, *Nevada*, and *Arizona*—were trapped in the harbor. They made easy targets for the Japanese pilots. The sailors onboard these battle wagons fought with the courage of an entire legion of warriors when they were attacked by a skillful, fanatical, and tyrannical enemy. All of these fierce U.S. Navy battleships were sunk or damaged. Their guns, Mr. Speaker, are now silent.

The hull of the USS *Arizona* became the sacred graveyard in the peaceful Pacific for more than 1,177 American sailors and marines. I have seen, Mr. Speaker, the oil that still seeps to the surface from the hull of the battleship *Arizona*.

Luke Trahin and his Navy buddies in Patrol Wing One quickly got organized, prepared, and waited for 2 days for the expected land invasion by the Japanese. It never came. But America was at war. It was World War II, and the war was long. It spread from the Pacific to Europe to Africa to the Middle East to Asia. The Japanese, then the Nazis, seemed undefeatable. But even the Japanese were concerned about the spirit of America. The Japanese commander of the Pearl Harbor invasion remarked that what Japan had done was wake a sleeping giant.

World War II was hard. Millions served in uniform overseas; millions served on the home front; all sacrificed

for the cause of America. The Nation woke from a somber sleep of neutrality and, with our allies, defeated the tyrants that would rule over the world. That was a time when Americans put aside all differences and united to defend freedom in our Nation. When the war was won, over 400,000 Americans had given their lives for this nation.

Mr. Speaker, I'm always intrigued by the stories of those war heroes and the folks of that generation. There isn't one of them that cannot recall the exact moment and place they were when they heard the news of Pearl Harbor. Both of my parents, barely teenagers at the time, still talk about what they were doing when they heard on the radio that broadcast that Sunday morning about the invasion.

Until September 2001, this was the deadliest attack on American soil. "December 7, 1941, a date that will live in infamy." Those were the words of President Franklin Roosevelt that became forever embedded in the minds of patriots across our land igniting and launching a nation into the fiery trenches of battle throughout the world.

Those of that Greatest Generation proved that when freedom of this Nation is threatened, our people will stand and fight. They will bring the thunder of God upon our enemies. Defending freedom and liberty was the battle cry of the sailors, marines, and soldiers that died 70 years ago at Pearl Harbor.

We remember December 7, 1941, and the Americans who stood tall and kept the flame of America burning brightly. They were a remarkable bunch of people. They were the Americans.

My friend, Petty Officer Luke Trahin, stayed in the United States Navy for 38 years, either on active or reserve status. He wore his uniform every Memorial Day, every Veterans Day, and spent a lot of time speaking proudly about this country. He died 4 years ago on December 5, 2007. He was 89 years of age.

And that's just the way it is.

#### UNEMPLOYMENT INSURANCE EXTENSION

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Ohio (Ms. FUDGE) for 5 minutes.

Ms. FUDGE. Mr. Speaker, I rise to address the urgent need to extend unemployment insurance for struggling Americans. Forty-five percent of all unemployed workers—more than 6 million people—have been out of work for more than 6 months.

Karen, from Cleveland, was laid off in March. She was laid off from a law firm due to budget constraints. She is 62 years old and unable to find a job in this economy. Unemployment insurance is helping her to get by with just the basic necessities. It is allowing her

to pay for expensive but necessary prescriptions. She is actively looking for work, but she is afraid that if her unemployment benefits are cut, she will lose her house. Karen's State unemployment benefits can run out at the end of December.

□ 1020

If Congress fails to act to renew the Federal unemployment insurance program, she'll become just another statistic, one of the millions of Americans who identify themselves with the 99 percent. Karen, along with 6 million Americans, will be cut off from emergency lifeline saving resources unless Congress acts.

Sandra, of Cleveland Heights, lost her job in April 2011. It's her third lay-off. She is 59 years old. She never thought she would find herself in this position at this age.

Rather than defaulting on her mortgage, she has used up all of her retirement savings. Now she is deeper into debt. When her unemployment funds run out, it's likely she will default. And being an older worker, it makes it even harder.

We see this scenario all too often across this Nation, hardworking Americans getting laid off, using up their savings, and then losing their homes. We've seen foreclosure rates soar, and Americans are falling behind on their mortgage payments at a very rapid rate. In my district, more than 13 percent of homeowners are 90 or more days behind on their mortgage.

In 2010, unemployment benefits kept 3 million Americans, including nearly 1 million children, from falling into poverty. Extending unemployment insurance can prevent the loss of over 500,000 jobs, according to the Economic Policy Institute—500,000 jobs.

You know why? Because UI payments go directly into the economy. They support local businesses. They help create jobs and reduce the demand for public services. If we don't extend unemployment insurance, it would be the equivalent of pulling nearly \$90 billion out of the economy in 2012.

There's one more story I'd like to tell you. It's from Molly in Toledo. I tell Molly's story because it embodies the frustration felt by thousands upon thousands of American across this country.

Molly has battled unemployment since October 2008. She wonders how the rich and powerful expect people like her to survive without good-paying jobs. "Are we just supposed to die," she asks? "Commit suicide? Starve to death while we are homeless and on the streets?"

Molly says: "The deck really seems to be stacked against ordinary Americans. No one with any real power seems to care, except Warren Buffett."

"I'm trying to find a good job," she says, "or any job for that matter. We,

the unemployed are demonized by the right and discriminated against for being out of work. We're too old or overqualified or underqualified, or we're the wrong color. What has happened to my country?" she asks.

These are the stories of everyday Americans who are struggling to get by. This is not about Democrats and Republicans. This is about coming together to help millions of unemployed Americans get through the worst economic recession since the Great Depression. It's about helping our economy grow and about creating jobs.

Americans are frustrated with the decline of the middle class and the lack of good-paying jobs. But these honorable citizens haven't given up, and neither can we. We must act now. We must extend unemployment insurance.

#### WHY ARE WE STILL IN AFGHANISTAN?

The SPEAKER pro tempore. The Chair recognizes the gentleman from North Carolina (Mr. JONES) for 5 minutes.

Mr. JONES. Mr. Speaker, when we were home during the Thanksgiving break, like all my colleagues, I did as much as I could to be with the people of the Third District of North Carolina. The Third District is the home of Camp Lejeune Marine Base, Cherry Point Marine Air Station, and Seymour Johnson Air Force Base, and over 60,000 retired veterans in the Third District.

Since coming back to Washington, I've done two town meetings by phone. What I heard while I was home during Thanksgiving and the two town meetings: Why are we still in Afghanistan?

When I hear my colleagues in both parties talking about the problems facing the American people—unemployment benefits, extending the tax cuts for middle class America—we all grapple with, both parties, how we are going to pay for it.

Well, there is a man in Afghanistan that is a crook and corrupt, who gets \$10 billion a month that he doesn't have to worry about. Poor Americans are out here doing the best they can in a very difficult economy, and we can't help them, but we can help a corrupt leader in Afghanistan. It makes no sense. I hope that this Congress will come together and say to the President, let's not wait till 2014.

How many more American boys and girls will have to die and give their legs in the next 3 years for a corrupt leader? I've asked the Department of Defense, and I wrote Secretary Panetta and asked him that question. Give me your projections of how many more young men and women will have to die and lose their legs. I hope that I get that response soon.

That brings me to the point of a young marine I saw at Walter Reed/Bethesda about 3 weeks ago. There were

four marines from the Third District of North Carolina. Three have lost both legs, and the one that had lost only one leg, a corporal, mom sitting in the room, said to me, Sir, may I ask you a question? I said certainly you may. Why are we still in Afghanistan? And I looked at him and I said, I don't know why we're still there.

Mr. Speaker, it makes no sense. The American people and the people of the Third District of North Carolina are saying, we have won; bin Laden is dead; al Qaeda has been dispersed all over the world.

Mr. Speaker, it is time, as we debate these very difficult, complex issues for our Nation, that we get smart with our foreign policy. And smart means, let's don't try to police the world.

History has proven you will never change Afghanistan. It will never change, no matter what we do or any other country tries to do.

So, Mr. Speaker, beside me is a poster with a flag-draped coffin coming off the plane at Dover. And with humility I tell you today, Mr. Speaker, I've signed over 10,400 letters to families and extended families who've lost loved ones in Afghanistan and Iraq.

I thank God that He has allowed me to have a heart large enough to feel the pain of war, because I've never been to war. But when I sign those letters, I feel the pain of the families, and I lick every envelope that I send.

Mr. Speaker, with that, I want to close my comments by asking God to please bless our men and women in uniform, God to please bless the families who've lost loved ones fighting in Afghanistan and Iraq. God, please bless the House and Senate that we will do what's right for the American people. Bless Mr. Obama that he will do what is right for the American people.

And three times I will say, God, please, God, please, God, please continue to bless America.

#### UNEMPLOYMENT INSURANCE EXTENSION

The SPEAKER pro tempore. The Chair recognizes the gentleman from Minnesota (Mr. ELLISON) for 5 minutes.

Mr. ELLISON. Mr. Speaker, before I begin my remarks, I want to publicly associate myself with everything WALTER JONES just said. He is absolutely right.

Mr. Speaker, this holiday season Congress has chances, a couple of chances right in front of them to do what's right for the American people and to side with the overwhelming percentage of Americans suffering out there in this economy.

For an entire year, the majority in the House has not offered a single bill to create a single job. In fact, the only thing that the Congress has been doing is creating an environment where public sector jobs are cut, and where private sector jobs, though they have been

growing, are offset by those public sector cuts, leaving us with an unemployment rate which we're happy to have at 8.6 percent, but within the historical context is still a national disgrace and an outrage to have unemployment at 8.6 percent for so very long. But we're happy to have it because it has been as high as 10.

And now we're threatening to leave more than 2 million Americans, including 13,000 in my home State of Minnesota, out in the cold during the holiday season by taking away their unemployment insurance.

Right now, 14 million people are unemployed, and companies really aren't hiring. For most of these people, unemployment insurance is the only thing that's keeping them in their homes and not out on the street.

According to the Census Bureau, unemployment insurance has pulled 3.2 million Americans out of poverty last year. And that's why Congress needs to make sure that all Americans, Mr. Speaker, continue to have this vital lifeline available.

Any credible economist will tell you that unemployment insurance creates jobs. Every dollar invested in unemployment insurance yields a return of \$1.52 in economic growth.

At least 200,000 jobs would be lost if Congress fails to pass the extension of unemployment insurance benefits. Congress must not leave Washington for the holidays without extending unemployment benefits that create jobs and put money into the pockets and on the tables of millions of Americans.

□ 1030

Both Democrat and Republican politicians, we together have not passed that jobs bill. While the Republicans are in the majority, and I believe bear the weight of the responsibility, it's a responsibility of every Member of Congress to call for the extension of unemployment insurance benefits and jobs at this critical time.

America can't wait. We shouldn't be leaving hardworking Americans high and dry this holiday season. This holiday season, we can spur economic growth, create jobs, and strengthen the middle class by doing the right thing of extending unemployment insurance benefits.

On behalf of the good people who play by the rules and lost their jobs because of Wall Street greed, and while this majority looked the other way, I urge all of my colleagues to support the extension of unemployment insurance benefits.

#### AFGHANISTAN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. KINZINGER) for 5 minutes.

Mr. KINZINGER of Illinois. There has been a lot of talk lately about Af-

ghanistan. You hear it every day. You heard it just a little bit ago about why are we in Afghanistan? What are we fighting for? Isn't it time to go home?

I've got to tell you the easy thing to do is to stand up and say let's just declare victory and let's leave, and then whatever happens after we're gone, that's not our fault anymore. It's not our problem. That's the easy thing to do.

You know, the America I grew up in and continue to grow in and live in is not the country that always picks the easy thing. The thing about the American DNA is, I believe we do typically the right thing.

Now, let me tell you, I'm still a pilot in the military. I still fly for the Air National Guard, and I've had the privilege and honor of serving overseas with my fellow men and women in uniform. Although most of my experience was in Iraq, I remember in Iraq a time when Members of this House stood up and said that the war in Iraq is lost, that there is no way to win, and it's time to just come home.

And we see today that now the American troops are coming home from Iraq but under a condition of victory. And while I have concerns about that timetable for withdrawal, I think anybody would agree that that's better than had we just in 2006 and 2007 folded up and taken the easy way.

So let me ask my fellow Members of Congress and let me ask the American people, what is it we're fighting for in Afghanistan?

I have here a very disturbing but a very appropriate picture of what it is that we're fighting for.

The young girl you see on the top, her name is BiBi. BiBi is 17 years old. When BiBi was 12 years old, she was sold to somebody basically as a slave as a result of a member of her family committing a crime and selling her as reparations for that crime. For 5 years she was beaten by her husband until one day she decided to run away to seek freedom.

Well, she was caught. Her husband caught her, drug her back to his house, and the Taliban, as a way to enact justice, forced him, with his brother holding her down, forced him to cut off her nose and to cut off her ears. She then proceeded to basically crawl to her uncle's house, and her uncle ignored her. And somebody finally called the hospital, and they said go to an American forward-operating base. They'll take care of you.

You hear the stories of the major who took care of her talking about how she showed up and talking about the fright that she had in her eyes.

I took a trip to Afghanistan recently and saw a village where I saw a man who was standing on a berm with an AK-47. And I talked to him through a translator, and he informed me that not 2 days ago his daughter fell into a

well and drowned. But yet he still believes that his village needs protecting. And he could be sitting at home mourning the loss of his daughter, and I'm sure he mourned the loss, but he was standing out defending his village because he wants what Americans want, what anybody around the world wants. They want security. They want to be able to raise their family. BiBi just wants to live her life without being beaten and sold into slavery.

Today, because of the American presence in Afghanistan and that of our coalition partners, you see the picture at the bottom of this, the best part of this picture, and that is girls in school learning to read and write, learning that there is a world out there, learning that despite where they were raised and born, they, too, can have some of the freedoms and some of the privileges that folks in the rest of the world and especially in the United States have.

So let me say this. It is so easy to stand up and say this is not worth it. But I'm going to tell you the second verse of the Star Spangled Banner has a line that says "Oh conquer we must, when our cause it is just."

Ladies and gentlemen, what we're doing in Afghanistan is not extending an empire. It's bringing freedom to millions of people, taking out jihadists that would kill people simply because you believe differently than them, and we are standing up for freedom around the globe. The greatest disinfectant to terrorism is freedom.

Ladies and gentlemen, the fight in Afghanistan, though difficult, is worth it, and I come in today and stand up and say "God bless you" to those that have gone over there and put on the uniform, and I say "thank you" for your service to your country. The fight is worth it.

#### TAKING CARE OF THOSE AT HOME

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. RANGEL) for 5 minutes.

Mr. RANGEL. I have been so moved by the preceding gentleman's remarks about the good work that Americans can do, especially when the argument is which side are we on, terrorism or freedom.

I don't know how many cases in the world that the United States of America can intercede in, but I do know that, as we see these horrible examples of what people can do to their own people, that we have thousands of Americans who have volunteered to support our flag and the integrity of the United States who have been killed. And it just seemed to me that when we're talking about the protection of a human body, whether it's losing a limb or your sight or your face, no matter what it is—and especially your life—that if America is going to take this

position, all Americans should be prepared to make the sacrifices as the gentleman before me has.

I think it's so unfair and borders on corrupt when people talk about where our American men and women should be, defending freedom in foreign countries, when America hasn't spoken. Presidents haven't declared war. And we find ourselves talking about volunteers when it's abundantly clear that everybody does not assume the same sacrifices, whether we're talking about taxes or loss of life.

So whether we're talking about Australia, Afghanistan, Iraq, before the people make a decision—and that's what we're for in the House—before they make a decision, at least say that everyone has to participate in that decision and not those who, for economic reasons, find themselves in communities with the highest, the very highest unemployment.

And I laud what happens to all of us who volunteered, because when that flag goes up, you salute the flag. The President becomes the Commander in Chief, and there is only one thing to do. And that's win and protect the integrity of the United States.

But I submit that we have to have a draft that's a part of—what?—the United States, and not a plea for those people, for economic reasons, who will have to protect themselves. I don't think I've ever said this before, but I was thinking that my brother volunteered long before Pearl Harbor, which today we commemorate, and so he was unable to say, nor I, that he volunteered because we were being attacked.

□ 1040

Several years later, in 1948, when the war was over, I volunteered, and that was before the North Koreans invaded South Korea. I would like to walk away by saying how patriotic we both were; but really what motivated me was the excitement my mother would get in receiving a check from my older brother. It wasn't a question of whether she loved him more; it was that she needed it.

I was a teenager—11, 12 years old. The one thing I knew, I wanted to make my mother as happy as my brother did and send her that allotment check. Yet, today, I have medals, and I've been lorded by the Koreans and everyone else; but when I think about it, there were economic reasons that made me a "hero," and there are economic reasons that make the heroes that we have who defend our country and our flag so well.

I didn't expect to talk about that; but in hearing that, 70 years ago, we were attacked and of the American lives that were lost and then of coming back to what has happened in Afghanistan, I am reminded of how unfair this system is for the greatest country in the world and of the hope and division

that we're losing and of what separates us from so many other countries in which you can be born into the pits of poverty, and yet you can always dream that, in this great country, you can succeed.

So many Members of Congress and so many members of the Congressional Hispanic Caucus are the first ones who ever went to college—their parents were the first ones in generations who were able to become professionals—and then had the great honor to represent the United States of America in this Congress.

I am sorry to have deviated from why I came to the well. What I can say to other Members is: God bless America. We have to keep fighting for equality and justice for all.

#### IN HONOR OF THE BLUE STAR MOTHERS OF AMERICA

The SPEAKER pro tempore. The Chair recognizes the gentleman from Colorado (Mr. TIPTON) for 5 minutes.

Mr. TIPTON. Yesterday, legislation that I sponsored, along with Senator MICHAEL BENNET from Colorado, passed the House floor. This bill for the Blue Star Mothers of America updated their congressional charter for the modern era.

Mr. Speaker, I am privileged today, particularly on this day as we commemorate the attack on Pearl Harbor 70 years ago, to be able to rise to honor the Blue Star Mothers of America—the people, the women of America, who have been providing much needed assistance to our Nation's active duty servicemen and -women, veterans, and military families since 1942.

Founded during the height of World War II, the Blue Star Mothers are a nonpartisan veterans' service organization, composed of mothers of current and former servicemembers. Today, over 5,000 dedicated women perform a wide variety of important volunteer services for our troops, providing transportation, supplies, food, and emotional support. More than 225 local chapters across the United States carry out the mission of supporting our troops, our veterans, and the families of our fallen heroes, as well as developing individual projects to assist the specific needs of the military in their own communities. Last month alone, thousands of care packages were sent to our troops overseas, and chaplains and commanders across the military received boxes of supplies and gifts to be able to be distributed to the comrades.

The Blue Star Mothers were originally formed to bring their children home, to ensure that they were given the benefits that they deserved, and to provide them with a vast support network upon their arrival. The organization has since expanded to include other forms of assistance, including re-

habilitation, family services, and civil defense. This was chartered by Congress in 1960.

Mr. Speaker, it is an honor to be able to recognize the Blue Star Mothers of America, and I rise today to thank these patriotic women for their commitment to serving the needs of America's military community and for making a difference in the lives of those who sacrifice the most.

Several years ago, I had the opportunity to be at the graduation at the United States Air Force Academy. My son-in-law was graduating, and Secretary Gates delivered the commencement address. At that time, he noted that that freshman class was the first to enter the academy after 9/11, knowing full well that they would be putting themselves in harm's way.

We have the finest volunteer military that the world has ever seen. May God continue to bless this country with such men and women who will always stand for freedom.

#### WALL STREET AND MF GLOBAL

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Ohio (Ms. KAPTUR) for 5 minutes.

Ms. KAPTUR. Mr. Speaker, numerous stories have come out over the last few weeks, all detailing the corruption and outright fraud on Wall Street.

First, there was the recent news about former Secretary of the Treasury Hank Paulson's inappropriately tipping off a few key friends from Goldman Sachs and other Wall Street tycoons about the impending collapse of Fannie Mae and Freddie Mac so that those friends could hedge and make money on that insider knowledge. Then a judge in New York threw out one of the orchestrated settlements between Citigroup, which was a bank at the center of the wrongdoing, and the Securities and Exchange Commission, which allowed that bank to walk away from cases of fraud without admitting any wrongdoing.

This past weekend, "60 Minutes" interviewed a former executive vice president at Countrywide Financial, a giant and duplicitous player in the U.S. mortgage business. This woman was in charge of fraud investigations at the company before the financial crisis.

According to her, "Countrywide loan officers were forging and manipulating borrowers' income and asset statements to help them get loans they weren't qualified for and couldn't afford." She went on to say that all of the recycle bins, wherever they looked in that company, were full of signatures that had been cut off of one document and put onto another and then photocopied or faxed. According to her, the fraud she witnessed was systemic, taking place in Boston, Chicago, Miami, Detroit, Las Vegas, Phoenix, and elsewhere. She was fired before she

could speak to government regulators about the extent of fraud she had documented.

What is most troubling is that these stories are not isolated. The FBI testified before Congress as early as 2004 that they were seeing an epidemic in white collar crime. They stated the FBI did not have anywhere near enough agents to investigate major white collar crime like the financial crisis. There are moments when I do wonder if the FBI has the will to prosecute; but still, today, the FBI has nowhere near enough special agents or forensic experts to properly investigate the level of corruption that we know occurred.

Frankly, the Congress has shorted the FBI—some might say purposely—of the resources it needs to do the job. I have a bill, which I invite my colleagues to support, H.R. 1350, the Financial Crisis Criminal Investigation Act, authorizing an additional 1,000 FBI agents to aggressively investigate the kind of fraud that has destroyed the economic future of millions of our people and that has upset the global financial system.

Back when we had the S&L crisis in the 1990s, we had 1,000 agents. Do you know how many were working when this financial crisis started? Forty-five. The others had all been reassigned to terrorism. We're only up a little over 200 agents now investigating white collar crime. Think about that, America. Why do you think these financial wrongdoers aren't in jail? Frankly, this Congress has not taken its responsibility to investigate seriously.

Despite the robust public reporting of misdeeds on Wall Street, it has not been until the MF Global case, one of the top 10 bankruptcies in this country, that Congress has shown some mild interest in the magnitude of the inquiry required. In November, we got an inside look into the stunning misdeeds—and let's be blunt—outright thievery that occurred at MF Global in the days before it declared bankruptcy. The total amount missing from private accounts has fluctuated over the weeks. As much as \$1.2 billion could be missing from private customer accounts.

Congress is finally having hearings on this subject tomorrow, and we'll see how seriously an investigation is pursued. Let me say that the public has a right to know on what specific dates throughout 2011 money from customer accounts was wire-transferred in order to meet MF Global's margin calls.

□ 1050

This is the key question. Members should ask, probe, and exact the truth. The public has a right to know on what specific dates through 2011 was money from private customer accounts at MF wire-transferred in order to meet MF's global margin calls.

If Mr. Corzine authorized the taking of those funds, then this body should remind him that no one is above the law, not even someone who was a former Goldman Sachs CEO, former Governor and U.S. Senator. Whichever friends and associates aided his actions in that company should be brought into full sunlight, as well as other companies that were likely involved in those wire transfers.

The fact that hundreds of millions of dollars, if not over a billion dollars, can simply be stolen from a major banking institution from the inside requires full investigation, not just by the Congress, but by the FBI. I'm reminded of that book, written by Professor William Black, "The Best Way To Rob a Bank is To Own One." Well, I wonder how much of that applies in this case.

It's time that Wall Street, white collar crimes, be prosecuted seriously, that this Congress do its job. Let's provide the FBI the resources it needs to fully investigate and prosecute, and the committees of this Chamber use their full authority to do no less. We surely owe this to the American people and the cause of justice toward all.

#### SUPPORT REINS ACT AND GOP REGULATORY REFORM AGENDA

The SPEAKER pro tempore. The Chair recognizes the gentleman from Nebraska (Mr. SMITH) for 5 minutes.

Mr. SMITH of Nebraska. Mr. Speaker, I am pleased to speak today about the Regulations from the Executive in Need of Scrutiny, or the REINS, Act.

This bill, which I have cosponsored, restores accountability to the regulatory process by requiring an up-or-down vote in Congress and the President's signature on any new major rule before it is enforced on the American people.

Over-regulation, Mr. Speaker, is devastating our economy and hindering job growth. Of the current administration's new regulations, 200 are expected to cost more than \$100 million each. Seven of those new regulations, however, will cost the economy more than \$1 billion each. At the current pace, the current regulatory burden for 2011 alone will exceed \$105 billion.

And the Federal Government has created more than 81.9 million hours' worth of paperwork this year alone, costing employers \$80 billion just in compliance. It's no wonder a recent Gallup Poll found small business owners citing "complying with government regulations" as "the most important problem" they face.

Nebraskans have not been immune to the reams of red tape being handed down by Federal regulators. Just yesterday it was reported the city of Grand Island, Nebraska, population 51,000, will be saddled with a \$3.2 million compliance cost due to a new Fed-

eral emissions regulation. This EPA Cross-State Air Pollution Rule was finalized June 1 and will be enforced January 1.

But this is only one example. There are additional, even more costly rules and unworkable timelines coming down the pike, all of which mean a much longer winter for Americans struggling with high energy costs.

But it doesn't stop there. Recently, the Department of Labor proposed a misguided rule which would restrict youth involvement in agriculture work. Yes, Mr. Speaker, anything from milking cows and feeding calves to hauling and detassling corn would come under fire under the Department's current rule.

Everyone agrees the safety of these young people and workers everywhere is of the utmost importance; but by allowing such heavy-handed thoughtless regulation, we're greatly restricting opportunities for rural youth. These jobs, often seasonal, teach young people responsibility and the value of hard work; and they're able to earn a little spending money in the process.

I'm also a proud cosponsor of the Farm Dust Regulation Prevention Act of 2011, H.R. 1633, which the House is slated to consider later this week. This bill would prevent the EPA from regulating farm dust, or the type of dust which naturally occurs in rural areas.

Farmers and ranchers already are subject to strict Federal and State regulations to control dust. It makes no sense for the EPA to impose costlier requirements on top of the existing standards. While the EPA has backed off without legislative action, nothing certainly prohibits the agency from regulating farm dust in the future.

During a time of economic hardship, keeping the door open for additional regulatory overreach is not the answer. Actually, I'm often reminded of a meeting I had in southeastern Nebraska with representatives from a Federal agency, good people they are. One of them said it had been more than 20 years since he'd ridden on a gravel road.

For me, this meeting certainly emphasized the disconnect between Washington and rural America. These are only a few examples of the regulatory burden and uncertainty facing Nebraskans who recognize economic growth ultimately depends on job creators, not regulators.

Mr. Speaker, I encourage my colleagues on both sides of the aisle to support commonsense regulatory reforms like the REINS Act.

This is yet another step towards increased accountability, improving the regulatory process, and providing certainty for job creators in my home State of Nebraska and in States all across this country.

# SMART: MORE SECURITY AT A FRACTION OF THE COST

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. WOOLSEY) for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, the violence rages on in Afghanistan. Earlier this week, suicide bombers struck in three different cities, in each case targeting Shiite worshipers who are observing a religious holiday.

The death toll is at least 63, according to a news report; and a Pakistani extremist group has claimed responsibility for the attacks. One eyewitness told The New York Times: "We saw 30 or 40 people on the ground missing arms or legs." Another said the Kabul blast was timed to wreak the maximum havoc, as the bomber detonated at the moment that the crowd was largest, when one group was going into a mosque and another was exiting.

In the 10 years of this war, it's the first attack specifically against Shiites, adding a sectarian angle and religious tension that hadn't previously been prevalent in the Afghanistan conflict.

Mr. Speaker, how can we call our occupation of Afghanistan a success when, after 10 years of attacks like this and making a young woman like BiBi who was talked about on the other side of the aisle earlier this morning, make her victimization and her terrorization commonplace. When this is commonplace, we cannot be having success in Afghanistan.

The truth is our continued military presence is aggravating the violence, not containing it, and certainly not stopping it. I'm not saying that Afghanistan will be magically transformed when the last of our troops leaves; but our best hope for peace, for security and stability there is a swift end to this war.

But here's another important thing, Mr. Speaker. If we do this right and have an end to the war that is meaningful, it would mean the beginning of an even more robust engagement with Afghanistan, an engagement based on the principles of SMART Security, in other words, a peaceful partnership based on mutual respect, assistance to strengthening Afghanistan's democratic infrastructure, not with military force, but with civilian support.

SMART Security would empower the Afghan people investing in their hopes and dreams, instead of bringing further violence to their country. Military redeployment out of Afghanistan can't and won't mean a complete withdrawal from Afghanistan.

So I hope that every single one of my colleagues who has eagerly rubber-stamped war spending year after year, even while complaining about the United States budget deficits, will show the same enthusiasm and the same support for a humanitarian surge in Afghanistan.

I have to shake my head, Mr. Speaker, every time I hear someone say we can't afford such generous foreign aid. Talk about penny wise and pound foolish. Last fiscal year we spent roughly \$2.5 billion on development assistance in Afghanistan. Mr. Speaker, we go through that much war spending in Afghanistan every single week. The bottom line is that smart investments provide more security at a fraction of the cost, pennies on the dollar compared to waging war.

Allowing extreme poverty and widespread unemployment to prevail throughout Afghanistan imperils our national security as much as anything else. Where there's hopelessness, that's where insurgents get a foothold. Nothing breeds terrorism like hardship, deprivation, and despair.

□ 1100

Mr. Speaker, because it's the right thing to do and because it's the best way to protect America, let's bring our troops home and make the transition to SMART Security. And let's do it now.

## REGS AGENDA

The SPEAKER pro tempore. The Chair recognizes the gentleman from North Dakota (Mr. BERG) for 5 minutes.

Mr. BERG. Mr. Speaker, as I talk with North Dakotans, it's clear we're all frustrated with Washington.

ObamaCare is a disastrous law that 70 percent of North Dakotans do not want. Unemployment remains unacceptably high, making it clear that President Obama's government stimulus did not work. Washington bailed out Wall Street while Main Street continues to suffer. And Washington persistently fails to uphold its responsibility to balance the budget.

Meanwhile, the Obama administration continues to pursue overreaching regulations that create more redtape and uncertainty for North Dakota's families, farms, and small businesses. These burdensome regulations threaten job creation, and they are the biggest challenge facing our economy. We need to take serious steps today to halt the Obama administration's regulatory overreach.

That's why I announced my REGS Agenda: Reduce the redtape; Empower the States; Grow the economy, and Stop President Obama's overreach.

This agenda is the result of talking with North Dakotans and learning about the impact of senseless regulations on North Dakota's farmers, ranchers, and small businessmen.

During my recent regulations tour, I spoke with energy providers who are concerned about the EPA's regional haze requirements that could cost North Dakota over \$700 million just to comply. Farmers told me about the for-

ever-changing fuel storage mandates that added new costs. And I heard how the new EPA regulations on gas generators could cost a North Dakota school district a quarter of a million dollars. This cost is not because they are using generators more than allowed; the cost is because the EPA simply doesn't like which hours they're using it.

The REGS Agenda is also the product of feedback I've received from North Dakotans at 10 public town hall hearings I've held this year and through the countless emails, letters, and phone calls. The message was clear: Washington is not the solution, it's the problem.

To get our economy moving again and our country back on track, President Obama and congressional leaders could learn a lot about how we do things in North Dakota. The REGS Agenda is also the product of legislation I've been working on. Last month, I introduced a bill that would rein in the Obama administration's Federal takeover of the State regional haze management, which threatens to create more business uncertainty and stifle job creation. It will also increase the energy costs for American families and small business. And today, I will proudly vote in support of the REINS Act, which is a much-needed measure to rein in this regulatory overreach.

But this agenda is not simply the sum of this past year; it's also a path moving forward to rein in the overreaching, out-of-touch government regulations that burden small business, farms, and ranches each and every day. I will continue to add to this agenda to fight against the job-killing regulations that threaten small businesses' ability to create jobs and grow our economy.

The number one thing we can do to get our economy back on track, to give small business certainty, to grow and create jobs, is to rein in President Obama's overbearing regulations. They're burdening job creation, and it adds more cost and more redtape. Through the REGS Agenda, I'll continue fighting to bring regulatory relief to the American people.

## VOTER SUPPRESSION LAWS

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. LEE) for 5 minutes.

Ms. LEE of California. Mr. Speaker, first let me take a moment to thank the gentlelady from Ohio, Congresswoman MARCIA FUDGE, for her fearless and tireless leadership in protecting our democracy and the bedrock, of course, of our country, and that is the right to vote. She has done an amazing job keeping us very focused and pointed with all of the information we need to try to address this in a big way.

Once again, I am here today to sound the alarm because, make no mistake

about it, the fundamental right to vote which is at the heart of our democracy, it is under attack. Republican legislators and governors are proposing partisan laws that require voters to show government-approved photo IDs before voting.

Now, I came to this floor years ago after the stolen Presidential elections in Florida and in Ohio to protest the results of those two elections that were filled with voter suppression. It worked for the Republicans before, and so legislators in 42 States on this map of shame have doubled down on these strategies to make it harder for certain communities to vote.

These proposals would disenfranchise 21 million Americans. That's over 1 in 10 eligible voters in America who do not have adequate identification. Now, how in the world, for example, would my 100-year-old aunt get her birth certificate to prove who she is to get a government ID to vote? She wouldn't know where to start, nor how to pay for it. And it's no coincidence that a disproportionate number of these disaffected voters come from communities of color as well as the poor, the elderly, and students.

Fully one in four otherwise qualified African Americans would be unable to vote under these voter-ID laws. Around one in five Asian Americans, Latinos, and young adults between the ages of 18 to 24 would be blocked.

In my home State of California, a voter-ID bill was introduced to suppress voter participation. It would cost \$26 just to get the required documents to qualify for a government-issued ID. Now, having been born and raised in Texas, this certainly looks like a poll tax to me, which those of us remember as a way to prevent African Americans from voting. These voter-ID laws have a partisan agenda seeking to disenfranchise and deny specific populations of voters before they have the opportunity to elect their representatives in government. These partisan laws are shameful, and they're a disgrace to our country.

If these Republican lawmakers were truly concerned with fighting voter fraud, they would take on actual documented problems such as distributing fliers with false information meant to trick voters, improperly purging voters, or tampering with election equipment and forms.

Instead, they are pushing laws designed to change election outcomes by reducing voting, repressing turnout, and turning the clock back to the days of Jim Crow. This is the exact opposite of where our country needs to go. With almost 40 percent of eligible voters regularly staying away from voting booths, we need to be expanding participation in our democracy, making the ballot more accessible, not less. We cannot and we must not allow democracy to be undermined, especially

while we're promoting democracy abroad.

We must unmask these shameful attempts to disenfranchise voters. Let's stop this partisan effort that strikes at the very core of our country. Let's win this war against voters. We should be about dismantling and reducing barriers so that we can really begin to reignite the American Dream for those who have lost hope.

So I want to thank my colleagues, especially Congresswoman FUDGE, for their calls to protect the right to vote on behalf of all the citizens across this great Nation.

#### ENTREPRENEUR STARTUP GROWTH ACT

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. CHU) for 5 minutes.

Ms. CHU. America doesn't have a small business problem; it has a startup problem. That was the title of a recent Washington Post article. It pointed to the fact that self-employed startups have been the chosen alternative for millions of Americans, but we must do more to help them. Today, one out of every three new jobs is created by self-employed startup businesses.

□ 1110

But we can do better. Compared to other wealthy countries, the U.S. ranks 23rd in new businesses formed per thousand working adults. These entrepreneurs take risks to make it on their own, but they could do better if we help them be competitive. That is why yesterday I introduced the Entrepreneur Startup Growth Act.

One of the most intimidating times of the year for new owners is tax season, as they learn and navigate the different tax standards for businesses. My bill turns this tough time into an opportunity by offering not only affordable business tax assistance but business development services so that these companies can get the advice they need in order to grow.

This bill builds on the Self-Employment Tax Initiative launched by CFED, the Corporation for Enterprise Development, a nonprofit economic opportunity organization. According to CFED, nearly two-thirds of all self-employed people are operating business startups.

Self-employed startups in their first year of existence create an average of 3 million jobs per year. In fact, without business startups, there would be no net job growth in the U.S. economy. Nearly all net job creation since 1980 has occurred in self-employed startups less than 5 years old. They are critical to our economy.

In my bill, community-based organizations, local governments, and higher education institutions are eligible to

apply for grants up to \$75,000 to operate this program. The IRS will work with the Small Business Administration to ensure that the operators of the program have expertise in both tax assistance and business development assistance.

This is a program that works. With such a modest investment in this assistance, 62 percent of businesses were able to get refundable tax credits such as EITC and Making Work Pay, refunds that they might otherwise have missed out on. The Entrepreneur Startup Growth Act will help businesses grow and help low-income households build the assets that they need in order to survive. They will get the economic security they desire. With this, we will be able to help people climb up that ladder of opportunity and reach for that American Dream.

#### RAPE AND SEXUAL ASSAULT IN THE MILITARY

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. SPEIER) for 5 minutes.

Ms. SPEIER. I rise again today for the 13th time to talk about a stain on the American people, a stain on the American Government. I'm talking about military assault and rape. I'm talking about the 19,000 soldiers each year who are victims of sexual assault or rape in the military. Those are figures by the Department of Defense. Yet only 13 percent will report because they know that if they do report, they will be summarily removed from service. In fact, 90 percent of them are involuntarily honorably discharged from the military after they report a rape.

So what are we doing about it? Well, I have good news this morning to report. A few weeks ago, not far from here, a nonprofit organization, Protect Our Defenders, was born. It was launched to give voices to survivors of sexual assault in our military. More than 6,000 Americans have signed survivor Terry Odum's petition, whose story I've told here on the floor.

Terry's petition demands Congress take the reporting of sexual assault and rape outside the normal chain of command. I imagine many of my colleagues have received emails and tweets or Facebook messages from their constituents about this issue. This is a movement, and we must address it. Our troops protect us, and we must protect them. Both Republicans and Democrats should be able to agree that we need to fix this system.

Today, I'm going to tell you the story of Petty Officer Amber De Roche. Petty Officer De Roche served in the Navy from December 2000, to December 2005. In August of 2001, Petty Officer De Roche was raped by two shipmates in a hotel while on port of call in Thailand. One assailant ripped off Petty Officer De Roche's clothes and held her down

while the other assailant raped her. The assailants repeatedly took turns holding her down while the other would rape her. After they had their way with her, one of the rapists threw her in the shower in an attempt to wash off the evidence. They then kicked her out of the room and onto the unfamiliar streets of Thailand.

The following day, Petty Officer De Roche, with the help of a friend, went to get a medical exam. Petty Officer De Roche was bruised and injured to such a degree during the assault that the physician had to stop the exam and began to cry.

Petty Officer De Roche decided to report her horrific experience to her command. What was her reward? She became the target of severe harassment, was imprisoned in the medical ward, and denied food. I know this sounds unbelievable, but this is going on in our military.

When Petty Officer De Roche was released from the medical ward, her command refused to let her leave the ship and forced her to be on call 24 hours a day without receiving any counseling to help her cope with having been raped. Petty Officer De Roche sought out the ship's chaplain and told him she was suicidal as a result of the rapes and her subsequent mistreatment. Petty Officer De Roche was finally permitted to leave her ship and serve out the remainder of her duty on another ship.

As if the horrifying assault and subsequent mistreatment of Petty Officer De Roche is not heartbreaking enough, her predators didn't get the punishment they deserved. In fact, something very different. Instead of court-martialing the predators, her command decided to handle the rapes with so-called nonjudicial punishments. The punishment required the rapists to admit their crimes—so they admitted them. They got 6 months docked pay and a reduced rank for only one of the rapists. Both of the rapists were permitted to remain on active duty. When command informed Petty Officer De Roche of the outcome, they also advised her to "accept the situation" and refrain from speaking out against the lack of punishment or accountability.

Petty Officer De Roche's story, like many others, highlights a system that is unimaginable to so many of us and a system that is so clearly broken. In the military, a base commander has complete authority and discretion over how a degrading and violent assault under his command is handled. The commander can issue virtually any punishment for any reason. If they don't want a black mark on their record or their friends were accused or if they simply don't know the correct way of dealing with a case, they can issue just a simple slap on the wrist.

My bill, H.R. 3435, the Sexual Assault Training Oversight and Prevention

Act, the STOP Act, takes this issue and puts it in the hands of others who can handle it appropriately.

#### RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 17 minutes a.m.), the House stood in recess until noon.

□ 1200

#### AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

#### PRAYER

Reverend Roger Schoolcraft, Fayetteville, Arkansas, offered the following prayer:

Almighty and most high God, Father, Son, and Holy Spirit, You led our Forefathers to weave Your presence in the fabric of our Nation. Move us also to acknowledge and trust Your presence among us daily. And although we may face many obstacles and adversities, continue to shower us with Your mercy that we may recover.

Today, we thank You for healing our Nation from the attack on Pearl Harbor 70 years ago. We are grateful for all those who sacrifice their lives to preserve our freedom. O Lord, may we not squander it. Bless all wounded warriors, veterans and their families. Fill them and us with Your peace and joy this Christmas season.

Give us wisdom, and lead us by Your Spirit that the choices made here would result in our country united, an economy restored, and hearts grateful for Your loving care through Jesus Christ, our Lord.

Amen.

#### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

#### PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Illinois (Mr. QUIGLEY) come forward and lead the House in the Pledge of Allegiance.

Mr. QUIGLEY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

#### WELCOMING REVEREND ROGER SCHOOLCRAFT

The SPEAKER. Without objection, the gentleman from Arkansas (Mr. WOMACK) is recognized for 1 minute.

There was no objection.

Mr. WOMACK. Mr. Speaker, today it is my privilege to introduce Reverend Roger Schoolcraft of Fayetteville, Arkansas.

Reverend Schoolcraft retired from the ministry in 2008 after nearly 40 years in the ministry, serving congregations in Iowa, Nebraska and, most recently, in northwest Arkansas, where he led St. John's Lutheran Church in Fayetteville, Arkansas.

Reverend Schoolcraft was called to the ministry in 1953 after accepting an invitation from a friend to attend a Sunday school class at St. John's Lutheran Church in Rochester, Michigan.

Mr. Speaker, Reverend Schoolcraft's service extends well beyond the walls of the church. He served as campus pastor of the Lutheran Student Center at the University of Arkansas. He was a circuit counselor for 11 years and was assistant dean and dean for two national campus missionary institutes. Locally, he was president of Cooperative Emergency Outreach, secretary-treasurer of the Fayetteville Ministerial Alliance, and treasurer for the Council of Religious Organizations.

Reverend Schoolcraft is married to Deborah Steen Schoolcraft; and they have two children, Andrea and Aaron.

On behalf of the United States House of Representatives, I want to thank Reverend Schoolcraft for his longstanding devotion to the ministry, the churches he has served, and his fellow man.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mrs. MILLER of Michigan). The Chair will entertain up to 15 further requests for 1-minute speeches from each side of the aisle.

#### WHAT A GAME

(Mr. JOHNSON of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSON of Ohio. Madam Speaker, I would like to congratulate the gentleman from Illinois, Congressman RANDY HULTGREN, on winning our friendly wager on the MAC football championship game last Friday. The participants in the game, Ohio University and Northern Illinois University, are located in the districts that we are privileged to represent.

The game was an instant classic. Both teams left everything on the field and gave it their all and, in the process, made their universities and their fans proud.

The OU Bobcats jumped out to an early lead, but the Huskies of Northern Illinois fought back. They showed their toughness and won the game on the game's final play. Another way to say it is that OU won the first half and that Northern Illinois won the second half. Both teams were worthy of participation in the game, but it's a shame that either team had to come out on the losing end.

I am very proud of the OU Bobcats, and I look forward to watching both teams compete in their bowl games and represent their schools in the same fashion they did last Friday night.

Congratulations to Congressman HULTGREN.

#### SUPPORT THE PAYROLL TAX EXTENSION

(Mr. POLIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. POLIS. A huge tax increase is looming unless this House takes action immediately. Unless this House takes action in the next few weeks, a typical American household earning \$50,000, \$60,000 a year will see a tax increase of \$1,000 a year on payroll taxes—yes, Madam Speaker, a \$1,000 tax increase for middle class families, many of whom have not seen any raises or increases for several years due to the recession.

People who are struggling to support their families will see a \$1,000 tax increase if this body does not act in the next several weeks. This is a tax increase that most families haven't budgeted for and haven't prepared for. They haven't assumed that this Congress is as dysfunctional as it potentially is if we fail to renew this tax increase. We shouldn't let our dysfunction in this body harm the middle class and the American people.

I call upon my colleagues on both sides of the aisle to support renewing the payroll tax extension to make sure that middle class families are not slapped with a \$1,000-plus tax increase next year.

#### SIXTEEN DAYS AGAINST GENDER VIOLENCE

(Mr. POE of Texas asked and was given permission to address the House for 1 minute.)

Mr. POE of Texas. Madam Speaker, Sehar, a Pakistani woman in an arranged marriage, was constantly raped and abused by her husband. He accused her of becoming a doctor only to attract men. He blamed her for the miscarriage that she had, and he constantly beat her. He was angry when she gave birth to two girls rather than to two boys, and he was an abuser of the girls and his wife.

Sehar and her daughters were able to escape to the United States to find

safety. She will not go back to Pakistan because her former husband's family says they will kill her.

Violence against women, unfortunately, is too common of a plight for women throughout the world. My grandmother used to tell me that you never hurt somebody you claim you love. As the leader of the free world, it is critical that the United States promote this simple truth throughout this country and other countries:

Every person has the right to a life free of violence.

I want to thank the gentlelady from Illinois (Ms. SCHAKOWSKY) for bringing this to the attention of the Members of Congress as we reflect on this fact during these 16 days against gender violence.

And that's just the way it is.

#### THE DEFENSE OF MARRIAGE ACT, AN AFFRONT TO AMERICA'S VALUES

(Mr. QUIGLEY asked and was given permission to address the House for 1 minute.)

Mr. QUIGLEY. Madam Speaker, in 1996 Congress passed the so-called Defense of Marriage Act, or DOMA. It was then, as it still is today, an affront to our country's values—the values we hold true as established in the Declaration of Independence, those of life, liberty, the pursuit of happiness, and of equality and fairness for all.

On October 7 of this year, I held a field forum in Chicago, along with my colleague JAN SCHAKOWSKY, to hear from legal experts and gay and lesbian couples about the real-world harm caused by DOMA. The findings were startling. I ask that the clerk enter all of their testimony into the RECORD to formally document this collection of unfairness and inequity, burdens that are imposed on normal Americans who are just trying to live normal lives.

It is incomprehensible that today we are still dealing with such injustice. Congress created this injustice, and Congress should correct it. Let the RECORD reflect these sentiments.

#### LET'S REIN IN THE REGULATORS

(Mr. HULTGREN asked and was given permission to address the House for 1 minute.)

Mr. HULTGREN. Madam Speaker, \$1.75 trillion annually—America's job creators are buried under the regulatory burden of about \$1.75 trillion annually.

The cost of the regulatory burden from new regulations just this year is \$67.4 billion, which is larger than the entire State budget of Illinois, my home State. Studies and polls have shown us time and again that the regulations are a hidden form of taxation; and just as our Tax Code is in need of reform, so is our regulatory system.

That's why I'm proud to support the REINS Act. This commonsense bill will require that Congress approve every new major regulation proposed by the executive branch in order to ensure that Congress, not unelected bureaucrats, retain control and accountability for the impact of government on the American people.

Unless Congress acts decisively, this unchecked regulatory state will only grow bigger and make things more complicated. Let's pass the REINS Act, and let's give our job creators the certainty they need to grow, expand, and put Americans back to work.

□ 1210

#### TAXES

(Mr. BACA asked and was given permission to address the House for 1 minute.)

Mr. BACA. Madam Speaker, this year will be a very difficult holiday season for millions of Americans looking for jobs. Sadly, these families are not getting the help they deserve from the Republicans here in Congress.

We have now reached 337 days of Republican control here in the House, and we still do not have a jobs plan from the Republicans.

Benefits for over 6 million unemployed Americans are about to expire. And now, to make matters worse, Republicans are creating uncertainty for the 160 million middle class families by stalling and extending the payroll tax cut.

Why are these Americans forced to wait? Because Republicans refuse to ask those making more than a million dollars to pay their fair share. Millionaires are not paying their fair share.

We must act now on those lifelines of the middle class and allow the Bush tax cuts for the ultrarich to expire. No new taxes, no jobs. No new taxes, no new jobs. We must pass a responsible tax plan that extends the unemployment benefits and gets the economy moving again.

#### IMPLICATIONS OF GOVERNMENT'S ADDING ADDITIONAL RED TAPE AND ADDITIONAL REGULATIONS

(Mr. DOLD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOLD. Madam Speaker, as a small business owner, I understand firsthand the implications of the government adding additional red tape and additional regulations. One clear example of this is the Dodd-Frank bill.

The Dodd-Frank bill was supposed to impose clear rules and regulations on the financial industry so that another economic disaster could be averted. However, this single piece of legislation has imposed more uncertainty

into the marketplace. The bill imposes literally hundreds of new rules and regulations, most of which haven't even been written yet. As a result, businesses are not growing and they're not creating jobs, and this is in large part because they don't understand what tomorrow will bring.

I did have an opportunity to talk to a smaller bank back in my district that said, We're not growing, with the exception of adding people into our compliance department to cross the T's and dot the I's, but not a single person was hired in order to try to get additional liquidity into the marketplace and help small businesses.

Rather than pile on rule after rule, we should implement smart regulations that truly protect consumers. The last thing we want is another financial disaster, so we should examine the implications of the rules and regulations and ensure that the right regulations are in place and get America back to work.

#### THE NEED TO PASS PAYROLL TAX CUT

(Mr. SIREs asked and was given permission to address the House for 1 minute.)

Mr. SIREs. Madam Speaker, the majority has held 891 votes in this Chamber, and we still see no plan for job creation.

To make matters worse, my colleagues across the aisle have now focused their efforts on opposing a tax break for the middle class. They are opposing the extension of the Federal tax holiday enacted earlier this year that gave virtually all working Americans a much needed tax cut, reducing taxes for over 160 million American workers.

Economic uncertainty both here in the U.S. and abroad makes this a dangerous time to eliminate an important tax cut that is saving American families an average of \$1,000 a year. Failing to extend the payroll tax holiday will raise taxes on millions of Americans, taking over \$120 billion out of the pockets of consumers and out of the economy.

Furthermore, at the same time the majority is working to raise taxes on the middle class, they are willing to cut off the unemployment insurance that has been keeping millions of Americans afloat.

Madam Speaker, let's ensure that millions of Americans enjoy this holiday season and are not forced to worry about raising taxes or losing essential assistance.

#### UNEMPLOYMENT HAS NOT BEEN THIS PERSISTENT SINCE 1948

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Madam Speaker, last Friday the U.S. Bureau of Labor Statistics announced November's unemployment rate remained above 8 percent. Over 13 million American families are now without jobs. Nearly 25 million people are looking for full-time employment. The number of unemployed Americans has not consistently remained at such a high percentage since 1948.

For the past 34 months, the American people have been depending upon Congress and the President to cut Washington's wasteful spending and enact policies targeting job creation and economic growth.

Since the Republicans regained the majority of the House in January, legislation has passed that allows small businesses to grow and create jobs. It is past time for the President and liberal-controlled Senate to change course to put our hardworking American families back to work.

In conclusion, God bless our troops, and we will never forget September the 11th in the global war on terrorism, as on December the 7th we honor the heroes of World War II.

#### BEYOND THE BORDER AGREEMENT

(Mr. HIGGINS asked and was given permission to address the House for 1 minute.)

Mr. HIGGINS. Madam Speaker, today the United States and Canadian Governments will announce a Beyond the Border agreement to ease border trade and travel in this era of heightened security.

I support this goal because in western New York our future depends on integrating our economy with the booming economy of southern Ontario by expanding the Peace Bridge that connects our two communities. The Peace Bridge is the busiest passenger crossing at the northern border. Passengers using the bridge spend \$133 million in western New York annually in support of our retailers, sports franchises, airports, educational and cultural institutions.

In western New York, Peace Bridge trade impacts \$9.1 billion in business sales, supporting 60,000 local jobs and generating \$2.6 billion in household income and \$233 million in local tax revenue. All of this economic activity depends on a Peace Bridge that is free of congestion, one that is safe, reliable, and predictable.

I applaud the efforts of this agreement and call on a renewed Federal focus on the northern border, generally, and the Peace Bridge, specifically.

#### MEDICARE PHYSICIAN PAYMENT SYSTEM

(Mr. FITZPATRICK asked and was given permission to address the House for 1 minute.)

Mr. FITZPATRICK. Madam Speaker, for decades the fundamentally flawed Medicare physician payment system has created uncertainty and instability, not only in the health care system but in the larger economy.

Every year physicians face the threat of reimbursement cuts which, in turn, hinders their ability to provide the necessary care that patients need. The Sustainable Growth Rate rate formula has constantly called for negative updates to physician payments with the scheduled reductions accumulating year after year, but Congress has continually delayed the cuts.

Congress has a historic opportunity to implement sound fiscal policy in the Medicare program in the context of broad economic reforms. I believe we must pursue a fair, efficient, and affordable long-term solution to the Medicare SGR formula. I am committed to working with my colleagues to pass commonsense legislation that promotes efficiency, quality, and value and ensures access to medical services for Medicare beneficiaries.

#### MEDICARE TOWN HALL/DOUGHNUT HOLE CLOSURE

(Ms. HOCHUL asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. HOCHUL. Madam Speaker, yesterday I spoke with over 8,000 of my constituents during a telephone town hall to talk about the end of the open enrollment period for Medicare, which occurs at midnight tonight.

We also talked about the savings they are now receiving as a result of the closing of the legendary prescription drug doughnut hole. More than 2.5 million Medicare recipients across the Nation have saved \$1.5 billion on their prescription drugs this year alone. In New York, we had 175,000 Medicare recipients, and they received a 50 percent discount on prescription drugs, totaling over \$113 million in savings, an average of \$650 per family.

Yesterday's call was a reminder, when I was talking about Bill from Williamsville and Joan from Livingston County, that we have to work hard to protect this absolutely critical program that ensures medical care for our seniors and allows them to live their later years in dignity.

As my seniors told me: Medicare is not an entitlement; it is a program we spent our entire lives paying into. And I, for one, plan to protect it.

□ 1220

#### CONGRATULATING ED SNIDER

(Mr. MEEHAN asked and was given permission to address the House for 1 minute.)

Mr. MEEHAN. Madam Speaker, I rise to congratulate Ed Snider, the owner

of the Philadelphia Flyers hockey club, on being inducted into the United States Hockey Hall of Fame. This is a special occasion, not only for the city of Philadelphia and the Delaware Valley as a whole, but particularly for those who love the game of hockey, myself included.

Ed's tremendous success with the Flyers franchise—winning two Stanley Cups and reaching the finals six times—contributed to making Philadelphia a Class A hockey town. However, the key is that he has really given back to communities.

Through his organization, the Ed Snider Youth Hockey Foundation, he teaches high-risk inner city boys and girls from Philadelphia the game of hockey. But it prepares them with life skills for success in school and life as well. Hard work, honest effort, teamwork, dedication, and a solid work ethic are instilled in these children as life lessons and values as part of participation in this program. It is through these lessons that his organization helps our children become good and productive citizens. His philanthropic cause is significant to our region and to these young children in our area.

Congratulations to Ed Snider on this recognition.

#### ENDING VIOLENCE AGAINST WOMEN

(Ms. SCHAKOWSKY asked and was given permission to address the House for 1 minute.)

Ms. SCHAKOWSKY. Madam Speaker, I rise today to join thousands of activists participating in the 16 Days Campaign by speaking out against violence against women.

Violence against women is a violation of fundamental human rights. It is a global problem of epidemic proportions. One in three women worldwide is beaten, coerced into sex, or otherwise abused over the course of her lifetime.

That is why I am proud to be working with Congressman TED POE to reintroduce the International Violence Against Women Act. The important bill would require a comprehensive strategy to prevent and respond to violence against women and girls internationally.

Violence against women is not just a humanitarian tragedy; it is a global health menace and a threat to national security. The United States can play a significant role in protecting the human rights of all women and ending the violence against our sisters around the world.

#### COMMEMORATING DECEMBER 7

(Mr. CARNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARNEY. Madam Speaker, I rise today to commemorate two very important events in our Nation's history that occurred on December 7. As we know, today is National Pearl Harbor Remembrance Day. We pray for the more than 3,500 U.S. soldiers and civilians who were killed or wounded in defense of our Nation that day. The sacrifices they made 70 years ago are not unlike the sacrifices that our soldiers and their families are being asked to make today.

December 7 is also an important milestone for the founding of our Nation. Today is Delaware Day, the 224th anniversary of Delaware's ratification of the United States Constitution, making Delaware the first State to join the Nation.

Delaware's Founding Fathers saw the vision and genius of the form of government laid out in our Constitution. It is this vision and this document that continues to guide everything we do today.

So let us take time today to remember the contributions every generation has made to protect the values and freedoms upon which this great Nation was founded.

#### THE SEINFELD CONGRESS

(Mr. DOYLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOYLE. Madam Speaker, the last time the Republicans controlled the House back in 2006, a newspaper columnist called it "the Seinfeld Congress," because like Seinfeld, which was a show about nothing, the 109th Congress was a Congress about nothing. Absolutely nothing got done.

Now the House Republicans have upped the ante. They have an agenda filled with Seinfeld legislation—a bunch of bills about nothing. Tomorrow, for example, we're considering the so-called farm dust bill. Now, ignore for a moment the fact that it's more about mines and smelters and concrete plants than it is about farms. House Republicans want to ban an EPA rule that the EPA administrator has said she has no intention of issuing.

Why are we wasting time prohibiting a rule that's not being issued when we've got real problems like a struggling economy and millions of people out of work.

As Seinfeld might say, yada, yada, yada.

#### HONORING TRINITY SHAMROCKS

(Mr. YARMUTH asked and was given permission to address the House for 1 minute.)

Mr. YARMUTH. Madam Speaker, with an average margin of victory of more than 40 points, an undefeated season, and a win in the State champion-

ship that Sports Illustrated called the team's "finest offensive performance of the year," there can be no more debate: Trinity High School Shamrocks is the best high school football team in the country.

Friday's 62-21 victory over Scott County in the 6A final completed a 25-game win streak, secured a second straight State title, and capped a season in which Trinity didn't just beat the competition, they rocked them.

Over five playoff games, Trinity outscored its foes by more than 240 total points. They never trailed in the second half all season. They crushed top-tier out-of-state competition and avenged their only 2010 loss. After facing Trinity, Scott County's coach called the Shamrocks "the best team in Kentucky football history."

This was a true team effort, and thanks to the leadership and dedication of 40 seniors, these student athletes have achieved a perfect record and deserve to bring a national title home to Louisville. I ask my colleagues to join me today in congratulating Coach Beatty, the team, and the entire Trinity community on an incredible championship and an amazing 2011 season. Way to go Rocks.

#### EXTEND PAYROLL TAX CUT AND EMPLOYMENT ASSISTANCE

(Mr. CICILLINE asked and was given permission to address the House for 1 minute.)

Mr. CICILLINE. Madam Speaker, we simply cannot leave Washington before extending the payroll tax cut and unemployment assistance. With our economy still struggling and unemployment remaining unacceptably high at 10.4 percent in my home State of Rhode Island, now is not the time to take more money out of the pockets of hardworking families.

Allowing the payroll tax cuts to expire at the end of this month will mean less money in the pockets of 600,000 hardworking Rhode Islanders. It is absolutely critical that we extend the payroll tax cut which is saving working families an average of \$1,000 per year and would add \$400 million to Rhode Island's economy next year. We have to do everything we can to strengthen our middle class families who are struggling to make ends meet and provide assistance to those families who need it most.

If Congress does not extend emergency unemployment assistance, thousands of Rhode Islanders, as well as millions of Americans who rely on this critical safety net, will lose their assistance. This will have a devastating impact on these families and on our economy.

Rather than providing subsidies to Big Oil companies and arguing for more tax cuts for millionaires and billionaires, it's time for Congress to

stand up for American families and to extend the payroll tax cut and unemployment compensation.

#### EXTEND PAYROLL TAX CUT

(Ms. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. McCOLLUM. Madam Speaker, the temporary payroll tax cut is putting money into the economy and the pockets of 160 million Americans. And now my Republican colleagues are demanding harmful cuts to working families and seniors to offset these middle class tax cuts.

A better idea is to cut from the \$1 trillion in special interest tax earmarks identified by the bipartisan Simpson-Bowles Commission. Let's cut the \$2 million earmark for wooden arrow manufacturers. Let's cut the \$40 million earmark for the owners of NASCAR racetracks. And let's cut \$235 million in earmarks for rum producers in Puerto Rico and the U.S. Virgin Islands. The earmarks are unfair and unaffordable.

To the 99 percent of Americans who don't have a lobbyist, sorry, you missed out on the special interest bonanza. Congress needs to protect working families. Let's pass President Obama's middle class payroll tax cut and help our families and our economy now.

#### SUPPORT REINS ACT

(Mr. YODER asked and was given permission to address the House for 1 minute.)

Mr. YODER. Madam Speaker, the American economy is crying out for certainty. Every day the instability created by new Washington rules, regulations, new taxes, et cetera makes it harder for the economy to recover and harder for small businesses to create jobs.

That's why today I stand in full support of the Regulations from the Executive in Need of Scrutiny Act, known as the REINS Act.

As our Federal agencies churn out regulations by the truckload, it's our small businesses, those very entities that we expect to create jobs and are struggling to survive, that are burdened with implementing them. In fact, regulations cost the economy \$1.75 trillion per year. New regulations this year alone will cost business over \$60 billion, all driving up the cost of doing business and putting more people out of work.

I'm supporting the REINS Act because this legislation will provide Americans with an additional level of accountability when it comes to job-killing regulations from government agencies.

Madam Speaker, it's time we stand up for small business owners, and it's

time we do all that we can to remove the barriers Washington is putting in their way. Let's come together as a Congress and help get America back to work again.

□ 1230

#### OPPOSITION TO THE REINS ACT

(Mrs. CAPPS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. CAPPS. Madam Speaker, later today the House will vote on the REINS Act. This is a terrible piece of legislation that will make it next to impossible to protect Americans' health or the environment. It would allow either Chamber of Congress to stop efforts to keep our water and air clean or to protect the public from unsafe food—by simply doing nothing.

This bill sets up a congressional approval requirement that is a recipe for more gridlock. It would mean more bureaucracy and more delay, generating uncertainty for businesses and weaker rules to protect consumers.

Sherwood Boehlert, the former Republican chairman of the House Science Committee and one of our most thoughtful former colleagues, recently wrote a scathing piece in *The Hill* about the REINS Act. He said the bill would result in "a virtual shutdown of the system that will leave the public exposed."

Madam Speaker, the REINS Act is an outrageous effort to throw out a system that has protected American families and communities for more than 100 years. I urge my colleagues to join me in voting down this irresponsible and misguided legislation.

#### VOTER SUPPRESSION

(Mr. PETERS asked and was given permission to address the House for 1 minute.)

Mr. PETERS. Madam Speaker, I rise today to oppose nationwide efforts to suppress voter turnout for the 2012 election, including State legislation imposing strict photo ID requirements. These new regulations would disproportionately burden seniors, people with disabilities, the poor, and minorities.

In Michigan, we have seen aggressive purges of voter rules, which can disenfranchise low-income voters who have moved to a new address. Half a million Michiganders don't have a driver's license or State ID. How are they supposed to make their voices heard if these rules are passed?

Let's be clear. These efforts are about one thing and one thing only: silencing voters.

America is a beacon of democracy, and to limit voter access is hypocritical and wrong. Madam Speaker, I don't have to tell you about the shame-

ful times in America's history where power and intimidation were used to prevent Americans from voting. We must learn from our past.

Fight voter suppression efforts in the courts, in State legislatures, here in Washington, and, most importantly, on election day.

#### REMEMBERING PEARL HARBOR

(Ms. HANABUSA asked and was given permission to address the House for 1 minute.)

Ms. HANABUSA. December 7, 1941, "a date which will live in infamy," are the words of President Roosevelt.

I represent Pearl Harbor. On this day, let us not forget the brave people who gave their lives at Pearl Harbor. On this day, let us not forget this act of unprovoked, dastardly aggression which propelled us into a war. On this day, let us not forget how the people of this Nation were unmatched in their evidence of loyalty and patriotism.

Let us remember because we need to be that people again to continue our fight to maintain our position as the greatest Nation in the world. Let us remember because we need to show the compassion to those who are in need in these days.

#### MOTION TO INSTRUCT CONFEREES ON H.R. 2055, MILITARY CONSTRUCTION AND VETERANS AFFAIRS AND RELATED AGENCIES APPROPRIATIONS ACT, 2012

Mr. ROGERS of Kentucky. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2055) making appropriations for military construction, the Department of Veterans Affairs, and related agencies for the fiscal year ending September 30, 2012, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference requested by the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. DICKS. Madam Speaker, I have a motion to instruct at the desk.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. Dicks moves that the managers on the part of the House at the conference on the disagreeing votes of the two Houses on the Senate amendment to the bill, H.R. 2055, be instructed to recede to the Senate on the higher level of funding for the "Department of Veterans Affairs—Medical and Prosthetic Research" account.

The SPEAKER pro tempore. Pursuant to clause 7 of rule XXII, the gentleman from Washington (Mr. DICKS) and the gentleman from Kentucky (Mr. ROGERS) each will control 30 minutes.

The Chair recognizes the gentleman from Washington.

GENERAL LEAVE

Mr. DICKS. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on the motion to instruct.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. DICKS. Madam Speaker, I yield myself such time as I may consume.

The motion instructs conferees to provide the highest level of funding for medical and prosthetic research. This program helps the Department of Veterans Affairs develop cutting-edge treatments for veterans and their families. It is fully integrated throughout the medical community through partnerships with academic affiliates, nonprofits, and commercial entities, as well as other Federal agencies. It is unique because both the clinical care and research occur together.

The Medical and Prosthetic Research Program plays a vital role in advancing the health and care of our Nation's veterans. Some of the areas that the Medical and Prosthetic Research Program focus on include mental health research, prosthetics, traumatic brain injury, and posttraumatic stress disorder, or PTSD. The program has emphasized efforts to improve the understanding and treatment of veterans in need of mental health care.

We hear a lot about the casualties of war and soldiers who have sacrificed their lives in duty. However, over the past few years, the VA has begun to examine the psychological wounds of posttraumatic stress disorder. The motion will provide funding for the VA to care for veterans returning home from Iraq and Afghanistan who may suffer from depression, anxiety, and substance abuse.

Funding for medical and prosthetic research in the House-reported bill was inadequate, and during floor consideration the House majority agreed to increase funding by \$22 million. While I was pleased to see this increase, I believe we need to do more.

The Senate-passed bill funds this program at the FY2011 enacted level, which is \$51 million higher than the House-passed level. I believe the higher funding levels should be maintained because of the impact this research can have on the everyday life of our Nation's veterans.

This Nation must get its fiscal house in order. However, even in an austere budget, we need to make room to fully fund our priorities. The Medical and Prosthetic Research Program is a high priority.

I'm sure that all of my colleagues would agree we can never repay America's veterans for the sacrifice they have made for our country. As a first

installment, we should make a substantial investment in health care research for our veterans, and I urge a "yes" vote on the motion to instruct.

I reserve the balance of my time.

Mr. ROGERS of Kentucky. Madam Speaker, I yield myself such time as I may consume.

This motion to instruct is well-intentioned but unnecessary. The motion would urge adoption of the Senate-passed level for VA medical research, which is \$50 million above the House-passed level.

We all support our veterans and honor their service and sacrifice. We, of course, support the important research work the VA is doing for our veterans in fields such as traumatic brain injury and posttraumatic stress disorder. We provided a robust level of funding for this research in the House-passed version of the bill at a time when our overall funding targets were constrained. In fact, the House bill provided a total of \$531 million for VA medical research, an increase of \$22 million above what the White House and the VA requested. In addition, the VA still has \$71 million in unobligated research funding left over from previous years that could be put to use. So even without the increase, the program level would still be well above the 2011 level.

We all agree that medical research at the VA is undeniably important and we want to do the best that we can for our veterans, particularly those in need of medical assistance. On that, there's no difference between the ranking minority member and myself and between the members of the subcommittee.

□ 1240

I can reassure the Members that we will work with our House and Senate colleagues to determine the appropriate level for VA research to continue to support and honor the service of our veterans.

While this motion is not necessary, I understand and agree with its intent; and I will work with the ranking member. And with reservations, I will accept the motion at this time.

Madam Speaker, I yield back the balance of my time.

Mr. DICKS. I would ask for a vote on my motion to instruct, and I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to instruct.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to instruct.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DICKS. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further pro-

ceedings on this question will be postponed.

MOTION TO INSTRUCT CONFEREES ON H.R. 1540, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2012

Mr. McKEON. Madam Speaker, by direction of the Committee on Armed Services, I ask unanimous consent to take from the Speaker's table the bill (H.R. 1540) to authorize appropriations for fiscal year 2012 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference requested by the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SMITH of Washington. Madam Speaker, I have a motion to instruct at the desk.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. Smith of Washington moves that the managers on the part of the House at the conference on the disagreeing votes of the two Houses on the Senate amendment to the bill H.R. 1540 be instructed to insist on the amendments contained in subtitle I of title V of the House bill (sections 581 through 587 relating to improved sexual assault prevention and response in the Armed Forces).

The SPEAKER pro tempore. Pursuant to clause 7 of rule XXII, the gentleman from Washington (Mr. SMITH) and the gentleman from California (Mr. McKEON) each will control 30 minutes.

The Chair recognizes the gentleman from Washington.

Mr. SMITH of Washington. Madam Speaker, I yield myself such time as I may consume.

This is a very important provision of the House bill dealing with better combating sexual assault within the military. Now, this is a significant problem that has been documented by many studies and many media reports. I want to particularly congratulate members of my committee, Ms. LORETTA SANCHEZ, Ms. TSONGAS, Ms. SPEIER, and Mrs. SUSAN DAVIS, who have taken a leadership role in this to try to implement policies to control sexual assault within the military. The provisions that we've put together in the House help move us forward towards addressing that issue, make sure that it takes on the importance that it deserves, and empower the military to make the decisions they need to better protect against sexual assault within the military.

I particularly applaud Ms. TSONGAS. This is her motion to stick to the

House provisions in this area. I urge the conference committee to do that going forward.

With that, I reserve the balance of my time.

Mr. McKEON. I reserve the balance of my time.

Mr. SMITH of Washington. Madam Speaker, I yield 2 minutes to the gentlewoman from New York (Ms. SLAUGHTER).

Ms. SLAUGHTER. I thank the gentleman for yielding. And, Madam Speaker, good afternoon.

Sexual assault in the military continues to be a serious problem. It impacts thousands of service women and men each year.

While I'm pleased with the recent improvements made by the Department of Defense, there remains much more to be done. It is vital that we do all we can to protect the men and women in the military who protect us.

I am very pleased that both the House and the Senate passed language improving the military's response to sexual assault in their respective versions of the National Defense Authorization Act.

□ 1250

Earlier this week, I, along with Representative TURNER and 45 colleagues, sent a letter to the House and Senate Armed Services Committees asking them to strongly consider the House-passed provisions dealing with military sexual assault.

The language contained in the House version makes necessary improvements to protect our service women and men. Specifically, the House-passed language strengthens the rights of sexual assault victims by clarifying victim access to legal counsel, and record maintenance and confidentiality, which are critically important. It also ensures expedited unit or station transfer when a servicemember has been victimized.

Imagine being a victim of rape, which one young soldier told me about at a hearing, while serving in the military, and every morning she had to salute her rapist. That's what the members of our Armed Forces have experienced and will continue to experience if we don't do something to change that situation.

The House-passed language also stresses the need for the NDAA to include comprehensive training and education programs for sexual assault prevention within the Department of Defense. The Senate version does not include this protection, which is part of H.R. 1709, the Force Protection and Readiness Act, which I introduced earlier this year.

I am pleased this motion to instruct conferees on the NDAA recognizes the importance of this issue, and I ask the conferees to seriously consider including the strongest possible language to prevent and appropriately respond to

incidents of sexual assault in the military.

Mr. McKEON. I continue to reserve the balance of my time.

Mr. SMITH of Washington. Madam Speaker, I yield the balance of my time to the gentlewoman from Massachusetts (Ms. TSONGAS).

The SPEAKER pro tempore. Without objection, the gentlewoman from Massachusetts will control the balance of the time.

There was no objection.

Ms. TSONGAS. Madam Speaker, I yield myself such time as I may consume.

While one in six women will experience sexual assault in her lifetime, as many as one in three women leaving military service report that they have experienced some form of military sexual trauma.

By the Pentagon's own estimate, as few as 13.5 percent of sexual assaults are reported. Additionally, while 40 percent of sexual assault allegations in the civilian world are prosecuted, this number is a staggeringly low 8 percent in the military.

The military has been slow to take the appropriate actions necessary to protect victims of sexual assault. For example, rape victims still do not yet have the right to a unit or duty location transfer following an assault. This means victims of sexual assault are often forced to live and work alongside their perpetrator, facing repeated stress and trauma due to the constant contact they may have with an assailant who is part of their unit.

As unbelievable as it sounds, this is exactly what happened to Marine Lance Corporal Maria Lauterbach, who accused her assailant of rape, and then spent the next 8 months exposed to the accused rapist, who later murdered her and buried her with the body of her unborn son in his backyard.

Although these events happened in 2007, the Department of Defense has not adopted provisions that would allow victims to escape constant contact with their assailant. We ask men and women who serve in the military to put their lives on the line for our country, and they shouldn't fear harm from their fellow servicemembers. We simply must do more to protect them.

In May, this House passed H.R. 1540, which included strong bipartisan provisions that would allow victims of sexual assault the right to transfer units, the right to counsel, the right to privileged communications between a victim and a victim advocate, and the right to get records of their sexual assault so they can be eligible for veterans' benefits. These provisions came from a bipartisan bill that I introduced with Mr. TURNER of Ohio.

Our language stipulates that confidential communications cannot be used by the defense attorney against a victim during court proceedings, and

they remain actually confidential. These provisions will encourage more victims to come forward and get the help they need to heal, and will encourage more victims to participate in the legal process of prosecuting perpetrators of sexual assault, both of which are critical to maintaining readiness and unit cohesion in the military.

These provisions also establish full-time sexual assault response coordinators and victim advocates and ensure they are well trained for the job and able to properly serve victims of sexual assault. The 2009 Defense Task Force Report on Sexual Assault in the Military Services found that current victim advocates and sexual assault response coordinators are unprepared for the duties of the position.

In the words of a current unit victim advocate, "I would truly be unprepared if a sexual assault were to occur and my services were needed. It is my opinion that active duty victim advocates are not prepared to deal with sexual assaults and could potentially deter individuals from coming forward."

Having full-time SARCs and VAs with extensive training and certification will ensure that they are truly a valuable resource to their unit and to victims who come forward.

This language also improves the retention of sexual assault records and guarantees that victims of sexual assault will have lifetime access to these records for a variety of purposes, such as being considered for veterans benefits and given priority consideration for counseling at Veterans Affairs.

Currently, survivors of sexual assault have to jump through multiple bureaucratic hurdles to prove that their symptoms are connected to an incident of sexual assault in the military in order to be prioritized for mental health counseling or be eligible for benefits. Servicemembers find it difficult to obtain documentation proving their sexual assault once they have left the services because many of these documents are destroyed at DOD after only a few years. This language ensures that the documents are maintained.

This language also requires DOD to prepare a record of all court proceedings in which a charge of sexual assault is adjudicated and provide a copy to the victim. Because victims of sexual assaults serve as a witness rather than an active participant in trials where their case is litigated, they often do not understand the outcome of their case. These records are prepared where convictions result, but when charges are dismissed, or when a perpetrator is found innocent, the victim has no reliable way to understand what happened and why his or her case was dismissed.

Making sure victims understand the outcome of their case is important to providing closure for victims and making sure they are an active, respected participant in the legal process.

□ 1300

It will help to alleviate much of the mistrust that servicemembers and victims of sexual assault in the military harbor when it comes to how a sexual assault case will be handled if they make a report.

Similar provisions were included in the Senate's version of the defense authorization, but these provisions do not clearly spell out a victim's right to counsel and do not provide for a comprehensive education and training program.

Yesterday a bipartisan group of 47 Members, led by Ms. SLAUGHTER and Mr. TURNER, sent a letter to the chairman and ranking member of both the House and Senate Armed Services Committees in support of the House's language. This motion simply instructs our conferees to insist on the House language, language that will protect our servicewomen.

I urge my colleagues on both sides of the aisle to support the motion to instruct conferees.

With that, Madam Speaker, I reserve the balance of my time.

Mr. McKEON. I continue to reserve the balance of my time.

Ms. TSONGAS. Madam Speaker, I am pleased to yield 2 minutes to the gentlewoman from California who has taken such an interest in this very grave issue and played an important leadership role, Congresswoman SPEIER.

Ms. SPEIER. I thank Ms. TSONGAS and the ranking member, Mr. SMITH, for bringing this motion. Thank you, Madam Speaker, for the opportunity to say a few words here.

This is a cancer that is eating up our military. For 25 years, we have debated and discussed and reported on it, and yet the numbers are staggering. By DOD's own estimates, 19,000 men and women in the military each and every year are sexually assaulted or raped. Only 13 percent actually report these sexual assaults and rapes, and 90 percent of them are involuntarily honorably discharged.

There is a message in the military: Shut up, take an aspirin, go to bed, sleep it off. These very modest elements are really very important, but if we're really going to deal with this issue, if we're truly going to say that you are no longer going to be more likely to be a victim of violence in the military by a fellow officer than by the enemy, if we're really going to be able to change that construct, then we're going to have to take the reporting of these crimes away from the chain of command and put it in a separate office where we will have experts, both military and civilian, that will be able to prosecute these cases and actually investigate them.

Right now there's a huge conflict of interest. I spoke on the floor this morning about Petty Officer De Roche

who was raped by two officers in Thailand when they were on port of call. She was raped twice by each of these men. She then went to report it and was told to leave it alone. She was then put in a medical hold for 24 hours, for days. And then what happened, she was eventually allowed to leave the ship and be put in another service setting.

But do you know what happened to those two assailants, both of whom admitted that they had raped her?

The SPEAKER pro tempore. The time of the gentlewoman has expired.

Ms. TSONGAS. I yield the gentlewoman an additional minute.

Ms. SPEIER. One of them had 6 months of reduction in pay; one of them got demoted, one of them did not; but neither of them served any time for having admitted that they had raped her. They got what was called non-judicial punishment.

What a joke that in this country we give a unit commander the authority to be judge and jury and then not even have these individuals who commit these violent crimes have to pay anything. It doesn't go on a record; there is no sexual assault database. That's the way we've been running the military, and that must stop.

Ms. TSONGAS. I yield back the balance of my time.

Mr. McKEON. Madam Speaker, I yield myself such time as I may consume.

I just have to respond to the last speaker that we had.

We have this language in the bill. We have worked with Ms. TSONGAS. She's done great work with Mr. TURNER. We have been out of the majority for 4 years. We now have the majority. I'm not going to say that it shouldn't have been fixed before; it should have. But we have this in the bill. But to attack the military and make them like they are the worst people in the world—19,000 is excessive. It is something that never should have happened. This will take care of it.

We just had talk of a revered football coach we found right in their organization of a very upstanding university that we all have thought great things about, has all kinds of problems with sexual abuse.

I refuse to have the innuendo or the charge that the military is corrupt top to bottom, which is what you basically inferred in what you just said.

We support this. We put it in the bill. We think that it is very important to take care of this problem.

Ms. SPEIER. Will the gentleman yield?

Mr. McKEON. I'd be happy to yield.

Ms. SPEIER. I did not say that the military was corrupt. What I did say was that the way—

Mr. McKEON. Reclaiming my time, you did charge them with some very serious issues and besmirch the character of the military.

Ms. SPEIER. Will the gentleman yield?

Mr. McKEON. I'd be happy to yield.

Ms. SPEIER. What I would say to the gentleman from California is this: that the Congress of the United States has, for almost a quarter of a century now, been looking at this issue. We have not done a good job—

Mr. McKEON. Reclaiming my time, as the new chairman of the committee, the first bill that we have brought forward, we have it in the bill. We are moving to take care of it.

Ms. SPEIER. Will the gentleman yield?

Mr. McKEON. No. I think we've probably said enough.

What I would say at this time is we do support this. The bill was overwhelmingly supported out of committee 60-1, 322-96 in the House. We're moving strongly on this issue. We will support it through the conference and do our best to see that it remains in the bill because it is such a very important issue.

With that, I yield back the balance of my time.

Ms. TSONGAS. Madam Speaker, I did not mean to yield back my time; so I ask unanimous consent to reclaim my time.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

Mr. McKEON. Reserving the right to object, I understand that I did that once myself, yield back my time inadvertently.

With that, I would be happy to see that my colleague has the balance of her time to close, and I withdraw my reservation.

The SPEAKER pro tempore. Without objection, the gentlewoman from Massachusetts is recognized.

There was no objection.

Ms. TSONGAS. I thank the chairman.

It has been my honor and pleasure to work in a bipartisan fashion on this legislation that seeks to address the great challenge of military sexual trauma. I think that we have incorporated into the House version of the bill some very significant reforms that will help to protect victims, unfortunate victims of this great affront to young people serving in our military; will seek to better protect them as they seek to bring to justice the perpetrators; will better train those who are put in a place designed and created—these are positions created to help victims deal with this tremendous trauma, seek out appropriate legal remedies and do it in a way that does not further victimize the victim.

Does that mean there is not always going to be additional work to do? Absolutely, always; otherwise, we would all be out of a job if we didn't have to simply come back and revisit and revisit and revisit these issues.

But I want to make it very clear that this has been a great bipartisan effort. I'm very thankful for the support we have received. The military has made tremendous efforts. But obviously we would not be here today discussing this if there were still not a long way to go.

I appreciate the fact that this has been recognized on both sides of the aisle, and I thank you for allowing me to reclaim my time.

I will now yield 1 minute to the gentlelady from California, Congresswoman SPEIER.

Ms. SPEIER. I thank the gentlelady from Massachusetts for yielding me the time.

I would just like to say to the gentleman from California and to my colleagues on the Armed Services Committee, I am very grateful that this language is in the motion to instruct the conferees.

My only point is that until we create an independent office to handle these cases, we continue to place the unit commanders and the base commanders in a conflict of interest. What happens when the unit commander is, in fact, the assailant? That means that the rape victim has to go to her rapist and seek to have help and to report that rape to her unit commander.

□ 1310

What we need to do is create an independent authority that will have the expertise, which a unit commander is not going to have, regarding sexual assault and rape and have investigators who have, again, the expertise to look at these cases so that the unit commanders and the base commanders are not flummoxed by the various issues surrounding this very, very serious subject.

Ms. TSONGAS. I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to instruct.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to instruct.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

#### RECORDED VOTE

Mr. SMITH of Washington. Madam Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to clauses 8 and 9 of rule XX, this 15-minute vote on the motion to instruct will be followed by 5-minute votes on the motion to permit closed conference meetings on H.R. 1540 and the motion to instruct on H.R. 2550.

The vote was taken by electronic device, and there were—ayes 421, noes 2, not voting 10, as follows:

[Roll No. 892]

Messrs. CRENSHAW, CRAWFORD, BRADY of Texas, Mrs. CAPPS, Messrs. MCCARTHY of California, HUIZENGA of Michigan, Ms. CLARKE of New York, Messrs. ENGEL, and KING of Iowa changed their vote from "no" to "aye."

So the motion to instruct was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

#### MOTION TO PERMIT CLOSED CONFERENCE MEETINGS ON H.R. 1540, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2012

Mr. McKEON. Madam Speaker, pursuant to clause 12 of rule XXII, I move that the managers on the part of the House on H.R. 1540 be permitted to close to the public any of the conference at such times as classified national security information may be broached, providing that any sitting Member of Congress shall be entitled

to attend any meeting of the conference.

The SPEAKER pro tempore. Pursuant to clause 12 of rule XXII, the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 406, nays 17, answered “present” 1, not voting 9, as follows:

□ 1347

Mr. CONYERS changed his vote from “yea” to “nay.”

Mrs. LUMMIS changed her vote from “nay” to “yea.”

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MOTION TO INSTRUCT CONFEREES ON H.R. 2055, MILITARY CONSTRUCTION AND VETERANS AFFAIRS AND RELATED AGENCIES APPROPRIATIONS ACT, 2012

The SPEAKER pro tempore. The unfinished business is the vote on the motion to instruct on the bill (H.R. 2055) making appropriations for military construction, the Department of Veterans Affairs, and related agencies for the fiscal year ending September 30, 2012, and for other purposes, offered by the gentleman from Washington (Mr. DICKS), on which the yeas and nays were ordered.

The Clerk will redesignate the motion.

The Clerk redesignated the motion.

The SPEAKER pro tempore. The question is on the motion to instruct.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 409, nays 13, not voting 11, as follows:

So the motion to instruct was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. CICILLINE. Mr. Speaker, during rollcall vote No. 894 on H.R. 2055, I mistakenly recorded my vote as “no” when I should have voted “yes.”

#### APPOINTMENT OF CONFEREES

THE SPEAKER pro tempore (Mr. WESTMORELAND). Without objection, the Chair appoints the following conferees:

Messrs. ROGERS of Kentucky, YOUNG of Florida, LEWIS of California, FRELINGHUYSEN, ADERHOLT, Mrs. EMERSON, Ms. GRANGER, Messrs. SIMPSON, CULBERSON, CRENSHAW, REHBERG, CARTER, DICKS, VISCLOSKEY, Mrs. LOWEY, Mr. SERRANO, Ms. DELAURO, Messrs. MORAN, PRICE of North Carolina, and BISHOP of Georgia.

There was no objection.

#### APPOINTMENT OF CONFEREES ON H.R. 1540, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2012

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees:

From the Committee on Armed Services, for consideration of the House bill and the Senate amendment, and modifications committed to conference:

Messrs. McKeon, Bartlett, Thornberry, Akin, Forbes, Miller of Florida, LoBiondo, Turner of Ohio, Kline, Rogers of Alabama, Shuster, Conaway, Wittman, Hunter, Rooney, Schilling, Griffin of Arkansas, West, Smith of Washington, Reyes, Ms. Loretta Sanchez of California, Messrs. McIntyre, Andrews, Mrs. Davis of California, Messrs. Langevin, Larsen of Washington, Cooper, Ms. Bordallo, Messrs. Courtney, Loeb sack, Ms. Tsongas and Ms. Pingree of Maine.

From the Permanent Select Committee on Intelligence, for consideration of matters within the jurisdiction of that committee under clause 11 of rule X:

Mr. Rogers of Michigan, Mrs. Myrick and Mr. Ruppersberger.

From the Committee on Education and the Workforce, for consideration of secs. 548 and 572 of the House bill, and secs. 572 and 573 of the Senate amendment, and modifications committed to conference:

Messrs. Petri, Heck and George Miller of California.

From the Committee on Energy and Commerce, for consideration of secs. 911, 1099A, 2852 and 3114 of the House bill, and sec. 1089 of the Senate amendment, and modifications committed to conference:

Messrs. Upton, Walden and Waxman.

From the Committee on Financial Services, for consideration of sec. 645 of the House bill, and sec. 1245 of the Senate amendment, and modifications committed to conference:

Mr. Bachus, Mrs. Capito and Mr. Ackerman.

From the Committee on Foreign Affairs, for consideration of secs. 1013, 1014, 1055, 1056,

1086, 1092, 1202, 1204, 1205, 1211, 1214, 1216, 1218, 1219, 1226, 1228–1230, 1237, 1301, 1303, 1532, 1533 and 3112 of the House bill, and secs. 159, 1012, 1031, 1033, 1046, 1201, 1203, 1204, 1206–1209, 1221–1225, 1228, 1230, 1245, title XIII and sec. 1609 of the Senate amendment, and modifications committed to conference:

Ms. Ros-Lehtinen, Messrs. Chabot and Berman.

From the Committee on Homeland Security, for consideration of sec. 1099H of the House bill, and sec. 1092 of the Senate amendment, and modifications committed to conference:

Mr. Daniel Lungren of California, Mrs. Miller of Michigan and Mr. Thompson of Mississippi.

From the Committee on the Judiciary, for consideration of secs. 531 of subtitle D of title V, 573, 843 and 2804 of the House bill, and secs. 553 and 848 of the Senate amendment, and modifications committed to conference:

Messrs. Smith of Texas, Coble and Conyers.

From the Committee on Natural Resources, for consideration of secs. 313, 601 and 1097 of the House bill, and modifications committed to conference:

Messrs. Hastings of Washington, Bishop of Utah and Markey.

From the Committee on Oversight and Government Reform, for consideration of secs. 598, 662, 803, 813, 844, 847, 849, 937–939, 1081, 1091, 1101–1111, 1116 and 2813 of the House bill, and secs. 827, 845, 1044, 1102–1107 and 2812 of the Senate amendment, and modifications committed to conference:

Messrs. Ross of Florida, Lankford and Cummings.

From the Committee on Science, Space, and Technology, for consideration of secs. 911 and 1098 of the House bill, and secs. 885, 911, 912 and Division E of the Senate amendment, and modifications committed to conference:

Messrs. Hall, Quayle and Ms. Eddie Bernice Johnson of Texas.

From the Committee on Small Business, for consideration of sec. 804 of the House bill, and secs. 885–887 and Division E of the Senate amendment, and modifications committed to conference:

Mr. Graves of Missouri, Mrs. Ellmers and Ms. Velázquez.

From the Committee on Transportation and Infrastructure, for consideration of secs. 314, 366, 601, 1098 and 2814 of the House bill, and secs. 262, 313, 315, 1045, 1088 and 3301 of the Senate amendment, and modifications committed to conference:

Messrs. Mica, Cravaack and Bishop of New York.

From the Committee on Veterans Affairs, for consideration of secs. 551, 573, 705, 731 and 1099C of the House bill, and secs. 631 and 1093 of the Senate amendment, and modifications committed to conference:

Mr. Bilirakis, Ms. Buerkle and Ms. Brown of Florida.

From the Committee on Ways and Means, for consideration of secs. 704, 1099A and 1225 of the House bill, and sec. 848 of the Senate amendment, and modifications committed to conference:

Messrs. Camp, Herger and Levin.

There was no objection.

#### REGULATIONS FROM THE EXECUTIVE IN NEED OF SCRUTINY ACT OF 2011

Mr. SMITH of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous materials on H.R. 10.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 479 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the consideration of the bill, H.R. 10.

□ 1400

#### IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 10) to amend chapter 8 of title 5, United States Code, to provide that major rules of the executive branch shall have no force or effect unless a joint resolution of approval is enacted into law, with Mr. DENHAM in the chair.

The Clerk read the title of the bill.

The CHAIR. Pursuant to the rule, the bill is considered read the first time.

The gentleman from Texas (Mr. SMITH) and the gentleman from Michigan (Mr. CONYERS) each will control 30 minutes.

The Chair recognizes the gentleman from Texas.

Mr. SMITH of Texas. Mr. Chairman, I yield myself such time as I may consume.

The American people today have been hit by an onslaught of unnecessary Federal regulations. From the Obama administration's health care mandate to the increase of burdens on small businesses, government regulation has become a barrier to economic growth and job creation.

By its own admission, the administration is preparing numerous regulations that each will cost the economy \$1 billion or more per year. Its 2011 regulatory agenda calls for over 200 major rules which will affect the economy by \$100 million or more each every year.

Employers, the people who create jobs and pay taxes, are rightly concerned about these costs and the costs that regulations impose on their businesses. In a Gallup poll conducted last month, nearly one-quarter of small business owners cited compliance with government regulations as their primary concern. That should motivate us to take action today.

Rather than restrain its efforts to expand government, the administration now seeks to accomplish through regulatory agencies what it cannot get approved by Congress. The REINS Act gives the people's representatives in Congress the final say over whether Washington will impose major new regulations on the American economy.

More than once this year, the President himself has talked about the dangers that excessive regulations pose to our economy. He has called for reviews of existing regulations. He has professed a commitment to more trans-

parency. The President has stated that "it is extremely important to minimize regulatory burdens and avoid unjustified regulatory costs."

Unfortunately, the President's actions speak louder than his words. But rather than make good on its statements, the Obama administration has proposed four times the number of major regulations than the previous administration over a similar time period. And the White House has admitted to Congress that, for most new major regulations issued in 2010, government failed to analyze both the cost and the benefits.

It is time for Congress to take action to reverse these harmful policies. With the REINS Act, we can hold the administration accountable for its unjustified regulatory assault on America's job creators; and we can guarantee that Congress, not unelected agency officials, will be accountable for all new major regulatory costs.

The American people want job creation, not more regulation. The REINS Act reins in out-of-control Federal regulations that burden America's businesses and job creators.

I thank Mr. DAVIS of Kentucky for introducing this legislation. I urge all my colleagues to support the REINS Act, and I reserve the balance of my time.

Mr. CONYERS. Mr. Chairman, I yield myself 2 minutes.

Ladies and gentlemen of the House, H.R. 10 is the mother of all antiregulatory bills. Since the House was in session during 2010 for 116 legislative days, under this bill—and I invite any of my colleagues to make any different analysis—the Congress would be required after 70 days after they receive a rule to act upon it. If you only have 116 days, legislative days a year, it would be literally impossible to handle the number of rules that we would get.

Namely, we got 94 rules last year, 116 days. If we were handling every rule—please, use your arithmetic skills, ladies and gentlemen. This bill would be unworkable, and it would be impossible for new regulations to be enacted. But then, maybe that's the whole thrust of the matter.

I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I yield 6 minutes to the gentleman from Kentucky (Mr. DAVIS), who is the sponsor of this legislation.

Mr. DAVIS of Kentucky. I thank the chairman.

Two years ago, I met with the a constituent who was concerned about the effects of unfunded EPA mandates on his water and sewer bills. He wanted to know why Congress doesn't vote on new regulations. This simple question inspired the legislation that we're considering today, and it also begs a broader question: Who should be accountable to the American people for

major laws with which they are forced to comply?

Since the New Deal, every Congress has delegated more of its constitutional lawmaking authority to unelected bureaucrats in administrative agencies through vaguely written laws. This is an abdication of Congress' constitutional responsibility to write the laws.

This practice of excessive delegation of legislative powers to the executive branch allows Members of Congress to take credit for the benefits of the law it has passed and then blame Federal agencies for the costs and requirements of regulations authorized by the same legislation. Members of Congress are never required to support, oppose, or otherwise contribute to Federal regulations that are major and finalized under their watch.

Even more troubling, this practice has enabled the executive branch to overstep the intent of Congress and legislate through regulation based on broad authorities previously given the agency. In recent years, we've seen examples of administrative agencies, regardless of party, going beyond their original grants of power to implement policies not approved by the people's Congress.

In several cases, such as net neutrality rules and the regulation of carbon emissions, agencies are pursuing regulatory action after Congress has explicitly rejected the concept. In fact, administrative officials publicly proclaimed the strategy after the results of the 2010 elections, going around Congress by forcing their agenda through regulation.

In February of last year, The New York Times quoted White House Communications Director Dan Pfeiffer as saying, "In 2010, executive actions will also play a key role in advancing the administration's agenda." True to their word, the administration continues using regulations as an end around Congress.

The lack of congressional accountability for the regulatory process has allowed the regulatory state to grow almost unchecked for generations. Federal administrative agencies issued 3,271 new rules in 2010, or roughly nine regulations per day.

These regulations have a profound impact on our economy. The Small Business Administration estimated that regulations cost the American economy \$1.75 trillion in 2008, and that's nearly twice the amount of individual income taxes paid in this country that year. Small businesses spend an estimated \$10,500 per employee to comply with Federal rules, a considerable burden on the private sector's ability to create jobs at a time of continued economic struggles.

Today, we can choose to continue on this path, or we can vote to restore our constitutional duty to make law and be

held accountable for the details. The REINS Act effectively constrains the delegation of congressional authority by limiting the size and scope of rule-making permission.

Once major rules are drafted and finalized by an agency, the REINS Act would require Congress to hold an up-or-down vote on any major regulation. Major regulations are those with an annual economic impact of more than \$100 million, as determined by the Office of Information and Regulatory Affairs. The President would also have to sign the resolution before it could be enforced on the American people, job creators, or State and local governments. Every major regulation would be voted on within 70 legislative days.

The REINS Act was specifically written not to unnecessarily hold up the regulatory process. Rather, the bill prevents REINS resolutions from being filibustered in the Senate.

The point of the REINS Act is simply accountability. Each Congressman must take a stand and be accountable for regulations that cost our citizenry \$100 million or more annually. No longer would Congress be able to avoid accountability by writing vague laws requiring the benefits up front and leaving the unpopular or costly elements to the bureaucrats who will write those elements of the law at some later date. Whether or not Congress approves a particular regulation, there will be a clearly accountable vote on the subject that the American people can see and judge for themselves.

□ 1410

This ensures the greatest regulatory burdens on our economy are necessary to promote the public welfare, rather than simply sprouting from the minds of unelected bureaucrats.

The bill's name as a metaphor for the reins on a horse is fitting. The purpose of reins is not to keep a horse at a standstill. Reins are a tool to ensure that the horse knows what is expected of him and is acting according to the intent and will of the rider.

Likewise, the REINS Act would not stop the regulatory process. It would improve the regulatory process by ensuring that new major rules match the intent of Congress and the will of the American people. The REINS Act would foster greater upfront cooperation between agencies and future Congresses, resulting in better written legislation and regulation.

With greater accountability and transparency, regulatory agencies will have no choice but to write regulations that reflect the need for sensible standards and take into account the impact regulations have on American businesses and families.

Similarly, agencies would no longer be able to bypass Congress with regulations that don't match congressional intent or go too far.

Not all regulations are bad. Many provide needed public safeguards, help to keep the American people safe, and maintain a level playing field for businesses to compete. And so good regulations would be approved by future Congresses, and those that could not withstand the public scrutiny of a vote in Congress would not.

A commonsense regulatory system with appropriate checks and balances on the most economically significant rules will help to revive our stagnant economy and give more businesses the ability to hire thanks to a better sense of stability and what to expect from Washington going forward.

The question we're asked today is in effect the same I was asked by my constituent in August of 2009: Who should be accountable for the rules and regulations that have the greatest economic impact on our economy? My answer is the Congress. In an era of high unemployment, Congress can no longer avoid its responsibility to the American people for the regulatory burden. Passing the REINS Act today would be a major step forward in returning to a constitutional, responsible, legislative, and regulatory framework.

I want to thank Judiciary Chairman LAMAR SMITH for his countless efforts on behalf of the REINS Act and his leadership, as well as the more than 200 cosponsors of this bill in the House. I urge my colleagues to support this bill.

Mr. CONYERS. Mr. Chairman, I yield myself 15 seconds.

The REINS Act is the mother of all anti-regulatory bills in the Congress. The only problem, I say to the distinguished author, the gentleman from Kentucky, is that it won't work. There are only 116 legislative days.

I yield 2 minutes to the gentleman from Virginia, JIM MORAN.

Mr. MORAN. I thank the very distinguished former chairman of the Judiciary Committee.

This Republican bill is neither effective nor responsible. To paraphrase H.L. Mencken, eliminating Federal agency rulemaking as we know it is a solution that is simple, neat, and wrong.

Mr. Chairman, despite what the House majority would like you to believe, our Federal regulatory process is a model the world over. Delegations from other countries frequently visit our government agencies to learn how their governments can best ensure public involvement while maximizing government effectiveness and efficiency. Why? Because our regulatory system is the most open and the most fair system in the world.

Current law already guarantees that proposed regulations get widely published and receive extensive public participation. The proof of that is that proposed Federal regulations receive hundreds, thousands, even millions of public comments. The U.S. Forest

Service, for example, received over 1.6 million comments on its roadless rule and held over 600 public meetings.

And public involvement doesn't stop there. Federal agencies are required by law to consider and respond to each comment received. Commenters frequently request and receive comment-period extensions. And when agencies learn of legitimate problems with their proposed regulations, they change or withdraw them to address those concerns.

As an additional check on Federal rulemaking, Congress passed the Congressional Review Act. This law already provides a 60-day waiting period before a final rule becomes effective. And during that delay, Congress can disapprove an agency rule by joint resolution.

The fact is that Federal agencies already have the right attitude about regulation. I think Federal Reserve Chairman Ben Bernanke summed up agency regulatory philosophy best: We seek to implement the will of Congress in a manner that provides the greatest benefit at the lowest cost to society as a whole.

This bill takes America in the wrong direction—one full of risk and cost that will put the public's health and safety at great risk.

I strongly urge my colleagues to join Chairman CONYERS in opposing this wrong legislation.

Mr. SMITH of Texas. Mr. Chairman, I yield 3 minutes to my friend and colleague from Texas (Mr. HENSARLING), the chairman of the House Republican Conference.

Mr. HENSARLING. I thank the gentleman for yielding.

Mr. Chairman, it was just a few weeks ago that our Nation celebrated Thanksgiving. Unfortunately, in the Obama economy, millions could not give thanks for having a job. In the Obama economy, unemployment remains mired at near or above 9 percent. In the Obama economy, one in seven are on food stamps. In the Obama economy, we have seen the fewest small business startups in 17 years.

That's why, Mr. Chairman, jobs are job number one for House Republicans.

That's why our jobs bills have been passed; but, unfortunately, 25 of them are stacking up like cord wood in the Democratic-controlled Senate. After today, it will be 26 because one of the most important pro-jobs bills is on the floor today, the REINS Act.

Mr. Chairman, whether I'm speaking to Fortune 50 CEOs out of Dallas, Texas, where I reside, or small business people in east Texas that I have the privilege of representing in this body, they all tell me the same thing: the number one impediment to jobs in America today is the Federal regulatory burden.

I hear from them each and every day. I heard from the Grasch family in the Fifth District of Texas:

"As a small business, I have to bring in an additional thousand dollars a month to break even." He's talking about his regulatory burden. "This is while consumers have less money to purchase my services. I will not invest in any further expansion and therefore not hiring until smarter policies are being conveyed from Washington."

I heard from the Rossa family, also in the Fifth District, who talks about the regulatory burden from the President's health care plan:

"My company has laid off all staff, and I myself will file for unemployment on Monday. That's about 23 people added to the unemployment rolls next week," again due to Federal regulation.

I heard from the Nixon family in the Fifth District of Texas. Federal regulation, again:

"We are giving up this part of our business. One person's losing their job. This is just one small example of how excessive government regulation is stifling business."

It's the number one impediment, and all we're asking today with the REINS Act is that if a regulation is going to cost our economy jobs, if it's going to cost a hundred million dollars or more, let's have congressional approval. It's common sense. It forces accountability. It simply weighs the benefit of a regulation to be balanced with the cost to our own jobs.

Jobs ought to be number one in this House, and the number one jobs bill we can pass is the REINS Act. I ask for once that my colleagues on the other side of the aisle join me, and let's put America back to work.

Mr. CONYERS. Mr. Chairman, I am pleased to yield 3 minutes to the gentleman from Virginia, STEVE COHEN, a ranking subcommittee member in Judiciary.

Mr. COHEN. I appreciate the time, but I don't appreciate the relocation. I am from Tennessee, the Volunteer State, and from Memphis, in particular. But it is appropriate, I guess, that we be a little confused with States because listening to the debate on the floor, it's obvious we're a little confused about history and Presidents, too, for President Obama has been Bush-whacked here on the floor of the House.

It's not the Obama economy, it's the Bush economy that President Obama saved from going into the second Great Depression that this country would have suffered in 100 years, saved it from depression with great actions at a time of bipartisan action that helped save this country from the Great Depression that it was otherwise looking at. I think we need to commend President Obama and not Bush-whack him when we get the chance here in the partisan discussions.

□ 1420

This bill that has been brought up, H.R. 10, the REINS Act, would rein in

government. It would rein in the opportunity for regulations that are promulgated by experts in our agencies, experts who have years of expertise in subject matters, in order to come up with rules and regulations to implement the laws that we pass.

Now, I am proud to be a Member of the United States Congress. I know that we have good men and women in this House and that most of the people are very good men and women. But right now, Congress has a 9 percent approval rating. This bill would tell the American public that it should take the expertise of the people who are in the agencies and in the administration and turn it over to the 435 Members of Congress—535 when including those in the Senate—the least approved government body that exists.

On the one hand, they decry Congress, and their candidate Mr. Perry wants us to work half time, but this bill would make us the super-regulatory commission. We would have to approve every regulation by a positive vote in the House and by a positive vote in the Senate. We would have to do it and have the President sign it within 70 days of promulgation. We'd only have every other Thursday to do this, and we'd only have debate of 30 minutes on each side. So you'd take the least respected body of government in the entire United States of America—maybe of the entire world—and give it a very limited amount of time to make all of the rules and regulations for the biggest government in the world.

Talk about clean air. We wouldn't have it. You'd have more dirty rain. The REINS Act—it should be called the Acid Rain Act. It's raining outside. It's raining prevarications, fabrications, and canards upon us, none of which are appropriate for this body or for the American people.

We've had several bills dealing with regulation in this session, all of which basically tend to emasculate government. These bills take away the people's rights to clean air, clean water, safe products, and to occupational safety and health hazard protection, all of which are almost second nature to the American public.

I'd ask us to defeat this bill and to protect our environment and our workers.

Mr. SMITH of Texas. Mr. Chairman, I yield 2 minutes to my friend and colleague from Texas (Mr. POE), a member of the Judiciary Committee.

Mr. POE of Texas. The mere phrase "the regulators" brings fear and trepidation down into the hearts and souls of small business owners throughout the fruited plain.

Mr. Chairman, the Code of Federal Regulations is 150,000-pages long. That's a lot of pages. Those are a lot of regulations. According to the Small Business Administration, the annual

cost of all Federal regulations in this country was almost \$2 trillion in 2008.

Now, do we really need all of those expensive regulations? Good thing the Federal regulators weren't around when the Ten Commandments were written—no telling what additional regulations they would have added to those simple 10 phrases.

It is common sense that Congress should have a say on a regulation that would have a drastic, expensive effect on our economy. So why do my friends on the other side, who are such big friends of regulations, not want the regulators to be regulated? I don't understand that.

Remember, we are elected.

The regulators are not.

Congress is the branch of government that is closely connected to the people, and if Congress approves unnecessary and burdensome regulations, we have to be accountable to our voters in our districts for that.

Who do the regulators answer to?

No one. They only answer to their supervisors, who are also regulators.

When the regulators go to work every day, like most people go to work, their work assignments are a little different. In my opinion, they sit around a big oak table, drinking their lattes, they have out their iPads and their computers, and they decide: Who shall we regulate today? Then they write a regulation, send it out to the masses, and make us deal with the cost of that.

All the REINS Act does is ask that the Congress be involved in these over-burdensome regulations.

Mr. CONYERS. Mr. Chairman, I yield 2 minutes to a valuable member of the Judiciary Committee, the distinguished gentleman from Georgia, HANK JOHNSON.

Mr. JOHNSON of Georgia. I rise in opposition to H.R. 10, the so-called REINS Act. It's a demonstration of the reign of terror that the Tea Party-Grover Norquist Republican Party has exacted on Americans insofar as their health and safety are concerned, and in terms of their ability as small businesses to compete with Wall Street and Big Business.

You see, this is a Christmas gift. It's a gift to those who installed this Tea Party reign in Congress, and this Tea Party reign, the Republicans in Congress, are doing everything they're supposed to do.

This is the anti-regulatory bill, as the chairman said, that is the mother of all anti-regulatory bills. In fact, these 25, 26 bills that have been misnamed "jobs bills" that the Republicans have passed are nothing more than anti-regulatory legislation, sprinkled with a little antiabortion legislation in there—with not one job to be created.

You're just simply kowtowing to the wishes of those who line your pockets with gold in order for you to get elected.

This anti-regulatory legislation is turning the clock back on progress in America. We want to turn it all over to Big Business. This is what the Wall Street occupation is all about. This is what the Tea Party is all about.

The CHAIR. The time of the gentleman has expired.

Mr. CONYERS. I yield the gentleman an additional 30 seconds.

Mr. JOHNSON of Georgia. This bill will make it impossible to implement critical new regulations that will place some restraints on the excesses of the business community, and I ask that it be defeated.

Mr. SMITH of Texas. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. QUAYLE), a member of the Judiciary Committee.

Mr. QUAYLE. I thank the gentleman for yielding.

Mr. Chairman, I rise today in strong support of H.R. 10 because greater congressional scrutiny of major regulations ensures that the Federal Government is more accountable to the American people.

Poll after poll of small business owners and of medium-sized business owners will show you that major regulations are holding back their expansions and the ability for them to hire more workers. Yet you don't have to rely on polls. You can just go down and talk to the local businesses in your districts. I had a job forum the other week. Time and time again, the constant refrain we heard from these business leaders was that the overly burdensome regulatory environment is holding back their expansions.

Several months ago, in the beginning of the 112th Congress, I had some hope because President Obama issued an Executive order that required agencies to review their regulations to see if we could have a less burdensome regulatory environment. Unfortunately, what happened was that those were just words, and were not followed up by actual action, for, since then, the administration has continued to introduce new regulations at a rapid rate.

In this year alone, over 73,000 pages of new regulations have been added to the Federal Register at a cost of \$67.4 billion. Mr. Chairman, I have right here the amount of paper that has been added to the Federal Register in one week. This is last week's regulations. It's pretty hefty. Actually, it's 8 pounds, 13 ounces. There are 2,940 brand new pages of Federal regulations that would stretch, if you laid them end to end, 2,695 feet.

At this time, there are more than 4,000 new regulations in the pipeline. Of those, 224 are major regulations that will have an economic impact exceeding \$100 million. So, at a minimum, the annual economic impact for these new regulations will be \$22 billion.

We need to change this. Some of these agencies act outside the statu-

tory authority granted by Congress, and we must stop this. The REINS Act is the way to do it, and I strongly urge my colleagues to support this measure.

□ 1430

Mr. CONYERS. Mr. Chairman, I yield 3 minutes to a senior member of the House Judiciary Committee, the gentlewoman from Texas, the Honorable SHEILA JACKSON LEE.

Ms. JACKSON LEE of Texas. I thank the gentleman.

I think it's important for our colleagues to understand just what is being asked of this body. I believe it is a nullification of the Constitution, which I like to carry, and the very distinct definition of the three branches of government and their responsibilities.

Frankly, our friends are trying to equate this Congress and its do-nothing record to the work of the executives, and now to create a do-nothing pathway for the rulemaking process which, as I've indicated on many of the bills that have already passed, there is a Federal court process for anyone that wants to challenge the process of rulemaking or whether or not due process has been denied. So I'd actually say that what we have here is a complete shutdown of the Federal Government, for it is asking this Congress to pass a joint resolution of approval for any major rule to be passed.

Now, Mr. Chairman, let me suggest to you what would happen: Warnings on cigarette packages would no longer exist; Medicare payments for those lying in psychiatric hospitals would not be able to be paid; and the emissions standards for boiler pollutants, hazardous pollutants out of industrial, commercial, and institutional emissions would go flat; and we would have a nation that small businesses, I believe, would argue would also be a distraction from the work that they do.

It is interesting that my friends would want to use the backs of small businesses to pretend that they are protecting them. First of all, if they look at their facts, they will note the Obama administration has passed less rules than the Bush administration.

As I indicated, they will also note that the 111th Congress passed more constructive bills to help small businesses than this Congress could ever do, and the fact that they would note that it has been recorded that this Congress is the largest do-nothing Congress that has ever existed. It would be helpful if we could pass the payroll tax cut for 160 million Americans, allow them to infuse dollars, 1,000 or \$1,500, into the small businesses of America.

I will tell you that my small businesses will celebrate that. In visiting a medical clinic owned by a doctor that had thousands of feet that he wanted to rehab and expand, he said that payroll tax that was part of the jobs bill that

the President wanted to pass through this do-nothing House of Representatives would have helped him greatly.

Then we have millions of Americans, 6 million, who are trying to get unemployment insurance. Here we are down to the last wire telling those in this blessed holiday season, whatever your faith, that you have to wait at the door and, in fact, there may not be any room at the inn for 6 million who don't have their unemployment insurance.

I don't want to shut down the government.

The CHAIR. The time of the gentleman has expired.

Mr. CONYERS. I yield the gentleman an additional 15 seconds.

Ms. JACKSON LEE of Texas. I thank the distinguished gentleman.

I don't want to shut down the government. I want a government that works. Rulemaking is not the demon here; and the process of rulemaking, if you read it, provides the input and assessment of those who are concerned.

What this does is involve the President, the Congress, in a scheme that is so dilatory that we will never do any work in this Congress. I beg of you to defeat this legislation.

Mr. Chair, I rise today to debate H.R. 10 Regulations from the Executive in Need of Scrutiny (REINS). REINS would amend the Congressional Review Act (CRA) and require Congressional approval of all major rules (rules with an economic impact that is greater than \$100 million). If Congress fails to act within 70 days the rule cannot be implemented. This change is targeted directly at executive agencies and does nothing to create jobs.

In other words, this bill is calling for Congressional oversight of Executive branch activities and functions. I have been serving as a member of this governing body since 1995, and oversight of the Executive branch is exactly what Congress does. One of the main functions of the Congressional Committees is oversight.

If Congress were required to proactively approve every federal rule, it would be extremely time consuming. The Federal agencies of the Executive branch are made up of experts in their respective fields. Many of the regulations that Federal agencies enact are very specific and require a high level of familiarity with the minute details of certain issues. The time it would take members of Congress to become adequately acquainted with each issue being proposed by each Federal agency would certainly be more productive if channeled into efforts to effect the change that Americans want. For example extending unemployment insurance, job creation, and encouraging job growth. Yet, here we are again wasting time on a measure that will not help our economy.

There is no credible evidence that regulations depress job creation. The Majority's own witness at the legislative hearing (on H.R. 3010 a bill based on the same false premise) clearly debunked the myth that regulations stymie job creation. Christopher DeMuth, who appeared on behalf of the American Enterprise Institute, a conservative think tank, stated in

his prepared testimony that the “focus on jobs . . . can lead to confusion in regulatory debates” and that “the employment effects of regulation, while important, are indeterminate.”

If anything, regulations may promote job growth and put Americans back to work. For instance, the BlueGreen Alliance notes: “Studies on the direct impact of regulations on job growth have found that most regulations result in modest job growth or have no effect, and economic growth has consistently surged forward in concert with these health and safety protections. The Clean Air Act is a shining example, given that the economy has grown 204% and private sector job creation has expanded 86% since its passage in 1970.”

Regulation and economic growth can go hand in hand. Regarding the Clean Air Act, the White House Office of Management and Budget (“OMB”) recently observed that 40 years of success with this measure “have demonstrated that strong environmental protections and strong economic growth go hand in hand.” Similarly, the Natural Resources Defense Council and the United Auto Workers cite the fact that increased fuel economy standards have already led to the creation of more than 155,000 U.S. jobs.

REGULATORY UNCERTAINTY IS NOT WHY BUSINESSES  
ARE NOT HIRING WORKERS

The claim that regulatory uncertainty hurts business has been debunked as political opportunism. Bruce Bartlett, a senior policy analyst in the Reagan and George H.W. Bush Administrations observed “[R]egulatory uncertainty is a canard invented by Republicans that allows them to use current economic problems to pursue an agenda supported by the business community year in and year out. In other words, it is a simple case of political opportunism, not a serious effort to deal with high unemployment.”

Regulatory uncertainty does not deter business investment. A lack of demand, not uncertainty about regulation, is cited as the reason for not hiring.

At a legislative hearing on regulatory reform (H.R. 3010), Professor Sidney Shapiro similarly noted, “All of the available evidence contradicts the claim that regulatory uncertainty is deterring business investment.”

A July 2011 Wall Street Journal survey of business economists found that the “main reason U.S. companies are reluctant to step up hiring is scant demand, rather than uncertainty over government policies.”

The most recent National Federation of Independent Business survey of its members likewise shows that “poor sales”—not regulation—is the biggest problem. Of those reporting negative sales trends, 45 percent blamed faltering sales, 5 percent higher labor costs, 15 percent higher materials costs, 3 percent insurance costs, 8 percent lower selling prices and 10 percent higher taxes and regulatory costs.”

Small businesses reject the argument that deregulation is what they need. The Main Street Alliance, an alliance of small businesses, observes: “In survey after survey and interview after interview, Main Street small business owners confirm that what we really need is more customers—more demand—not deregulation. Policies that restore our customer base are what we need now, not poli-

cies that shift more risk and more costs onto us from big corporate actors. . . . To create jobs and get our country on a path to a strong economic future, what small businesses need is customers—Americans with spending money in their pockets—not watered down standards that give big corporations free rein to cut corners, use their market power at our expense, and force small businesses to lay people off and close up shop.”

Mr. SMITH of Texas. Mr. Chairman, I yield myself 15 seconds.

I want to set the record straight. The bill is not antiregulatory but pro-accountability. It will enable both Republican and Democratic majorities in Congress to make the final calls on major regulations that come from administrations of either party. Majorities of either party can be expected to approve regulations whenever appropriate, but the key is that Congress always be held accountable.

Mr. Chairman, I yield 2 minutes to the gentleman from Nevada (Mr. AMODEI), a member of the Judiciary Committee.

Mr. AMODEI. I thank my distinguished chairman from Texas.

Mr. Chairman, 85 percent of the land in Nevada is controlled by the Federal Government. Perhaps no other State in the Nation lives with a more daily, direct impact of the presence of the Federal Government and its regulatory regime than the Silver State.

Community-driven development proposals that would generate economic growth often take years longer than they should because of layer upon layer of regulatory, mandatory gymnastics. Home builders, agribusiness, mining, manufacturers, retailers, the resort and hospitality industries, small business in general all lament the gymnastics that they have to go through to get a permit or even to comply with existing regulations.

All of that effort in a State, which I am sorry to have to sit up here and remind you, 85 percent of the land controlled by the Federal Government, highest unemployment rate in the Nation, highest foreclosure rate in the Nation. We are trying to generate economic development, and it's taking years to get a permit because of regulatory regimes. There is no one that will indicate that that is not the case.

So when we talk about this issue before us today—and I congratulate my colleague from Kentucky. When we talk about the job of Congress in an oversight sense, I think it is entirely appropriate that you revisit the regulations that are promulgated not out of thin air, but as a result of the statutes that pass these two Houses. And to revisit that point and make sure that those regulations bear resemblance to both sides of the aisles' legislative intent where they're supported is something we ought to guard zealously; because, the last time I checked, the Federal-elected officials in the executive

branch numbered two. And it doesn't matter what side of the aisle they come from or what party they come from, I think it's appropriate for those 535 who send those measures to those folks, check back to make sure that's being done appropriately.

Mr. CONYERS. Mr. Chairman, I am pleased to yield 2 minutes to a senior member of the Education Committee, the gentleman from New Jersey, ROB ANDREWS.

Mr. ANDREWS. Mr. Chairman, 25 days from now, if the Congress doesn't act, every middle class family in this country is going to have a \$1,000 tax increase. Twenty-five days from now, if the Congress doesn't act, doctors who take care of our Medicare patients are going to have a 23 percent cut in the fee they get to see Medicare patients. During those 25 days, several million Americans who are out there looking for a job every day are going to receive their last unemployment benefits check.

These are the issues confronting America today, and what are we doing? We're debating a bill that says that some regulation the government might do someday in the future should have a procedure where Congress can reject it. There already is such a procedure.

And for all these terrible regulations we keep hearing about that have been introduced this year, do you know how many times the majority has brought to the floor a resolution to reject one of those regulations? Once.

So this is such a grave threat to the country's economy that the majority that controls the floor has chosen on one occasion to bring a regulation to the floor.

What we ought to be doing is canceling out this \$1,000-a-year tax increase on the middle class. What we ought to be doing is making sure our seniors can see the doctor come January 1. What we ought to be doing is making sure Americans who are diligent in looking for work don't run out of employment benefits. But that's not what we're doing.

This is not only the wrong bill, it's the wrong time. Let's put on the floor a bill that puts Americans back to work and focuses on the real priorities of the country.

Mr. SMITH of Texas. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. PENCE), a senior member of the Judiciary Committee.

□ 1440

Mr. PENCE. Mr. Chairman, with so many American families struggling, with so many Americans struggling to find work, and businesses struggling to hire unemployed Americans, it's time to rein in the Federal Government. It's time to rein in the avalanche of red tape cascading out of Washington, D.C. and stifling our recovery. It's time to enact the Regulations from the Executive in Need of Scrutiny Act of 2011, the REINS Act.

I rise to commend the gentleman from Kentucky, Congressman GEOFF DAVIS, for his visionary and tireless efforts in moving the REINS Act to the floor today and for his leadership in this Congress.

You know, small businesses are the lifeblood of our economy. They represent 99.7 percent of employer firms, and have generated 65 percent of net new jobs over the past 17 years. Yet today, as most American small businesses know, our job creators are saddled with too many regulations and too many regulatory authorities. According to the Small Business Administration, the average small business faces a cost of \$10,585 in Federal regulation per employee each and every year. The REINS Act will address that. It will protect jobs and promote small business growth by ensuring that the legislative branch has the final say on major regulations before they take effect.

This legislation reforms the rule-making process by requiring that Congress approve any regulation that would have an annual economic impact of \$100 million or more. For too long, Congress has delegated its legislative authority to unelected bureaucrats and agency officials to determine the rule-making process. It's time to bring that authority back into the Congress where the Framers of the Constitution intended it to be, especially with regard to major rulemaking.

The American people are hurting. The American economy is struggling. It's time to rein in Big Government and release the inherent power of the American economy. Again, I urge my colleagues to join with me in a bipartisan fashion, I hope and trust, in support of this important legislation.

Mr. CONYERS. Mr. Chairman, I am pleased to yield 2 minutes to a member of the Financial Services Committee, the gentleman from Connecticut, the Honorable JIM HIMES.

Mr. HIMES. I thank the ranking member.

Mr. Chairman, I rise this afternoon, as I frequently do in this Chamber, a little incredulous at what it is that I'm hearing. I'm hearing stories about east Texas. I'm hearing about lattes, and I'm hearing that the number one reason American businesses are not hiring is because of regulations. It's baloney. There's not a fact in there.

Here's some facts. I wish I had more time to get into these facts. The Bureau of Labor Statistics, which studies this stuff, asked businesses that have been laying people off, why? Regulations was a negligible answer.

I would love to talk about Bruce Bartlett, financial adviser to President Reagan, Republican, who said that the notion that regulation is why this economy is on its back was just plain made up.

If I had more time, I would like to talk about our former colleague, Sher-

wood Boehlert of New York, who said the House is moving forward with bills that would cripple the regulatory system, but they show how far a party enthralled by its right-most wing is willing to veer from what has long been the mainstream.

I've got deep problems with this crazy idea that we should have Congress sign off on every regulation. But my biggest problem, Mr. Chairman, is that we're standing here today talking about this. I hear endlessly about the uncertainty associated with these regulations. Mr. Chairman, I was shocked to look at my schedule tomorrow to see that the Republican majority is sending me home. And I'm going to talk to people in Connecticut tomorrow who are uncertain if after next month they're going to have unemployment insurance available to them because they don't have a job and they don't have money. And they may not have food on their table.

Small businesses and an awful lot of Americans with jobs in my district are uncertain about whether they will see an extension of the payroll tax that we passed in bipartisan fashion.

Except we're here talking about this, a fraudulent idea followed by a terrible legislative proposal, instead of dealing with the imminent expiration of unemployment insurance and payroll tax. Let's talk about those things. Let's remove the uncertainty for the people we represent. We represent people who have a lot of uncertainty about whether they'll have unemployment insurance or the payroll tax cut. Let's deal with that.

Mr. SMITH of Texas. Mr. Chairman, I yield 1½ minutes to the gentleman from Minnesota (Mr. PAULSEN), a member of the Ways and Means Committee.

Mr. PAULSEN. I thank the gentleman for yielding.

I rise as a cosponsor and a strong supporter of the REINS Act. This is legislation that will bring forward reform, accountability, and transparency to the Federal rulemaking process. You know what, it's time for Congress to act more like a board of directors where we will have to oversee proposed rules and regulations, especially those that have a significant economic impact. This bill will absolutely force accountability. It allows regulations to go forward, but it's also going to force Congress to analyze, to pay attention, and then finally to act.

So no longer are we going to see agencies and unelected bureaucrats being able to promulgate these rules and regulations without having an appropriate check and balance. There are thousands and thousands and thousands of these rules and regulations in the pipeline, and over 200, 224 specifically, that have that major economic impact threshold that would be affected by the REINS Act. That's a cost of over \$22 billion, at a minimum, to the economy.

If we want to help small businesses grow, if we want to grow jobs, if we want to help our economy get going and jump start it, we need to remove that cloud of uncertainty that is hanging over the heads of small and medium-sized businesses in that regulatory environment.

I want to thank my colleague from Kentucky for his leadership in leading this reform. I ask for its passage.

Here's an example of a proposed guideline that is of particular concern to me. The FTC, the Department of Agriculture, the FDA, and the CDC have a proposal which seeks to restrict advertising, marketing and sales of food products. As drafted, it would affect 88 of the top 100 most consumed food and would have devastating effects. If this were to go through, one study estimates it could affect more than 74,000 jobs in the first year alone.

Mr. CONYERS. Mr. Chairman, I am pleased to yield 2 minutes to the distinguished gentlelady from Colorado, DIANA DEGETTE, who serves on the Energy and Commerce Committee.

Ms. DEGETTE. Mr. Chairman, do we really want to bind Congress to more votes so we can play Monday morning quarterback for the executive branch every time it tries to finalize a rule? Don't we have enough gridlock around here?

Look around. The REINS Act would grind our government to a halt and stymie the implementation of regulations to protect consumers and protect public health and well-being.

Now, look, this bill would add a feedback loop to require Congress to approve major rules that it has already specifically directed an agency to promulgate. What we really need are smart people and streamlined regulations regardless of which party is in charge of Congress.

In 2010 alone, Federal agencies finalized important rules related to energy efficiency, community disaster loans, weatherization assistance for low-income people, truth in lending, and better pay for teachers. All of those rules would be considered major rules under the REINS Act, and all of those rules would have required congressional approval. Good luck there with this Congress.

Who would oppose final approval of these rules that protect everyday Americans? Well, based on the track record of the 112th Congress, some special interest group would find a way. In fact, the REINS Act would allow special interests a back-door entrance to have their way and weaken laws that protect the American people.

Mr. Chairman, we all know standing here today this bill won't become law; and the majority knows it, too. Why? Because it's a bad idea.

In these last days of the year, what we should be doing is finding a way to help the millions of unemployed Americans who are looking for a job by extending their unemployment insurance. We should be helping middle

class Americans by helping extend their payroll tax cuts so that they can pay for the food and everything else they're putting on their table. That's what the focus of this Congress should be, not passing ill-conceived legislation that will only slow down the process even more.

Mr. SMITH of Texas. Mr. Chairman, I yield 1½ minutes to the gentleman from New York (Mr. GIBSON).

Mr. GIBSON. I thank the chairman.

I rise today in strong support of the REINS Act. This bill is about representative democracy, transparency, and accountability. The concept is simple: any new proposed regulatory rule written by the Federal bureaucracy that has an estimated economic impact greater than \$100 million must first come here before the Congress for an up-or-down vote before implementation.

To get our economy moving, to create jobs, to strengthen the jobs we have now, and to raise the standard of living of all, we need to address the impediments to growth—taxes, regulations, health care costs, and energy costs. The simple truth is Federal regulations have increased the cost of doing business and contributed to job loss and stifled new job creation. Even the President has acknowledged this when he appeared in this Chamber to speak to the American people.

□ 1450

According to the Small Business Administration, Federal regulations cost our economy \$1.75 trillion a year.

This negative impact is something small business owners, including farmers, have told me time and again as I have traveled across the 137 towns in my district. Something must be done. It really comes down to judgment. We want to get these key decisions right. It's about balancing competing priorities. In the process, certainly we want to hear the advice of our subject matter experts in the bureaucracy, but the decision should fall to the people's representatives who can be held accountable to them, not unelected, faceless bureaucrats.

It's far past time for some transparency and accountability. It's far past time for the REINS Act. I'm proud to be an original cosponsor of this bill, and urge my colleagues to join me in voting for it.

Mr. CONYERS. Mr. Chairman, I am pleased to yield 2½ minutes to the gentleman from Virginia, a member of the Government Oversight Committee, Mr. GERRY CONNOLLY.

Mr. CONNOLLY of Virginia. I thank my good friend from Michigan.

Mr. Chairman, for the 173rd time this year our friends on the other side have brought another anti-environmental, anti-public health bill to the floor. For good reason, this House majority has been identified as the most stridently

anti-environmental Congress in history in a tragic refutation of Republicans' heretofore historic commitment to conservation and public safety.

The REINS Act, like the Regulatory Accountability Act passed last week, has a poetic finality as it would block any and all progressive regulations largely the legacy of Republican Teddy Roosevelt. Under Teddy Roosevelt's administration, in response to appalling food processing conditions described in Upton Sinclair's "The Jungle," Congress reacted and passed the first comprehensive food safety regulation. One hundred years later, the REINS Act, on the floor today, would block even the most commonsense regulations which Congress mandated just last session—new standards to protect Americans from deadly contamination by Chinese and Mexican imported foods. The REINS Act is a worthy piece of legislation for those among us who actually believe that Chinese factory farms should ship contaminated, uninspected food directly to American dinner tables.

President Teddy Roosevelt used the Antiquities Act, written by a Republican Congressman, Congressman Lacey of Ohio, to protect the Grand Canyon—and thank God they did—when Congress at that time refused to designate it as a National Park. The REINS Act would prevent Federal land management agencies from issuing regulations to protect America's greatest places from degradation by mining and off-road vehicles.

The REINS Act also would block all regulations issued subsequent to Teddy Roosevelt's administration, including such landmark bills as the Clean Air Act, the Clean Water Act, the Wagner Labor Relations Act, and the Occupational Safety and Health Act. Along with the Regulatory Accountability Act, which the House approved last week, the REINS Act is the most comprehensive, radical assault on American safety and public health in the last century.

If REINS passes, it will replace the rule of law with the rule of the jungle. Our friends on the other side know full well that in commonsense language they have masked the inability of the Federal Government ever again to issue commonsense regulation to protect public health and safety in this country. And that would be a tragedy.

Mr. SMITH of Texas. Mr. Chairman, I yield 1 minute to gentleman from Pennsylvania (Mr. FITZPATRICK).

Mr. FITZPATRICK. I thank the chairman.

Over the past year, I've met with hundreds of businesses throughout the Eighth District of Pennsylvania, and from each of them I've heard a common theme: uncertainty from constant new government regulation is impeding their ability and willingness to invest in our economy, expand their busi-

nesses, and to create jobs. In fact, just last night during a town hall, one of my constituents, Gallus Obert, lamented at the fact that new and burdensome regulations have driven small businesses—and with them, jobs—from Bristol Township in Bucks County.

This should come as no surprise to any of us. Even President Obama admitted on January 18 that his administration's rules have placed unnecessary strain on businesses and stifled innovation and stifled job growth.

Today, small businesses spend more than \$10,000 per employee to comply with Federal regulation. Compliance leads to higher consumer costs, lower wages, and reduced hiring. At the same time, the number of new rules and regulations continues to grow with each passing year. Just as our Tax Code is in need of reform, so is our ballooning regulatory system. The REINS Act will provide the American people with both congressional oversight and congressional accountability for regulations stemming from legislation.

Mr. CONYERS. Mr. Chairman, I am pleased to yield 3 minutes to the former chairman of the Education and Labor Committee, the gentleman from California, the Honorable GEORGE MILLER.

Mr. GEORGE MILLER of California. I want to thank the ranking member for yielding.

The legislation before us today would really destroy the ability of the Congress to create new regulations, to create laws to protect the health and safety of the American citizens. It would also provide a great second bite at the apple for every special interest in this country that doesn't like the regulations to protect clean water and safe drinking water and the health and safety of our workers and our children at play.

If you're wondering what it would look like when we wipe out the health and safety protections for Americans, you need to look no further than the Upper Big Branch Mine in West Virginia, where an explosion ripped through the mine and killed 29 miners in April of this year. That mine was operated as if there were no safety regulations. They treated their workers as if there were no mine safety rules at all because they overruled all of those regulations through criminal activity, through illegal activity, and those miners were forced to work with essentially none of the value of health and safety regulations designed to protect their lives.

And what happened in that mine without those regulations and without the benefit of those safety protections? An explosion ripped through that mine, traveling 2,000 feet per second, and it consumed the lives of 29 miners. Twenty-nine workers died, and their families will never be the same.

That's what happens when you take away the basic worker protections intended to make our economy function and to keep our workers safe. And that's what this bill on the floor today would do.

Now it's even more interesting that the man who broke the laws, created that system of no regulations for the miners in the Upper Big Branch Mine for his own personal benefit and the benefit of that of the corporation and at the expense of his workers, may be getting back into the mining business. Donald Blankenship got an \$86 million "golden parachute" after 29 mine workers died in West Virginia. And now he wants to open a new mine. People who live in coal-mining States like Kentucky should be aware that a serial violator of basic mine safety laws is coming to your State soon seeking to operate a mine. Mine companies under his leadership have engaged in dangerous and deadly practices that would pose a threat to mine workers in your State.

In the 2 years preceding the explosion of the Massey Company mines, they were cited over 10,000 times a year for violations. Under this provision, the coal mines come into Congress, they get the regulations, they cease to exist, and they can go on their way, and there won't be 10,000 citations for the violation of occupational health and safety to protect those miners, and other miners will lose their lives like those in the Upper Big Branch Mine.

I say to my colleagues in this House, you must defeat this incredibly offensive bill for every American, and you must do so in the name of these 29 mine workers who were killed in the Upper Big Branch Mine in West Virginia. They died because a ruthless mine owner gamed the system. Let us not have them game the system in the Congress of the United States.

Mr. SMITH of Texas. Mr. Chairman, I yield 2 minutes to the gentleman from Tennessee (Mr. DUNCAN).

Mr. DUNCAN of Tennessee. Mr. Chairman, I rise in strong support of this bill, and I thank the gentleman from Texas, Chairman SMITH, for yielding me this time and I commend both him and the gentleman from Kentucky (Mr. DAVIS) for bringing this bill to the floor to us at this time.

Thomas Donohue, president of the U.S. Chamber of Commerce, in his speech to the Jobs Summit a few months ago said, "Taken collectively, the regulatory activity now underway is so overwhelmingly beyond anything we have ever seen that we risk moving this country away from a government of the people to a government of regulators."

I want to straighten out one thing, Mr. Chairman. This bill does not do away with any of the thousands and thousands of laws and regulations that are already on the book. It applies only

to new regulations, which will cost businesses and the consumer over \$100 million each. I think the American people would be very surprised if they thought the Congress did not already act on legislation and laws that would cost our economy that much money.

We've heard estimates today by the SBA that rules and regulations cost small businesses almost \$2 trillion a year, and anywhere from \$8,000 to \$10,000 per employee. We have so many thousands and thousands of laws and rules and regulations on the books today, Mr. Chairman, that they haven't even designed a computer that can keep up with them, much less a human being. People are out there every day violating laws that they didn't even know were in existence.

□ 1500

The thousands and thousands of rules and regulations that we have today make it more difficult to run and maintain a business than at any other time in this country's history, and they're the cause of why so many small businesses and medium-size businesses are going under or being forced to merge and why the big keep getting bigger in almost every industry.

The REINS Act is a very modest attempt to end Washington's almost unchecked regulatory power. And it would apply only to regulations which cost over \$100 million annually, so there is nothing even close to being radical about this bill.

I hope my colleagues will join me in supporting this bill, this very moderate and reasonable bill.

Mr. CONYERS. Mr. Chairman, I am honored at this time to recognize the former Speaker of the House, the leader, the gentlewoman from California, the Honorable NANCY PELOSI.

The CHAIR. The gentlewoman from California is recognized for 1 minute.

Ms. PELOSI. Thank you, Mr. Chairman.

I rise today to oppose this bill, the so-called REINS Act, and to urge my colleagues to act now on behalf of jobs for America's workers. Jobs are the lifeblood of our economic growth and that of the middle class, which is the backbone of our democracy.

Mr. Chairman, for more than 330 days the Republican majority has failed to put forward a clear jobs agenda, choosing instead to propose initiatives that undermine job creation and only benefit the special interests. Today, as we approach the end of this year, Republicans have again refused to vote to expand the payroll tax cut for the middle class and unemployment benefits for those who have lost their jobs through no fault of their own. They risk the economic security really of all of us—certainly the 99 percent—but we're all in this together, as our President has said.

Democrats have been clear: We must not go home for the holidays without

extending the payroll tax cut and unemployment insurance benefits. We shouldn't be leaving hardworking Americans high and dry over this holiday season without doing their work.

This challenge poses a question: Why are we here? Republicans have chosen to be here for massive tax cuts for people making over \$1 million a year—not having \$1 million; making over \$1 million a year—300,000 Americans. Democrats are here for the 160 million Americans facing tax cut uncertainty because of Republican inaction. But Democrats are here for everybody, for all Americans, because we all benefit from a strong middle class with demand injected into our economy to create jobs.

Indeed, if we fail to act now on the payroll tax cut and unemployment insurance, consider the consequences of that reduced demand to our economy. At least 600,000 jobs will be lost. Don't take it from me. Respective independent economists have stated that. Over 6 million out-of-work Americans would lose assistance in the beginning of next year.

Now, consider if we do act—and act we must—putting more than \$1,500 in the pockets of the typical middle class family. And every dollar invested in unemployment insurance yields a return of more than \$1.50 in economic growth. What's important about that is what it does to inject demand into the economy.

Money in the pockets of hardworking Americans, that's what we want this Congress to pass, instead of being so completely wedded to the idea that if we give tax cuts to the top 1 percent there will be a trickle-down effect. It hasn't happened.

As we approach the end of this year, Congress has a responsibility to address America's top priority—job creation and economic growth. It's time for us to put the interests of working people ahead of the special interests. We must act now to reignite the American Dream and build ladders of success for anyone willing to work hard and play by the rules, to remove obstacles of participation for those who wish to do that. We must spur our economy, put people to work, and strengthen our middle class.

Now, we should not go home for the holidays without passing the middle income tax—the payroll tax cut and unemployment insurance and SGR. And there are other issues that need to be addressed that affect America's great middle class.

Mr. Chairman, Christmas is coming; the goose is getting fat; please to put a dollar in a worker's hand.

I urge my colleagues to vote "no" on this REINS Act and to get to work to extend the payroll tax cut and unemployment insurance for the American people. Only then will we increase demand in our economy, create jobs, promote economic growth, and put money

into the pockets of 160 million Americans. Think of the difference that will make instead of putting forth legislation that has no impact on our economic growth, is not in furtherance of job creation, is not in furtherance of strengthening the middle class, which is the backbone of our democracy. We can't go home without the payroll tax cut and unemployment benefits for all Americans who need them, who have lost their jobs through no fault of their own.

Mr. SMITH of Texas. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. JOHNSON).

Mr. JOHNSON of Ohio. I thank the gentleman for yielding.

I rise in strong support of H.R. 10, the REINS Act, because America's job creators are buried in red tape and need certainty from the Federal Government in order to create jobs. This bill would provide that.

You know, when I travel up and down eastern and southeastern Ohio, I hear a recurring theme from the businesses that I meet with: Government over-regulation is strangling their ability to hire new employees, expand their businesses, innovate, and compete.

Today it costs a business over \$10,000 per employee just to comply with current Federal regulations. This administration that claims it believes in reducing the burden on small business is in the process of adding another \$67 billion worth of new regulations this year alone.

This administration is burying small businesses, and enough is enough. The REINS Act will simply return control of the regulatory process to the American people, who are fed up with unelected bureaucrats stopping job creation and delaying true economic recovery.

I strongly urge my colleagues to support this legislation.

Mr. CONYERS. Mr. Chairman, I yield the balance of my time to our final speaker, Representative LYNN WOOLSEY of California, who is finishing out a brilliant career.

The CHAIR. The gentlewoman from California is recognized for 4½ minutes.

Ms. WOOLSEY. I thank our great ranking member for allowing me this time.

It is ironic; we're here today debating a bill supported by those in the Congress who won't cut taxes for the middle class, but won't budge when it comes to making permanent the tax cuts for the very wealthy.

Why are we not here today talking about extending the payroll tax cuts? Why are we not here talking about extending employment benefits? Why are we not working on a jobs bill? That's what we should be doing.

This Congress cannot—and I echo the words of our leader. This Congress cannot leave for the holidays without en-

suring jobless Americans have the security of unemployment benefits that will make their Christmas, their holiday, the rest of their year livable.

I know firsthand what it's like to fall on hard times and need a hand up.

□ 1510

Forty years ago, when I was a single mother raising three young children—my children were 1, 3, and 5 years old—I was lucky enough to have a job; so I didn't need unemployment benefits. But I did need Aid for Families With Dependent Children just to make ends meet. My family needed the compassion of the government and my fellow citizens just to survive. Without that safety net, I don't know what we would have done.

We cannot abandon people who have been victimized by this sluggish economy. These are proud people, who aren't just willing to work; they're desperate to work. There are roughly five unemployed Americans for every available job. These folks need a life preserver.

Extending unemployment benefits is not just a moral imperative. It will pump life back into the economy. It will give people money for their pockets that they can spend in their local communities and in the shops and grocery stores and other businesses that they will inhabit and support if they have some money in their pockets.

And I can't believe that there are some on the other side of the aisle who have been resisting this extension, sticking their finger in the eye of jobless Americans, while protecting lavish tax cuts for millionaires and for billionaires. That flies in the face of common sense and does violence to the very values of who we are as American people.

One Republican Member even said just recently that, and I quote him, he said, "Congress ought to concentrate on paying people to work, not paying people not to work." Except his party hasn't lifted a single finger to do a single thing about creating jobs in this country. You can't pay them to work when there is no work.

So I ask you, having experienced what it means to have little kids that depend on you during hard times, I ask you, do not let these families down. Extend unemployment benefits. Pass a big, bold jobs bill. Put Americans back to work, and stop wasting time on the REINS bill.

Mr. SMITH of Texas. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. GERLACH), a member of the Ways and Means Committee.

Mr. GERLACH. I thank the chairman. I also want to thank Congressman DAVIS of Kentucky for his great leadership on this important legislation.

While our small business owners are focused on meeting payroll, and their

employees are working hard making products and delivering for customers, unelected bureaucrats in Washington are putting in overtime coming up with new rules and regulations.

In 2010 alone, the Federal Government issued 3,200 new regulations and rules. That's roughly nine rules per day. Complying with all these regulations costs small business owners, as was mentioned, an estimated \$10,500 per employee each year. At a time when we are trying to create jobs, we need to have better accountability and transparency in Congress for the regulatory burdens the Federal Government places on businesses as we try to rejuvenate our economy.

The REINS Act is a commonsense measure that would do just that, giving workers and small business owners and others a voice in the process of approving regulations that will ultimately affect their jobs, their families, and their communities. This legislation would make sure that job creators don't have to worry about unelected bureaucrats imposing regulations on them without the approval of their elected Representatives.

I urge my colleagues to support this legislation.

Mr. SMITH of Texas. Mr. Chairman, I yield the balance of my time to the gentleman from Georgia (Mr. KINGSTON).

The CHAIR. The gentleman from Georgia is recognized for 2 minutes.

Mr. KINGSTON. I thank the Chairman.

The REINS Act provides powerful, commonsense regulatory reform. It reins in the costly overreach of Federal agencies that stifles job creation and slows economic growth.

If we want to have jobs, we have to help the job creators. This bill restores the authority to impose major regulations on those who are accountable to the voters, their elected Representatives in Congress.

Opponents of the bill resist it for two primary reasons. They say, number one, it takes too much time for Congress to approve or disapprove major regulations. Secondly, they say Congress isn't expert enough to understand whether major regulations should be approved or disapproved. Both objections amount to one thing: their belief that Congress cannot be responsible and accountable for major decisions that affect America's economic life.

Fortunately, the Framers of the Constitution saw things differently, and so do most Americans. The Constitution gives Congress the Federal authority to regulate the economy, not the unelected bureaucrats. If the Constitution gives the authority to Congress, then Congress should be willing to accept the responsibility and the accountability for these decisions.

We should and we will take the time. We should and we will hold hearings.

We should and we will allow amendments on the floor and votes and, most importantly, Mr. Chairman, transparency, something that the job creators are not being allowed right now.

This administration has admitted its failure to consider the costs and the benefits when it imposes major new regulations. This administration clearly intends to force through the regulatory process things that they cannot achieve in the people's Congress. They do not want the transparency. They do not want the constituent input, and they do not want to have the hearings where experts from all over the country can give balanced testimony.

The American people struggle enough under the Obama administration's failed economic policy. It's time for Congress to say, Enough.

I urge my colleagues to vote for the REINS Act. Let's help the job creators and vote "yes."

Mr. HOLT. Mr. Chair, I rise in opposition to the so called Regulations from the Executive in Need of Scrutiny Act. Just as the authors went through contortions to generate names with a cute acronym, so this bill is very . . . This misguided legislation would undermine the ability of federal agencies to promulgate and enforce safeguards that protect public health and our environment.

Today again the Majority is showing the American public that they don't think we have a jobs crisis in America, and that getting Americans back to work is not their top priority. Getting the American economy back on track and helping to create jobs is my first, second and third priority. Unlike the Majority, I remain committed to creating jobs immediately and expanding educational opportunity for all Americans.

The so called REINS Act is legislation in search of a problem. Federal agencies cannot create rules and regulations without statutory authority that is granted by Congress, and Congress already has the ability to overturn agency rules. The REINS Act would require Congress to vote within seventy days on all major rules, creating an unprecedented level of uncertainty for the vast number of businesses, organizations, and other entities that already comply with government protections affecting food and drug safety and air and water pollution.

The REINS Act puts politics above the safety and health of the American people. We should let the scientists and experts in the agencies develop and enforce rules like the Clean Air and Clean Water Acts that protect all Americans from toxic air pollution and water-borne illness. I urge my colleagues to vote no on this dangerous bill.

Mr. WAXMAN. Mr. Chair, today, December 7th, is the 70th anniversary of the brutal sneak attack by the Imperial Empire of Japan on Pearl Harbor, which unleashed America's involvement in World War II. Victory over Fascism would come four years later. On this day recalling Pearl Harbor, the House Republicans are bringing to the floor their own sneak attack on America's government, and how it works to protect the safety, security, health and welfare of the American people.

We already have in place today an effective mechanism by which Congress can overturn regulations by government agencies that are judged to be unjustified, overly broad, too harsh, excessively expensive or not in the public interest. There is in place today a court of appeal for bad regulations. That process is called the Congressional Review Act, and it provides expedited consideration by Congress of a measure to veto an offending rule. If Members of Congress have issues with regulatory overreach by an agency, there is a constitutional remedy in place today to stop that agency. Moreover, Congress can pass limits on the agency funding to curtail unwise activities.

But that is not enough for the House Republicans. They want to cripple the Executive Branch and its regulatory agencies altogether. They do so in this bill, by changing the burden of proof in the ability of agencies to develop and implement rules that are developed, in the first instance, pursuant to laws enacted by Congress. These are not rogue agencies; they are implementing policy and directives that Congress has passed and the President has signed into law.

But H.R. 10 says that no major rule can become law unless and until Congress passes—and the President signs—a joint resolution approving the specific regulation. In other words, nothing happens unless Congress says it is OK—and that means nothing will happen.

Congress is an institution where we cannot even pass all the individual bills funding the government by the start of the fiscal year. The last time that happened was in 1994, and it has happened only three times since 1948. With that track record, it is not credible to assert that Congress can process hundreds of major rules by government agencies in a timely fashion.

The deadlock that we see in Congress this year will become perpetual gridlock for the functioning of the Executive Branch and independent regulatory agencies.

One suspects, in fact, that this is the true intent of those supporting H.R. 10: to destroy the workings of our government. And it is for this reason that I wholeheartedly oppose this bill.

No special interest should be powerful enough to eclipse the public interest—but this bill lets the special interests who are being regulated win every time.

If this bill were law, all of the historic legislation we passed into law during the Obama presidency would be vulnerable to re-litigation by powerful special interests as agencies work to put into place the rules to implement those laws. Just this year alone, at risk would be rules that prevent health insurance companies from discriminating against people with pre-existing conditions; rules that ban the marketing of tobacco products to children; rules that improve toy safety and reduce lead in products; and rules that require higher fuel economy standards for cars and reduce mercury and other toxic emissions from power plants.

These are the protections the authors of H.R. 10—and their corporate backers—want to stop.

I believe profoundly that government is a positive force that serves its people—and this is what H.R. 10 is really attacking. This is why

H.R. 10 is so offensive to our constitutional system.

In the great debate over the size and scope and role of government—which is a very legitimate and important discussion—the rhetoric from the Republicans that has gained the most traction is that regulations from Washington are “job killers,” and that these agencies must be stopped before they kill more jobs again.

But this is a lie. David Brooks, a very conservative columnist, assessed these issues this week in the *New York Times*:

Over the past 40 years, small business leaders have eloquently complained about the regulatory burden. And they are right to. But it's not clear that regulations are a major contributor to the current period of slow growth.

The Bureau of Labor Statistics asks companies why they have laid off workers. Only 13 percent said regulations were a major factor. That number has not increased in the past few years. According to the bureau, roughly 0.18 percent of the mass layoffs in the first half of 2011 were attributable to regulations.

Some of the industries that are the subject of the new rules, like energy and health care, have actually been doing the most hiring. If new regulations were eating into business, we'd see a slip in corporate profits. We are not.

There are two large lessons here. First, Republican candidates can say they will deregulate and, in some areas, that would be a good thing. But it will not produce a short-term economic rebound because regulations are not a big factor in our short-term problems.

Second, it is easy to be cynical about politics and to say that Washington is a polarized cesspool. And it's true that the interest groups and the fund-raisers make every disagreement seem like a life-or-death struggle. But, in reality, most people in government are trying to find a balance between difficult trade-offs. Whether it's antiterrorism policy or regulatory policy, most substantive disagreements are within the 40 yard lines.

Obama's regulations may be more intrusive than some of us would like. They are not tanking the economy.

H.R. 10 is a dangerous bill. It is a direct attack on how our government works to protect the public interest. It is based on a completely false premise.

H.R. 10, a bill to veto regulations, deserves its own special veto by Congress and, if necessary, by the President of the United States.

Mr. DINGELL. Mr. Chair, I rise in strong opposition to H.R. 10, the REINS Act. This misguided piece of legislation would do nothing to put people back to work, it would do nothing to reinvigorate the economy, and it would do nothing to rein in our debt and excessive deficit. Worse yet, it would serve to make our government even more dysfunctional. By prohibiting all major regulations from going into effect unless Congress enacts a joint resolution of approval, the REINS Act would put up a major roadblock for implementing important consumer protections, including regulations which help keep our food safe and prevent Wall Street from rascality that could bring our economy to its knees again.

Supporters of this legislation claim that the Obama administration's excessive regulations are crippling our economy. However, the conservative columnist David Brooks of *The New*

York Times recently pointed out that in a recent poll by the Bureau of Labor Statistics, only 13 percent of companies said regulations were a major factor in why they laid off workers. Interestingly, this number has stayed steady over time. If overregulation is what is hampering our economy, you would expect a big spike in this number. This leads Mr. Brooks to conclude that "Obama's regulations may be more intrusive than some of us would like. They are not tanking the economy." I would urge all members to read this column to help dispel some common myths about the impact regulations are having on our economy today.

It is important to note that Congress already has the authority to review regulations before they go into effect. The Congressional Review Act of 1996 allows Congress to pass a joint resolution to overturn a regulation to block its implementation. Additionally, all regulations must be subject to a public comment period, giving this body and members of the general public ample time to weigh in with their concerns. Given that these safeguards are already in place, it makes you wonder if the supporters of the bill seek simply to kill all regulations, including those that keep pollution out of our air and water, our armed forces safe, our commerce uninterrupted and our foods safe to eat.

H.R. 10 is a crass attempt to stop important consumer protections by those who are fundamentally opposed to any government intervention in the private sector. I urge all members to oppose this flawed legislation, and get back to work doing the business of the American people—producing a balanced plan to reduce our deficit, invest in our infrastructure, and put the American people back to work.

Mr. STARK. Mr. Chair, I rise in opposition to H.R. 10, the Regulations from the Executive in Need of Scrutiny Act (REINS Act). It is unfortunate but not surprising that we are voting on this legislation today. We are just weeks away from millions of people being kicked off unemployment insurance and Medicare providers having their payments cut by 27% making it difficult for seniors to find a doctor or get access to care. Instead of dealing with those pressing issues we are voting on another ideological Republican message bill. More false promises from the Republican House Leadership that jobs will miraculously appear if we just eliminate rules that keep our food safe to eat, our air and water clean, and our cars safe to drive.

The REINS Act is aimed at making government less efficient and less responsive to the issues facing our country. The legislation would make it nearly impossible for the government to pass regulations. Any rule developed by an agency through the extensive notice and comment process that we currently use would now be forced through both houses of Congress, where majorities would have to affirmatively vote within 70 days or the rule would disappear. Under the REINS Act, proposed rules would be subject to even more rounds of approval in a new system biased to ensure that these rules fail to be adopted.

Did any one of the Republican cosponsors of this legislation ever take a class in government or civics when they were in high school? Passing a law requires approval of the House,

Senate, and then the President. Congress then delegates the relevant rulemaking to the agencies because these agencies have the manpower, time and expertise to develop the appropriate rules. This legislation turns the relationship between the three branches of government, and our entire regulatory system, on its head.

Our economy needs a level playing field that protects consumers and small business from corporate and other special interests. Science-based regulation helps to create a stable and fair marketplace for consumers and businesses alike. The REINS Act would further empower big business to challenge regulations that they disagree with regardless of the benefits to the public health and welfare. This is yet another Republican attack on the American middle class intended to please their corporate benefactors. I cannot support this legislation and I urge my fellow members to join me in voting "no."

Mr. RYAN of Wisconsin. Mr. Chair, I rise in support of the Regulations from the Executive in Need of Scrutiny Act of 2011 (REINS Act), which will ensure that major policy decisions are made by the people's representatives in Congress and not by unelected bureaucrats.

The bill requires that major regulations cannot go into effect until approved by Congress. Under current law, these economically significant regulations go into effect without further action by Congress. This legislation's sensible reform has important implications for the consideration of legislation that authorizes regulations that result in mandatory spending or other budgetary effects. The Congressional Budget Office's (CBO) longstanding policy is to score legislation providing such regulatory authority with the full budgetary effects of implementing that legislation. The rule governing consideration of H.R. 10 added a provision to the bill, titled the Budgetary Effects of Rules Subject to Section 802 of Title 5, United States Code, that ensures this practice continues.

Absent this provision, CBO has indicated that once the REINS Act is enacted, it would no longer score the budget authority, outlays, or receipts authorized by a statute to that statute if those budgetary effects are contingent on the adoption of a major regulation. Instead, those budgetary effects would be charged to the joint resolution approving the major regulation. While this approach would maintain the principle that the legislation that actually causes the budgetary effects would be charged with the costs incurred, in practice it would create potential problems. Because the REINS Act waives all points of order against the approval resolutions, there would be a potential circumstance where new mandatory spending or other budgetary effects would escape Congressional budget enforcement. This provision retains the current practice of scoring the budgetary impact to the legislation that creates the rulemaking authority and ensures new spending created by that legislation would be fully subject to budget enforcement.

I am pleased that this potential problem has been addressed, and I strongly support this effort to restrain Washington's regulatory overreach and create a more conducive environment for job creation.

#### DESCRIPTION OF THE RYAN AMENDMENT TO THE REINS ACT

The Ryan Amendment self-executed in the rule governing debate for H.R. 10 amends section 257 of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. §907) (BBEDCA) in order to ensure that any budgetary costs associated with approving or disapproving regulations authorized by legislation are properly accounted for under the congressional budget process. Section 257 of BBEDCA defines the budgetary baseline calculated by the Congressional Budget Office and the Office of Management and Budget. This amendment requires that the baseline include any changes in budget authority, outlays, or receipts resulting from regulations necessary to implement a law. Consistent with this requirement, the Congressional Budget Office and the Office of Management and Budget will continue to score legislation that provides the legal authority to promulgate implementing regulations with the budgetary implications resulting from the regulations.

Absent this provision, CBO has indicated that once the REINS Act is enacted, it would no longer score the budget authority, outlays, or receipts authorized by a statute to that statute if those budgetary effects are contingent on the adoption of a major regulation. Instead, those budgetary effects would be charged to the joint resolution approving the major regulation. This amendment maintains the current law practice for scoring the original authorizing legislation.

Mr. RAHALL. Mr. Chair, in recent weeks, the House of Representatives has taken up three major bills designed to address concerns about executive agency overreach in regulatory proposals.

I supported the first two bills—H.R. 3010, the Regulatory Accountability Act, and H.R. 527, the Regulatory Flexibility Act. I believe they would have improved the current regulatory approval scheme. The bills alternatively would have codified the use of critical cost-benefit analyses and the consideration of less costly regulatory alternatives, and helped to ensure the opportunity for additional public participation, especially in regard to small businesses. Both bills contained provisions that would have helped to address the concerns of my State, which has felt under siege in recent months by a raft of regulatory actions affecting the coal industry and emanating from the Environmental Protection Agency.

Today, the House is considering H.R. 10, the Regulations in Need of Scrutiny Act. This bill would require the Congress to approve all major rules projected to cost \$100 million or more. I believe this is, at the very least, an impractical idea, given the number of rules that would have to be considered in the midst of other legislative business. It also raises serious questions about the legal status of rules promulgated by the executive agencies and approved by the Congress, subjecting even the least controversial rules to potential litigation in the courts. In addition, it subjects the Congressional schedule to the whims of the executive agencies and their regulatory agenda.

But worse still, I believe such a requirement could be detrimental to the functions of government, the certainty required by business,

and the stability desired for the economy. Considering the inability of the current Congress to pass important and even popular legislation, the requirements of this bill would almost certainly put rules, even rules supported by the business community that endorses this bill and rules that may be promulgated by future Administrations more favorable to business, in complete limbo.

In this Congress, bipartisan efforts like the surface transportation reauthorization have become mired in partisan squabbles; the Federal Aviation Administration suffered a partial shutdown when a mere extension of its authority was tangled in a partisan mess. When matters of such importance to our nation, matters that are clearly necessary to get our country back on the right economic track, are sidelined indefinitely, I question whether it is wise to subject so many rules to the uncertainty of the Congressional approval process. What's more, when one of the most stringent complaints about the current regulatory process centers on concerns that proposed regulations are politically motivated, it makes no sense to further subject them to the whims of an inherently political institution.

So, while I support critical Congressional oversight of executive agency rules, more public input in the rulemaking process, better cost-benefit analyses of the impact on businesses large and small, and the consideration of less costly regulatory alternatives, I must decline to support H.R. 10.

Mrs. CHRISTENSEN. Mr. Chair, the REIN Act is the culmination of all of the anti-regulation, anti-government and especially anti-President Obama legislation that has been brought to this body since January 2009.

All of the political gymnastics we and the White House have been put through has made it extremely difficult for our President who tried very hard to craft bipartisan solutions to be able to pass much of his agenda. I am glad that he is now doing whatever he can through executive orders, because yes—our country cannot wait.

Even today, with only a few weeks before the deadlines, our Republican colleagues are blocking extending the payroll tax to keep families from losing about 1,000 badly needed dollars next year, they are blocking the extension of unemployment benefits which not only helps families, including children, but is clearly one of the best stimuli for our struggling economy; and they are blocking even just a temporary fix to cuts in fairer payments to the doctors who take care of our elderly and people with disabilities.

But that was not bad enough, now comes the REIN Act to prevent government from fulfilling its critical role to provide services, and to protect the safety, health and wellbeing of people of this country.

They claim they are doing this to get Congress to do their job. Well as far as I can see Congress was doing their job pretty well in the recent Congresses, but that all ground to a halt with this one.

In all of the over 9 months of this Congress the Republican leadership has talked a lot about jobs but done absolutely nothing to create even one and they have held up or weakened laws that would have created the jobs the American people need.

In fact they have wasted these nine months by insisting on bringing legislation to the floor with rhetoric that would keep the fringe elements of their party happy, but go absolutely nowhere and do absolutely nothing.

This is yet another bad bill, with a bad intent that has wasted our time.

The people of this country want government to be there to protect their homes, their money and their retirement, to keep them safe at work and in their neighborhoods, to provide them with access to quality health care, to ensure that their children will have a sound education and meaningful opportunities.

I ask my colleagues to do what the people are calling on us to: create jobs, extend the payroll reduction and unemployment insurance and pay our doctors a fairer fee for their services; and to stop attacking these necessary functions of government. They not only undermine the role of government, but they are weakening our country and making us the laughing stock of the world.

They should withdraw the REIN Act, but since they won't, we need to vote it down and get on with the important issues our fellow Americans want us to address.

Mr. VAN HOLLEN. Mr. Chair, I rise in opposition to H.R. 10, the so-called "Regulations from the Executive in Need of Scrutiny (REINS) Act of 2011."

Federal agencies issue rules based on statutes created when Congress and the President enact legislation. These agencies devote months and even years conducting research, gathering expertise from skilled professionals, and seeking public input when crafting major rules. Congress relies on these agencies to promulgate these rules, because they have expertise in a given area. However, this bill would require that congressional politics play a part in deciding complicated rules and regulations. By preventing agencies from enacting rules, this bill could undermine the ability of agencies to protect the public's health and safety.

Supporters of this legislation make the anecdotal claim that this bill is needed to stop a plethora of regulations. They forget that Congress currently has considerable power, even the responsibility at times, to alter and influence federal rulemaking. Congress has the power under various means to review and reject rules issued by executive agencies. Under the Congressional Review Act, Congress may pass a joint resolution disapproving any rule within 60 days of receiving the rule. If the President signs the resolution of disapproval, the regulation is not implemented. Additionally, it is important to note that federal agencies are only issuing rules to implement statutes that have been enacted by Congress. Federal agencies must adhere to the statute when promulgating a rule. Congress can also impose restrictions on agency rulemaking through the appropriations process by preventing agencies from using funds to implement or enforce certain rules. Congress may also revamp rule-making procedures. In addition to the Congressional Review Act, Congress has enacted the Unfunded Mandates Reform Act, the Regulatory Flexibility Act, and the Paperwork Reduction Act. All of these bills reform the procedures for federal rulemaking by federal agencies.

This bill before us today is unnecessary and potentially harmful to the public health and safety. I urge my colleagues to oppose this bill.

Mr. BLUMENAUER. Mr. Chair, as an administrator and policymaker at the local, state, and federal levels, I have often seen the value of common-sense regulations that save lives. I have also seen the challenges associated with cumbersome regulations that can sometimes appear to be bureaucracy at its worst. However, in my experience, regulations tend to be less stringent than necessary rather than overly strict. While I am very open to discussing how we can make regulations more effective and efficient, I am extremely disappointed with the anti-regulatory agenda of the House leadership.

Congress today considers yet another attack on our government's basic ability to enforce laws that protect public health and the environment. Every major law requires enforcement by the executive branch of government, and enforcement requires agencies to write regulations that explain and make public how that agency is going to enforce the law. The bills under consideration by the House will stop the regulatory process in its tracks. Agencies will not be able to enforce new laws or complete updates to regulations as required by existing laws, such as the Clean Air Act.

H.R. 10, the REINS Act, requires both the House and the Senate to vote on every major regulation before that regulation can be enforced, providing only seventy days to do it. This will allow either house of Congress to effectively veto any major regulation that would enforce a law already passed by Congress merely by taking no action.

H.R. 3010, the Regulatory Accountability Act, adds additional requirements to the regulatory process and overrides standards in existing laws that protect public health and safety. This bill would require agencies to analyze not only the direct costs of regulatory changes, but also vaguely defined indirect costs, as well as costs and benefits of potential alternative rules. The bill requires agencies in nearly every case to use the least costly rule, instead of balancing costs and benefits as required in existing laws. This standard will make it nearly impossible for an agency to regulate at all, because there is always an alternative that could be less costly, even if the public at large bears the much higher cost of less protective rules.

H.R. 527, the Regulatory Flexibility Act, expands the review that agencies must conduct before issuing new regulations to include an evaluation of all reasonably foreseeable "indirect" costs of regulations, especially to small businesses. Virtually any proposed agency action—even a guidance document designed to help a business comply with a rule—could be subject to a lengthy regulatory process. The additional analysis would make any change to a regulation even more difficult. There are already more than 110 separate procedural requirements in the rulemaking process; additional review and analysis will not improve regulations, but merely add to delay.

These bills add additional steps on top of the current process. For major regulations the process, from writing a regulation to its enforcement, can already take four to eight

years. If Congress feels at the end of that process that a regulation is inappropriate in any way, it already has the authority to vote to overturn that regulation and direct the agency to start over. These bills are unnecessary.

It's time for Congress to move beyond a debate about repealing regulations and focus instead on how to make them more effective and efficient. I strongly oppose these three bills that do not make any changes for the better, but instead jeopardize important progress on protecting health and safety.

Mrs. MALONEY. Mr. Chair, I rise today to oppose H.R. 10, the Regulations From the Executive in Need of Scrutiny (REINS) Act.

This bill is another instance of the Republican Majority playing politics, rather than focusing on passing legislation that creates jobs, grows our economy, and protects the American people. Requiring that Congress approve all agency rules and regulations with an annual economic cost of \$100 million or more would not only handicap our government's ability to regulate health and safety laws, it would also distract Congress from addressing pressing issues like job creation, national security and reducing our deficit. After an entire year in which the Republican Majority has demonstrated an inability to take up a productive legislative schedule—forcing last-minute votes on critical issues and not even introducing any kind of serious jobs agenda—it seems ludicrous to suggest that Congress should be spending its time nitpicking federal agencies about enacting regulations that Congress has authorized or ordered be done.

Additionally, this bill would actually harm job creation and hurt businesses. By creating a scenario in which regulations are proposed, and then potentially overridden, and then potentially proposed yet again in a new form, businesses will be forced to spend significant time and resources just keeping track of all the changes—decreasing their productivity and bottom line. This will create uncertainty for businesses and harm job creation—the very thing that the Republican Majority asserts that this bill will prevent. This is nothing more than blatant political posturing, as evidenced by the fact that Congress already has the authority to review and override federal rules under the Congressional Review Act.

The fact is that federal agencies need to be able to issue rules in a timely and efficient manner to protect the health and welfare of the American people and help grow our economy. Industries and individuals in areas from finance to farming rely on rulemaking and regulations to facilitate their businesses, and this bill would undermine that. I urge a no vote.

Ms. HIRONO. Mr. Chair, I rise today to express strong opposition to legislation this chamber passed yesterday, H.R. 10, the Regulations from the Executive in Need of Scrutiny (REINS) Act of 2011.

The REINS Act requires that both chambers of Congress pass a resolution approving every regulation with an economic impact of \$100 million or more. If Congress fails to pass such a resolution, that regulation would not take effect, and the law would go unimplemented.

I oppose this legislation, which would hurt the health, safety, and well-being of my constituents and Hawaii's communities. We cannot let our constituents and communities down when it comes to these vital responsibilities.

For example, this bill would stop the rules that are being written now to implement the Wall Street Reform and Consumer Protection Act—which will rein in reckless behavior in financial markets. Important rules to implement the health care law—which is already lowering drug costs for seniors—would also be stopped. And rules relating to the recent food safety legislation and protecting clean air and water would be stopped.

These rules—and the laws they are implementing—were and are opposed by various powerful corporate special interests. Those special interests know they don't have the votes to repeal these laws—and they know the American people don't want them repealed.

So instead, corporate special interests and their allies claim that the costs of these types of rules are too big to be worth it.

They're wrong.

Even the Bush Administration recognized that the benefits of rules like these outweigh their costs. In fact, in 2008, the Office of Management and Budget—which must sign off on all major rules developed by federal agencies—estimated that costs to the economy for major rules it approved were between \$46 billion and \$54 billion. These costs were far outweighed by the benefits of those same regulations, which they estimated to be between \$122 billion and \$656 billion. Imagine if the rules that are being written to implement Wall Street Reform had been on the books in 2005, before the financial crisis came to a head?

I believe our country could have reined in rampant, out of control behavior of Wall Street, and such regulations could have saved our economy trillions of dollars in lost economic growth and hard-earned retirement and college savings. Millions of people who have lost jobs could still be working. And this body could be focused on matters like improving U.S. education, economic competitiveness, and reducing our deficit.

Not only would this bill halt our regulatory system in its tracks, but it is also unnecessary. The Congressional Review Act already gives Congress the ability to review and disapprove of regulations if they are contrary to Congressional intent. This system ensures that the laws enacted by Congress are implemented appropriately, while preventing the law and its implementation from being hijacked by special interests on a whim—and creating disruptive uncertainty for our economy and legal system.

Mr. Chair, people in Hawaii are tired of these politically motivated bills. They want the federal government to get to work helping to create jobs, protecting health and safety, and to do so responsibly.

The REINS Act also fails miserably on that front. This legislation would require federal agencies to conduct the rigorous analysis required to develop a rule—a process that can take several years—only to have that rule stopped by Congress. This is a waste of federal resources and irresponsible at a time when Congress needs to focus on creating jobs and reducing our deficit.

These are just some of the concerns I have with the REINS Act, and some of the reasons that I voted against this unnecessary and ill conceived legislation.

The CHAIR. All time for general debate has expired.

In lieu of the amendment in the nature of a substitute recommended by the Committee on the Judiciary, printed in the bill, the amendment in the nature of a substitute recommended by the Committee on Rules, printed in the bill, modified by the amendment printed in part A of House Report 112-311, shall be considered as adopted, shall be considered as an original bill for purpose of further amendment under the 5-minute rule, and shall be considered read.

The text of the bill, as amended, is as follows:

H.R. 10

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### **SECTION 1. SHORT TITLE.**

*This Act may be cited as the "Regulations From the Executive in Need of Scrutiny Act of 2011".*

#### **SEC. 2. PURPOSE.**

*The purpose of this Act is to increase accountability for and transparency in the federal regulatory process. Section 1 of article I of the United States Constitution grants all legislative powers to Congress. Over time, Congress has excessively delegated its constitutional charge while failing to conduct appropriate oversight and retain accountability for the content of the laws it passes. By requiring a vote in Congress, the REINS Act will result in more carefully drafted and detailed legislation, an improved regulatory process, and a legislative branch that is truly accountable to the American people for the laws imposed upon them.*

#### **SEC. 3. CONGRESSIONAL REVIEW OF AGENCY RULEMAKING.**

*Chapter 8 of title 5, United States Code, is amended to read as follows:*

##### **"CHAPTER 8—CONGRESSIONAL REVIEW OF AGENCY RULEMAKING**

*"Sec.*

*"801. Congressional review.*

*"802. Congressional approval procedure for major rules.*

*"803. Congressional disapproval procedure for nonmajor rules.*

*"804. Definitions.*

*"805. Judicial review.*

*"806. Exemption for monetary policy.*

*"807. Effective date of certain rules.*

##### **"§801. Congressional review**

*"(a)(1)(A) Before a rule may take effect, the Federal agency promulgating such rule shall submit to each House of the Congress and to the Comptroller General a report containing—*

*"(i) a copy of the rule;*

*"(ii) a concise general statement relating to the rule;*

*"(iii) a classification of the rule as a major or nonmajor rule, including an explanation of the classification specifically addressing each criteria for a major rule contained within sections 804(2)(A), 804(2)(B), and 804(2)(C);*

*"(iv) a list of any other related regulatory actions intended to implement the same statutory provision or regulatory objective as well as the individual and aggregate economic effects of those actions; and*

*"(v) the proposed effective date of the rule.*

*"(B) On the date of the submission of the report under subparagraph (A), the Federal agency promulgating the rule shall submit to the Comptroller General and make available to each House of Congress—*

*"(i) a complete copy of the cost-benefit analysis of the rule, if any;*

“(ii) the agency’s actions pursuant to sections 603, 604, 605, 607, and 609 of this title;

“(iii) the agency’s actions pursuant to sections 202, 203, 204, and 205 of the Unfunded Mandates Reform Act of 1995; and

“(iv) any other relevant information or requirements under any other Act and any relevant Executive orders.

“(C) Upon receipt of a report submitted under subparagraph (A), each House shall provide copies of the report to the chairman and ranking member of each standing committee with jurisdiction under the rules of the House of Representatives or the Senate to report a bill to amend the provision of law under which the rule is issued.

“(2)(A) The Comptroller General shall provide a report on each major rule to the committees of jurisdiction by the end of 15 calendar days after the submission or publication date as provided in section 802(b)(2). The report of the Comptroller General shall include an assessment of the agency’s compliance with procedural steps required by paragraph (1)(B).

“(B) Federal agencies shall cooperate with the Comptroller General by providing information relevant to the Comptroller General’s report under subparagraph (A).

“(3) A major rule relating to a report submitted under paragraph (1) shall take effect upon enactment of a joint resolution of approval described in section 802 or as provided for in the rule following enactment of a joint resolution of approval described in section 802, whichever is later.

“(4) A nonmajor rule shall take effect as provided by section 803 after submission to Congress under paragraph (1).

“(5) If a joint resolution of approval relating to a major rule is not enacted within the period provided in subsection (b)(2), then a joint resolution of approval relating to the same rule may not be considered under this chapter in the same Congress by either the House of Representatives or the Senate.

“(b)(1) A major rule shall not take effect unless the Congress enacts a joint resolution of approval described under section 802.

“(2) If a joint resolution described in subsection (a) is not enacted into law by the end of 70 session days or legislative days, as applicable, beginning on the date on which the report referred to in section 801(a)(1)(A) is received by Congress (excluding days either House of Congress is adjourned for more than 3 days during a session of Congress), then the rule described in that resolution shall be deemed not to be approved and such rule shall not take effect.

“(c)(1) Notwithstanding any other provision of this section (except subject to paragraph (3)), a major rule may take effect for one 90-calendar-day period if the President makes a determination under paragraph (2) and submits written notice of such determination to the Congress.

“(2) Paragraph (1) applies to a determination made by the President by Executive order that the major rule should take effect because such rule is—

“(A) necessary because of an imminent threat to health or safety or other emergency;

“(B) necessary for the enforcement of criminal laws;

“(C) necessary for national security; or

“(D) issued pursuant to any statute implementing an international trade agreement.

“(3) An exercise by the President of the authority under this subsection shall have no effect on the procedures under section 802.

“(d)(1) In addition to the opportunity for review otherwise provided under this chapter, in the case of any rule for which a report was submitted in accordance with subsection (a)(1)(A) during the period beginning on the date occurring—

“(A) in the case of the Senate, 60 session days, or

“(B) in the case of the House of Representatives, 60 legislative days,

before the date the Congress is scheduled to adjourn a session of Congress through the date on which the same or succeeding Congress first convenes its next session, sections 802 and 803 shall apply to such rule in the succeeding session of Congress.

“(2)(A) In applying sections 802 and 803 for purposes of such additional review, a rule described under paragraph (1) shall be treated as though—

“(i) such rule were published in the Federal Register on—

“(I) in the case of the Senate, the 15th session day, or

“(II) in the case of the House of Representatives, the 15th legislative day,

after the succeeding session of Congress first convenes; and

“(ii) a report on such rule were submitted to Congress under subsection (a)(1) on such date.

“(B) Nothing in this paragraph shall be construed to affect the requirement under subsection (a)(1) that a report shall be submitted to Congress before a rule can take effect.

“(3) A rule described under paragraph (1) shall take effect as otherwise provided by law (including other subsections of this section).

#### “§802. Congressional approval procedure for major rules

“(a)(1) For purposes of this section, the term ‘joint resolution’ means only a joint resolution addressing a report classifying a rule as major pursuant to section 801(a)(1)(A)(iii) that—

“(A) bears no preamble;

“(B) bears the following title (with blanks filled as appropriate): ‘Approving the rule submitted by \_\_\_\_\_ relating to \_\_\_\_\_’;

“(C) includes after its resolving clause only the following (with blanks filled as appropriate): ‘That Congress approves the rule submitted by \_\_\_\_\_ relating to \_\_\_\_\_’; and

“(D) is introduced pursuant to paragraph (2).

“(2) After a House of Congress receives a report classifying a rule as major pursuant to section 801(a)(1)(A)(iii), the majority leader of that House (or his or her respective designee) shall introduce (by request, if appropriate) a joint resolution described in paragraph (1)—

“(A) in the case of the House of Representatives, within three legislative days; and

“(B) in the case of the Senate, within three session days.

“(3) A joint resolution described in paragraph (1) shall not be subject to amendment at any stage of proceeding.

“(b) A joint resolution described in subsection (a) shall be referred in each House of Congress to the committees having jurisdiction over the provision of law under which the rule is issued.

“(c) In the Senate, if the committee or committees to which a joint resolution described in subsection (a) has been referred have not reported it at the end of 15 session days after its introduction, such committee or committees shall be automatically discharged from further consideration of the resolution and it shall be placed on the calendar. A vote on final passage of the resolution shall be taken on or before the close of the 15th session day after the resolution is reported by the committee or committees to which it was referred, or after such committee or committees have been discharged from further consideration of the resolution.

“(d)(1) In the Senate, when the committee or committees to which a joint resolution is referred have reported, or when a committee or committees are discharged (under subsection (c)) from further consideration of a joint resolution described in subsection (a), it is at any time

thereafter in order (even though a previous motion to the same effect has been disagreed to) for a motion to proceed to the consideration of the joint resolution, and all points of order against the joint resolution (and against consideration of the joint resolution) are waived. The motion is not subject to amendment, or to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the joint resolution is agreed to, the joint resolution shall remain the unfinished business of the Senate until disposed of.

“(2) In the Senate, debate on the joint resolution, and on all debatable motions and appeals in connection therewith, shall be limited to not more than 2 hours, which shall be divided equally between those favoring and those opposing the joint resolution. A motion to further limit debate is in order and not debatable. An amendment to, or a motion to postpone, or a motion to proceed to the consideration of other business, or a motion to recommit the joint resolution is not in order.

“(3) In the Senate, immediately following the conclusion of the debate on a joint resolution described in subsection (a), and a single quorum call at the conclusion of the debate if requested in accordance with the rules of the Senate, the vote on final passage of the joint resolution shall occur.

“(4) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a joint resolution described in subsection (a) shall be decided without debate.

“(e) In the House of Representatives, if any committee to which a joint resolution described in subsection (a) has been referred has not reported it to the House at the end of 15 legislative days after its introduction, such committee shall be discharged from further consideration of the joint resolution, and it shall be placed on the appropriate calendar. On the second and fourth Thursdays of each month it shall be in order at any time for the Speaker to recognize a Member who favors passage of a joint resolution that has appeared on the calendar for at least 5 legislative days to call up that joint resolution for immediate consideration in the House without intervention of any point of order. When so called up a joint resolution shall be considered as read and shall be debatable for 1 hour equally divided and controlled by the proponent and an opponent, and the previous question shall be considered as ordered to its passage without intervening motion. It shall not be in order to reconsider the vote on passage. If a vote on final passage of the joint resolution has not been taken by the third Thursday on which the Speaker may recognize a Member under this subsection, such vote shall be taken on that day.

“(f)(1) If, before passing a joint resolution described in subsection (a), one House receives from the other a joint resolution having the same text, then—

“(A) the joint resolution of the other House shall not be referred to a committee; and

“(B) the procedure in the receiving House shall be the same as if no joint resolution had been received from the other House until the vote on passage, when the joint resolution received from the other House shall supplant the joint resolution of the receiving House.

“(2) This subsection shall not apply to the House of Representatives if the joint resolution received from the Senate is a revenue measure.

“(g) If either House has not taken a vote on final passage of the joint resolution by the last day of the period described in section 801(b)(2), then such vote shall be taken on that day.

“(h) This section and section 803 are enacted by Congress—

“(1) as an exercise of the rulemaking power of the Senate and House of Representatives, respectively, and as such is deemed to be part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of a joint resolution described in subsection (a) and superseding other rules only where explicitly so; and

“(2) with full recognition of the Constitutional right of either House to change the rules (so far as they relate to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

**“§803. Congressional disapproval procedure for nonmajor rules**

“(a) For purposes of this section, the term ‘joint resolution’ means only a joint resolution introduced in the period beginning on the date on which the report referred to in section 801(a)(1)(A) is received by Congress and ending 60 days thereafter (excluding days either House of Congress is adjourned for more than 3 days during a session of Congress), the matter after the resolving clause of which is as follows: ‘That Congress disapproves the nonmajor rule submitted by the \_\_\_\_\_ relating to \_\_\_\_\_, and such rule shall have no force or effect.’ (The blank spaces being appropriately filled in).

“(b)(1) A joint resolution described in subsection (a) shall be referred to the committees in each House of Congress with jurisdiction.

“(2) For purposes of this section, the term submission or publication date means the later of the date on which—

“(A) the Congress receives the report submitted under section 801(a)(1); or

“(B) the nonmajor rule is published in the Federal Register, if so published.

“(c) In the Senate, if the committee to which is referred a joint resolution described in subsection (a) has not reported such joint resolution (or an identical joint resolution) at the end of 15 session days after the date of introduction of the joint resolution, such committee may be discharged from further consideration of such joint resolution upon a petition supported in writing by 30 Members of the Senate, and such joint resolution shall be placed on the calendar.

“(d)(1) In the Senate, when the committee to which a joint resolution is referred has reported, or when a committee is discharged (under subsection (c)) from further consideration of a joint resolution described in subsection (a), it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) for a motion to proceed to the consideration of the joint resolution, and all points of order against the joint resolution (and against consideration of the joint resolution) are waived. The motion is not subject to amendment, or to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the joint resolution is agreed to, the joint resolution shall remain the unfinished business of the Senate until disposed of.

“(2) In the Senate, debate on the joint resolution, and on all debatable motions and appeals in connection therewith, shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing the joint resolution. A motion to further limit debate is in order and not debatable. An amendment to, or a motion to postpone, or a motion to proceed to the consideration of other business, or a motion to recommit the joint resolution is not in order.

“(3) In the Senate, immediately following the conclusion of the debate on a joint resolution

described in subsection (a), and a single quorum call at the conclusion of the debate if requested in accordance with the rules of the Senate, the vote on final passage of the joint resolution shall occur.

“(4) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a joint resolution described in subsection (a) shall be decided without debate.

“(e) In the Senate the procedure specified in subsection (c) or (d) shall not apply to the consideration of a joint resolution respecting a nonmajor rule—

“(1) after the expiration of the 60 session days beginning with the applicable submission or publication date; or

“(2) if the report under section 801(a)(1)(A) was submitted during the period referred to in section 801(d)(1), after the expiration of the 60 session days beginning on the 15th session day after the succeeding session of Congress first convenes.

“(f) If, before the passage by one House of a joint resolution of that House described in subsection (a), that House receives from the other House a joint resolution described in subsection (a), then the following procedures shall apply:

“(1) The joint resolution of the other House shall not be referred to a committee.

“(2) With respect to a joint resolution described in subsection (a) of the House receiving the joint resolution—

“(A) the procedure in that House shall be the same as if no joint resolution had been received from the other House; but

“(B) the vote on final passage shall be on the joint resolution of the other House.

**“§804. Definitions**

“For purposes of this chapter—

“(1) The term ‘Federal agency’ means any agency as that term is defined in section 551(1).

“(2) The term ‘major rule’ means any rule, including an interim final rule, that the Administrator of the Office of Information and Regulatory Affairs of the Office of Management and Budget finds has resulted in or is likely to result in—

“(A) an annual effect on the economy of \$100,000,000 or more;

“(B) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

“(C) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

“(3) The term ‘nonmajor rule’ means any rule that is not a major rule.

“(4) The term ‘rule’ has the meaning given such term in section 551, except that such term does not include—

“(A) any rule of particular applicability, including a rule that approves or prescribes for the future rates, wages, prices, services, or allowances therefore, corporate or financial structures, reorganizations, mergers, or acquisitions thereof, or accounting practices or disclosures bearing on any of the foregoing;

“(B) any rule relating to agency management or personnel; or

“(C) any rule of agency organization, procedure, or practice that does not substantially affect the rights or obligations of non-agency parties.

**“§805. Judicial review**

“(a) No determination, finding, action, or omission under this chapter shall be subject to judicial review.

“(b) Notwithstanding subsection (a), a court may determine whether a Federal agency has

completed the necessary requirements under this chapter for a rule to take effect.

“(c) The enactment of a joint resolution of approval under section 802 shall not be interpreted to serve as a grant or modification of statutory authority by Congress for the promulgation of a rule, shall not extinguish or affect any claim, whether substantive or procedural, against any alleged defect in a rule, and shall not form part of the record before the court in any judicial proceeding concerning a rule except for purposes of determining whether or not the rule is in effect.

**“§806. Exemption for monetary policy**

“Nothing in this chapter shall apply to rules that concern monetary policy proposed or implemented by the Board of Governors of the Federal Reserve System or the Federal Open Market Committee.

**“§807. Effective date of certain rules**

“Notwithstanding section 801—

“(1) any rule that establishes, modifies, opens, closes, or conducts a regulatory program for a commercial, recreational, or subsistence activity related to hunting, fishing, or camping; or

“(2) any rule other than a major rule which an agency for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rule issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest, shall take effect at such time as the Federal agency promulgating the rule determines.”.

**SEC. \_\_\_\_ . BUDGETARY EFFECTS OF RULES SUBJECT TO SECTION 802 OF TITLE 5, UNITED STATES CODE.**

Section 257(b)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 is amended by adding at the end the following new subparagraph:

“(E) BUDGETARY EFFECTS OF RULES SUBJECT TO SECTION 802 OF TITLE 5, UNITED STATES CODE.—Any rules subject to the congressional approval procedure set forth in section 802 of chapter 8 of title 5, United States Code, affecting budget authority, outlays, or receipts shall be assumed to be effective unless it is not approved in accordance with such section.”.

The CHAIR. No further amendment to the bill, as amended, is in order except those printed in part B of the report. Each such amendment may be offered only in the order printed in the report, by a Member designated in the report, shall be considered read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question.

AMENDMENT NO. 1 OFFERED BY MR. SESSIONS

The CHAIR. It is now in order to consider amendment No. 1 printed in part B of House Report 112-311.

Mr. SESSIONS. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 25, line 18, insert “, including an analysis of any jobs added or lost, differentiating between public and private sector jobs” before the semicolon.

The CHAIR. Pursuant to House Resolution 479, the gentleman from Texas (Mr. SESSIONS) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Texas.

Mr. SESSIONS. Mr. Chairman, I yield myself such time as I may consume.

I want to first thank, if I can, the author of this piece of legislation, the gentleman from Kentucky, GEOFF DAVIS. Mr. DAVIS has distinguished himself among, not only our colleagues, but also, I believe, his strong support of free enterprise and the people of Kentucky in doing his job, and I appreciate the opportunity to be here to help in that endeavor today.

I believe that excessive government regulations are a significant barrier to the creation of private sector jobs in America today. This Congress has made job creation a priority. As a matter of fact, we had the minority leader down talking just a few minutes ago about job creation and the priority that it needs to represent. And as a result, we must review regulations which stand in the way of not only having more jobs, but also the overuse of rules and regulations that prohibit and add to jobs and job creation.

□ 1520

That proposal that I believe we need to look at is whether the benefits outweigh any potential economic harm that might come.

My amendment requires the agencies submitting the report on a proposed Federal rule to include an assessment of anticipated jobs gained or lost as a result of its implementation and to specify whether those jobs will come from the public or the private sector.

This assessment would be part of the cost benefit analysis. It would be required to be submitted to the Comptroller General and made available to each Member of the House prior to our consideration of the rule.

I believe that what we are doing here today is positive, not only a benefit to the country in terms of recognizing that rules and regulations are burdening our economic engine, but also we are doing something about it here today, and I'm very, very proud to be here in support of this.

Earlier this year, I introduced House Resolution 72, and the House passed it with a strong bipartisan vote in February. My bill required authorizing committees in the House to review existing, pending, and proposed regulations through hearings this year and to report back to the House with their findings.

The REINS Act today before us is an extension, I believe, of H. Res. 72 and is an important measure to ensure that the government does not compete against the free enterprise system. And if it does, Congress should understand that at the time that we pass our laws.

Mr. Chairman, I ask my colleagues to support this important addition.

I reserve the balance of my time.

Mr. CONYERS. Mr. Chairman, I rise in opposition to this amendment.

The CHAIR. The gentleman from Michigan is recognized for 5 minutes.

Mr. CONYERS. I want to merely start off by recognizing that somewhere buried in this amendment is the gentleman from Texas' recognition that regulations could or might create jobs. I want to thank him for that.

There's no credible evidence that regulations depress job creation. Now, we've talked about this for 2 days. But at our hearing in the Judiciary Committee, one of the anti-regulatory bills that we considered, we had an American Enterprise Institute witness, Christopher DeMuth, from the conservative think tank that AEI is, and he stated in his prepared testimony that focus on jobs can lead to confusion in regulatory debates and that the employment effects of regulation, while important, are indeterminate.

I must say to my colleagues that that is exactly the same impression that I came out of my Judiciary Committee hearing with, and it's the same impression that I've come to realize is probably accurate in the debate for the last few days on the floor of the House itself.

I'm concerned about this amendment because it would add to the analytical burdens of agencies, the speculative assessment of jobs added or lost, and how many of those jobs would be added or lost in the public and private sectors.

For these reasons, I conclude that this amendment would not be helpful, and I am unable to support it.

I yield back the balance of my time.

Mr. SESSIONS. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. SMITH).

Mr. SMITH of Texas. Mr. Chairman, I thank my Texas colleague for yielding me time, and I also thank him for offering this amendment.

The bill restores to Congress the accountability for the regulatory decisions that impose major burdens on our economy. As Congress makes those decisions, one of the most important facts to consider is whether new regulations produce jobs or destroy them.

The amendment guarantees that when agencies submit new regulations to Congress, their cost benefit analyses will be made available.

The amendment also assures that agencies will specifically identify regulations' impact on private and public sector jobs. With that information, Congress will be in a position to determine whether to approve the rules. And the American people will be in a position to hold Congress accountable for those decisions.

I urge my colleagues to support the amendment.

Mr. SESSIONS. Mr. Chairman, I yield myself the balance of my time.

I believe that the case which we're bringing forth today to Congress is

that we believe that jobs should be priority number one for this United States Congress and for the American people—not just the middle class, but investors and people who want to have great jobs in this country, for us to be competitive with the world. For us to do that, we need to recognize that people in Washington, D.C., who probably wouldn't recognize the free enterprise system if they saw it put rules and regulations on people; they don't understand the business; they don't understand how they operate; and they sure as heck don't understand why it's important to have a free enterprise system, one which is nimble and prepared and ready for competition.

I spent 16 years without missing a day of work in the private sector prior to coming to Congress. During those 16 years, I learned firsthand about how rules and regulations by the Federal Government and others can impede not only us and our ability to add jobs but perhaps more importantly, for us to be competitive. And I want to know today those people who will support us making sure that we look at a rule and regulation and understand what the impact on jobs would be.

That's what this vote will be. All Members will have an opportunity to come down to say, We think that there should be a consideration or should not be a consideration, at the time a rule will be written by an agency, what will be the impact of that rule. It would elude me to understand why someone would not want to include that as part of a cost benefit analysis.

Thus, Mr. Chairman, I rest my case.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Texas (Mr. SESSIONS).

The amendment was agreed to.

AMENDMENT NO. 2 OFFERED BY MR. JOHNSON OF GEORGIA

The CHAIR. It is now in order to consider amendment No. 2 printed in part B of House Report 112-311.

Mr. JOHNSON of Georgia. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 45, line 22, insert after the first period the following:

**“§ 808. Exemption for certain rules**

“Sections 801 through 807 of this chapter, as amended by the Regulations from the Executive in Need of Scrutiny Act of 2011 shall not apply in the case of any rule that the Director of the Office of Management and Budget determines will result in net job creation. This chapter, as in effect before the enactment of the Regulations from the Executive in Need of Scrutiny Act of 2011, shall continue to apply, after such enactment, to any such rule, as appropriate.”.

Page 24, in the matter preceding line 10, add after the item relating to section 807 the following new item:

808. Exemption for certain rules.

The CHAIR. Pursuant to House Resolution 479, the gentleman from Georgia (Mr. JOHNSON) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Georgia.

Mr. JOHNSON of Georgia. Mr. Chairman, I yield myself such time as I may consume.

I rise to support my amendment to this dangerous bill, the REINS Act.

My amendment is simple. It would exempt any rule that the Office of Management and Budget determines would promote job growth from the bill's congressional approval requirement, which is very cumbersome.

The Republican majority claims that job growth is its top priority, and if that's the case, then my Republican friends should support this amendment. In reality, we all know this bill will not create a single job, and as part of the majority's anti-regulatory agenda, will make it virtually impossible to implement rules for our health and safety.

This bill does not fine-tune the regulatory process, as the Republicans say. It will do nothing but make the regulatory process more bureaucratic and impose unnecessary hurdles for the agencies seeking to enact rules that protect our health and safety.

The majority has a scare tactic—that is that regulations kill jobs, and that's nothing but a myth. The National Federation of Independent Businesses, which describes itself as the leading small business association representing small and independent businesses, does a regular survey of small businesses. And it found that the single most important problem facing small businesses is poor sales, not regulations.

The REINS Act would delay, if not halt, regulations that are necessary for the health and safety of our constituents. Further, the bill would slow down regulations that may actually foster job growth. Thus, if my colleagues on the other side of the aisle are truly concerned about job growth, I would encourage them to support this amendment.

I hope all of my colleagues will support this amendment because the regulations that will help put unemployed Americans back to work should take effect without unnecessary delay.

I reserve the balance of my time.

□ 1530

Mr. SMITH of Texas. I rise in opposition to the amendment.

The CHAIR. The gentleman is recognized for 5 minutes.

Mr. SMITH of Texas. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky (Mr. DAVIS), the sponsor of the legislation.

Mr. DAVIS of Kentucky. Thank you, Mr. Chairman.

I could not disagree with the gentleman from Georgia more. It's obvious

which one of us has run a business and which one is talking about a business.

The reality of the regulatory impact on businesses is huge. All you have to do is ask small business owners in any of our congressional districts if they can get credit because of the newly improved FDIC rules on lending. They will tell you they can't. They can't get credit because of the new regulations, and banks are being consolidated and are going under now. We're finding a rash of environmental regulations throughout the Ohio Valley. Machine tool operators, steel mill operators and other manufacturers say over and over that they will be out of business if the cap-and-trade carbon regulations are imposed by the EPA. These are facts. Health care right now is imposing hiring freezes with the Affordable Care Act.

Once again, there is no reason under any circumstances that we should exempt major regulations that do, indeed, have a real impact on hiring, investment, job creation, and especially on an individual who wants to take the risk to start a business.

Congress should not abdicate its authority any longer regarding these rules. We should step up to the plate and be accountable. If we do so, jobs will be created as a result.

Mr. JOHNSON of Georgia. In response, no, I've never operated a business on Wall Street, and I'm not really concerned about Wall Street as Wall Street has been getting all of the breaks. This party, the Tea Party Republicans, seem hellbent on shifting everything in their direction.

I yield the balance of my time to the distinguished gentlewoman from Texas, SHEILA JACKSON LEE.

The CHAIR. The gentlewoman is recognized for 1½ minutes.

Ms. JACKSON LEE of Texas. I am pleased to join my dear friend and colleague on the Judiciary Committee, the gentleman from Georgia, in offering this amendment as the Johnson-Jackson Lee amendment.

I hold a sign that, I think, speaks to the gist of this amendment, "Make It In America." A number of us have been on the floor of the House on a regular basis talking about creating jobs and about making it in America. My good friend from Texas just passed an amendment without opposition, and I see no reason why the Jackson Lee-Johnson or Johnson-Jackson Lee amendment cannot be accepted in the very same way.

Bruce Bartlett, one of the senior policy analysts in the Reagan and George H.W. Bush administrations, observed that regulatory uncertainty is a canard, an invented canard, that allows those who use it to use current economic problems to pursue an agenda supported by the business community year in and year out. In other words, it is a simple case of opportunism be-

cause regulations don't stop you from creating jobs. In actuality, they provide cleaner air; they provide clean food; they provide the opportunity of a roadmap so that small and large businesses can do their work.

The Clean Air Act is a shining example. A lot of regulations came out of the Clean Air Act. Given that the economy since the Clean Air Act was passed in 1970 under Richard Milhous Nixon, a Republican, it shows that the economy has grown 204 percent and that private sector job creation has expanded 86 percent.

I would ask my colleagues to join us in supporting the Johnson-Jackson Lee amendment. Let's make it in America. Let's ensure there is a regulatory process that exempts any regulation that creates jobs. I ask my colleagues to support the amendment.

Mr. Chair, I rise today in support of amendment #2, that I offered along with my esteemed colleague Mr. JOHNSON, to H.R. 10 Regulations from the Executive in Need of Scrutiny (REINS). Our amendment would exempt the Office of Management and Budget once it is determined that the rules they offer will result in net job creation.

REINS would amend the Congressional Review Act (CRA) and require Congressional approval of all major rules (rules with an economic impact that is greater than \$100 million). If Congress fails to act within 70 days the rule cannot be implemented. This change is targeted directly at executive agencies and does nothing to create jobs.

In other words, this bill is calling for Congressional oversight of Executive branch activities and functions. I have been serving as member of this governing body since 1995, and oversight of the Executive branch is exactly what Congress does. One of the main functions of the Congressional Committees is oversight.

If Congress were required to proactively approve every federal rule, it would be extremely time consuming. The Federal agencies of the Executive branch are made up of experts in their respective fields. Many of the regulations that Federal agencies enact are very specific and require a high level of familiarity with the minute details of certain issues. The time it would take members of Congress to become adequately acquainted with each issue being proposed by each Federal agency would certainly be more productive if channeled into efforts to effect the change that Americans want. For example extending unemployment insurance, job creation, and encouraging job growth. Yet, here we are again wasting time on a measure that will not help our economy.

As we consider REINS, it is important that we not forget that federal agencies have their own oversight process in place to ensure that proposed regulations are thoroughly vetted.

For every proposed regulation, agencies are required to issue notice of proposed rulemakings to the industry and market over which they regulate. Those entities then comment on the rules, and they go through many rounds of changes before a final order is enacted.

Furthermore, rules enacted by Federal agencies are subject to Congressional oversight and review, and must meet standards of judicial review. Arguably, rules and regulations issued by Federal agencies go through just as much, if not more, review as bills considered and passed by Congress.

Implementing this rule would put a tremendous burden on Congress, and to be frank, as members elected by our constituencies to represent their interests, our time could be utilized in a much more effective manner.

Instead of debating about oversight authority that Congress already has, we should be focusing on the issues that most concern the American people, particularly, creating jobs. As our country rebounds from one of the most severe economic downturns in our history, it is imperative that we make decisions that will enable our economy to grow and, most importantly, create jobs. We should be using our judgment in a manner that would create American jobs by comprehensively reforming our broken immigration system. We should be working to implement an orderly process for immigration that eases the burden on employers, improves documentation, and complements our enforcement efforts to make them more effective.

Healthy market competition not only protects consumers, but will help our economy to prosper. Congress should be examining the consolidation taking place in certain industries to ensure healthy competition is alive and thriving.

America is a free enterprise society, and small businesses are part of the backbone of our economy, employing a vast portion of Americans. We should be ensuring that any consolidation taking place in the marketplace does not push out small businesses and render them unable to compete.

In the last couple of years, some sweeping mergers and acquisitions have taken place. Just recently, it was reported that 500 jobs are being cut as a result of last year's United-Continental merger. As we face a high unemployment rate, and Americans struggle to make ends meet, every job counts. We should be investigating the outcomes of mergers such as United-Continental, amongst others, to ensure that no more precious jobs are being lost.

Many of my colleagues on the other side of the aisle have stood up here and emphasized the importance of jobs for American workers—especially in the context of immigration debates. However, one of the largest contributors to the lack of employment opportunities here in American is the outsourcing of jobs to other countries where the labor is less expensive. We should be focusing our efforts on ways to return outsourced jobs to American soil.

Bottom line, Congress has a large responsibility. We carry on our shoulders the needs of the American people. Our time here is valuable and our work load is great. We should not further burden this body with the work that an entire branch of government has already been commissioned to do, especially since Congress still has oversight authority.

For each one of us, the needs of the constituents in our districts should be our priority. The needs of the American people as a whole should be our priority.

There is no credible evidence that regulations depress job creation. The Majority's own witness at the legislative hearing clearly debunked the myth that regulations stymie job creation. Christopher DeMuth, who appeared on behalf of the American Enterprise Institute, a conservative think tank, stated in his prepared testimony that the "focus on jobs . . . can lead to confusion in regulatory debates" and that "the employment effects of regulation, while important, are indeterminate."

If anything, regulations may promote job growth and put Americans back to work. For instance, According to the BlueGreen Alliance, notes: "Studies on the direct impact of regulations on job growth have found that most regulations result in modest job growth or have no effect, and economic growth has consistently surged forward in concert with these health and safety protections. The Clean Air Act is a shining example, given that the economy has grown 204% and private sector job creation has expanded 86% since its passage in 1970."

Regulation and economic growth can go hand in hand. Regarding the Clean Air Act, the White House Office of Management and Budget ("OMB") recently observed that 40 years of success with this measure "have demonstrated that strong environmental protections and strong economic growth go hand in hand." Similarly, the Natural Resources Defense Council and the United Auto Workers cite the fact that increased fuel economy standards have already led to the creation of more than 155,000 U.S. jobs.

The claim that regulatory uncertainty hurts business has been debunked as political opportunism. Bruce Bartlett, a senior policy analyst in the Reagan and George H.W. Bush Administrations observed "[R]egulatory uncertainty is a canard invented by Republicans that allows them to use current economic problems to pursue an agenda supported by the business community year in and year out. In other words, it is a simple case of political opportunism, not a serious effort to deal with high unemployment."

Regulatory uncertainty does not deter business investment. A lack of demand, not uncertainty about regulation, is cited as the reason for not hiring.

At a legislative hearing on regulatory reform (H.R. 3010), Professor Sidney Shapiro similarly noted, "All of the available evidence contradicts the claim that regulatory uncertainty is deterring business investment."

A July 2011 Wall Street Journal survey of business economists found that the "main reason U.S. companies are reluctant to step up hiring is scant demand, rather than uncertainty over government policies."

The most recent National Federation of Independent Business survey of its members likewise shows that "poor sales"—not regulation—is the biggest problem. Of those reporting negative sales trends, 45 percent blamed faltering sales, 5 percent higher labor costs, 15 percent higher materials costs, 3 percent insurance costs, 8 percent lower selling prices and 10 percent higher taxes and regulatory costs."

Small businesses reject the argument that deregulation is what they need. The Main Street Alliance, an alliance of small busi-

nesses, observes: "In survey after survey and interview after interview, Main Street small business owners confirm that what we really need is more customers—more demand—not deregulation. Policies that restore our customer base are what we need now, not policies that shift more risk and more costs onto us from big corporate actors . . ."

I urge my colleagues to support this amendment to create jobs and get our country on a path to a strong economic future, what small businesses need is customers—Americans with spending money in their pockets—not watered down standards that give big corporations free reign to cut corners, use their market power at our expense, and force small businesses to lay people off and close up shop."

Mr. SMITH of Texas. Mr. Chairman, I yield such time as he may consume to the gentleman from Kentucky (Mr. DAVIS).

Mr. DAVIS of Kentucky. I thank the gentleman for yielding.

I would point out that Gallup has released a survey that shows that one in three small business owners is worried about going out of business; and overwhelmingly, the response to this survey across the United States points to the uncertainty and the unpredictability caused by regulations.

This bill, the REINS Act, is not antiregulation. It is about more transparency and accountability in regulation, and it is about having Congress step up to the plate. It's important that we work together to restore that trust and confidence in the Congress—that we do our jobs, that we stand firm, and that we exercise restraint over the executive branch so that it cannot act in scoring itself on whether jobs are created.

Let that be done by the Congress, which is held accountable. Let us stand for the vote and be accountable to our citizens.

Mr. SMITH of Texas. Mr. Chairman, I yield myself the balance of my time.

The amendment carves out of the bill regulations that the Office of Management and Budget (OMB) determines will lead to net job creation.

The danger in the amendment is the strong incentive it gives OMB to manipulate its analysis of a major regulation's jobs impacts. Far too often, OMB will be tempted to shade the analysis to skirt the bill's congressional approval requirement.

In addition, regulations alleged to create net new jobs often do so by destroying real, existing jobs and "creating" new, hoped-for jobs associated with regulatory compliance. For example, some Environmental Protection Agency (EPA) Clean Air Act rules will shut down existing power plants. EPA and OMB may attempt to justify that with claims that more new, "green" jobs will be created as a result.

In the end, that is just another way in which government picks the jobs winners and the jobs losers. And there is no guarantee that all of the new, "green" jobs will ever actually exist.

The REINS Act is not intended to force any particular outcome. It does not choose between clean air and dirty air. It does not choose between new jobs and old jobs.

Instead, the REINS Act chooses between two ways of making laws. It chooses the way the Framers intended, in which accountability for laws with major economic impacts rests with Congress. It rejects the way Washington has operated for too long, where there is no accountability because decisions are made by unelected agency officials.

The amendment would undermine that fundamental choice.

I urge my colleagues to oppose the amendment.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Georgia (Mr. JOHNSON).

The question was taken; and the Chair announced that the noes appeared to have it.

Mr. JOHNSON of Georgia. Mr. Chairman, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Georgia will be postponed.

AMENDMENT NO. 3 OFFERED BY MR. SCHRADER

The CHAIR. It is now in order to consider amendment No. 3 printed in part B of House Report 112-311.

Mr. SCHRADER. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 25, line 9, strike "and".

Page 25, insert after line 9 the following (and redesignate provisions accordingly):

"(v) a cost-benefit analysis of the rule; and"

Page 26, insert after line 11 the following:

"(D) Not later than the later of January 1, 2013 or the date that is 1 year after the date of enactment of the Regulations from the Executive in Need of Scrutiny Act of 2011, each Federal agency shall submit to Congress appropriate criteria for conducting cost-benefit analyses under subparagraph (A)(v) for each rule for which that agency may be required to submit such an analysis."

The CHAIR. Pursuant to House Resolution 479, the gentleman from Oregon (Mr. SCHRADER) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Oregon.

Mr. SCHRADER. Mr. Chairman, I yield myself such time as I may consume.

This amendment is pretty straightforward. The goal here is to actually codify some of what has been done here just by Executive order to make sure Congress' intent is actually done regardless of what the executive branch is considering.

It basically codifies the cost-benefit analysis in statute that we would like to have. As we all know, a lot of times some of our agencies get a little overzealous, and some of the cost-benefit

analyses that they do or don't do do not actually reflect a lot of the real-world criteria by which American men and women in businesses actually operate. So our goal here is to actually follow through on what is already existing law but to just codify it so it's not a huge change.

There is a little bit more to it. Right now a lot of the independent Federal agencies are not subject to this Executive order. Of course, this amendment would actually codify that they should be. There is no reason any Federal agency should be exempt from giving Americans the idea of what it's going to cost and what sort of benefit we're going to get out of this at the end of the day.

Last but not least, I think one of the big pieces that is very, very important to know as a veterinarian, a man of science a little bit, are the assumptions by which these cost-benefit analyses are done. That oftentimes influences the outcome. It's important for the agencies, the businesses and, again, others in this country to look at what assumptions are being made when these cost-benefit analyses are being done. Sometimes they deserve to be challenged, and sometimes questions need to be raised. So I think it's extremely important that any cost-benefit analysis assumptions should be made public and transparent.

With that, I yield back the balance of my time.

Mr. SMITH of Texas. Mr. Chairman, I rise in opposition to the amendment.

The CHAIR. The gentleman is recognized for 5 minutes.

Mr. SMITH of Texas. I yield such time as he may consume to the gentleman from Kentucky (Mr. DAVIS).

Mr. DAVIS of Kentucky. I thank the gentleman for yielding.

I also oppose the amendment. The amendment leaves it to each agency to determine how we will conduct the cost-benefit analyses of any regulations. This is regrettable. Each agency will be tempted to design rules that it can manipulate to claim that benefits routinely outweigh costs. In past administrations when we've seen this attempt done, there was a divergence of standard; there was no continuity and virtually no reduction in the regulations or understanding of this across the whole of government.

The Regulatory Accountability Act, which the House passed on December 2, 2011, calls for agencies to follow uniform guidelines for cost-benefit analyses. This improves quality, and it prevents deceptive actions by rogue agencies. The amendment undercuts that effort. Similarly, under executive order 12866, the President has long required agencies to follow uniform guidelines for cost-benefit analyses. The amendment undermines that requirement, too.

I urge my colleagues to oppose the amendment.

Mr. SMITH of Texas. Mr. Chairman, I yield myself the balance of my time.

The amendment leaves it to each agency to determine how it will conduct cost-benefit analyses of new regulations. This is regrettable. Each agency will be tempted to design rules that it can manipulate to claim that benefits routinely outweigh costs.

The Regulatory Accountability Act, which the House passed on December 2, 2011, calls for agencies to follow uniform guidelines for cost-benefit analyses. This improves quality and prevents deceptive actions by rogue agencies. The amendment undercuts that effort.

Similarly, under Executive Order 12866, the President has long required agencies to follow uniform guidelines for cost-benefit analyses. The amendment undermines that requirement, too.

I urge my colleagues to oppose the amendment.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Oregon (Mr. SCHRADER).

The question was taken; and the Chair announced that the noes appeared to have it.

Mr. SCHRADER. Mr. Chairman, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Oregon will be postponed.

□ 1540

AMENDMENT NO. 4 OFFERED BY MR. MCKINLEY

The CHAIR. It is now in order to consider amendment No. 4 printed in part B of House Report 112-311.

Mr. MCKINLEY. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 42, line 23, strike "\$100,000,000" and insert "\$50,000,000".

The CHAIR. Pursuant to House Resolution 479, the gentleman from West Virginia (Mr. MCKINLEY) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from West Virginia.

Mr. MCKINLEY. Mr. Chairman, I rise today to offer an amendment that would reduce the threshold for a major rule from \$100 million or more to \$50 million. This would ensure greater accountability.

Let's keep this in perspective. I base this amendment on legislation that has already been adopted by the House—in 1995—with bipartisan support which lowered the threshold to \$50 million. It passed with a vote of 277-141 with much of today's leadership who were here at the time supporting it.

Also, in perspective, in fiscal year 2011, only 2.6 percent of all the rules were classified as "major," and in 2010 it was only 3 percent that met that criteria. Keep that in consideration. Would you be satisfied with only 2 or 3

percent of your food being inspected or 2 or 3 percent of the aircraft which we fly?

According to the Small Business Administration, in 2008 it cost the economy \$1.75 trillion in regulations. We just went through a gut-wrenching supercommittee that tried to reduce \$1.5 trillion, but yet we let, every year, hundreds of billions of dollars pass through without involvement of Congress.

Since January of this year, we have already seen 67,000 more pages of regulation, 88 million hours, man-hours, have been lost by businesses and employers trying to respond to the regulatory reform. None of this has had congressional oversight or approval.

Canada realizes there needs to be more accountability, and they require all rules and regs of \$50 million or more to come before their legislative body.

Congress, having jurisdiction of only 2 or 4 percent may be better than nothing, but I believe America deserves better. We need a system of checks and balances. No wonder the American people have lost their confidence in Congress and the Federal Government. I'm hopeful that the chairman will see the issues that I have raised here today and work with me on future legislation to correct that.

With that, I yield 30 seconds to the gentleman from Texas (Mr. SMITH).

Mr. SMITH of Texas. I thank the gentleman from West Virginia for yielding me time.

I share my colleague's desire to bring more congressional scrutiny to major regulations and appreciate his interest in the subject.

I know that recent major regulations have hit West Virginia and the gentleman's constituents particularly hard. The Environmental Protection Agency's major regulations that affect energy sources and power production are among the most troubling.

I look forward to continued discussions with the gentleman on these and other issues of interest to him.

Mr. MCKINLEY. Thank you, Mr. Chairman. I appreciate your willingness to work with me on these issues.

Since Congress deserves to have more specific numbers that have not been available from GAO and the CBO relative to lowering this threshold from \$100 million to \$50 million, I ask unanimous consent, for now, to withdraw my amendment, Mr. Chairman.

The CHAIR. Without objection, the amendment is withdrawn.

There was no objection.

AMENDMENT NO. 5 OFFERED BY MRS. MCCARTHY OF NEW YORK

The CHAIR. It is now in order to consider amendment No. 5 printed in part B of House Report 112-311.

Mrs. MCCARTHY of New York. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 45, line 22, strike the quotation marks and second period.

Page 45, insert the following after line 22: **"§ 808. Exemption for certain rules**

"Sections 801 through 807, as amended by the Regulations From the Executive in Need of Scrutiny Act of 2011, shall not apply in the case of any rule that relates to the safety of food, the safety of the workplace, air quality, the safety of consumer products, or water quality. The provisions of this chapter, as in effect before the enactment of the Regulations From the Executive in Need of Scrutiny Act of 2011, shall continue to apply, after such enactment, to any rule described in the preceding sentence."

Page 24, in the matter preceding line 10, add after the item relating to section 807 the following new item:

"808. Exemption for certain rules.

The CHAIR. Pursuant to House Resolution 479, the gentlewoman from New York (Mrs. MCCARTHY) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from New York.

Mrs. MCCARTHY of New York. Mr. Chairman, I yield myself such time as I may consume.

I rise today to offer an amendment to the deeply flawed bill before us right now.

Today we continue the majority's politically motivated attacks on regulations. For the past 2 weeks, we have considered bills designed to slow down and stop the regulatory process.

The bill before us today doesn't target just the rules that the majority might like you to believe are problematic; it would hamper all rulemaking, even those rules that are essential to public health and safety.

My amendment today seeks to address that issue by exempting the REINS Act regulations relating to food safety, workplace safety, air quality, consumer product safety, or water quality.

These issue areas are too important to be impeded by the majority's need to generate political talking points. Consumers can't be put at risk because one House of Congress can't get its act together to pass food safety regulations.

Children at risk from being exposed to toxic substances in toys can't wait for 535 new regulators to weigh in—that's us, the Members of Congress. People getting sick from tainted water supplies shouldn't be put further at risk by a legislative vote from one half of one-third of the branches of the government.

Today's bill, the REINS Act, would amend the Congressional Review Act to prohibit a majority rule from going into effect unless Congress enacts a joint resolution of approval, specifically approving the rule.

This is a bizarre, backwards, and unnecessary piece of legislation. The majority claims to be aiming to stream-

line the regulatory process and reduce the negative effects of a bureaucracy on the American people and on American businesses.

Ironically, however, this bill has the effect of growing the regulatory process by effectively adding 535 of us additional regulators to the process. Each Member of Congress will now have to perform the role of a regulator. Congress will be forced to review the rules and regulations regarding highly technical matters currently handled by subject area experts.

This technical complexity is precisely why we have professionals in the executive branch with subject matter expertise to work on these rules and regulations. This divide has been the fundamental cornerstone of the principal of separation of powers.

But Congress is intended to represent the people and enact laws. The executive branch is intended to implement those laws. That implementation takes the form of issuing rules, regulations, and specific guidance on how the law will be implemented.

The REINS Act inappropriately puts Congress into duties that should be carried out only by the executive branch. Congress does have oversight responsibility and a duty to monitor implementation, but we currently have methods to address the problems when they do occur, and we do not need this bill. The bill also will lead to confusion, uncertainty, and more gridlock.

Thanks to the REINS Act requirement that Congress affirmatively approve of every major rule, one House of Congress will essentially have a legislative veto over any major regulation issued.

The worst time for businesses is uncertainty, and the REINS Act increases it in the regulatory process. After engaging in the process of helping to shape the regulations through the rule-making process, citizens will have to wonder what actions will Congress take. What legislative deal-making will occur? Will Congress approve of the regulation? When will Congress approve the regulation?

This uncertainty keeps businesses from investing and from hiring new workers. More uncertainty under the REINS Act is the opposite of what we need. Congress should spend more of its time thoroughly considering enacting legislation. We should have the implementation where it belongs, in the executive branch. We should continue to monitor implementation and exercise proper oversight. And in the cases where correction is needed, use the current legislative tools that we have at our disposal to address those issues.

I do urge all of our Members to vote for my amendment to protect the American people.

We don't need more gridlock here in Washington. That's why everybody back at home is mad at everybody. We

need to go on with our work. We have to make sure that there is a streamlined process so that we can get small businesses growing again, get people back to work. That's what the American people want from all of us.

I urge my colleagues to vote for this amendment.

With that, I yield back the balance of my time.

□ 1550

Mr. DAVIS of Kentucky. Mr. Chairman, I rise in opposition to the amendment.

The CHAIR. The gentleman is recognized for 5 minutes.

Mr. DAVIS of Kentucky. Mr. Chairman, I yield myself such time as I may consume.

The amendment carves out of the bill essential categories of major regulations. These include all major rules on food safety, workplace safety, consumer product safety, clean water, and clean air.

In many cases, these are precisely the agency actions that impose the most cost, do not produce enough benefits, and do not faithfully implement the intent of the people's representatives in the Congress and in the Senate.

A good example is the Environmental Protection Agency's recent proposal to control mercury emissions from coal and oil-fired power plants. EPA estimated that the rule would cost \$11 billion annually to achieve at most just \$6 million in total mercury reduction benefits. That is an 1,833 to 1 cost-benefit ratio. Most of the benefits EPA identified to justify the rule had nothing to do with the control of hazardous air pollution. Proponents of the regulation have nothing to fear from the REINS Act. When agencies prepare good major regulations, Congress will be able to approve them. This provides agencies with a powerful incentive to get major regulations right the first time.

Think about this from the perspective of the mercury regulation that had the 1,833 to 1 cost-benefit ratio. Who do you think is going to pay for that? The mistake that is made in the arguments saying that it's the rich on Wall Street who benefit are entirely wrong. It's hardworking taxpayers. It's the middle class, the working poor, and the elderly whose utility rates will be driven through the roof as a result of a regulation that was imposed against the intent of the Congress.

When an agency prepares a bad regulation, however, Congress will be able, under the REINS Act, to correct the agency and send it back to the drawing board. In the end, the agency will find a way to issue a good regulation that Congress will approve.

It will improve the dialogue between the executive branch and the Congress. But until it does, those who must pay

for regulations will not have to pay for the cost of a misguided major rule made by people who are not accountable to our voters.

I urge my colleagues to oppose the amendment, and I yield back the balance of my time.

Mr. SMITH of Texas. Mr. Chair, I oppose the amendment.

The amendment carves out of the bill essential categories of major regulations. These include all major rules on food safety, workplace safety, consumer product safety, clean water and clean air.

In many cases, these are precisely the agency actions that impose the most costs, do not produce enough benefits and do not faithfully implement Congress' intent.

A good example is the Environmental Protection Agency's (EPA) recent proposal to control mercury emissions from coal- and oil-fired power plants. EPA estimated that the rule would cost \$11 billion annually to achieve at most just \$6 million in total mercury reduction benefits. That is a 1,833:1 cost-benefit ratio.

Most of the benefits EPA identified to justify the rule had nothing to do with the control of hazardous air pollution.

Proponents of regulation have nothing to fear from the REINS Act. When agencies prepare good major regulations, Congress will be able to approve them. This provides agencies with a powerful incentive to get major regulations right the first time.

When an agency prepares a bad regulation, however, Congress will be able to correct the agency and send it back to the drawing board.

In the end, the agency will find a way to issue a good regulation that Congress approves. But until it does, those who must pay for regulations will not have to pay for the costs of a misguided major rule.

I urge my colleagues to oppose the amendment.

The CHAIR. The question is on the amendment offered by the gentleman from New York (Mrs. MCCARTHY).

The question was taken; and the Chair announced that the yeas appeared to have it.

Mrs. MCCARTHY of New York. I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from New York will be postponed.

AMENDMENT NO. 6 OFFERED BY MS. JACKSON LEE OF TEXAS

The CHAIR. It is now in order to consider amendment No. 6 printed in part B of House Report 112-311.

Ms. JACKSON LEE of Texas. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 45, line 22, insert after the first period the following:

**"§ 808. Exemption for certain rules**

"Sections 801 through 807 of this chapter, as amended by the Regulations from the Ex-

ecutive in Need of Scrutiny Act of 2011 shall not apply in the case of any rule made by the Secretary of Homeland Security. This chapter, as in effect before the enactment of the Regulations from the Executive in Need of Scrutiny Act of 2011, shall continue to apply, after such enactment, to any such rule, as appropriate."

Page 24, in the matter preceding line 10, add after the item relating to section 807 the following new item:

808. Exemption for certain rules.

The CHAIR. Pursuant to House Resolution 479, the gentlewoman from Texas (Ms. JACKSON LEE) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Texas.

Ms. JACKSON LEE of Texas. Mr. Chairman, I yield myself such time as I may consume.

What America wants and what I believe is important to the institution that we have such great respect for is for Members to work together. There are a number of amendments that were allowed by the Rules Committee, and I thank them; and the idea should be that these amendments improve a bill.

It is obvious that I disagree with this bill because I think it will literally shut down government. If you cannot pass simple bills that have been passed out of the House of Representatives to the other body and they have not yet passed, we've finished one year of the 112th Congress, how do you think we can manage what is called major rule-making? Eighty different rules would have to be approved by the President, the House, and the Senate. Literally, the American people would be held hostage.

So this amendment is a cooperative amendment. I think it makes the bill better. The reason why, we have our soldiers, most likely on the front lines of Afghanistan. On account of a heinous act of terrorism on 9/11, our soldiers were dispatched to defend this Nation in Afghanistan. In doing so, they had as their backup the Department of Homeland Security, a Department whose responsibility is to secure the homeland. Simply ask the 9/11 families how serious it is to secure the homeland.

My amendment would simply say that Homeland Security regulations or regulations dealing with securing the homeland, making America safe, would be exempt from this dilatory, long-winded process of approval. We need urgency when we speak of securing the homeland.

For example, it is well known that we deal not only with a terrorism potential from around the world, but it is also possible to have a catastrophic event that deals with a domestic terrorist attack.

I cannot believe that my colleagues would not want to act in a bipartisan manner and, in particular, with the REINS Act that requires a voted-on resolution of approval, otherwise the

security amendment does not go into place. I cannot believe that we would not in a bipartisan way accept the Jackson Lee amendment.

With that, I reserve the balance of my time.

Mr. DAVIS of Kentucky. Mr. Chairman, I rise in opposition to the amendment.

The CHAIR. The gentleman is recognizing for 5 minutes.

Mr. DAVIS of Kentucky. I would point out, first of all, that in a national emergency, the President of the United States does have the ability to enact an emergency rule. But what this amendment seeks to do is shield the Department of Homeland Security from Congress's authority to approve regulations under the REINS Act. That shield should be denied.

For example, take the Department's rule to extend compliance deadlines for States to issue secure driver's licenses under the REAL ID Act. Ten years after 9/11 when hijackers used fraudulent licenses to board airplanes to murder 3,000 innocent Americans, DHS continues to extend the deadline.

Another example is the Department's 2009 rule to recall the Bush administration's no-match rule. That regulation helped companies to identify illegal workers and comply with Federal immigration law. When the Obama administration issued its rule to repeal no match, it put the interests of illegal immigrants above those of millions of unemployed Americans and legal immigrants.

This is the kind of decisionmaking that takes place at the Department of Homeland Security. Congress should use every tool it can use to reassert its authority over the legislation rule-making functions it has delegated to DHS. The result will be to streamline communication, to improve communication in crisp and focused pieces of legislation and regulation. The REINS Act is available to do that.

The point of the REINS Act is accountability, and each Congressman must take a stand to be accountable for regulations that cost our citizenry \$100 million or more annually.

I reserve the balance of my time.

Ms. JACKSON LEE of Texas. Mr. Chairman, I yield myself such time as I may consume.

I thank the gentleman for his explanation, but I think he plays right into the reason why he should join me and make this a bipartisan amendment.

Frankly, I don't think we would want to throw out or delay any process of rulemaking dealing with securing the homeland. I think when the gentleman was citing licenses, he was speaking 9/11. It is now 11 years, and we have passed a number of rulemakings that have improved securing the homeland. As a member of the Homeland Security Committee, I'm quite aware of the progress we've made, such as not hav-

ing to address that kind of, if you will, mishap—more than a mishap—but that kind of lack of communication that we had on 9/11.

The point I want to make is our soldiers are on the front line in Afghanistan. They are asking, as someone would say on the playing field, Have you got my back? The Department of Homeland Security is that Department created from the Select Committee on Homeland Security which I was on, now in the Homeland Security Committee, to in fact provide for the security of the Nation. With that in mind, I think it is untenable to think of thwarting that process.

What we have here in the REINS Act is truly the REINS Act. It is a stranglehold on moving the Nation forward on good regulations, clean air, clean water, but in this instance securing the homeland. I believe that having the President, the Senate, and the House come together in a reasonable period of time to approve a rule dealing with securing the homeland while soldiers are on the front line defending us is an atrocious position to put the securing of the Nation in.

Let me just say this, Bruce Bartlett is a Republican. He said that the regulatory uncertainty that Republicans talk about is a canard invented by Republicans that allows them to use current economic problems to pursue an agenda supported by the business community year in and year out. That's from a Republican.

The question is let's separate the special interests. The REINS Act is here. They have the majority. More than likely it will pass. But they're going to ignore our war and our fight to secure the homeland.

□ 1600

Here on the front line, what are we doing? We're putting a stranglehold on the rulemaking that will come forward that's attempting to help the American people. If we have to do something for the Transportation Security Administration and the security checkpoints and we need a rule, it's going to be held back because of this process.

I ask for the support of the Jackson Lee amendment, and I yield back the balance of my time.

Mr. Chair, I rise today in support of my amendment #6, to H.R. 10, "Regulations from the Executive in Need of Scrutiny" (REINS). This bill amends the Congressional Review Act (CRA) to require Congressional approval of all major rules (rules with an economic impact that is greater than \$100 million). If Congress fails to act within 70 days the rule cannot be implemented. This change is targeted directly at executive agencies and does nothing to create jobs. Under current law Congress can provide oversight and disapprove of a promulgated bill.

My amendment would exempt all rules promulgated by the Department of Homeland Security. As a Senior Member of the Homeland

Security and Ranking Member of the Transportation Security Subcommittee, I am very concerned about any legislation that would hinder the Department of Homeland Security's ability to respond to an emergency.

The bill would add new review requirements to an already long and complicated process, allowing special interest lobbyists to second-guess the work of respected scientists and staff through legal challenges, sparking a wave of litigation that would add more costs and delays to the rulemaking process, potentially putting the lives, health and safety of millions of Americans at risk.

The Department of Homeland Security simply does not have the time to be hindered by frivolous and unnecessary litigation, especially when the safety and security of the American people are at risk.

According to a study conducted by the Economic Policy Institute, public protections and regulations "do not tend to significantly impede job creation", and furthermore, over the course of the last several decades, the benefits of federal regulations have significantly outweighed their costs.

There is no need for this legislation, aside from the need of some of my colleagues to protect corporate interests. This bill would make it more difficult for the government to protect its citizens, and in the case of the Department of Homeland Security, it endangers the lives of our citizens.

In our post 9/11 climate, homeland security continues to be a top priority for our nation. As we continue to face threats from enemies foreign and domestic, we must ensure that we are doing all we can to protect our country. DHS cannot react to the constantly changing threat landscape effectively if they are subject to this bill.

Since the creation of the Department of Homeland Security in 2002, we have overhauled the government in ways never done before. Steps have been taken to ensure that the communication failures that led to 9/11 do not happen again. The Department of Homeland Security has helped push the United States forward in how protect our nation. Continuing to make advance in Homeland security and intelligence is the best way to combat the threats we still face.

The Department of Homeland Security is tasked with a wide variety of duties under its mission. One example of an instance where DHS may have to act quickly to establish new or emergency regulations is the protection of our cyber security.

In the past few years, threats in cyberspace have risen dramatically. The policy of the United States is to protect against the debilitating disruption of the operation of information systems for critical infrastructures and, thereby, help to protect the people, economy, and national security of the United States.

We are all affected by threats to our cyber security. We must act to reduce our vulnerabilities to these threats before they can be exploited. A failure to protect our cyber systems would damage our Nation's critical infrastructure. So, we must continue to ensure that such disruptions of cyberspace are infrequent, of minimal duration, manageable, and cause the least possible damage.

Like other national security challenges in the post 9/11 era, the cyber threat is multifaceted

and without boundaries. Some cyber attackers are foreign nations that utilize their military or intelligence-gathering operations, whereas others are either operating alone or are connected to terrorist groups. In addition, there are cyber threats that are international or domestic criminal enterprises.

According to the Government Accountability Office (GAO), the number of cyber incidents reported by Federal agencies to US-CERT has increased dramatically over the past four years, from 5,503 cyber incidents reported in FY 2006 to about 30,000 cyber incidents in FY 2009 (over a 400 percent increase).

The four most prevalent types of cyber incidents and events reported to US-CERT during FY 2009 were malicious code; improper usage; unauthorized access and incidents warranting further investigations (unconfirmed malicious or anomalous activity).

Critical infrastructure in the Nation is composed of public and private institutions in the sectors of agriculture, food, water, public health, emergency services, government, defense industrial base, information and telecommunications, energy, transportation, banking and finance, chemicals and hazardous materials, and postal and shipping.

With cyberspace as their central nervous system—it is the control system of our country. Cyberspace is composed of hundreds of thousands of interconnected computers, servers, routers, switches, and fiber optic cables that allow our critical infrastructures to work. Thus, the healthy, secure, and efficient functioning of cyberspace is essential to both our economy and our national security.

In light of an attack that threatens the United State's cyber protection, Homeland Security officials may need to issue emergency regulations quickly. Attacks can be sent instantly in cyber space, and the protection of our critical infrastructure cannot be mitigated by cumbersome bureaucracy.

As the Representative for the 18th District of Texas, I know about vulnerabilities in security firsthand. Of the 350 major ports in America, the Port of Houston is the one of the busiest.

More than 220 million tons of cargo moved through the Port of Houston in 2010, and the port ranked first in foreign waterborne tonnage for the 15th consecutive year. The port links Houston with over 1,000 ports in 203 countries, and provides 785,000 jobs throughout the state of Texas. Maritime ports are centers of trade, commerce, and travel along our Nation's coastline, protected by the Coast Guard, under the direction of DHS.

If Coast Guard intelligence has evidence of a potential attack on the port of Houston, I want the Department of Homeland Security to be able to protect my constituents, by issuing the regulations needed without being subject to the constraints of this bill.

The Department of Homeland Security deserves an exemption not only because they may need to quickly change regulations in response to new information or threats, but also because they are tasked with emergency preparedness and response.

Take for example U.S. Immigration and Customs Enforcement (ICE) which identifies prosecutorial discretion as "the authority of an agency charged with enforcing a law to decide to what degree to enforce the law against a

particular individual." When ICE favorably exercises prosecutorial discretion, it "essentially decides not to assert the full scope of the enforcement authority available to the agency in a given case."

In the civil immigration enforcement context, prosecutorial discretion may take the form of a broad range of discretionary enforcement decisions, including: focusing enforcement resources on particular administrative violations or conduct; deciding whom to stop, question, or arrest for an administrative violation; deciding whether a suspect will be detained or released on bond; and granting deferred action, granting parole, staying a final order of removal, or other alternative to obtaining a formal order of removal.

Let me be clear; prosecutorial discretion is not amnesty; it is done on a case by case basis to ensure that the limited resources ICE has to work with are put toward removing those who pose a threat to the safety and security of the American people. Allowing ICE to identify and focus on priorities strengthens immigration enforcement by targeting the right individuals.

Furthermore, ICE Director John Morton issued a memorandum in March of 2011 that outlined the enforcement policies for the agency. Among the priority enforcement cases were aliens posing a risk to national security or public safety, recent illegal entrants, and those who are fugitives or have a history of violating U.S. immigration law.

Director Morton's memorandum indicates that prosecutorial discretion is by no means widespread, blanket amnesty for undocumented aliens; it is a law enforcement method used by many agencies, including ICE, under Republican and Democratic administrations. In fact, prosecutorial discretion allows ICE to allocate its resources to ensure their enforcement efforts provide for the safety and security of the nation. Why would this rule need additional scrutiny?

And another major impact rule deals with the U.S. Citizenship and Immigration Services Fee Schedule the final rule will provide DHS with an average of \$209 million in FY2010 and FY2011 annual fee revenue, based on a projected annual fee-paying volume of 4.4 million immigration benefit requests and 1.9 million requests for biometric services, over the fee revenue that would be collected under the current fee structure. The increased revenue will be used to fund the full cost of processing immigration benefit applications and associated support benefits; the full cost of providing similar benefits to asylum and refugee applicants; and the full cost of similar benefits provided to others at no change. These are the sorts of rules that are going to be needlessly hindered by this Legislation.

Again, instead of focusing on jobs we are focusing on regulations that Congress already has the power to review and prevent its implementation if and when necessary.

There are many challenges our communities face when we are confronted with a catastrophic event or a domestic terrorist attack. It is important for people to understand that our capacity to deal with hurricanes directly reflects our ability to respond to a terrorist attack in Texas or New York, an earthquake in California, or a nationwide pandemic flu outbreak.

On any given day the city of Houston and cities across the United States face a widespread and ever-changing array of threats, such as: terrorism, organized crime, natural disasters and industrial accidents.

Cities and towns across the nation face these and other threats. Indeed, every day, ensuring the security of the homeland requires the interaction of multiple Federal departments and agencies, as well as operational collaboration across Federal, State, local, tribal, and territorial governments, nongovernmental organizations, and the private sector. We can hinder the Department of Homeland Security's ability to protect the safety and security of the American people.

I urge my colleagues to support the Jackson Lee amendment in order to ensure that regulations that save lives that are promulgated by the Department of Homeland Security are not unnecessarily delayed by this legislation.

Mr. DAVIS of Kentucky. Mr. Chairman, I yield myself the balance of my time.

I would like to reiterate that the point of the REINS Act is accountability. It would not impinge, but I believe it would actually improve our ability to manage rulemaking and regulation that relates to security, indeed. The strongest authority in the House of Representatives who could speak on that very issue spoke in favor of this bill earlier, Congressman CHRIS GIBSON from New York, who commanded a brigade in Afghanistan, where that picture was taken, and also a battalion in Iraq in 2005. And I would defer to his authority and military experience on that fact.

The real issue is accountability and restoring transparency and checks and balances to the executive branch so that the American people do not have the reach of government into their back pockets, into their personal lives, into their schools, into their communities, and frankly, in northern Kentucky, even into our sewer pipes, without the consent of the governed.

With that, I oppose the amendment, and I yield back the balance of my time.

Mr. SMITH of Texas. Mr. Chair, I oppose the amendment.

The amendment seeks to shield the Department of Homeland Security (DHS) from Congress' authority to approve regulations under the REINS Act. That shield should be denied.

For example, take the Department's rule to extend compliance deadlines for States to issue secure drivers' licenses under the REAL ID Act. Ten years after 9/11 hijackers used fraudulent licenses to board airplanes used to murder 3,000 innocent Americans, DHS continues to extend the deadline.

Another example is the Department's 2009 rule to recall the Bush Administration's "no-match" rule. That regulation helped companies to identify illegal workers and comply with Federal immigration law.

When the Obama Administration issued its rule to repeal "no-match," it put the interests of illegal immigrants above those of millions of unemployed Americans and legal immigrants.

This is the kind of decision making that takes place at the Department of Homeland Security. Congress should use every tool it can to reassert its authority over the legislative rulemaking functions it has delegated to DHS. The REINS Act is available to do that.

I urge my colleagues to oppose the amendment.

The CHAIR. The question is on the amendment offered by the gentlewoman from Texas (Ms. JACKSON LEE).

The question was taken; and the Chair announced that the noes appeared to have it.

Ms. JACKSON LEE. Mr. Chairman, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from Texas will be postponed.

#### AMENDMENT NO. 7 OFFERED BY MS. MOORE

The Acting CHAIR (Mr. WOMACK). It is now in order to consider amendment No. 7 printed in part B of House Report 112-311.

Ms. MOORE. I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 45, line 22, insert after the first period the following:

#### “§ 808. Exemption for certain rules

“Sections 801 through 807 of this chapter, as amended by the Regulations from the Executive in Need of Scrutiny Act of 2011 shall not apply in the case of any rule that relates to veterans or veterans affairs. This chapter, as in effect before the enactment of the Regulations from the Executive in Need of Scrutiny Act of 2011, shall continue to apply, after such enactment, to any such rule, as appropriate.”.

Page 24, in the matter preceding line 10, add after the item relating to section 807 the following new item:

#### 808. Exemption for certain rules.

The Acting CHAIR. Pursuant to House Resolution 479, the gentlewoman from Wisconsin (Ms. MOORE) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Wisconsin.

Ms. MOORE. Mr. Chairman, I yield myself such time as I may consume.

My amendment is very straightforward. It would exempt our Nation's veterans from the burdensome layers and hurdles that H.R. 10 imposes and adds to the administrative rulemaking process and would specifically remove veterans from the bill's so-called “reining” provisions that require a joint resolution of Congress before an agency puts forth a major rule to help our men and women in uniform when they become veterans and after they return home from service.

Many of my colleagues and I disagree with this bill for a variety of reasons, including the author's premise that reducing the administration's ability to regulate and promulgate rules will result in job creation. But whether or not

we agree on the direction and approach to best help and promote America's future, we all agree on some things. We all agree that the last thing we want to do is to pass legislation that will delay assistance to those veterans who have selflessly chosen to fight for our country and deserve every ounce of assistance we can provide them when they come back home.

Veterans deserve educational opportunity, rehabilitation for sometimes very severe disabilities, Mr. Chairman, mental health treatment for posttraumatic stress disorder, employment opportunities, and housing opportunities. Delaying rulemaking authority will have dire consequences for our veterans.

For example, Mr. Chair, one very disturbing issue for me has been the high rate of suicides among our servicemembers. We can't delay this kind of assistance. In fact, last year there were more deaths among our troops from suspected suicide than deaths from hostile combat.

We're facing an epidemic here at home, too. A recent report from the Center for New American Security noted that 1 percent of the population has served in the military, and yet those servicemembers represent 20 percent of all of the suicides in the United States.

Resources for the military are sparse. According to a recent Veterans Health Administration survey of mental health providers, 40 percent responded that they could not schedule a new appointment at their clinic within 14 days; 70 percent of surveyed facilities cited an inadequate number of staff to treat veterans; and 70 percent said that they just simply lacked space.

We also know that there's a serious unemployment barrier among our veterans as they return to civilian life. The unemployment rate among vets who served in Iraq and Afghanistan since 9/11 is 12.1 percent, substantially higher than the national average that we're so concerned about now. Unemployment among vets will spike as we end the war in Iraq. The last 20,000 troops are expected to arrive by the end of the year from Iraq. We can expect about an additional 10,000 veterans from Afghanistan to come home before the end of the year, and 23,000 by the end of 2012.

We just can't delay assistance to our veterans. This has been an area, Mr. Chairman, where Democrats and Republicans have typically come together and agreed. Yet H.R. 10, the REINS Act, will have unintended consequences and dangerous consequences for veterans who, of course, have received our undying gratitude and support.

I ask my colleagues to consider this amendment and support my amendment because this is not an area where we want to delay services to them. We don't want to subject our vets to the

politics of Washington and a gridlocked, hyperpartisan Congress that struggles even to extend unemployment insurance in a recession or the payroll tax to middle class people, let alone a credit default by something “so historically difficult” as raising the debt ceiling.

I just think that Americans will agree with me that our Nation's veterans deserve to be excluded from the gridlock that this will invariably cause. Let's come together once more to adopt this amendment, Mr. Chair, not just for the troops that need help, but for the troops that will be here in the near future.

I reserve the balance of my time.

Mr. DAVIS of Kentucky. Mr. Chairman, I rise in opposition to the amendment.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. DAVIS of Kentucky. I yield myself such time as I may consume.

I respect my friend from Wisconsin with whom I have worked on numerous pieces of legislation related to child homelessness and affordable housing; but in this case I'm going to respectfully disagree with the premise of the legislation, as a veteran, as a former Army Ranger, as a flight commander of an assault helicopter unit in the 82nd Airborne Division and who served in the Middle East.

The one thing that I would say is that nothing in the REINS Act would in any way inhibit or impede the delivery of services to our veterans, of whom I have been a champion in my time in Congress on numerous pieces of legislation. What I would say is the REINS Act would provide a framework for discussion were there a rule to arise that hit that cost threshold to assure crisp, clear improvement, particularly in dealing with backlogs.

When we deal with the VA specifically, I have had area managers of the Veterans Administration point out specific rules that cause increased queuing and waiting time that were not being addressed. This amendment would actually prevent us from being able to address such things, were they to hit the threshold.

The amendment carves all regulations that affect veterans and veteran affairs out of the REINS Act congressional approval procedures. Frankly, the REINS Act supporters honor America's veterans. We have had America's veterans speaking in favor of this bill throughout the afternoon.

I believe that ultimately we are going to make decisions that will be in keeping with the will of the American people and in the best interests of those veterans as we move forward.

With that, I reserve the balance of my time.

Ms. MOORE. I thank the gentleman for responding, even though he doesn't agree with me. I'm just looking at

about at least 14 rules that have been implemented very expeditiously on behalf of our veterans since September 11. It is chilling to think about the delays that may be caused by an extra process.

With that, I yield back the balance of my time.

Mr. DAVIS of Kentucky. That's a point that the gentlewoman and I will agree to disagree on. I believe that we have seen the Congress move in an expedited manner in national security in dealing with our veterans, and there would be no difference under this legislation.

Ultimately, we know that Congress must approve all legislation relating to every agency of the Federal Government, and we'll be doing our constitutional duty, as I remind everybody listening, to restore transparency, accountability, and a check-and-balance so that our citizens and our voters can hold somebody in the government accountable instead of faceless bureaucrats.

□ 1610

It's a solution that everyone should support. Congress will be more accountable.

I ask all of my colleagues to oppose this amendment, and I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from Wisconsin (Ms. MOORE). The question was taken; and the Acting Chair announced that the noes appeared to have it.

Ms. MOORE. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from Wisconsin will be postponed.

#### ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments printed in part B of House Report 112-311 on which further proceedings were postponed, in the following order:

Amendment No. 2 by Mr. JOHNSON of Georgia.

Amendment No. 3 by Mr. SCHRADER of Oregon.

Amendment No. 5 by Mrs. MCCARTHY of New York.

Amendment No. 6 by Ms. JACKSON LEE of Texas.

Amendment No. 7 by Ms. MOORE of Wisconsin.

The Chair will reduce to 2 minutes the minimum time for any electronic vote after the first vote in this series.

#### AMENDMENT NO. 2 OFFERED BY MR. JOHNSON OF GEORGIA

The Acting CHAIR. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Georgia (Mr. JOHNSON) on which further proceedings were

postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

#### RECORDED VOTE

The Acting CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 187, noes 236, not voting 10, as follows:

[Roll No. 895]

## ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR (during the vote).  
There is 1 minute remaining.

□ 1645

So the amendment was rejected.

The result of the vote was announced  
as above recorded.

AMENDMENT NO. 6 OFFERED BY MS. JACKSON  
LEE OF TEXAS

The Acting CHAIR. The unfinished  
business is the demand for a recorded  
vote on the amendment offered by the  
gentlewoman from Texas (Ms. JACKSON  
LEE) on which further proceedings were  
postponed and on which the noes pre-  
vailed by voice vote.

The Clerk will redesignate the  
amendment.

The Clerk redesignated the amend-  
ment.

ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR (during the vote). There is 1 minute remaining.

□ 1653

So the amendment was rejected.

The result of the vote was announced as above recorded.

The Acting CHAIR (Mr. WEST). There being no further amendments, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. WOMACK) having assumed the chair, Mr. WEST, Acting Chair of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 10) to amend chapter 8 of title 5, United States Code, to provide that major rules of the executive branch shall have no force or effect unless a joint resolution of approval is enacted into law, and, pursuant to House Resolution 479, reported the bill, as amended by that resolution, back to the House with a further amendment adopted in the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT

Ms. DELAURO. Mr. Speaker, I have a motion to recommit at the desk.

The SPEAKER pro tempore. Is the gentlewoman opposed to the bill?

Ms. DELAURO. I am opposed in its current form.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Ms. DELAURO moves to recommit the bill H.R. 10 to the Committee on the Judiciary with instructions to report the same back to the House forthwith, with the following amendment:

Page 45, line 22, insert after the first period the following:

**“§ 808. Protection of Food Safety and Consumer's Right to Know through Country-of-Origin Labeling**

“Sections 801 through 807 of this chapter, as amended by the Regulations from the Executive in Need of Scrutiny Act of 2011 shall not apply in the case of any rule regarding country of origin labeling. This chapter, as in effect before the enactment of the Regulations from the Executive in Need of Scrutiny Act of 2011, shall continue to apply, after such enactment, to any such rule, as appropriate.”.

The SPEAKER pro tempore. The gentlewoman from Connecticut is recognized for 5 minutes.

Ms. DELAURO. Mr. Speaker, I rise to offer a motion that would exempt country of origin labeling from the regulations affected by this legislation. This is the final amendment to the bill, which will not kill it or send it back to

committee. Instead, we will move to final passage on the bill, as amended.

We have had a heated debate over this act. I have very strong concerns about it. But however one feels about the legislation before us, we should all be able to agree on fundamental principles.

First, that it is the responsibility of this institution and of government to see that the health and the safety of American families are protected. This includes protecting Americans from unsafe and contaminated food. And, second, the consumer should be able to know where the food and products they buy come from so that they can make informed decisions about their purchases, as they should be able to in a free market.

That is what country of origin labeling does, and it is why my final amendment simply exempts country of origin labeling from the underlying bill before us. It gives us an opportunity to come together in a bipartisan way to protect the health and safety of our constituents and to give the American public the information they need and clearly want to make informed decisions for their families.

More than 40 other countries we trade with have a country of origin labeling system in place, and the majority of American consumers continue to support country of origin labeling.

We know that food-borne illnesses are a major public health threat. They account for roughly 48 million illnesses, 100,000 hospitalizations and over 3,000 deaths in this country every year. Every year one in every six Americans become sick from the food that they eat. Our youngest and oldest Americans are the most vulnerable to these illnesses, and right now roughly 80 percent of the seafood and 60 percent of the fruits and vegetables consumed in the United States have been produced outside our borders.

Amid all this imported food, our ability to ensure that food products are safe and not contaminated is dwindling. The FDA inspects less than 2 percent of the imported food in its jurisdiction. Yet, 70 percent of the apple juice we drink was produced in China, roughly 90 percent of the shrimp that we eat was produced outside of the United States. Across this 2 percent, the FDA finds a frighteningly large number of shipments with dangerous food safety violations, including the presence of pathogens and chemical contamination.

Families should be able to know where their food is coming from. Just this morning, a Japanese food producer announced the recall of 400,000 cans of infant formula after traces of radioactive cesium were found in the company's milk powder. And after the Fukushima disaster earlier this year, Americans were concerned about the safety of seafood imports.

I do not want to single out any one country. Sadly, food-borne disease outbreaks are frighteningly normal, both here and abroad. We recently experienced a listeria outbreak in cantaloupes which sickened at least 139 people and killed 29 more. Germany saw an E. coli crisis this summer that killed dozens and sickened thousands. In 2010, we saw a salmonella outbreak in crushed pepper that sickened 272 people, and another salmonella outbreak that resulted in the recall of over half a billion eggs and almost 2,000 Americans becoming ill.

Country of origin labeling does not lead to American job losses or bankrupt the food industry; it simply lets consumers know where their food comes from.

That is particularly important in this economy, when not only food inspectors, but food producers are stretched thin. Consumers should be able to know when they are buying foods that were grown, raised, or produced right here in America.

□ 1700

They have the right to know where their food was produced and to make their own choices about the food that they buy.

In the past, there has been a bipartisan consensus that country-of-origin labeling is a good idea, that it keeps families safe, and that it supports American farmers. In fact, the chairman, my counterpart on the Labor-HHS-Education Appropriations Subcommittee, Congressman REHBERG of Montana, has been a leader in ensuring strong country-of-origin labeling. We should continue that bipartisan commitment today. Exempt country-of-origin labeling from the REINS Act.

I urge my colleagues to stand up for public health, consumers' right to know, and American businesses. Support this final amendment.

Mr. DAVIS of Kentucky. Mr. Speaker, I rise in opposition to the motion to recommit.

The SPEAKER pro tempore. The gentleman is recognized for 5 minutes.

Mr. DAVIS of Kentucky. Mr. Speaker, this motion is a distraction. It misses the point of this legislation entirely. We are here today to restore accountability for the regulations with the biggest impact on our economy.

Good, bad or ugly—and our regulatory code includes all three—Congress should be accountable for regulations that cost the American people \$100 million or more annually.

The REINS Act simply says that Congress must vote on these regulations, these major rules, before they can be enforced on the American people. Essentially, this motion to recommit repeats part of an exclusion already attempted in the McCarthy amendment that the House just voted down. It's purely a political motion.

The REINS Act has been the subject of two hearings and a markup in the Judiciary Committee and was subject to an additional markup in the Rules Committee. Today, we have had a robust debate on the bill and seven amendments, five of which were offered by colleagues in the minority.

Congress has a bipartisan bad habit writing vague legislation that sounds nice, but leaves the dirty work to unelected bureaucrats in administrative agencies. This practice has allowed the Congress to claim credit for popular aspects of laws, and blame regulatory agencies for increased costs or the otherwise negative effects of the regulations.

Agencies are also starting to bypass Congress by writing regulations that stretch the bounds of their delegated authorities. The administration has declared an intent to pursue their agenda by pushing items they could not get through Congress through regulatory actions instead. Indeed, laws they could not pass in Democratic supermajorities in the last Congress are now being attempted, against the will of the Congress, to be implemented by regulation.

What we have proposed in the REINS Act is very simple: Congress should at the very least be accountable for regulations with \$100 million of annual economic impact or more. These rules are classified by the administration as major rules.

The REINS Act is not anti-regulation, and it is not pro-regulation. What we're saying is let's have a transparent and accountable process for implementing new regulations.

According to a recent Gallup Poll, small business owners cited complying with government regulation as the biggest problem facing them today. Public Notice did a poll recently that found that a majority of Americans believe Congress should approve regulations before they can be enforced.

Our economy is struggling to recover, and more than 13 million Americans are still out of work. Congress needs to do a much better job of creating a pro-growth environment that increases our competitiveness and rewards entrepreneurship and ingenuity.

Everyone agrees that regulations can have a significant and detrimental impact on jobs and our economy. Even President Obama described regulations that stifle innovation and have a chilling effect on growth and jobs in an op-ed for The Wall Street Journal earlier this year.

The REINS Act lays down a marker to say that Congress should be directly accountable for the most expensive regulations that could stifle innovation and have a chilling effect on growth and jobs.

In the words of the great Speaker from Cincinnati, Ohio, Nicholas Longworth, I ask all of my colleagues to

strike a blow for liberty, to vote for accountability. I oppose the motion to recommit. Vote against the motion to recommit. Support the REINS Act.

I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

#### RECORDED VOTE

Ms. DELAURO. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for any electronic vote on the question of passage.

The vote was taken by electronic device, and there were—ayes 183, noes 235, not voting 15, as follows:

## NOT VOTING—8

Bachmann	Giffords	Nadler
Castor (FL)	Hinchey	Young (FL)
Diaz-Balart	Myrick	

□ 1730

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1633, FARM DUST REGULATION PREVENTION ACT OF 2011

Mr. WEBSTER, from the Committee on Rules, submitted a privileged report (Rept. No. 112-317) on the resolution (H. Res. 487) providing for consideration of the bill (H.R. 1633) to establish a temporary prohibition against revising any national ambient air quality standard applicable to coarse particulate matter, to limit Federal regulation of nuisance dust in areas in which such dust is regulated under State, tribal, or local law, and for other purposes, which was referred to the House Calendar and ordered to be printed.

## HOUR OF MEETING ON TOMORROW

Mr. WEBSTER. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 9 a.m. tomorrow.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

## ELECTING A MEMBER TO A CERTAIN STANDING COMMITTEE OF THE HOUSE OF REPRESENTATIVES

Mr. BECERRA. Mr. Speaker, by direction of the Democratic Caucus, I offer a privileged resolution and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 486

*Resolved*, That the following named Member be and is hereby elected to the following standing committee of the House of Representatives:

COMMITTEE ON THE JUDICIARY.—Mr. Polis.

Mr. BECERRA (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. RENACCI). Is there objection to the request of the gentleman from California?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on the motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote incurs objection under clause 6 of rule XX.

Any record vote on the postponed question will be taken later.

## SYNTHETIC DRUG CONTROL ACT OF 2011

Mr. PITTS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1254) to amend the Controlled Substances Act to place synthetic drugs in Schedule I, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1254

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

### SECTION 1. SHORT TITLE.

*This Act may be cited as the "Synthetic Drug Control Act of 2011".*

### SEC. 2. ADDITION OF SYNTHETIC DRUGS TO SCHEDULE I OF THE CONTROLLED SUBSTANCES ACT.

(a) CANNABIMIMETIC AGENTS.—Schedule I, as set forth in section 202(c) of the Controlled Substances Act (21 U.S.C. 812(c)) is amended by adding at the end the following:

"(d)(1) *Unless specifically exempted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of cannabimimetic agents, or which contains their salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation.*

"(2) *In paragraph (1):*

"(A) *The term 'cannabimimetic agents' means any substance that is a cannabinoid receptor type 1 (CB1 receptor) agonist as demonstrated by binding studies and functional assays within any of the following structural classes:*

"(i) *2-(3-hydroxycyclohexyl)phenol with substitution at the 5-position of the phenolic ring by alkyl or alkenyl, whether or not substituted on the cyclohexyl ring to any extent.*

"(ii) *3-(1-naphthoyl)indole or 3-(1-naphthylmethane)indole by substitution at the nitrogen atom of the indole ring, whether or not further substituted on the indole ring to any extent, whether or not substituted on the naphthoyl or naphthyl ring to any extent.*

"(iii) *3-(1-naphthoyl)pyrrole by substitution at the nitrogen atom of the pyrrole ring, whether or not further substituted in the pyrrole ring to any extent, whether or not substituted on the naphthoyl ring to any extent.*

"(iv) *1-(1-naphthylmethylene)indene by substitution of the 3-position of the indene ring, whether or not further substituted in the indene ring to any extent, whether or not substituted on the naphthyl ring to any extent.*

"(v) *3-phenylacetylindole or 3-benzoylindole by substitution at the nitrogen atom of the indole ring, whether or not further substituted in the indole ring to any extent, whether or not substituted on the phenyl ring to any extent.*

"(B) *Such term includes—*

"(i) *5-(1,1-dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol (CP-47,497);*

"(ii) *5-(1,1-dimethyloctyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol (cannabicyclohexanol or CP-47,497 C8-homolog);*

"(iii) *1-pentyl-3-(1-naphthoyl)indole (JWH-018 and AM678);*

"(iv) *1-butyl-3-(1-naphthoyl)indole (JWH-073);*

"(v) *1-hexyl-3-(1-naphthoyl)indole (JWH-019);*

"(vi) *1-[2-(4-morpholinyl)ethyl]-3-(1-naphthoyl)indole (JWH-200);*

"(vii) *1-pentyl-3-(2-methoxyphenylacetyl)indole (JWH-250);*

"(viii) *1-pentyl-3-[1-(4-methoxynaphthoyl)indole (JWH-081);*

"(ix) *1-pentyl-3-(4-methyl-1-naphthoyl)indole (JWH-122);*

"(x) *1-pentyl-3-(4-chloro-1-naphthoyl)indole (JWH-398);*

“(xi) 1-(5-fluoropentyl)-3-(1-naphthoyl)indole (AM2201);

“(xii) 1-(5-fluoropentyl)-3-(2-iodobenzoyl)indole (AM694);

“(xiii) 1-pentyl-3-[(4-methoxy)-benzoyl]indole (SR-19 and RCS-4);

“(xiv) 1-cyclohexylethyl-3-(2-methoxyphenylacetyl)indole (SR-18 and RCS-8); and

“(xv) 1-pentyl-3-(2-chlorophenylacetyl)indole (JWH-203).”

(b) *OTHER DRUGS.*—Schedule I of section 202(c) of the Controlled Substances Act (21 U.S.C. 812(c)) is amended in subsection (c) by adding at the end the following:

“(18) 4-methylmethcathinone (Mephedrone).

“(19) 3,4-methylenedioxypropylvalerone (MDPV).

“(20) 3,4-methylenedioxyethylmethcathinone (methylo).

“(21) Naphthylpyrrolidone (naphyrone).

“(22) 4-fluoromethcathinone (fephedrone).

“(23) 4-methoxymethcathinone (methedrone; Bk-PMMA).

“(24) Ethcathinone (N-Ethylcathinone).

“(25) 3,4-methylenedioxyethylcathinone (ethylone).

“(26) Beta-keto-N-methyl-3,4-benzodioxolylbutanamine (butylone).

“(27) N,N-dimethylcathinone (metamfepramone).

“(28) Alpha-pyrrolidinopropiophenone (alpha-PPP).

“(29) 4-methoxy-alpha-pyrrolidinopropiophenone (MOPPP).

“(30) 3,4-methylenedioxy-alpha-pyrrolidinopropiophenone (MDPPP).

“(31) Alpha-pyrrolidinovalerophenone (alpha-PVP).

“(32) 6,7-dihydro-5H-indeno-(5,6-d)-1,3-dioxol-6-amine (MDA1).

“(33) 3-fluoromethcathinone.

“(34) 4-Methyl- $\alpha$ -pyrrolidinobutylphenone (MPBP).”

### SEC. 3. TEMPORARY SCHEDULING TO AVOID IMMINENT HAZARDS TO PUBLIC SAFETY EXPANSION.

Section 201(h)(2) of the Controlled Substances Act (21 U.S.C. 811(h)(2)) is amended—

(1) by striking “one year” and inserting “2 years”; and

(2) by striking “six months” and inserting “1 year”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Pennsylvania (Mr. PITTS) and the gentleman from New Jersey (Mr. PALLONE) each will control 20 minutes.

The Chair recognizes the gentleman from Pennsylvania.

#### GENERAL LEAVE

Mr. PITTS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous materials in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. PITTS. Mr. Speaker, I yield myself such time as I may consume.

H.R. 1254 was introduced by my friend and colleague from Pennsylvania, Representative CHARLIE DENT, in response to a frightening trend of synthetic drug use in our communities. These synthetic drug substitutes, made from chemical compounds that are sold legally in most States, mimic the hal-

lucinogenic and stimulant properties of drugs like marijuana, cocaine, and methamphetamines. While these synthetic drugs are just as dangerous as their traditional counterparts, they are not illegal.

Many families and young people in our communities do not realize the destructiveness of these synthetic drugs because of their legal status and their wide availability and often harmless-sounding names such as “Bath Salts” and “Plant Food,” both cocaine substitutes.

H.R. 1254 would, first, ban synthetic drugs that imitate marijuana, cocaine, and methamphetamines; and, second, allow the Drug Enforcement Administration to temporarily schedule a new substance for up to 3 years. Currently, DEA can only temporarily schedule a substance for up to 18 months.

I would like to thank Congressman DENT for working with the DEA on this important issue, and I would urge my colleagues to support this common-sense and bipartisanly supported legislation.

I reserve the balance of my time.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

I am pleased to support H.R. 1254, the Synthetic Drug Control Act. This bill enjoys bipartisan support and is aimed to eliminate commercial availability of harmful synthetic narcotics. Under this proposal, hallucinogenic drugs would no longer be able to hide behind misleading aliases.

During committee consideration, I was quite alarmed to hear some of the stories shared by the bill's sponsor, Representative CHARLIE DENT, as well as other Members. Around the country, constituents have been able to utilize synthetic products to the detriment of their mental and physical health and, in some cases, costing them their lives.

Unfortunately, these imitation drugs are not illegal, and there is a critical need to strengthen the Federal Government's ability to keep these harmful and dangerous drugs off the street. The Synthetic Drug Control Act adds specific synthetic versions of drugs of abuse to Schedule I of the Controlled Substances Act. These designer drugs mimic some of the effects of drugs such as marijuana and can be very unsafe, causing convulsions, anxiety attacks, and dangerously elevated heart rates, among other conditions.

Under current authority, the Drug Enforcement Agency has difficulty taking action against these drugs because they've been designed to fall outside existing statutory descriptions of Schedule I drugs. H.R. 1254 will enable the Drug Enforcement Agency to take appropriate enforcement actions to get them off the street and away from our Nation's youth.

Mr. Speaker, I urge my colleagues to vote in support of this legislation, and I hope the way we work together on it

can prove a model for our efforts on future legislation.

I reserve the balance of my time, Mr. Speaker.

Mr. PITTS. I yield 5 minutes to the prime sponsor of the legislation, the gentleman from Pennsylvania (Mr. DENT).

Mr. DENT. I certainly appreciate the support of Mr. PITTS and Mr. PALLONE for their leadership on this issue. It's deeply appreciated.

This issue of synthetic or designer drugs was first brought to my attention by a woman, a mother in my district whose son had been abusing legal substitutes for marijuana. These synthetic cannabinoids, as they're referred to, or synthetic marijuana, affect the brain in a manner similar to marijuana, but can actually be even much more harmful.

Synthetic marijuana, or cannabinoids, are just one category of designer drugs. Even more potent substances have properties similar to cocaine, methamphetamine, LSD, and other hard street drugs. These substances are marketed as innocent products like bath salts, plant food, incense, and they're sold under brand names familiar to their users, such as K2 Spice, Vanilla Sky, or Ivory Wave. However, these are total misnomers designed to facilitate their legal sale. These drugs have no legitimate purpose, period.

H.R. 1254, the Synthetic Drug Control Act, drafted in consultation with Federal law enforcement, has three principal components:

First, a prohibition of broad structural classes of synthetic marijuana or the cannabinoids;

Two, a prohibition of synthetic stimulants and other designer drugs, such as bath salts, mephedrone, MDPV, C2E, et cetera, several of those;

Third, an expansion of the DEA's existing authority to temporarily ban a new substance from 1½ to 3 years. Under current law, if the DEA and Department of Health and Human Services can prove that a substance is, one, dangerous and, two, lacking legitimate value while it is temporarily banned, the prohibition will become permanent.

Over the past year there's been a sharp increase in the number of new reports detailing horrific stories of individuals high on synthetic drugs. A man in Scranton, Pennsylvania, stabbed a priest, and another jumped out a three-story window, both high on bath salts. Several deaths from West Virginia to Florida to Pennsylvania to Iowa have been attributed to abuse of synthetic drugs.

Senator CHUCK GRASSLEY of Iowa has introduced a companion bill with provisions very similar to H.R. 1254, named after one of his young constituents who tragically took his own life while high on synthetic marijuana.

□ 1740

A man in my district was arrested this past May for firing a gun out of his window in a university neighborhood. Police charges indicate that he injected himself with bath salts, and he later told police he thought there were people on the roof watching him.

Finally, I was approached by another distraught mother from my district whose son was hospitalized for over 2 weeks after suffering liver failure and other complications after injecting himself with bath salts. These substances pose a substantial risk, both to the physical health of the user as well as to the safety of those around them when these drugs contribute to dangerous, psychotic behavior, suicide, and public endangerment.

The fact that these drugs are legal in many States contributes to the misconception that they are safe. And the use of easily recognizable brand names and logos on the packaging promotes the concept of a consistent product.

Significant variations of potency from one unit to the next have led recurrent users to inadvertently overdose. One of the major difficulties in combating these designer drugs is the ability of the producers to skirt the law with different chemical variations. By modifying the formula in some minor way, producers can generate a new compound which circumvents legal prohibitions but has similar narcotic events. DEA needs enhanced authority to temporarily schedule new variations when they hit the market, and they usually hit Europe first, and then they enter the United States.

A growing number of States, including Pennsylvania, have enacted bans on many forms of synthetic drugs, but Federal action is necessary to prevent these drugs from being obtained by simply crossing State lines or, increasingly, ordering them over the Internet.

I believe over 30 States have passed bans, if my memory serves me correctly. State-by-State differences in which individual substances are controlled and how strongly makes for a confusing legal patchwork, and Federal legislation certainly will facilitate enforcement.

The U.S. Department of Justice announced its support of H.R. 1254 as amended by the House Judiciary Committee in a letter dated September 30, 2011, and I would submit that for the RECORD.

I also want to point out, too, that the American College of Emergency Physicians, which notes the devastating physical and psychotic effects of these drugs, has also endorsed this bill, and I think that's quite significant as well.

Finally, go to a hospital like Children's Hospital of Philadelphia—they'll tell you they get a case every day with individuals who are suffering from these particular drugs. A year ago at this time, they probably got no calls.

And now every day, and that's not just typical in Philadelphia but throughout the country. I urge my colleagues to support this legislation.

You will also hear some folks here today who might actually argue that medical research will somehow be impeded. Nothing could be further from the truth. This legislation does not in any way impede medical research. I would be happy to get into that at some point.

U.S. DEPARTMENT OF JUSTICE,  
OFFICE OF LEGISLATIVE AFFAIRS,  
Washington, DC, September 30, 2011.

Hon. F. JAMES SENSENBRENNER, JR.,  
Subcommittee on Crime, Terrorism, and Homeland Security, Committee on the Judiciary,  
House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN. This letter provides the Department of Justice's views on H.R. 1254, as amended by the Committee on Energy and Commerce, titled the "Synthetic Drug Control Act of 2011." The bill would amend the Controlled Substances Act (CSA) to address the growing use and misuse of synthetic drugs by placing a number of substances in schedule I and by extending the length of time that a drug may be temporarily placed in schedule I.

We support the bill as drafted, but believe it can be strengthened with the addition of the "2C family" of drugs listed in an appendix to this letter and in S. 839. The Department also supports the goals of S. 605, Dangerous Synthetic Drug Control Act of 2011 or the "David Mitchell Rozga Act"; S. 839, Combating Designer Drugs Act of 2011; and S. 409, Combating Dangerous Synthetic Stimulants Act of 2011. H.R. 1254 already contains many provisions included in S. 605 and S. 409, and we urge that the bill be expanded to include the provisions of S. 839.

#### THE THREAT OF SYNTHETIC DRUGS

In recent years, a growing number of dangerous products have been introduced into the U.S. marketplace. Products labeled as "herbal incense" have become increasingly popular, especially among teens and young adults. These products consist of plant materials laced with synthetic cannabinoids which, when smoked, mimic the deleterious effects of delta-9- tetrahydrocannabinols (THC), the principal psychoactive constituent in marijuana. To underscore the scope and breadth of the synthetic cannabinoid problem, a recent report prepared by the United Nations Office on Drugs and Crime (UNODC) notes that more than 100 such substances have been synthesized and identified to date."

There is also growing evidence demonstrating the abuse of a number of substances labeled as "bath salts" or "plant foods" which, when ingested, snorted, smoked, inhaled, or injected, produce stimulant and other psychoactive effects. These synthetic stimulants are based on a variety of compounds and are purported to be alternatives to the controlled substances cocaine, amphetamine, and Ecstasy (MDMA). These drugs have been distributed and abused in Europe for several years and have since appeared here in the United States. According to a recent National Drug Intelligence Center report, poison control centers and medical professionals around the country have reported an increase in the number of individuals suffering adverse physical effects associated with abuse of these drugs.

There are other newly developed drugs that also pose a significant threat to the

public. This includes the "2C family" of drugs (dimethoxyphenethylamines), which are generally referred to as synthetic psychedelics/hallucinogens. Recently, a 19-year-old male in Minnesota died of cardiac arrest after allegedly ingesting 2C-E, one of the substances within this class of drugs. We note that the 2C substances listed in the attached Appendix are included in the list of substances covered by S. 839. The Department supports the addition of the 2C family of substances listed in the Appendix to H.R. 1254.

Products containing synthetic drugs are dangerous and represent a growing challenge to law enforcement. Apart from the wide array of harmful or even lethal side effects of many of the listed substances, neither the products nor their active ingredients have been approved by the Food and Drug Administration for use in medical treatment, and manufacturers and retailers of the products containing these substances do not disclose that there are synthetic drugs in their products. Synthetic drug abusers may endanger not only themselves but others: some become violent when under the influence of these substances, and abusers who operate motor vehicles after using synthetic drugs likely present similar dangers as those under the influence of controlled substances.

With the exception of the five substances recently controlled by the Drug Enforcement Administration (DEA) pursuant to its temporary scheduling authority, the listed synthetic cannabinoids and synthetic stimulants are not currently in any schedule under the CSA.

#### EFFORTS TO CONTROL SYNTHETIC DRUGS

Congress created an interagency process for placing new and emerging drugs into one of five schedules of the CSA (21 U.S.C. 811 et seq.). One such mechanism, temporary scheduling (21 U.S.C. 811(h)), was specifically designed to enable the Department to act in an expeditious manner if such action is necessary to avoid an imminent hazard to the public safety. In response to the growing threat posed by known synthetic cannabinoids, on March 1, 2011, the DEA temporarily placed the following five synthetic cannabinoids in schedule I: JWH-018, JWH-073, JWH-200, CP-47, 497, and CP-47, 497 C8 homologue.

The DEA is currently gathering scientific data and other information about synthetic cathinones as well as evaluating their psychoactive effects to support administrative action to schedule these substances under the CSA. To temporarily schedule these stimulants, the DEA must find that placement in schedule I is necessary to avoid an imminent hazard to the public safety, a finding that requires the DEA to consider the following three factors: history and current pattern of abuse; the scope, duration, and significance of abuse; and what, if any, risk there is to the public health, including actual abuse; diversion from legitimate channels; and clandestine importation, manufacture, or distribution. Once data have been gathered to meet the statutory criteria to temporarily schedule these cathinones, the Department will initiate an action to temporarily place them into schedule I. In fact, on September 8, 2011, the DEA published a notice of intent in the Federal Register (21 FR 55616) to temporarily place mephedrone, methylone and MDPV in schedule I.

Unfortunately, however, the distribution and abuse of synthetic drugs cannot be fully addressed by temporary scheduling because as law enforcement investigates, researches,

and develops evidence to support such action, illicit drug makers create new synthetic drugs for the purpose of evading federal law. Scheduling via legislation is an additional tool to promote public health and safety.

#### PURPOSE OF LEGISLATION

Placing synthetic cannabinoid and synthetic stimulant substances in schedule I would expose those who manufacture, distribute, possess, import, and export synthetic drugs without proper authority to the full spectrum of criminal, civil, and administrative penalties, sanctions, and regulatory controls. Unless authorized by the DEA, the manufacture and distribution of these substances, and possession with intent to manufacture or distribute them, would be a violation of the CSA and/or the Controlled Substances Import and Export Act.

H.R. 1254, as well as S. 409, would amend the CSA by expanding the list of substances in schedule I of the CSA (21 U.S.C. 812(c)). To address synthetic cannabinoid abuse, the bill names 15 unique substances that would be placed in schedule I; this list includes those temporarily scheduled by the DEA. Additionally, the bill creates five structural classes of substances collectively referred to as "cannabinimetic agents." In order for a substance to be a cannabinimetic agent, the substance must: (1) bind to the CB1 receptor; and (2) meet any of the definitions for those structural classes. If both criteria are met, that substance will be a schedule I cannabinimetic agent controlled substance.

To address emerging synthetic stimulant abuse, H.R. 1254 names 17 unique substances that would be placed in schedule I. These substances have either been encountered by law enforcement here in the United States or are most likely to be encountered by law enforcement in the United States based on their use and misuse in Europe, which is likely where the use and misuse originated.

Finally, the bill seeks to double the amount of time allowed for the Department to temporarily schedule new and emerging drugs by amending 21 U.S.C. 811(h). In this regard, the bill seeks to enhance the tools available to the Department to combat the abuse of new drugs that will appear in the future.

For these reasons, the Justice Department supports H.R. 1254 and recommends that the Committee consider strengthening it in the ways we have proposed.

Thank you for the opportunity to present our views. The Office of Management and Budget has advised us that from the perspective of the Administration's program, there is no objection to the submission of this letter.

Sincerely,

RONALD WEICH,  
Assistant Attorney General.

#### APPENDIX

Additional Synthetic Drugs for Inclusion in section 202(c) of the Controlled Substances Act (21 U.S.C. 812(c)):

Redline of H.R. 1254, as amended by Energy and Commerce on July 28, 2011—

“(35) 2-(2,5-Dimethoxy-4-ethylphenyl)ethanamine (2C-E).”

(36) 2-(2,5-Dimethoxy-4-methylphenyl)ethanamine (2C-D).

(37) 2-(4-Chloro-2,5-dimethoxyphenyl)ethanamine (2C-C).

(38) 2-(4-Iodo-2,5-dimethoxyphenyl)ethanamine (2C-I).

(39) 2-[4-(Ethylthio)-2,5-dimethoxyphenyl]ethanamine (2C-T-2).

(40) 2-[4-(Isopropylthio)-2,5-dimethoxyphenyl]

-[ethanamine (2C-T-4).

(41) 2-(2,5-Dimethoxyphenyl)ethanamine (2C-H).

(42) 2-(2,5-Dimethoxy-4-nitro-phenyl)ethanamine (2C-N).

(43) 2-(2,5-Dimethoxy-4-(n)-propylphenyl)ethanamine (2C-P).”

Mr. PALLONE. Mr. Speaker, I yield 1 minute to the gentleman from Maine (Mr. MICHAUD).

Mr. MICHAUD. I thank the gentleman for yielding.

Mr. Speaker, I rise today as a cosponsor and a strong supporter of this bill. The spread of synthetic drugs like bath salts has quickly reached crisis levels in many communities throughout our country. This year in Maine, the Bangor Police Department has responded to hundreds of bath salts-related incidents.

In October, I organized a meeting of local, county, State, and Federal law enforcement officials to discuss the spread of bath salts in our State. The message they shared with me was clear, and the message they shared with the ONDCP Deputy Director Ben Tucker was also clear: We need to give our law enforcement officers more tools to combat this epidemic.

While Maine has banned bath salts, a national law will build upon that good work and help make this a bigger impact all across the country. So I urge my colleagues to support the Synthetic Drug Act.

Mr. PITTS. Mr. Speaker, I yield 2 minutes to the gentlelady from Florida, Congresswoman SANDY ADAMS, who was formerly in law enforcement.

Mrs. ADAMS. Thank you, Congressman PITTS.

Mr. Speaker, in October 2010, a 31-year-old Texas man hanged himself in the bedroom. At the top of his suicide note the man wrote, “Thanks, bath salts.”

January 2011 in Panama City, Florida, a daughter tried to attack her sleeping mother with a machete before fleeing the scene. Police said she had spent several days taking drug-altered bath salts.

June, 2011, a 38-year-old Army sergeant murdered his wife and killed himself following a police chase. Both had chemically altered bath salts in their systems. Later in the day, the couple's 5-year-old son was found dead with a plastic bag over his head and bruises on his body.

Horrific cases just like these have been documented across the country. These incidents led many States, including my home State of Florida, to outlaw these often dangerous and deadly substances.

Earlier this year, I introduced legislation to add MDPV and mephedrone, chemicals added to bath salts to induce a drug high, to Schedule I of the Controlled Substances Act. These substances are not marketed for human consumption.

It also is why I have joined Representative CHARLIE DENT in his work

to bring H.R. 1254, which includes a bill I introduced in April, to the floor today. You have heard no research can be conducted if this passes, but those claims are false. It can be conducted. Research is being done and will continue to be done on Schedule I chemicals. Just listen to the ER doctors and the poison control centers that have both asked for this bill, that both want this bill to save lives.

Too many lives have been lost and too many violent acts have been already committed due to these drugs. These dangerous substances are being packaged and marketed to our children by using innocuous names like Ivory Snow, Bliss, and Vanilla Sky. Today I urge support for H.R. 1254. Let's get the substances off the streets and out of the hands of our children.

Mr. PALLONE. Mr. Speaker, I yield the balance of my time to the gentleman from Virginia (Mr. SCOTT), a member of the Committee on the Judiciary.

The SPEAKER pro tempore. Without objection, the gentleman from Virginia will control the time.

There was no objection.

Mr. SCOTT of Virginia. I thank the gentleman for yielding, and I yield myself 2½ minutes.

Mr. Speaker, this bill will place over 40 chemical compounds on Schedule I of the Controlled Substances Act at a time when only eight of these substances can even be found in the United States. And it does so in a way that circumvents the normal process, that skirts scheduling substances, and does so without any scientific or medical research or evidence to support it.

Congress has a process for placing substances on drug schedules. The Criminal Code sets forth a process that the Attorney General and the Secretary of Health and Human Services must engage in to determine the propriety of scheduling substances. The Secretary must conduct a scientific and medical evaluation and provide recommendations about whether the substances being analyzed need to be controlled. And this needs to be a scientific study, not a compilation of anecdotes.

In this there is a mechanism for addressing emergencies. In the case where the Attorney General on his own determines that there is an emergency, the Code provides that substances may be placed on Schedule I for up to 1½ years while the evidence is being developed to permanently schedule them.

Moreover, the Judiciary Committee during our consideration received numerous statements from pharmaceutical and medical researchers imploring us not to hamper their ability to determine possible medical uses of these substances by placing them on Schedule I, which makes it illegal to possess these substances without a permit even for research purposes.

This includes promising research on the cure for Parkinson's disease that would be compromised by this bill. Now, even with a permit, the restrictions placed on researchers once they are placed on Schedule I are unduly onerous. So there are legal uses of these substances.

Mr. Speaker, when Congress established a process for the Secretary and the Attorney General to do their due diligence and study the propriety of placing substances on Schedule I, we've had a very thoughtful process. And if we want to establish good crime policy, we need to follow that thoughtful process. H.R. 1254 circumvents that process. For these reasons, I urge a "no" vote on H.R. 1254.

I reserve the balance of my time.

□ 1750

Mr. PITTS. Mr. Speaker, I yield 4 minutes to the gentleman from Iowa, Congressman TOM LATHAM.

Mr. LATHAM. I thank the chairman and the ranking member for this opportunity today.

Mr. Speaker, I rise in support of H.R. 1254, the Synthetic Drug Control Act. This bill addresses an alarming danger to our kids that many American families may not be aware of.

Many American teenagers are experimenting with synthetic drugs that supposedly mimic the effects of marijuana or other types of drugs. These products, known as K2, Pure Evil, Cloud Nine, and other names, can often be bought legally at convenience stores or at so-called "head shops" where they're passed off as incense or bath salts. In reality, the users of these substances can experience unexpected anxiety attacks, extreme paranoia, hallucinations, and thoughts of suicide; and the users are at serious risk of harming themselves.

Our experience with this issue in the State of Iowa illustrates why a Federal ban on these dangerous substances is so important. A year and a half ago yesterday, 18-year-old David Rozga, from Indianola, Iowa, shot himself after taking K2. In response to the tragedy, David's parents, Mike and Jan, have led a campaign to outlaw synthetic drugs like K2. They testified before Congress about the dangers of the drug and enlisted the help of their elected Representatives in cracking down on the sale and abuse of these substances.

My colleagues, we must act on this issue to protect our kids. And the time is now. The threat posed by synthetic drugs is dangerous, and it's growing. In the past 2 weeks alone, there have been several cases where teens have been injured or hospitalized after taking synthetic drugs. In Polk County, three teens were involved in a high-speed crash after smoking one of these substances. In central Iowa, a teenage boy was hospitalized after taking synthetic

drugs. He became violently ill—having seizures, vomiting, and hallucinations.

I really want to thank the Rozga family for their selfless willingness to relive the tragedy they've experienced, and I want to thank them for their efforts to prevent other families from experiencing the same heartbreak. This legislation and other efforts to address this threat to our children would simply not have occurred without the Rozgas' courage, strength, and leadership.

I am heartened today that Congress has listened to their message and is taking action. It is time to recognize how dangerous these substances are and to ban their sale in the United States by clarifying their status as Schedule I controlled substances. As a cosponsor of H.R. 1254, I urge my colleagues to support the passage of this most important piece of legislation.

Mr. SCOTT of Virginia. Mr. Speaker, I yield 2 minutes to the gentlelady from California (Ms. ZOE LOFGREN).

Ms. ZOE LOFGREN of California. We are all opposed to the damage that these drugs can do to the American people, but I have to express my opposition to this bill.

My concern about the bill is its effect on scientific research. When a drug is placed on Schedule I of the Controlled Substances Act, it becomes difficult to obtain not only for illegal purposes but for researchers who wish to study its pharmaceutical and medical potential. While this may be justified for some drugs, it isn't a restriction that should be implemented rashly. That's because it becomes very difficult for scientists to get permission to obtain these molecules even for the scientific study that we need.

For example, in the United States, only 325 researchers have been able to obtain Schedule I licenses at this moment. Congress established the procedure for scheduling drugs, and it requires a scientific and medical evaluation. This bill would bypass that process rather than relying on scientific and medical experts. I've heard from faculty from a range of universities, and they've shared their concerns about the impact.

Here is what Warren Heideman, Ph.D., professor of pharmaceutical sciences and associate dean for Research, School of Pharmacy, at the University of Wisconsin-Madison writes:

"The bill is an irrational, simplistic response to a social problem of great complexity. As such, the world will get significantly less medical and technical help with a low probability of helping anyone with a substance abuse issue. The list is too broad and does seriously restrict what would otherwise be important and easy experiments. Paperwork problems are already a serious campus concern."

The SPEAKER pro tempore. The time of the gentlewoman has expired.

Mr. SCOTT of Virginia. I yield the gentlelady an additional minute.

Ms. ZOE LOFGREN of California. Here is what Dr. Neal Benowitz, M.D., the chief of the Division of Clinical Pharmacology at the University of California, San Francisco, writes:

"While we support restrictions on the sale of these chemicals for purposes of illicit use . . . scheduling so as to impede access to precursor chemicals in small quantities has the potential to seriously hamper medical research. On balance, the faculty are against this measure."

John Arnold, the faculty director of the Berkeley Center for Green Chemistry, writes:

"This effort is well-intentioned, but it will cause more problems than it solves."

We are all against drugs that harm our people; but we had no hearings in the Judiciary Committee on this, and I think the placing of these molecules on Schedule I is evidence of that lack of scholarship. These drugs need to be controlled, but they need to be controlled in such a way that there is no harm done to the vital scientific and medical research that we count on.

I join the gentleman from Virginia in urging a "no" vote on this bill in the hopes that we can come back with a measure that accomplishes the worthy goals without doing damage to scientific research, which will save so many lives.

Mr. PITTS. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania, a former prosecutor, Congressman PAT MEEHAN.

Mr. MEEHAN. I rise in support of H.R. 1254 for the very practical reason that, as a prosecutor, I have seen the impact of what can be done when children are lured into the false promise, into the sense that somehow, because it's synthetic, it doesn't present the same kind of danger as the drugs that are often believed to be the most dangerous—the heroins, the cocaines. These are luring kids into a false sense of security.

As has been suggested, this evidence isn't anecdotal. I have had the chance to visit an emergency department at one of the leading children's hospitals in the Nation where we have seen a dramatic rise in families who are being affected because their children are coming in and are under the control of these synthetic substances. For that reason, the American College of Emergency Physicians supports this bill.

Lastly, I think we have it backwards. If what we're trying to say is that somehow we've got to let these children be exposed while we wait with the potential that there could be research done, the fact of the matter is I have worked with pharmaceutical companies and with the DEA to be able to get access to drugs that have been held under control. That can be done in

working with the DEA. That's the solution. It's not the solution to put our kids at risk.

Mr. SCOTT of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Tennessee (Mr. COHEN).

Mr. COHEN. I appreciate the gentleman from Virginia for yielding the time.

I rise in opposition to this particular bill. It's not that I am, indeed, in favor of any of the particular drugs that are here; but just like Mrs. ADAMS, my colleague from Florida mentioned, the State of Florida has already criminalized it, as many States have, and it's really a State issue.

It seems interesting. When the subject du jour comes up, the item of the day, there is a rush to action and a rush to forget States' rights. There is a desire on gun bills to overlook the States and to have a Federal law on the interstate shipment of guns or on the interstate transportation of guns by people with permits. In this situation, drugs that should be criminalized are criminalized at the State level, but all of a sudden we're doing it more at the Federal level.

This bill would place more than 40 chemical compounds on Schedule I, the most punitive and restrictive schedule, without any independent scientific evidence that doing so is necessary or warranted. It is a rush to legislate before we know all the facts.

This bill essentially bans these substances without any study whatsoever. I've read the press reports of young people who have been harmed by these substances and by others, and I'm very sympathetic as that's certainly wrong; but we shouldn't legislate on the basis of anecdotal evidence. It's typical of the "shoot first and ask questions later" approach that we have taken to drug policy in this country for decades.

Our national drug policy should be driven by science, not politics. We've already gotten a well-deserved reputation here as a do-nothing Congress; but bills like this and our attitudes towards clean air, clean water, global climate change, and other environmental issues have made this the no-respect-for-science Congress as well.

□ 1800

The DEA has already taken steps to temporarily place certain synthetic substances on Schedule I while it conducts a review. If there is an emergency that requires temporarily scheduling the other substances in this bill, the DEA can review them and do that just as well.

But we shouldn't circumvent the process established in law. I don't think this is a responsible way to legislate. I know the sponsors of this bill know about the emergency review process because the bill doubles the length of time a bill can be put on emergency review on a schedule from

18 months to 3 years; it doubles it. Yet there's been no hearings or evidence that 18 months was insufficient, none whatsoever. It was just a knee-jerk way to respond to the issue du jour.

This is a very serious issue and deserves serious study and consideration before we act, as all bills before Congress should. I fear that this bill continues the misguided policies that we've created towards drugs in this country.

Just look at our experience with marijuana, which Congress placed on Schedule I in 1970. According to the criteria of the Controlled Substances Act, it supposedly has a high potential for abuse, has no currently accepted medical use in treatment in the United States, and there is a lack of accepted safety for use of the drug under medical supervision.

Let's put aside for a minute the question of whether it has a potential for abuse. Certainly there's a lot of evidence that it does not. But I think thousands of people who depend on marijuana to treat the effects of such diseases as AIDS, cancer, glaucoma, and multiple sclerosis would take issue with the notion that it has no medical use, and 15 or so States have legalized it for medical use. It increases appetite and eases pain in a way that has helped countless people in the last stages of life.

But we treat our approach to drugs as a law enforcement matter, not a scientific matter, and we've placed marijuana in Schedule I, the most restrictive schedule. Meanwhile, the scientific community is urging that we reschedule marijuana so we can continue to conduct important research and make it available to those in need.

Recently, the California Medical Association called for cannabis to be legalized and regulated, primarily so that scientists can gain access to it and conduct further research. They advocated wider clinical research with accountable and quality-controlled production of cannabis. None of this can happen with the tight restrictions we've placed on cannabis. That's exactly the situation we may find ourselves in with the substances named in this bill.

I know that licenses are available for research in the Schedule I drugs, but there's no reason to make researchers go through such hoops. It is nearly as easy to get permission to do research on a Schedule I drug as it would be to go to the Vatican and ask for a grant to study birth control.

We don't know what medical benefits these substances may contain and we don't know the true risk they pose. Perhaps they belong in a lower schedule. And Schedule II would certainly deter young people from using them and others and set a penalty stage. But we have no idea. We just decided to throw the book and make it Schedule I.

Perhaps they shouldn't be scheduled at all. I suspect they should be scheduled, maybe Schedule II. But the scientists should decide this and not politicians. We have no basis to believe they belong in Schedule I. Haven't we learned from this Nation's 40-year experiment with the war on drugs?

Prohibition does not work. It is an expensive and counterproductive policy that fills up our prisons and places a mark on our citizens that can make jobs, housing, and education nearly impossible to obtain. We should focus our efforts on educating young people about the substances and continue to do research about their benefits and risks.

Instead of basing our drug policy on science, we are letting it be driven by politics. This bill continues that trend, and regrettably I must urge its defeat. We need to send this bill back to committee and take a careful, considerable review so that we can have Congress make this decision on a scientific basis with help from the scientists.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. SCOTT of Virginia. I yield the gentleman 1 additional minute.

Mr. COHEN. The DEA can use its emergency powers to temporarily schedule these substances while letting the scientific process play out. Let's put science first and politics second. Let's defeat this bill.

If we put science first and politics second, maybe we won't be in single figures in the public's mind as an organization that they support as an institution. Part of the 9 percent level is because we do things sometimes in a rush to judgment and politics and the issue du jour rather than allowing the scientific process and doing what is logically best for our Nation to prevail.

I urge the defeat of this bill.

Mr. PITTS. Mr. Speaker, may I inquire how much time remains on each side?

The SPEAKER pro tempore. The gentleman from Pennsylvania has 6½ minutes remaining, and the gentleman from Virginia has 6 minutes remaining.

Mr. SCOTT of Virginia. Mr. Speaker, I tell my colleague that I am prepared to close.

Mr. PITTS. I yield 1 minute to the gentleman from Pennsylvania (Mr. MARINO), a former prosecutor.

Mr. MARINO. Thank you, Chairman.

Mr. Speaker, I recently coauthored a letter with my colleagues, Representative SANDY ADAMS and Representative TREY GOWDY, concerning this very issue, and I'd like to read just a paragraph:

"As of October 4, 2011, the DEA has 325 researchers conducting research with Schedule I controlled substances. These researchers include research centers and universities who seek to better understand the effects of Schedule I controlled substances. Additionally, as

of October 4, 2011, the DEA has 3,983 active registrants who manufacture, research, and conduct chemical analysis with Schedule I controlled substances.

"In fact, many researchers who would conduct research to better understand the compounds controlled in H.R. 1254 are already registered with the DEA, which means there would be virtually no impact on ongoing research."

Mr. Speaker, as a former prosecutor for 18 years at the State and local level, I have seen firsthand the disaster this drug causes.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. PITTS. I yield the gentleman an additional 30 seconds.

Mr. MARINO. I have seen firsthand what this drug does. If it doesn't kill our children, it makes them suicidal; it makes them incredibly violent.

And I still get calls, as a former prosecutor, from hospitals and emergency service personnel telling me the violence that a child under this influence causes, not only on him- or herself, but emergency personnel. Therefore, I ask my colleagues to support this legislation.

Mr. SCOTT of Virginia. Mr. Speaker, I had another speaker that arrived unexpectedly.

Mr. PITTS. I reserve the balance of my time.

Mr. SCOTT of Virginia. I yield 2 minutes to the gentleman from Illinois (Mr. DAVIS).

Mr. DAVIS of Illinois. I want to thank the gentleman from Virginia for yielding.

I rise in opposition to the proposed multistate mortgage settlement currently being negotiated between the country's major mortgage servicers and the State attorney generals.

Before we haphazardly rush into a settlement, we need to pause for what I call station identification, so to speak.

I'm speaking on the wrong bill.

But I also rise in opposition to the synthetic drug bill. I think there is not enough research. I think there's information still needed. I don't think that we are in a position to allow this action to take place, and so I join in opposition to passage of this legislation.

Mr. PITTS. I am prepared to close; so I continue to reserve the balance of my time.

Mr. SCOTT of Virginia. Mr. Speaker, in closing, this bill circumvents the normal thoughtful process for scheduling drugs. Most of the drugs in this bill can't even be found in the United States. And to the extent there is an emergency and a need to place these on a schedule, the Attorney General has the emergency process where he can just put a drug on the schedule for a year and a half.

Medical researchers have asked us not to pass the bill because it will dis-

turb promising research, particularly on Parkinson's disease, and so they have asked us not to pass this bill.

We should follow the thoughtful process for scheduling drugs and defeat this bill.

I yield back the balance of my time.

Mr. PITTS. Mr. Speaker, I yield the balance of my time to the prime sponsor of the bill, the gentleman from Pennsylvania (Mr. DENT).

Mr. DENT. I do want to address a few of the statements I heard on the floor from my friends from Tennessee and Virginia.

My friend from Tennessee made some comments, but I want to be very clear, these drugs are dangerous, have a high potential for abuse and no accepted medical use, which is why they belong on Schedule I. Schedules II and V are reserved for drugs used in legitimate medical procedures.

So we're talking about Schedule I here, not Schedules II through V. Let me be very clear on that point.

□ 1810

Second, the FDA has stated that the drugs listed in H.R. 1254 have no medical use, and there are no INDs—that is, investigational new drug applications—for these substances pending with the FDA. This is from the FDA. H.R. 1254 will not prevent further research into synthetic drugs. It's simply false to say that it will.

DEA has a routine, well-established procedure in place to facilitate scientific study of Schedule I drugs, including marijuana, cocaine, and heroin. Currently the DEA has licensed nearly 4,000 individuals and other entities, including universities, manufacturers, researchers, and labs to handle Schedule I drugs for scientific and investigational purposes. These are facts.

I also want to point out, my friend from Virginia made some comments about I guess eight compounds having been found in the United States. Actually, dozens of compounds have been found in the United States. Many bath salt chemicals currently are in the United States, but only three synthetic stimulants and five synthetic cannabinoids have been emergency scheduled by the DEA because they have to go chemical by chemical in order to act on this matter. They have to deal with this on a chemical-by-chemical basis.

We need Congress to give the DEA authority to be more effective and get ahead of this problem. We know that these drugs are coming into this country from Europe. That's where they're coming from, these compounds. There are some in Europe right now. Our goal is to get out in front of this before they have a chance to be exported into the U.S.

Another comment I heard about 325 researchers, well, 325 researchers because that's all who have applied to do

this type of research. DEA is not in the business of turning researchers away, so I want to be clear on these points.

There's so much more that can be said on this. But again, research will not be impeded in any way. There is a mechanism, there is a process in place to do research on these Schedule I drugs. It's well established. This has nothing to do with the medical marijuana debate. I heard that argued earlier, too. We're talking about synthetic marijuana and synthetic cocaine. This stuff is dangerous. And, in fact, some would argue worse than the real stuff, so let's get to it.

This is about public safety. This is about the health of our constituents. We know what's going on. In fact, somebody pointed out to me today that a store in Washington, D.C., a few blocks from the Capitol, somebody is selling this stuff. My State and over 30 other States have seen this problem. They know what's happening across this country. We need to do something about it. DEA is alarmed by this. Justice is on board. DEA is on board. Let's do something for the good of the American people. Please pass H.R. 1254, the Synthetic Drug Control Act of 2011. It's in the best interest of the American people, and the best interest of our children. We're doing the right thing.

Mr. WAXMAN. Mr. Speaker, the Synthetic Drug Control Act adds specified versions of drugs of abuse to Schedule I of the Controlled Substances Act. These designer drugs generally mimic the effects of marijuana or of stimulants and can be unsafe, causing convulsions, anxiety attacks, dangerously elevated heart rates, and bizarre and dangerous behavior, among other conditions. Under current authority, the Drug Enforcement Administration (DEA) has difficulty taking action against these drugs because they fall outside existing statutory descriptions of Schedule I drugs. H.R. 1254 will enable DEA to take appropriate enforcement actions to get them off the street and away from our Nation's youth. I therefore believe it is critical that we deal with the threat these drugs pose.

I wish to note however that I have concerns with the basic underlying statute that would now apply to these listed substances through this legislation. In particular, I do not support the mandatory minimum sentencing provisions of the Controlled Substances Act for Schedule I drugs, provisions that under this legislation will apply to the listed synthetic drugs as they apply to all Schedule I drugs. Mandatory minimum sentencing inappropriately applies a one size fits all approach, eliminating the ability of judges to exercise discretion in determining an appropriate sentence in light of individual circumstances. The sentencing judge is in the best position to determine a fair sentence, having considered all of the evidence and having heard from the parties and the defendant.

I also believe that the administrative process for scheduling controlled substances should be improved, so that the Attorney General, with the help of the Secretary of Health and Human Services, can make scheduling decisions without resorting to help from Congress.

I do not know whether such improvement requires legislation or regulation. I do know, however, that it is rarely a good idea for Congress to make scientific determinations such as are required to make good scheduling decisions.

Additionally, I believe it is incumbent upon DEA to reevaluate the recordkeeping and other regulatory requirements it imposes upon scientists who use controlled substances for legitimate research. The agency should ensure that such research is not impeded or discouraged through unnecessarily onerous requirements.

I recognize that it is not a simple task to strike the right balance, to exercise enough control to discourage abuse but not so much as to discourage research that may lead to important therapeutic advances and treatments. I intend to send a letter to DEA Administrator Michele Leonhart asking for a report on the restrictions imposed upon researchers, particularly those in academia who work with amounts of scheduled substances too small to pose a serious risk of diversion. I would like to know what if any improvements can be effected to eliminate or modify those requirements whose costs in time and resources outweigh their potential benefits in hindering research scientists from becoming drug abusers. I hope the Chairman of the Energy and Commerce Committee and others will join me on the letter.

Finally, however, while I remain concerned about aspects of the underlying statute, the question before us is whether these substances should be controlled as would be accomplished through passage of this legislation. I believe the answer is yes, because of the danger to public health posed by the listed synthetic drugs.

Mr. LATHAM. Mr. Speaker, I submit the following letter from one of my constituents with respect to the debate on H.R. 1254 that occurred on December 7, 2011.

DEAR CONGRESSMAN LATHAM: Regarding the Synthetic Drug Control Act, as you know I am a mother who lost her son to these drugs and I can't stop myself from reacting to the opposition on the floor yesterday.

Hundreds of chemical compounds are used to make synthetic drugs manufactured under the guise of bath salts, plant food, k2 and various names of synthetic marijuana—with the sole purpose being to ingest. These drugs are smoked, snorted, injected, or put into drinks. The label may say they are not for human consumption, but they are implicitly being sold as such.

Yet those opposing H.R. 1254 argue that not enough research has been done to prove whether or not these already banned and potentially future banned chemicals would bear any medical benefit.

To the contrary, not only have the synthetic drugs included in this legislation failed to show medicinal promise, but the Controlled Substances Act would still allow research on these synthetic drugs to continue if H.R. 1254 were enacted.

Under current law, researchers, universities and labs may register with the Drug Enforcement Agency (DEA) to obtain Schedule I controlled substances for scientific study. DEA allows thousands of labs to handle Schedule I drugs for scientific and investigative purposes. Chemicals with “a high potential for abuse” and “a lack of accepted

safety” under the Controlled Substances Act should be placed under Schedule I—available for scientific study but not sold on convenience store shelves.

The reality is that without H.R. 1254, our society will continue to allow informal, unsupervised and unethical medical experimentation—with our kids as the subjects. It begins with unscrupulous manufacturers obtaining unknown chemical compounds from other countries. It is either manufactured overseas here or in our own backyard. These drugs are openly sold to those “18 years or older” and can be purchased at gas stations, convenience stores and head shops around this country. Its availability is rampant on the internet as well. It is difficult if not impossible to find out who the people really are that sell the chemicals or pre-made products. When it's all said and done, it is American teens who are being endangered and experimented with.

Let's be bold and put a stop to the newest drug trends that are sweeping across our nation like a tidal wave—Jan Rozga, Indianola, IA

Ms. HIRONO. Mr. Speaker, I am voting for this legislation because, like the rest of my colleagues, I want to see an end to the illegal manufacture, sale, and use of synthetic drugs that mimic the properties of illegal drugs. Many of these drugs are extremely dangerous and warrant control. In fact, some 30 states, including Hawaii, have laws that address the manufacture, sale, and use of synthetic drugs.

I am concerned, however, that we may be moving too fast. I would prefer to see a bill that is as important as this considered under regular order, with members having an opportunity to offer amendments. I am hoping that the Senate will take a more measured approach in considering this legislation.

I am especially concerned about the application of mandatory minimum sentences and Schedule I penalties that are included in this bill. I support judicial discretion, especially when the lives and futures of young people are involved.

I know too that there are concerns that this could impede legitimate scientific research of chemical compounds listed in this bill. Adjustments to this legislation may be needed to ensure that we don't hinder development of future biomedical breakthroughs.

We need to make sure the legislation targets those most responsible for widespread distribution of these drugs. Most important, we need to find ways to keep our young people from using synthetic drugs. Education of parents and young people is badly needed as is market regulation to reduce the availability and misuse of certain household and industrial aerosol products. Adding to our already crowded prisons is not a real solution to the very real problem of synthetic drugs.

Mr. HOLT. Mr. Speaker, I rise to express my opposition to H.R. 1254, the Synthetic Drug Control Act of 2011.

While I support sensible restrictions on dangerous substances, I am concerned about the unintended consequences this bill could have on medical research. This bill has the potential to make these kinds of substances extremely difficult for researchers to obtain. In fact, many researchers have expressed concern that the list in this bill is too broad and would restrict their ability to conduct important experiments.

Additionally, this legislation would bypass the scientific and medical review process that

is in place for adding substances to Schedule I. Making decisions without scientific review is problematic.

It is important to note that states are free to make decisions regarding these kinds of substances. I supported the reasonable step New Jersey took when it banned the synthetic drugs known as “bath salts” this summer.

Since this bill would bypass scientific review and could hinder much-needed research, I urge my colleagues to vote no.

Mr. CARNAHAN. Mr. Speaker, I rise to clarify my position on H.R. 1254, the Synthetic Drug Control Act.

My vote in support of H.R. 1254 is not without reservations. I support this legislation because the health and safety of our citizens is my primary concern. This legislation will protect our communities, and particularly our youth, from more than forty new and dangerous synthetic drugs. These substances have been the cause of violent incidents and numerous deaths around the nation and it is preferable to immediately list them as Schedule I as opposed to allowing them to continue to be abused in our communities.

Criminalizing these substances, however, will not solve the root problem of drug abuse in our communities. I have serious concerns about the over-criminalization of drugs. Mandatory minimum sentences lead to over-capacity criminal justice and prison systems at significant burden to taxpayers. I have long advocated for a comprehensive approach to drug abuse treatment, including education, prevention, treatment, research, and enforcement. In fact, I have authored legislation to expand accessible treatment, especially for underserved communities, and research into cutting edge treatment therapies. Responsible law enforcement is just the way to address this issue, and it must be executed in conjunction with a robust and multifaceted approach that targets the root of drug abuse problems.

I also have concerns about the impact of penalties in H.R. 1254 on our scientific research processes. While, it is regrettable that H.R. 1254 circumvents the process for listing drugs as laid out in the Controlled Substances Act (CSA), it is necessary in this circumstance. The evidentiary procedure in CSA has worked well for determining the listing of new substances. Unfortunately, it can be time-intensive and the law enforcement community, including the Drug Enforcement Administration (DEA) and the Department of Justice, supports the immediate listing of these synthetic drugs because of the harm they inflict on our communities. This bill increases the length of time that a new substance can be temporarily scheduled by the DEA, thereby allowing more time for the usual CSA listing process to be carried out.

Throughout my career I have supported scientific research. The study of synthetic drugs is important for understanding their impact on health and their potential beneficial uses. Unfortunately, most of the substances included in this legislation have not been subjected to extensive scientific study, and I am concerned that listing them as Schedule I drugs may inhibit the study of these drugs. While the DEA has a procedure for scientists to study Schedule I controlled substances, it presents greater barriers for scientists to work with these drugs.

As of October 4, 2011, the DEA has 325 researchers conducting research with Schedule I controlled substances. These researchers include research centers and universities who seek to better understand the effects of Schedule I controlled substances. Additionally, as of October 4, 2011, the DEA has 3,983 active registrants who manufacture, research, and conduct chemical analysis with Schedule I controlled substances. I encourage the scientific community to continue their efforts to understand these and other drugs.

Mr. VAN HOLLEN. Mr. Speaker, I rise to oppose H.R. 1254, the "Synthetic Drug Control Act of 2011."

I share the concerns that supporters of this bill have about the sale of synthetic drugs that are determined to be harmful. The issue here is what process should be used to determine whether a drug is harmful and should be banned. I oppose this bill because it circumvents the established process for scheduling controlled substances as illegal for any uses without proper scientific review. This bill short-circuits that process and substitutes the less-informed judgment of Congress for the more considered view of scientists and experts.

We already have a process for banning drugs temporarily on an emergency basis. Indeed, the Drug Enforcement Agency (DEA) has temporarily prohibited the sale or manufacture of many of the compounds banned in this bill as more in-depth scientific reviews are conducted. I also support Maryland's Department of Health and Mental Hygiene's decision to ban the sale of many of these drugs in the State. I believe that the temporary ban by the DEA and the State bans of these drugs are sufficient at this point to protect our society from the harms caused by these synthetic drugs. Congress should only act to add these drugs to the list of Schedule I controlled substances after the process laid out in the Controlled Substance Act is completed.

The process established in the Controlled Substance Act requires that the Attorney General request from the Secretary of Health and Human Services "a scientific and medical evaluation, and his recommendations, as to whether such drug or other substances should be so controlled. . . ." This process is important for many reasons and should not be circumvented by this bill. Without proper scientific review this bill could create significant hurdles for medical research of cures and treatments for various diseases. During the bill mark up in the Judiciary Committee, statements from medical researchers were submitted stating that this bill could hamper their ability to determine lawful uses of these substances by making them illegal to possess. R. Gil Kerlikowske, the Director of the Office of the National Drug Control Policy (ONDCP), stated that these drugs are dangerous, but acknowledged that there is "a lack of sufficient data regarding the prevalence of bath salt stimulant drugs." Additionally, the penalties for possessing and distributing Schedule I drugs are serious. Adding over 35 additional substances to the list of Schedule I drugs, for which people can be incarcerated, should not be taken lightly by Congress.

I urge my colleagues to join me in opposing this bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania (Mr. PITTS) that the House suspend the rules and pass the bill, H.R. 1254, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. PITTS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

The point of no quorum is considered withdrawn.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

H.R. 944, de novo;  
S. 535, de novo;  
H.R. 2360, de novo;  
H.R. 2351, de novo;  
H.R. 1560, de novo;  
S. 683, de novo;  
S. Con. Res. 32, de novo.

#### CALIFORNIA COASTAL NATIONAL MONUMENT CONSOLIDATION ACT

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill (H.R. 944) to eliminate an unused lighthouse reservation, provide management consistency by incorporating the rocks and small islands along the coast of Orange County, California, into the California Coastal National Monument managed by the Bureau of Land Management, and meet the original Congressional intent of preserving Orange County's rocks and small islands, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and pass the bill.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

#### FORT PULASKI NATIONAL MONUMENT LEASE AUTHORIZATION ACT

The SPEAKER pro tempore. The unfinished business is the question on

suspending the rules and passing the bill (S. 535) to authorize the Secretary of the Interior to lease certain lands within Fort Pulaski National Monument, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and pass the bill.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

#### PROVIDING FOR OUR WORKFORCE AND ENERGY RESOURCES ACT

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill (H.R. 2360) to amend the Outer Continental Shelf Lands Act to extend the Constitution, laws, and jurisdiction of the United States to installations and devices attached to the seabed of the Outer Continental Shelf for the production and support of production of energy from sources other than oil and gas, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and pass the bill.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

#### NORTH CASCADES NATIONAL PARK SERVICE COMPLEX FISH STOCKING ACT

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill (H.R. 2351) to direct the Secretary of the Interior to continue stocking fish in certain lakes in the North Cascades National Park, Ross Lake National Recreation Area, and Lake Chelan National Recreation Area.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and pass the bill.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

# ALLOWING YSLETA DEL SUR PUEBLO TRIBE TO DETERMINE MEMBERSHIP REQUIREMENTS

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill (H.R. 1560) to amend the Ysleta del Sur Pueblo and Alabama and Coushatta Indian Tribes of Texas Restoration Act to allow the Ysleta del Sur Pueblo Tribe to determine blood quantum requirement for membership in that tribe.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and pass the bill.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

## BOX ELDER UTAH LAND CONVEYANCE ACT

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill (S. 683) to provide for the conveyance of certain parcels of land to the town of Mantua, Utah.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and pass the bill.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

# CORRECTING ENROLLMENT OF H.R. 470, HOOVER POWER ALLOCATION ACT OF 2011

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and concurring in the concurrent resolution (S. Con. Res. 32) to authorize the Clerk of the House of Representatives to make technical corrections in the enrollment of H.R. 470, an Act to further allocate and expand the availability of hydroelectric power generated at Hoover Dam, and for other purposes.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. HASTINGS) that the House suspend the rules and concur in the concurrent resolution.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

□ 1820

## EXTENDING UNEMPLOYMENT INSURANCE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 5, 2011, the gentleman from Michigan (Mr. LEVIN) is recognized for 60 minutes as the designee of the minority leader.

### GENERAL LEAVE

Mr. LEVIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the subject of my Special Order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. LEVIN. Mr. Speaker, today we're here to talk about the need to extend unemployment insurance. The numbers are staggering. If we do not act by the end of this month, in January well over a million people will lose their unemployment insurance, by mid-February the total will be well over 2 million, and by the end of next year, if we do not act, over 6 million people. As I said, these numbers are staggering. But the people behind these numbers are overwhelming.

We're here today to talk about the numbers and also talk about the people who are involved. When we've had emergencies like this, we have never failed to act. Today, we face an emergency beyond any we've seen since the Great Depression, and it's absolutely vital as a result that we act.

I'm joined by some of my colleagues. I want to call on them. As I do so, I want to read stories. I'll start by reading just one story and then call on one or more of my colleagues.

Let me start by reading what came in from a person in Amherst, New Hampshire, Jackie: "Unemployment benefits helped me make ends meet while I was using my savings and 401(k) to keep up with everything. Now they are gone. My savings are long gone. My 401(k) is almost gone. I'm watching everything I worked so hard for my entire adult life slip away from me. I am 50. I will never recover from this."

I would now like to yield to the gentleman from Texas, if he would like to join me.

Mr. REYES. I want to thank my colleague for yielding and some time to speak on this very important issue here.

Mr. Speaker, recently, the Department of Labor reported that the national unemployment rate fell to 8.6 percent in November, its lowest point in nearly 3 years. Coincidentally, in El Paso in the 16th District of Texas, the

unemployment rate has also declined. This is very good news and very positive news for not just our respective districts but for our country.

We have been told by economists that once our economy gets going and operating at full strength, it can literally drive the economies of the rest of the world. These positive signs make it evident that, in fact, our economy is moving forward and that we are on the road to recovery. However, as our economy continues to heal, we cannot afford to become complacent. Instead, we need to immediately pass legislation that will help create jobs and put more people back to work.

First, I believe, Mr. Speaker, that we must pass the American Jobs Act. My district, as well as the districts of my colleagues, in talking to them here, would greatly benefit from the President's Jobs Act. For instance, El Paso would receive over \$66 million to upgrade and modernize our schools to meet 21st-century needs. In addition, school districts in the El Paso region would receive funding to keep teachers from being laid off.

For example, our largest school district, the El Paso Independent School District, would receive an estimated \$45 million to keep teachers from being laid off and to perhaps hopefully continue to hire desperately needed teachers in our classrooms. These are smart investments on our part for the future which will also boost our economy in the immediate future.

Second, we must extend unemployment benefits. I want to thank my colleague for highlighting this and make sure that we extend unemployment benefits to those that are in desperate need. In fact, these benefits are the only thing that stand between them and homelessness and going without. During this downturn, unemployment benefits have kept over 3 million people in food and clothing and the basic essentials. It has also served as a booster to our struggling economy. We must protect these families who are still struggling and help them by the Jobs Act to find a stable source of income.

I have heard, like many other of my colleagues here, many stories from those in my district that have had difficulty in the last months and years in finding a job. So today we cannot and we must not turn our backs on the American people—the American people that need our help and need the passage of the American Jobs Act. They also need for us to step forward, stand with them, and pass the unemployment insurance. Rather than being distracted and being misled by our colleagues on the other side of the aisle, we must focus on our priority, which should be the creation of jobs, the passage of the unemployment insurance, and getting this economy going.

So I pledge to my colleague and my colleagues here that we must continue

to work together to create jobs not just for El Paso and not just for Texas, but for our country. And when we talk about the United States economy that literally drives all other economies, people around the world are waiting for us to work together to get this done. With that commitment, we can turn things around. We're seeing some very positive signs. We must continue to work for all the people that have sent us here to do that work.

With that, I want to thank my colleague for yielding.

Mr. LEVIN. I thank the gentleman from Texas for joining us and explaining what this means in his State and throughout the country. We're determined to tell the stories and, as I said, to put faces on these numbers. And to do that, I have joined with other Ways and Means Democrats to launch an extended unemployment program e-call Web site. As of this week, 2,590 Americans have joined the e-call, and we have received 501 stories from jobless Americans.

Before I call on the gentleman from Illinois to join, I would like to read, if I might, just a couple more. This is from Nick of Clinton Township, Michigan. "I was unemployed from August 2008 until March 2010 after working for 23½ years at my job.

□ 1830

"My job was sent to Sao Paulo, Brazil. Had it not been for extended unemployment benefits, I would have lost my house." Nick of Clinton Township.

And let me read what was said by Peter of Warren, Michigan: "I was permanently laid off from American Axle. I worked there 15 years and our jobs were sent to Mexico. As of this time, I have not found a job. I have been looking over 2 years now, and nothing in Michigan. I am in the TRA/TAA program to be reeducated, but my benefits will run out before I finish my school, and I will not get the degree in my field." Again, from Peter of Warren, Michigan.

I now would like to call, if I might, on the gentleman from Illinois to join us. And then, if I might, the sponsor of this legislation, Mr. DOGGETT of Texas.

Mr. DAVIS of Illinois. Let me thank the gentleman from Michigan for yielding, but I also want to commend him for his many years of excellent service to this body that we know as the United States House of Representatives. And I want to commend him for the tremendous leadership that he provides as the ranking member of the Ways and Means Committee.

Mr. Speaker, it is December 7, and Republicans still have not enacted legislation to protect the millions of Americans hardest hit by one of the worst economic crises in our Nation's history. The well-being of 6 million Americans, including 100,000 from my home State of Illinois, hangs in the

balance. Our Nation is in an unemployment crisis, and we must act now to help our citizens.

At this time last year, Republicans emphasized that the economy was so horrible that the wealthiest Americans needed 2 years of tax cuts, yet they only saw the need to help the unemployed for 1 year of emergency assistance. Now, 1 year later, as the emergency assistance runs out, Republicans remain comfortable with the \$180 billion in tax breaks for the wealthiest 3 percent of Americans, but they cannot support \$50 billion in 2012 to help millions of the neediest Americans—and never mind any consideration of helping the millions of Americans who have exhausted their Federal benefits and still can't find a job.

Our Nation, yes, is indeed in an unemployment crisis. Over 45 percent of all unemployed workers—more than 6 million people—have been out of work for more than 6 months. There are approximately 6.4 million fewer jobs now than at the beginning of the Great Depression. The Department of Labor data showed that there are over 4.2 unemployed Americans for every one job. Even if every job were filled, 8.9 million citizens would remain unemployed.

During this protracted storm of economic hardship, unemployment benefits are a critical lifeline for our citizens and for our economy. Unemployment benefits have kept 3.2 million Americans—including nearly 1 million children—from falling into poverty in 2010 alone. New research shows that the current Federal unemployment programs provide \$2 in economic stimulus for every \$1 in unemployment benefits circulating in the economy. The Federal unemployment programs saved or created 1.1 million jobs as of the fourth quarter of 2009 alone. And the Economic Policy Institute estimates that preventing unemployment benefits from expiring could prevent the loss of over 500,000 jobs.

Our Nation is indeed in an unemployment crisis, and we must act now to help our citizens. We cannot protect the wealthy while ignoring the millions of Americans hardest hit by one of the worst economic crises in our Nation's history. We cannot deliver a windfall to the privileged and deny the poor. Such a position is not responsible leadership, and such a position is not consistent with American values.

So I join with my colleagues in urging the Republican leadership to protect vulnerable Americans by extending the unemployment benefits.

I want to thank you, Mr. LEVIN, again for the opportunity to participate.

Mr. LEVIN. And I thank the gentleman from Illinois for your distinguished service and your passion that you bring to this and so many other issues.

I want to yield to the gentleman from Texas, who's the lead sponsor and ranking member on the relevant subcommittee. But before I do that, since you're from Texas, I want to read one of the hundreds that we've received, a word from people who are the unemployed.

This is Jessie of San Antonio, Texas: "I have submitted over 350 job applications and have only been called for two face-to-face interviews and five over-the-phone interviews. I am a disabled Navy veteran whose appendix ruptured in October 2010 and was filled with cancer cells. My State benefits expired at the end of August, and now my Federal benefits will expire in 6 weeks.

"It seems that no one is hiring adults over 56 years of age. I'm a very good, positive employee, and I feel that with every job application I'm due to get hired soon. Please help me in any way possible."

It's now my privilege to yield to the lead sponsor of this legislation, LLOYD DOGGETT from the great State of Texas.

Mr. DOGGETT. Thank you, Mr. Chairman. And I still call you "Mr. Chairman," though the formal leadership of the committee has changed with the change in the majority here in the House. And I guess if you were in fact still the chairman with full authority we would not be here, nor would there be any unemployed individual in the United States among the millions whose benefits would expire next year who would be wondering the night before Christmas what would happen the day after their unemployment coverage expired next year.

We face a great challenge, and as you have been pointing out in describing individuals like Jessie, a retired—not voluntarily retired, but retired, removed from the workforce by unemployment in San Antonio, these are very real human beings, not just unemployment statistics.

With over 6 million fewer jobs than when the recession began and more than four workers competing for every job opening, too many Americans have nowhere to go. They are like the lyrics from that working man song of the Nitty Gritty Dirt Band:

Had me a job until the market fell out;  
Tried hard to borrow, but there was no help.

Now I've got nowhere to go.  
I need a job for these two hands;  
I'm a working man with nowhere to go.

And if our Republican colleagues continue to insist that unemployment is caused by the unemployed instead of by the troubling economy we have, there will be about another 5 million Americans with nowhere to go, looking as to where they will find the resources to put food on the table, make the car or pick-up truck payment, take care of the kids and meet the other necessities of life if their unemployment insurance expires.

While the Republicans continue to have a really factless finger-pointing at the unemployed, I think it is past time for us to lay the facts straight out on the table and respond to some of these myths that they've been promoting.

Fact: An unemployment check is not a substitute for a paycheck. People like Jessie know that. An unemployment benefit usually amounts to a fraction of what a worker was making before someone lost his or her job.

Fact: Unless you are actively searching for a job, getting job training for a new job, or are on temporary layoff, you're not likely to be entitled to an unemployment check.

□ 1840

I'm not for just paying people to be idle; but these are individuals who are either getting training, who are actively involved in a job search, or the few that are in the temporary layoff category. There is little evidence to support the Republican claim, repeated again and again, that unemployment insurance benefits are a significant factor in discouraging folks from going out and looking for work.

Fact: to receive extended benefits, an unemployed person is required to accept reasonable offers of employment. Two out of three of the unemployed respondents in the Heldrich Center survey, and 80 percent of those who were receiving unemployment benefits, said they were willing to take a pay cut in order to get a new job, as so many Americans have had to do with the challenges in our economy.

Fact: one economist estimates that for every \$1 dollar we spend on these unemployment insurance benefits, about a \$1.61 in economic activity comes back. In fact, some of the estimates from one group that began its survey back during the Bush administration for the Department of Labor say it's even higher than that in terms of the economic rewards.

So I believe that we must create jobs. Certainly, we must do the kinds of things that this Congress has failed totally to do in terms of job creation and promoting economic recovery. But we also must provide a vital lifeline for those folks who are out there actively searching for work and the jobs are just not there for them.

The facts are clear. The time for us to extend unemployment coverage is now, not to wait until next year, not to wait until Christmas, and not to wait until these families are faced with the critical situation of not having the unemployment insurance coverage that they should have to meet these basic necessities, but to act right now in the next few days.

It's for that reason, as you well know, that we're working together to try to get this unemployment insurance coverage extended, as it has been

done often on a bipartisan basis in the past whenever the unemployment rate was at a level near what it is today.

So, hopefully, in our sounding the alarm here again tonight, in your telling these stories about individual Americans and what a loss of this coverage means, we can begin to involve and get the support of more of our colleagues to do what we really need to have accomplished just as soon as possible.

Mr. LEVIN. Thank you. What we're trying to do, as you say, is to bring America into this debate because if the faces are shown and the voices heard, our faith is that somehow we'll act.

And as you say, Republicans tend to blame the unemployed instead of blaming themselves for inaction. And we're not going to leave here, we're not going to leave here until there's an extension of unemployment benefits; isn't that correct? That's your pledge.

Mr. DOGGETT. It is our pledge, because there's just too much at stake here. This Congress has been incredibly unproductive. You might think it had been unemployed for much of the past year. And we need to stay and complete the work.

This is work that was done practically on Christmas Eve last year, when this extension was in jeopardy again. And we ought not to go right down to the wire like that again. There's no reason that this could not be done in the coming week, but for this ideological commitment saying that unemployment insurance coverage is not good for the economy. The facts don't bear that out.

The individual stories that you're telling us about tonight, those are the individuals, those are the families that have so much at stake. And of course, because of this economic effect, those unemployed families, when they get a dollar of unemployment insurance, they have to spend that dollar. They may be spending it at the grocery store. They may be paying a landlord or a mortgage company. They may be paying on their credit card or their car, just to have the basic necessities of life; and that's why the economic impact on small businesses is so significant from doing what we would need to do in order to support these families engaged in an active job search or getting the retraining and the retooling they need to have an opportunity for a job in the future.

Mr. LEVIN. It's so important that you've talked about the facts. The more we discuss the facts about unemployment insurance, and the more we talk about the unemployed, the more persuasive is the need for action. There's so much mythology, and the stories help to blast the mythology.

I just would wish that we could get into the shoes—there are 6 million whose benefits are threatened here. If you lined up the 6 million from here,

they'd go, I think, to Sioux Falls, South Dakota.

But it's hard for us to receive the stories or to obtain them because, under the Privacy Act, we don't know the names; and that's why you and I and others have joined to, essentially, have a Web site so people can tell us how to reach them.

But your recitation of the facts is so important because, in the end, I think the facts will prevail. The stories will be telling.

And so, Mr. DOGGETT, you've been such a lead person on this. You're the lead person on this legislation. So many of us have been working on this.

As you said, one of the facts is we have never failed to act, and this is a deeper recession than we've known. In fact, one of the facts is that there are now nearly 7 million fewer jobs in the economy today compared to when the recession started in December 2007. Seven million fewer jobs. And so when people search, they're often hitting a wall.

By the way, this gentleman, Jesse, refers to his age. And it's very true that the older—they're not very old—people are having trouble.

I had a forum in Michigan, and it was so heartbreaking that a person said to me—I would guess in her fifties—that I've taken all of the years off of my CV, when I went to college, when I graduated, when I first had a job, and the date of every position she had because she's afraid that when these resumes come in, people look at the age and a stone wall is hit.

It's my privilege, Mr. DOGGETT, to join with you. I'd now like to have join us a very distinguished Member from California. And if you give me a minute, BARBARA LEE, the very distinguished woman, I want to find a story from California. And so if I might just read this before I yield to you.

This is Benjamin of Los Angeles, California:

"I've been actively looking for work for 8 months now. Unemployment insurance has been crucial in my survival. It has literally kept me alive. It's allowed me to buy food and pay all my bills. Bills have no conscience. They come, regardless if one is working or not.

"I really feel for and extend my empathy to those who are unemployed and have children. I wholeheartedly support the emergency extension of unemployment insurance."

Benjamin of Los Angeles California, your home State.

You do such honor to your State and the whole Nation, and it's my privilege now to call upon the gentlelady from California, BARBARA LEE.

□ 1850

Ms. LEE of California. Thank you so much.

First off, let me thank the gentleman from Michigan for those very kind

words, more importantly for your leadership on so many fronts and for caring about those who are falling through the cracks at this point, and also for this very sobering Special Order tonight, because this is very sobering on the need for an immediate extension of unemployment benefits for the millions of Americans who are struggling to find work.

While we received some welcome news on the unemployment rates from last week with the national unemployment rate falling to 8.6 percent from 9 percent, we cannot stop. We cannot abandon the millions of job seekers during the middle of a faltering recovery.

In fact, failing to extend these critical benefits would really cripple our recovery and cost the economy over half a million jobs.

The slow pace of private sector job creation is not because of regulations or uncertainty in the Tax Code. If you speak to nearly any business person, they will tell you that they are not hiring because they don't have customers.

Abruptly ending unemployment benefits during the holiday season, first of all, it's mean and it's morally wrong. It would strip 2 million customers out of the economy by March, and over 6 million customers out of the economy by the end of the year. But again, more importantly this is just morally wrong. This is just not who we are as Americans.

We could not make a worse decision than to cripple our economy by failing to protect millions of families and children from poverty because that is just what unemployment benefits do. It keeps 1 million children from falling into poverty. So we absolutely must extend this critical benefit to workers who were laid off through no fault of their own before the end of this year.

Hidden, though, within the positive 0.4 percent drop of unemployment is the discouraging news that over 300,000 Americans dropped out of the workforce and that the long-term unemployment picture is not improving, with the average length of unemployment now rising from 39 weeks to 40 weeks.

So not only must we immediately extend the emergency unemployment benefits, but we should also immediately pass legislation that Congressman BOBBY SCOTT and myself have introduced, H.R. 589, which would add an additional 14 weeks of tier I unemployment benefits for the millions of Americans who have already completely exhausted their benefits. And I hope that the Republican leadership will bring that bill to the floor for an up-or-down vote.

We can't ignore the needs of people who have hit the 99 weeks, because unfortunately when we extend unemployment benefits, there will be 2 to 3 million people who still won't be covered

because they've hit the 99 weeks. So we can't ignore the needs of the millions of Americans who have run out of time and who are now losing their homes, falling out of the middle class, and relying more and more on our help.

In addition, there was a startling rise in the African American unemployment rate from 15.1 percent to 15.5 percent in the same period. There can be no clearer reminder of the ongoing racial and ethnic disparities that continue to plague our Nation and keep minority communities suffering disproportionately than higher rates of unemployment, poverty, near poverty, and tragic health disparities like unconscionably higher rates of HIV infection.

When the national employment picture improved significantly for the first time in months, African Americans faced a marked increase in their unemployment. That means we must take immediate and bold action to implement targeted programs and policies to ensure that we truly are a Nation that provides equal opportunity and leaves no one behind in terms of accessing the American Dream.

Now, Congressman LEVIN, I held a job fair in my district a few months ago. Thousands of people showed up in Oakland for the few jobs—four people for every job—that were available.

But let me tell you, people want to work. They want to work. We in the Congressional Black Caucus held five job fairs around the country, thousands of people showed up for limited jobs. I can say with certainty, people want to work, people want to work.

And so we have to, however, extend the safety net or this bridge over troubled waters until we figure out how we can deal with the politics of getting the American Jobs Act passed, and also other opportunities and legislation to provide jobs for people because people want to work. So we have to extend this unemployment compensation until we do that.

We have to save our economy and the millions of struggling families from poverty and immediately pass and extend unemployment benefits now.

Let's not forget again the 2 million-plus people who've hit that 99-week limit who will not be eligible for an extension unless we figure out a way to include them in these initiatives and in this policy.

Mr. Speaker, we've got a lot of work to do. But I know we intend to stay here until we do our job, until we extend this bridge over troubled waters, the safety net for people just to survive. That's all this is, is for people just to survive.

If we don't do that, those of us who call ourselves people of faith really need to come to grips with our faith and who we are, and how we propose to move forward within the context of looking out for and making sure that

the least of these are addressed and taken care of until we can provide them those opportunities and dismantle those barriers so they can reignite the American Dream, because it's turned into a nightmare for millions and millions of people.

So Congressman LEVIN, I want to thank you again for, again, this clarion call to our conscience. It should prick our conscience tonight. We should, tomorrow, say let's pass this now. The holiday season is upon us. People need some certainty in their lives. They need to know that they have a bipartisan effort to help them through this period, and they need to also know that we're going to work very hard to pass the American Jobs Act so that they can finally get a job, because that's what this is all about. And people want to work. Thank you again.

Mr. LEVIN. Thank you for your eloquent statement.

As you said, this is one estimate, four people for every job. You mentioned this is a matter of faith. A few weeks ago, I met a minister. I had never met him before. And we got to talking about the challenge of unemployment insurance. And I paraphrase what he said to me: This is a challenge to America's soul.

Thank you very much.

Before I call on the distinguished colleague from Wisconsin, I want to read one more story.

I have a story that's given to us, one of the more than 400, from Nathan of Madison, Wisconsin.

So let me read this before I call on my distinguished colleague and friend from Wisconsin, GWEN MOORE.

I quote: "I have been unemployed twice in the past 5 years, and they were not by choice. I have a master's degree in organic chemistry and have worked in the pharmaceutical industry and related industries since finding a job out of school in 1998. After 2 years with my first company, I received a double promotion. So my layoffs have not been due to my performance, abilities, or capabilities.

Anyone who says unemployed people are lazy or have it good are ignoring the fact that people are hurting across the board." From your fellow resident of the State of Wisconsin.

It is now my distinguished privilege to yield to you, Ms. MOORE, from the State of Wisconsin.

Ms. MOORE. Absolutely, Representative LEVIN.

Let me start out by thanking you for this Special Order. And that letter is just one in 58,000 people, off the top of my head, that will be immediately affected by our inability to expand unemployment insurance. That's one story.

As you indicated, it's a person who is from Madison, Wisconsin, well educated, and cannot find a job in this recession.

I just think it is really curious, and I guess I would like to engage in a dialogue with you about this, you being

the ranking member on Ways and Means, maybe you can help me understand a little bit better. Our colleagues in the majority, the optic and the narrative in the country for them is they want to preserve benefits for millionaires and billionaires. They want to preserve corporate tax expenditure benefits for corporations.

□ 1900

They want to maintain foreign profits for expatriated funds. They want to maintain a very high tax exemption for estates over \$5 million. They want to maintain capital gains benefits, benefits on dividends.

So I'm just curious, Representative LEVIN, why they don't want to provide this governmental benefit for unemployed people. This is very distressing to me when I consider who the unemployed are. When I think about the people the majority party wants to preserve benefits for and then when I get an optic of the people who would most likely benefit from this unemployment insurance, there is a stark contrast. Perhaps that starts to explain why there is a reluctance, an unwillingness and an unreadiness to provide this benefit.

Now, as you know, the overall national unemployment rate dropped from 9.1 percent recently to 8.6, which is something that I think we can claim some victory for; but when you peel back the curtain and disaggregate these numbers, you're going to see that there's a sharp and problematic racial undertone as it pertains to black unemployment.

When you look at the unemployment for white men, Representative LEVIN, their unemployment dropped from 7.9 percent to 7.3 percent, which is very high; but black men endured a spike from 16.2 percent in unemployment to a disturbing 16.5 percent in unemployment. So those lowered unemployment rates certainly do not reflect what's happening in the African American community.

Of course, according to the Bureau of Labor Statistics, unemployment declined for every demographic within the white community—for teenagers, men, women—but it actually increased for every measured group within the African American community—for men, women, teenagers.

Even worse is after the fact, when the recession is over, when black unemployment won't be any better than white unemployment is right now. I guess that's sort of racial inequality 101. When we peel back the layers of this improved economy, what we find, Representative LEVIN, is that single mothers—women—are suffering, that they're some of the hardest hit.

As you will recall, Representative LEVIN, this institution on a bipartisan basis—and I understand I was not here when Mr. Newt Gingrich was Speaker

of the House—decided that the most important legislative initiative that they could undertake was to end aid to families with dependent children and to put women and children under the vagaries and vicissitudes of a cyclical economy. So now that we have an economy that is as bad as it was during the Great Depression, we can look at the unemployment numbers among women, especially among single women, and we can find some very, very distressing data.

Poverty among women climbed to 14.5 percent in 2010 from 13.9 percent in 2009, the highest in 17 years. According to a recent report by Legal Momentum, recent Census data on poverty paints a bleak picture for single-mother families. This report finds that the poverty rate for single moms, for people who by definition have to feed their kids every night, reached 42.2 percent last year, up from 38.5 percent in 2009, and way up from 33 percent in 2000. It is chilling to contemplate the predicament of women and children when there is no aid to families with dependent children and no entitlement. When you consider that you've got folks like the gentleman you described in your letter who has a master's degree and who cannot find a job, a mom with kids is competing in that same job market.

There is a great deal of need in these populations. Even as the economy begins to show growth, they're forced to make cuts in the family budgets. They're living with food insecurity—not enough food—and the quality of the food is not good. They're eliminating health insurance. I know families in my district who are taking medicines every other day, doing without transportation, clothing, and where utility cutoffs are very prevalent.

Mr. LEVIN. I was looking through some of the letters. Let me just read a letter in which the author is a single parent from Geneva:

"I never thought that I would have to start all over again looking for work in my late forties. I hadn't even been 1 year cancer free. I'm a single parent of a teenage daughter. So, when my job terminated, so did my medical insurance . . . I had to move back to my mom's house. I could no longer afford my rent, car note, insurance, and the basic everyday needs of raising my daughter and keeping my own place . . . Please don't take away UI so soon. People like me need to keep it until we can find full-time work to take care of our families and help us keep our self-esteem."

Ms. MOORE. I tell you, that is a very moving letter. You say she had to move with a teenage daughter back into her mom's house. I mean, teenage kids need things other than food. Something like toilet paper becomes an issue when you're sharing a household and when you don't have enough money to make those contributions.

The other thing that makes me very curious, Representative LEVIN, is the rhetoric around the desire to help small businesses. Do you realize if we don't extend this unemployment benefit, economists have calculated that, in 2012, this will take \$90 billion out of the economy? You won't buy that teenager shoes because you're unemployed.

Mr. LEVIN. Absolutely.

We're focusing today on the stories of the unemployed, on the personal stories, in order to put a face on the numbers. It's also important—and you referred to it—for the economy of our country. Every economist, I think without any exception, says that unemployment insurance is one of the two most beneficial instruments that we have in terms of putting money back into the economy because people who are unemployed and who receive their insurance—they work for it—spend it.

We have some other stories from single parents. Let me just, if I might, read another story. Then perhaps we should ask the gentlelady from Texas to join us if she would like.

"I am a military spouse that was forced to move and leave a great-paying office management position since my husband was transferred to a new duty station . . . I have applied for jobs that would barely cover our bills just so that I can be among the working again . . . My soldier can't afford to support us on a military income—and it's not just about me. I have a son to think of. I hope and pray that an extension is approved so that it doesn't cause our family structure to crumble. I believe that an extension should be approved as it is keeping not only my family but millions of other American families from drowning in a sea of financial ruin."

That's from Rachel of Lemoore, California.

It is now my privilege to yield to the gentlelady from Texas, Ms. SHEILA JACKSON LEE.

□ 1910

Ms. JACKSON LEE of Texas. I thank the gentleman very much and thank him for his leadership on this issue. And reading these passionate letters, I don't know how anyone could bring us to the brink of disaster where we find ourselves today.

I just want to read from the U.S. Department of Labor a simple sentence that I think speaks volumes:

"The unemployment insurance system helps the population most directly affected by recessions, those who have lost jobs through no fault of their own."

Mr. LEVIN, you have heard my colleagues speak of the double-digit unemployment in distinctive populations, the young, recent college graduates, African Americans and Latinos who remain at the bottom of the heap, but

who are looking for jobs every day. I am reminded of a job fair at the Fallbrook Church in Houston, Texas, where throngs came seeking opportunity and basically refuting the commentary of one Presidential candidate no longer in the race, Mr. Cain, who said if you're broke and if you're unemployed, it's your fault.

And now the front-runner, Mr. Gingrich, says that poor children have no role models, their parents don't get up and go to work, they have not seen anybody go to work. How outrageous to speak about those who have lost their job, their children are poor, and they would blame the victim.

So I think it is crucial that we pass this legislation; and we have never, Mr. LEVIN, not passed this legislation when unemployment in our country has been near 9.1 percent. It is not 9.1 percent, but it's very well near there.

And unemployment benefits will keep us from losing over 500,000 jobs. It will also help some of the bankrupt States. There are States that are, in fact, looking to \$5 billion in tax hikes on employers in nearly two dozen States. These solvency provisions will stop putting \$5 billion in tax hikes on employers in nearly two dozen States, as well as provide \$1.5 billion in interest relief.

Some of these very Members who may be objecting to this, debating about it, come from States that are themselves facing a question of solvency because of the unemployment insurance.

Where is the life raft, if you will? Where is the helping hand? Where is the rescue for the people who are desperate?

You might not be able to see this, but it's a very small picture of a person living in a disastrous home impacted by Hurricane Ike. There was some decision about some funds going there in Houston, Texas, today. I'm not happy with the meager distribution to help people like this. They're not getting all the money that they need.

I can assure you if they're living in some homes like this, many times they may also be unemployed. So they're living in devastated housing in many instances. They are in need of food on their table. They are likewise trying to provide for their children, and they don't have the resources.

Mr. LEVIN. The gentlelady referred to a particular situation. Let me read from another story, if I might.

Ms. JACKSON LEE of Texas. Please do.

Mr. LEVIN. This is Linda of Seattle, Washington:

"I am a person, a hardworking American person at that, and I will be forced to live on the streets if EUC is not extended. It terrifies me; and if it happens, the struggle I will face to once again be a productive member of this society, in these times, by myself, is

not one that I'm likely to win. There are thousands of stories just like mine that won't be told here. We are people, we have faces and lives and dreams just like everyone who still has a job. I am telling you: we will be on the streets without this extension, and only some of us will ever make it back from that."

Ms. JACKSON LEE of Texas. First, you read about a mother and her child that has to move back into their family's residence, or her parents' residence. These are now senior citizens.

Then you tell me about someone who's actually going to be homeless. Then we hear about a person that's degreed, has the ability to contribute to the engine of this economy in science, and they're unemployed. And then if you would, Mr. LEVIN, just look, I'm on the floor with Mr. GARAMENDI, the gentleman from California, and we use this to show how flat-lined our working and middle class have been in terms of the growth of their income; and we see the top percent of wealth right here shooting up to an enormous amount—that is the blue line. This is how the wealthy have progressed and grown.

And then we hear our friends saying the poor little rich person, where the very rich person in this group, because I'm not involved in class warfare, is saying we understand and we're willing to have the burden of sacrifice with the benefit of living in this great country.

And so when we look at this wealth, think about this woman who is saying she is near homelessness and think about the 160 million Americans that if we do not do a payroll tax cut; but think about, most of all, the 6 million Americans who will be left to homelessness in contrast to the enormous wealth that is on this poster board and the meager proposal of surtax on the 1 percent for 10 years, starting in 2013, to pay this off and to keep solvent Social Security. It is unbelievable that we would not rush to do this as we are nearing the holiday season.

I am just noting for you, Mr. LEVIN, just to say that the powerful, passionate letters that you have read are volumes in terms of those who are seeking our help.

And for anyone that has been to Occupy Houston or Occupy Wall Street or Occupy any city, if they talk to the people individually, they will know that these are simply hurting Americans who have lost their jobs who are seeking to come and seek opportunity. They want to work; and everyone that I have spoken to, the lady who is here with this home, 56 years old, I know that whether she's employed or not, the condition of her home suggests that she is in need. And the homeless persons, because they have no job, are in need.

I don't believe that the wealthy that are speaking on this particular poster

board would argue about the solution that you have come to and that you are advocating and that those who are writing in are saying, they are asking, just give me a lifeline and help me to survive.

I am prepared to stay here, Mr. LEVIN, as you have indicated, to make sure that we do right by the people who are so much in need.

Mr. Speaker, I rise today to address the issue of extending unemployment insurance. We must not go home for the holidays if we cannot agree to extend unemployment insurance.

With a national unemployment rate of 9.1 percent, preventing and prolonging people from receiving unemployment benefits is a national tragedy. As of today, in the City of Houston, the unemployment rate stands at 8.6 percent as almost 250,000 individuals remain unemployed.

Indeed, I cannot tell you how difficult it has been to explain to my constituents whom are unemployed that there will be no further extension of unemployment benefits until the Congress acts. Whether the justification for inaction is the size of the debt or the need for deficit reduction, it is clear that it is more prudent to act immediately to give individuals and families looking for work a means to survive.

If there is a single federal program that is absolutely critical to people in communities all across this nation at this time, it would be unemployment compensation benefits. Unemployed Americans must have a means to subsist, while continuing to look for work that in many parts of the country is just not there. Families have to feed children.

The American people are relying upon us to stand up for them when they are in need. This is not a time to take a vacation, go home to our families, and watch our unemployed constituents suffer through holidays.

Unemployed workers, many of whom rely on public transportation, need to be able to get to potential employers' places of work. Utility payments must be paid. Most people use their unemployment benefits to pay for the basics. No one is getting rich from unemployment benefits, because the weekly benefit checks are solely providing for basic food, medicine, gasoline and other necessary things many individuals with no other means of income are not able to afford.

Personal and family savings have been exhausted and 401(K)s have been tapped, leaving many individuals and families desperate for some type of assistance until the economy improves and additional jobs are created. The extension of unemployment benefits for the long-term unemployed is an emergency. You do not play with people's lives when there is an emergency. We are in a crisis. Just ask someone who has been unemployed and looking for work, and they will tell you the same.

Currently, individuals who are seeking work find it to be like hunting for a needle in a haystack. For every job available today, there are four people who are currently unemployed. You can not fit a square peg in a round hole and point fingers at the three other people who when that job is filled is left unemployed. Let's be realistic there are currently 7 million

fewer jobs in the economy today compared to when this recession began.

Although according to the U.S. Bureau of Labor Statistics the State of Texas continues to have the largest year-over-year job increase in the country with a total of 253,200 jobs. There are still thousands of Texans like thousands of other Americans in dire need of a job.

#### UNEMPLOYMENT INSURANCE

A study was conducted the research firm IMPAQ International and the Urban Institute found Unemployment Insurance benefits:

Reduced the fall in GDP by 18.3%. This resulted in nominal GDP being \$175 billion higher in 2009 than it would have been without unemployment insurance benefits.

In total, unemployment insurance kept GDP \$315 billion higher from the start of the recession through the second quarter of 2010;

kept an average of 1.6 million Americans on the job in each quarter: at the low point of the recession, 1.8 million job losses were averted by UI benefits, lowering the unemployment rate by approximately 1.2 percentage points; made an even more positive impact than in previous recessions, thanks to the aggressive, bipartisan effort to expand unemployment insurance benefits and increase eligibility during both the Bush and Obama Administrations. "There is reason to believe," said the study, "that for this particular recession, the UI program provided stronger stabilization of real output than in many past recessions because extended benefits responded strongly."

For every dollar spent on unemployment insurance, this study found an increase in economic activity of two dollars.

According to the Economic Policy Institute extending unemployment benefits could prevent the loss of over 500,000 jobs.

If Congress fails to act before the end of the year, Americans who have lost their jobs through no fault of their own will begin losing their unemployment benefits in January. By mid-February, 2.1 million will have their benefits cut off, and by the end of 2012 over 6 million will lose their unemployment benefits.

Congress has never allowed emergency unemployment benefits to expire when the unemployment rate is anywhere close to its current level of 9.1 percent.

Republicans seem to want to blame the unemployed for unemployment. But the truth is there are over four unemployed workers for every available job, and there are nearly 7 million fewer jobs in the economy today compared to when the recession started in December 2007.

The legislation introduced today would continue the current Federal unemployment programs through next year.

This extension not only will help the unemployed, but it also will promote economic recovery. The Congressional Budget Office has declared that unemployment benefits are "both timely and cost-effective in spurring economic activity and employment." The Economic Policy Institute has estimated that preventing UI benefits from expiring could prevent the loss of over 500,000 jobs.

In addition to continuing the Federal unemployment insurance programs for one year, the bill would provide some immediate assistance to States grappling with insolvency problems within their own UI programs.

The legislation would relieve insolvent States from interest payments on Federal loans for one year and place a one-year moratorium on higher Federal unemployment taxes that are imposed on employers in States with outstanding loans.

According to preliminary estimates, these solvency provisions will stop \$5 billion in tax hikes on employers in nearly two dozen States, as well as provide \$1.5 billion in interest relief. The legislation also provides a solvency bonus to those States not borrowing from the Federal government.

We must extend unemployment compensation. This will send a message to the nation's unemployed, that this Congress is dedicated to helping those trying to help themselves.

Until the economy begins to create more jobs at a much faster pace, and the various stimulus programs continue to accelerate project activity in local communities, we cannot sit idly and ignore the unemployed.

#### PAYROLL TAX CUT

For 337 days, the GOP House majority has failed to offer a clear jobs agenda. Congress must not leave Washington for the holidays without extending the payroll tax cut and unemployment benefits that put money into the economy and promote jobs.

GOP is risking tax relief for 160 million Americans while protecting massive tax cuts for 300,000 people making more than a million dollars per year.

Extending and expanding payroll tax cut would put \$1,500 into the pockets of the typical middle class family.

At least 400,000 jobs would be lost if Republicans block the payroll tax cut

In November, Senate Democrats proposed reducing it to 3.1 percent for 2012, and cutting employers' taxes on the first \$5 million in taxable payroll to the same level, which helps small businesses. To pay for the cut, the bill calls for a 3.25 percent tax on gross income over \$1 million for single filers and married couples filing jointly, the so-called "Millionaire's Tax." This is a reasonable compromise.

There are other ideas floating around this Chamber that touch on tax, such as repatriation. Lowering taxes is always a good idea, but scattershot approaches to tax reform almost always lead to undesirable outcomes.

#### TARGETED TAX RELIEF FOR AMERICAN WORKERS

The 2% payroll tax cut in effect for 2011 has provided \$110 billion of tax relief to 159 million American workers.

If the payroll tax cut is not extended, a family struggling through the economic recovery making \$50,000 will see its taxes go up by \$1,000.

Expanding the 2% payroll tax holiday to 3.1% will cut Social Security taxes in half for 160 million American workers next year.

This targeted tax relief will mean an extra \$1,500 for a typical American family making \$50,000, and \$2,500 for a family making \$80,000.

Mr. LEVIN. Your chart leads me to the last letter I'll read.

I read from Ralph of Warren, Michigan, because your chart shows what's at stake for middle-class America:

"Unemployment insurance must be extended so you can pay your bills and buy food. Without this insurance you

would see the foreclosures go through the roof. Start looking out for the middle class that built this country."

And this issue of extension of unemployment insurance is critical for all America, and it surely is critical for the middle class that helped to build this country in that now, and the millions are finding, they have lost their jobs, they are looking for work, they can't find it. We need to respond, and we need to respond right now.

And I close with this pledge from all of us on the Democratic side in the House: we do not intend to vote for a motion to adjourn until we have acted on the payroll issue, continuing on the physician reimbursement issue, and very much so on extending unemployment insurance so that people out of work, through no fault of their own, can be assured there won't be millions of people in this country, beginning the 1st of January, who are left out in the cold.

I thank all my colleagues.

Mr. Speaker, I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I rise today in unqualified support of extending unemployment benefits for the long-term unemployed.

The United States is a great nation. We're a great nation because we are the land of opportunity. We're a great nation because we are the home of the American Dream, where hard work and playing by the rules have always equaled success. But the United States is also a great nation because we assist our fellow citizens in need—those who have fallen on hard times and through no fault of their own are in need of a safety net.

An out-of-control Wall Street and the reckless deregulation pursued by the Bush Administration brought us the greatest economic crisis since the Great Depression. Tens of millions of American's lost their jobs, and fourteen million still are unemployed today. Forty-five percent of those unemployed have been out of work for six-months or more.

Every day, I hear from constituents that lost their job during the great recession and have been struggling to get by.

From one constituent:

I have been unemployed for almost 2 years. Never in my 51 years of life have I ever experienced anything like this. I submit resumes via Craigslist daily, I network and I have done whatever I can to get back to work. I will be homeless if [unemployment] benefits are not extended.

And another:

I'd really like to know if there's another unemployment benefits extension in the works. I am 53, with no family, and no car that I can live in, but I will lose my apartment if I can't find a job . . . or get more benefits. It's no secret that jobs are VERY hard to come by, and I've had a really good work history, but that means nothing right now.

And another:

I have sent out hundreds of resumes, both for positions in my field, and for positions I knew I could do, or have done when I was just starting out. I have received less than ten acknowledgements of receipt of my resume over the course of 21 months. My background and education are solid.

And another:

My job as CFO of a small restaurant chain, headquartered in Santa Monica, was eliminated in Dec. 2010. Since then I have been unable to find employment and, as a result, had to sell my condo at a considerable financial loss. I have been surviving through the extended unemployment program offered by the federal government. If this program is not renewed, I have no idea how I will cope, financially, or mentally.

And another:

I'm 63, was let go from a very significant position back in February 2008 after eight years of being a Multi Award Winning Sales Executive, in two industries . . . in working over 40 years without interruption I have been collecting unemployment benefits for two years. I'm embarrassed to tell you how many resumes and contacts I've made, competing with men and women in their 20's, 30's, 40's.

This has taken a huge toll on my life as you can imagine . . . my condo is for sale and I'm being audited by the IRS . . . my health has deteriorated and I didn't have health insurance for the past two years.

For too many Americans, unemployment benefits are the difference between having a roof over their head, or sleeping on the street; having food to feed their kids, or skipping dinner; seeing a doctor, or living with chronic illness.

As a great nation, we have an obligation to provide a lifeline to these fellow citizens. It is incumbent on us a decent society.

I have cosponsored legislation to extend unemployment insurance through the end of 2012. I have also cosponsored legislation to help the so-called "99-ers," by extending the length of federal benefits by an addition 14 weeks, to 113 weeks total.

But Congress must do more. My constituents need more than a safety net. They need jobs.

According to a recent report by the Washington Post, this Republican House is on track to be least productive first session in 20 years. In a full year, Republicans have yet to pass a single bill to create a single job.

The Republicans' refusal to take up measures to help restart our economy—like President Obama's American Jobs Act—is all the more reason that we must extend these essential unemployment benefits. I urge my colleagues to stand up for the unemployed Americans who are facing catastrophe through no fault of their own and vote now to extend this critical lifeline.

□ 1920

#### AMERICANS DESERVE BETTER

The SPEAKER pro tempore. Under the Speaker's announced policy of January 5, 2011, the gentleman from Florida (Mr. MACK) is recognized for 60 minutes as the designee of the majority leader.

Mr. MACK. Mr. Speaker, I think there are a lot of people back home who are watching this debate unfold, and more importantly, are watching the Congress and the administration. And, you know, I think a lot of people at home are scratching their head.

They're saying we the people are outraged at this administration and this Congress. And they should be.

The White House and their liberal allies in Congress and the media go on a nonstop bashing of a group of Americans who are productive and hardworking. Class warfare is as despicable as any other type of stereotyping, and putting citizen against citizen for political gain is outrageous and it's wrong.

Listen to this. The people are told that a tax cut is a tax increase or a tax increase isn't really a tax increase because there are savings that can be made elsewhere. That doesn't even make sense. Only in Washington can someone say we have to pay for a tax cut. Think about that. What we're saying is, what Washington is saying is, we have to pay for a tax cut. Well, whose money is it? Government doesn't make money. It's the people's money. Yet somehow up here in Washington we keep saying we have to pay for a tax increase. It's that hardworking family that has earned that money. It is not Washington's money.

And people, frankly, I think are disgusted with the notion that somehow the paradigm in Washington is we have to pay for a tax cut. It's their money. Something is very wrong here, and this body is part of the problem.

Let's put out the facts; facts, not spin. Government money doesn't exist. That's a fact. It's the people's money.

Here's another fact. If there are projects that can be cut, they should be cut. They shouldn't be traded like futures in the stock market. If we believe that we ought to extend the payroll tax cut extension, let's extend it. Let's stop playing games about moving money around from one program to another or keeping a bucket of projects or programs that we can save to cut at a time to bargain for something else.

It's time that we get serious, and the American people are saying they've had enough. They've had enough of what they're seeing here in Washington.

Let me say this one more time. Pitting American against American is un-American and outrageous and deserves the condemnation of each and every one of us in this Congress. This is not the America we know and love. We the people deserve better.

I yield back the balance of my time.

#### HONORING NAVAJO CODE TALKERS

The SPEAKER pro tempore (Mr. REED). Under the Speaker's announced policy of January 5, 2011, the gentleman from Arizona (Mr. GOSAR) is recognized for the remainder of the hour as the designee of the majority leader.

Mr. GOSAR. Mr. Speaker, thank you for joining me this evening to talk

about a very special group of veterans, the Navajo Code Talkers. Tonight, my colleagues and I are going to share their stories and highlight the amazing accomplishments of this group of warriors. Their contribution to the Allied effort during World War II is widely credited with winning the Battle of Iwo Jima and making majors gains in the Pacific.

During the early months of World War II, Japanese intelligence experts broke every code the U.S. forces devised. The Japanese were able to decode and intercept communications with ease. To combat this, increasingly complex codes were initiated that sometimes took hours at a time simply to decipher one message. Guadalcanal in 1942 was a turning point for the Allied military forces, who realized that the military communications needed a new direction, and new inspiration.

Fortunately, an innovative citizen named Philip Johnston had the answer. As the son of a Protestant missionary, Johnston had grown up on the Navajo reservation and was one of less than 30 non-Navajos fluent in the unique Navajo language. He realized that since it had no alphabet and was almost impossible to master without early exposure, the Navajo language was a perfect choice to form a new, impenetrable military code. In 1942, Johnston completed an impressive demonstration of the Navajo language to the Commanding General of the Pacific fleet headquartered in San Diego. He was then given permission to begin a pilot for the Navajo Code Talker program, and I would like to submit his letter dated March 8, 1942, for the RECORD.

HEADQUARTERS, AMPHIBIOUS FORCE,  
PACIFIC FLEET, CAMP ELLIOTT,  
San Diego, CA, March 6, 1942  
Subject: Enlistment of Navaho Indians.

To: The COMMANDANT,  
U.S. Marine Corps.

Enclosures: (A) Brochure by Mr. Philip Johnston, with maps. (B) Messages used in demonstration.

1. Mr. Philip Johnston of Los Angeles recently offered his services to this force to demonstrate the use of Indians for the transmission of messages by telephone and voice-radio. His offer was accepted and the demonstration was held for the Commanding General and his staff.

2. The demonstration was interesting and successful. Messages were transmitted and received almost verbatim. In conducting the demonstration messages were written by a member of the staff and handed to the Indian; he would transmit the message in his tribal dialect and the Indian on the other end would write them down in English. The text of messages as written and received are enclosed. The Indians do not have many military terms in their dialect so it was necessary to give them a few minutes, before the demonstration, to improvise words for dive-bombing, anti-tank gun, etc.

3. Mr. Johnston stated that the Navaho is the only tribe in the United States that has not been infested with German students during the past twenty years. These Germans, studying the various tribal dialects under the guise of art students, anthropologists,

etc., have undoubtedly attained a good working knowledge of all tribal dialects except Navaho. For this reason the Navaho is the only tribe available offering complete security for the type of work under consideration. It is noted in Mr. Johnston's article (enclosed) that the Navaho is the largest tribe but the lowest in literacy. He stated, however, that 1,000—if that many were needed—could be found with the necessary qualifications. It should also be noted that the Navaho tribal dialect is completely unintelligible to all other tribes and all other people, with the possible exception of as many as 28 Americans who have made a study of the dialect. This dialect is thus equivalent to a secret code to the enemy, and admirably suited for rapid, secure communication.

4. It is therefore recommended that an effort be made to enlist 200 Navaho Indians for this force. In addition to linguistic qualifications in English and their tribal dialect they should have the physical qualifications for messengers.

CLAYTON B. VOGEL,  
*Commanding General.*

Their elite unit was formed in early 1942 when the first of the 29 Navajo Code Talkers were recruited by Johnston. The code was modified and improved throughout the war, but it is so important to note that these 29 Navajo heroes came up with the original code themselves. Accordingly, they are often referred to reverently as the "original 29." We will have the honor of reading their names a bit later this evening.

Many of these enlistees were just boys with little exposure to the world outside of the Navajo reservation. After the war, it was discovered that recruits as young as 15 and as old as 35 years of age had enlisted. In fact, a few of these men traveled to other towns on the reservation, outside their clan where no one knew them and their true age, in order to enlist underage and serve their country.

After sailing through basic training, the Navajo Code Talkers were sent to Marine divisions in the Pacific theater of World War II. Their reputation as innovators soon spread far and wide amongst their commanding officers. In the field, they were not allowed to write any part of the code down as a reference. In fact, the code existed only amongst this small group. Under high pressure battle conditions, the Code Talkers had to quickly recall their code accurately, or risk hundreds or thousands of lives.

Make no mistake about the gravity of this accomplishment. The Navajo Code Talkers created the only unbroken code in modern military history. It baffled the Japanese forces. It was even indecipherable to a Navajo soldier taken prisoner and tortured on Bataan.

The secret code created by the Navajo Code Talkers was a simple marvel of linguistic invention. It contained native terms that were associated with specialized or commonly used military language, as well as native terms that represented letters in the alphabet.

English words with no Navajo translation were spelled out using the Nav-

ajo alphabet. The selection of a given term was based on the first letter of the English meaning of the Navajo word. For words that did not translate into Navajo, the Code Talkers created code that did not directly translate, but tended to resemble the things with which they are associated. For example, the Navajo word for "iron fish" represented submarine. I could give many more examples, but I think that one is particularly poignant. To say "America," the Code Talkers used the word "ne-he-mah," which means "our mother."

This brilliant code allowed our U.S. Marines to communicate quickly and accurately. The Code Talkers' brave work is widely credited with successes of battle in the Pacific and, more ultimately, with helping to end this tragic war.

□ 1930

In the battle for Iwo Jima, in the first 48 hours alone they coded over 800 transmissions with perfect accuracy.

While the true heroism of these brave warriors is known today, sadly, the Code Talkers had to return home after the war without the heroes' welcome they deserved. Ironically, the code was such a precious asset to the U.S. military that it was classified and had to be kept secret. While the code was declassified in 1968, it took years to properly decorate those veterans. In 2001, nearly 60 years after they created their legendary code, the Navajo Code Talkers finally received their well-deserved Congressional Medals of Honor.

Today, only one original Code Talker remains, but the tradition lives on. A delegation of the Four Corners States will attempt to recognize these warriors one by one and give us their thoughts during this hour.

I would like to first recognize my good friend from Arizona (Mr. FLAKE).

Mr. FLAKE. I thank the gentleman for yielding and for arranging this Special Order. This is something that we in Arizona and anywhere in the West in Utah and elsewhere have great pride in and that this recognition, as the gentleman mentioned, came far too late and has been far too little, given the amount of the impact that the Navajo Code Talkers had on World War II.

So I'm pleased to be here and to lend my voice to recognition. As the gentleman mentioned, only one of the original Code Talkers is still living. So I think it's important that we recognize others who carried on this code and tradition and helped out in this way.

This was a group, as we mentioned, of many Navajos, Native Americans, who volunteered for the armed services in World War II. This was, as the gentleman said, very successful. It was the only code that remained unbroken. And one of the most amazing aspects of World War II is how these people came

together, as the gentleman mentioned, young kids in their teen years and others, and volunteered for this effort. It's even more remarkable when we note that many States did not permit Native Americans to vote until the 1950s. Yet the Code Talkers were undeterred. They wanted to help their country.

It's fitting that we honor this group on the anniversary of the attack on Pearl Harbor, the start of World War II, because they had such an integral part of ensuring that that brutal war came to an end. I want to thank my colleague from Arizona and others who have come here for putting together this timely tribute to make sure that these individuals are recognized for the impact that they had in ending this war and to ensure that this world remains free.

Mr. GOSAR. I thank the gentleman.

I would like at this time to acknowledge my good friend from New Mexico (Mr. LUJAN).

Mr. LUJAN. I thank my colleague from Arizona (Mr. GOSAR) for bringing us together tonight as we get a chance to visit and celebrate heroes that are amongst us, whether it's in spirit or body, as we are still so fortunate to have Chester Nez with us, one of the original 29 as well.

With me tonight I have a few excerpts of articles that have been written around the country that capture some stories recently in the Fronteras Desk. An author by the name of Laurel Morales captured the story of Chester Nez. It starts like this: "Growing up in New Mexico, Chester Nez and many of his fellow Navajo were punished for speaking their language."

You talk about a language as they were pulled away to boarding schools, so many of the young Navajo across the country, and the importance of what they were able to accomplish during World War II. In the words of Major Howard Connor of the 5th Marine Division, he declared that were it not for the Navajos, the marines would never have taken Iwo Jima, and the importance of language and what they were able to accomplish.

The article goes on to read that years later, Nez was shocked to learn that he'd been recruited by the marines specifically to devise a code using the same language the government tried to beat out of him. It was extremely ironic. One of the very things they were forbidden to do—speak Navajo—ended up helping us save the war.

Mr. Nez goes on to say that he and his fellow Code Talkers first developed an alphabet, as you described, Mr. GOSAR, using everyday Navajo words to represent letters of words, as you talked about—submarine: iron fish; besh-lo: iron fish; and hummingbird: dah-he-tih-hi to talk about fighter planes. It's amazing how when we talked about the Japanese and how they were so effective at cracking

codes, how they couldn't crack this one.

Mr. Nez goes on to say in the article that being one of the last original Code Talkers, he lives in Albuquerque with his son—a father of six children. He has nine grandchildren and eight great-grandchildren. It goes on to say that “today, with so many people leaving the reservation, Navajo elders like Nez fear their language is dying. Nez hopes Navajo children learn the story of Code Talkers so they understand just how critical it is to learn their own language.”

And thank you for bringing us together, Mr. GOSAR, this evening to help celebrate the history of our Code Talkers, as it wasn't until Senator BINGAMAN moved legislation back in 2000 to be able to give honor to our original 29—a few of them, at the very least, and their families—with gold medals, and silver medals to the others that were also trained to go on.

So I think this is an example of a few stories that we'll be submitting and sharing this evening to be able to celebrate the lives and stories and the history, especially on today as we remember Pearl Harbor and all the sacrifice and all the families we lost that day and so many brave soldiers as well.

Thanks for bringing this tonight. I look forward to many stories and continuing to share many of the articles that we've been able to find capturing the history and personal stories of our friend, our heroes, the Code Talkers from all throughout New Mexico, Arizona, and Utah.

Mr. GOSAR. I thank the gentleman from New Mexico.

At this time I would like to recognize my good friend from Utah (Mr. CHAFFETZ).

Mr. CHAFFETZ. Thank you. I appreciate the bipartisan nature in which we do this. These are truly American heroes who have made a difference in our lives and something we should all be proud of and never forget. I worry as these gentlemen get older that some-how generations in the future will maybe forget this.

I appreciate you, Mr. GOSAR, for your commitment to them. I know you're passionate about this. I can see it in your eyes when you talk about it.

I wanted to recognize and pay special tribute to somebody who's originally from Utah, Samuel Tom Holiday. He was a Navajo Code Talker. He served in the United States Marine Corps 4th Marine Division, 25th Regiment, the H&S Company. We're fortunate to still have him here with us in our presence today.

Mr. Holiday was born in 1924 on a Navajo reservation near the Monument Valley area of Utah, down near the Four Corners area. He was a Navajo Code Talker in World War II. As you have talked about before, Code Talkers transmitted tactical messages by tele-

phone and radio in the Dine language. It was a code the Japanese were never able to break and was very instrumental in our war efforts.

At a young age, Samuel and his brothers hid from government agents who came to send Navajo children to boarding schools. Holiday said he was ultimately caught and forced to attend a boarding school where he was not allowed to speak his native language. As he said, “One of the hardest times I had was learning to talk English. I would hide cookies in my pockets to pay the older boys to teach me English. Whenever they”—the school instructors—“found out I had talked Navajo, they made me scrub floors, scrub walls. I spent much of my first year scrubbing the wall.”

Mr. Holiday attended the school until he was 18 years old and he was recruited into the Marine Corps. Mr. Holiday served in the Pacific theatre from 1943 to 1945 in Saipan, Tinian, Kwajalein Atoll, and Iwo Jima.

From Mr. Holiday: “A lot of time they sent us where it was a very dangerous spot, and I sent messages. They didn't know we were Navajo Code Talkers using Navajo language.” The very language he was punished for using in his boarding school was suddenly a major asset to the United States Marines.

Mr. Holiday remains active with the Navajo Code Talkers Association. He's traveled throughout most of the United States conducting presentations about the Code Talkers and about his life experiences before and after the war. I was very pleased to see that Mr. Holiday was awarded the Congressional Silver Medal, something he was very worthy of, obviously.

It's interesting to me that the Navajo Code Talker Program was actually a secret until after the war and was not declassified until later in 1968. It was another 14 years before the Navajo Code Talkers were recognized by the United States Government. In fact, in December of 1982, President Ronald Reagan recognized the Code Talkers for their dedicated service, unique achievement, patriotism, resourcefulness, and courage.

□ 1940

August 14, 1982 was proclaimed National Navajo Code Talkers Day. I think President Reagan did the right thing. I think it's something that all Americans—I want my kids and people in Utah and across the Nation to recognize the contributions and sacrifices that these people made. They truly made a difference in our lives; instrumental in the war.

I appreciate this time to be able to recognize their achievements and help to our country.

Mr. GOSAR. I thank the gentleman from Utah.

I would like at this time to recognize my friend, the gentleman from New Mexico (Mr. HEINRICH).

Mr. HEINRICH. I want to thank the gentleman from Arizona for pulling us together from around the four corners to honor these incredible Native Americans, these incredible Americans, especially on this historic anniversary. And I'm certainly honored to join my colleagues tonight to honor the quiet valor of all the Navajo Code Talkers.

Today, some six decades since their service during World War II, only one of the original 29 Code Talkers, Corporal Chester Nez, survives. And I am incredibly proud of Corporal Nez, who at the age of 90 resides in my congressional district in Albuquerque with his son Mike, his daughter-in-law Rita, and their children.

Corporal Nez's story is much like the hundreds of Code Talkers who followed in his footsteps. He grew up on the Navajo Nation to parents who grew corn and pinto beans, kept goats and sheep. And he grew up in a time when Navajos were sharply mistreated and even unable to vote in our own elections in places throughout the Southwest. Yet in 1942, at the age of 18, he sprung into action and he joined the 382nd Platoon in a role that is largely credited with saving thousands of American lives.

Along with the other 28 original Code Talkers, Corporal Nez developed a code from their unwritten language. You can find the code's explanation today in the index of his autobiography. And whether in artillery, tanks, aboard ships or in infantry, the Code Talkers played a vital role in some of the worst battles in the Pacific theater, communicating battlefield codes that were never, ever broken by the enemy. Their code-talking was considered so essential to the war that, unlike their counterparts, many of them were forced to serve straight through the war with no breaks for rest or trips back home. And today, we widely recognize that their service helped turn the course of World War II.

Yet because of the sheer secret of their role and the possibility that they would be called back for the same duty in the future, the actions of the Code Talkers weren't declassified until 23 years after the war ended. And it wasn't until 55 years later that they were bestowed with the Congressional Gold Medal of Honor and Silver Medal.

To the young people of the Navajo Nation for whom Corporal Nez's quiet valor is a remarkable example, I encourage you to carry on his legacy by keeping the Navajo language alive and well for generations to come.

Mr. Speaker, I know that the Navajo Nation takes such pride in these heroes. And on behalf of all of us who owe a tremendous debt of gratitude for their service, I'm proud to recognize the courage, service, and bravery of all the Navajo Code Talkers, and especially Corporal Nez of Albuquerque, New Mexico.

Mr. GOSAR. I thank the gentleman from New Mexico for that find.

I would now like to acknowledge my good friend from Arizona (Mr. SCHWEIKERT).

Mr. SCHWEIKERT. Thank you, Congressman GOSAR. For all of us, we truly appreciate you organizing this.

When you consider today is the 70th anniversary of Pearl Harbor and the entry into World War II, for many of us who grew up with family that had served, there's many heartbreaking stories. But when we reach out and read and learn more about the Code Talkers story, it's one of the great moments of pride for those of us from Arizona.

When you consider there were—my understanding is there were about 400 native Americans who served, but the 27—was it 27 or 29?

Mr. GOSAR. Twenty-nine.

Mr. SCHWEIKERT. Twenty-nine from Arizona, I've had the pleasure over time of meeting some of them. I also know, as Arizona now is about to begin celebrating its 100th anniversary—and I have, actually, it's a little bit of a silly photo, but there is actually a smaller version of this on my wall in my office. A few months ago we had our very first celebration of beginning the 1-year celebration of our centennial as a State, and we were featuring our Navajo Code Talkers. It is something that many of us from the West are very, very proud of. And it was also that little moment where if you ever want to be a little humiliated, have them try to teach you to speak a few Navajo words, and then the giggling begins on how badly you pronounce it.

But for anyone who is listening, the Navajo Code Talkers have actually built a foundation, and they actually have a wonderful Web site that has data and stories. It is [navajocodetalkers.org](http://navajocodetalkers.org). I encourage anyone to reach out and grab some of that information. These are powerful stories of incredible service to our country in a time of great need with a very unique skill and talent.

I thank the gentleman from Arizona for organizing this.

Mr. GOSAR. I thank the gentleman from Arizona.

I want to take a few moments and honor one of our own in Arizona who just recently died. It is my humble privilege to honor Allen Dale June, one of the original 29 Code Talkers. He died just recently in September of 2010 at the age of 91. He passed away of natural causes at the Veterans Hospital in Prescott, Arizona, which is in my district. He is survived by his wife and 10 children and was buried in Kaibeto, in the heart of Navajo reservation.

June, who attained the rank of sergeant, received the Congressional Gold Medal in 2001 along with other members of the original Code Talkers. When

he died, Navajo Nation Council Speaker Lawrence Morgan said, "The Navajo Nation lost a great warrior. His unique service to his country brought positive attention to the Navajo Nation. He will be missed."

According to his wife, Virginia, June first tried to sign up for the Marines in his hometown of Kaibeto, but a recruiter told him he was too young. He then traveled to the reservation town of Chinle to enlist because he figured people there wouldn't recognize him and he could lie about his age and forge his father's signature. This dedication and determination to serve their country was common among the Code Talkers and shows character and bravery that we all should emulate.

Allen June was a humble man who did not like to brag about much, even his remarkable service as a Code Talker. However, in the last years of his life he wore his service proudly, sporting a red Navajo Code Talker cap with his name on it.

I would like to take an opportunity and see if my colleague from New Mexico would entertain a colloquy back and forth giving the roll call of the names of the 29.

Mr. LUJAN. It would certainly be an honor, Mr. GOSAR.

Mr. GOSAR. Thank you, sir. The roll call for the Navajo Code Talkers, the original 29:

Charlie Y. Begay.  
Mr. LUJAN. Royal L. Begay.  
Mr. GOSAR. Samuel Begay.  
Mr. LUJAN. John Ashi Benally.  
Mr. GOSAR. Wilsie Bitsie.  
Mr. LUJAN. Cosey S. Brown.  
Mr. GOSAR. John Brown, Jr.  
Mr. LUJAN. John Chee.  
Mr. GOSAR. Benjamin Cleveland.  
Mr. LUJAN. Eugene R. Crawford.  
Mr. GOSAR. David Curley.  
Mr. LUJAN. Lowell S. Damon.  
Mr. GOSAR. George H. Dennison.  
Mr. LUJAN. James Dixon.  
Mr. GOSAR. Carl N. Gorman.  
Mr. LUJAN. Oscar B. Ilthma.  
Mr. GOSAR. Allen Dale June.  
Mr. LUJAN. Alfred Leonard.  
Mr. GOSAR. Johnny R. Manuelito.  
Mr. LUJAN. William McCabe.  
Mr. GOSAR. Chester Nez.  
Mr. LUJAN. Jack Nez.  
Mr. GOSAR. Lloyd Oliver.  
Mr. LUJAN. Joe Palmer.  
Mr. GOSAR. Frank Danny Pete.  
Mr. LUJAN. Nelson S. Thompson.  
Mr. GOSAR. Harry Tsosie.  
Mr. LUJAN. John Willie.  
Mr. GOSAR. William Dean Wilson.

Does my friend have any further comments?

Mr. LUJAN. Only to say again, Mr. GOSAR, as we celebrate tonight, to never forget about the contributions of the Navajo people to our great Nation, with the work that they've done not only through the Cold War, but going back to all the work that was done.

□ 1950

As we pointed out earlier, in the words of Major Howard Connor, if it

were not for the Navajos, the marines never would have taken Iwo Jima. It's a great night to be here to celebrate, and I thank you for bringing us together.

I would like to submit into the RECORD an article from the Santa Fe New Mexican, dated August 29, 2010, also capturing the story telling and talking about Mr. Chester Nez, as well as the article, "The Last of the Navajo Code Talkers," by Laurel Morales, which was listed in the Fronteras Desk.

[From the SantaFeNewMexican.com, Aug. 29, 2010]

AN ORIGINAL CODE TALKER KEEPS TALE ALIVE—FEW REMAINING MEMBERS OF ELITE NAVAJO MARINE UNIT

(By Felicia Fonseca)

ALBUQUERQUE.—Tourists hurry inside a shop here to buy books about the famed Navajo Code Talkers, warriors who used their native language as their primary weapon.

Outside, on a walk sheltered from the sun, nine of the Code Talkers sit at a table autographing the books. Each is an old man now. They wear similar caps and shirts, the scarlet and gold of the Marine Corps, and turquoise jewelry.

One of these men, who signs his name as Cpl. Chester Nez, is distinguished from the others. Below his signature, he jots down why: 1st Original 29.

Before hundreds of Code Talkers were recruited from the Navajo Nation to join the elite unit, 29 Navajos were recruited to develop the code—based on the then-unwritten Navajo language—that would confound Japanese military cryptologists and help win World War II.

Of the Original 29, only three survive. Nez is one.

The Code Talkers took part in every assault the Marines conducted in the Pacific, sending thousands of messages without error on Japanese troop movements, battlefield tactics and other communications critical to the war's ultimate outcome.

"It's one of the greatest parts of history that we used our own native language during World War II," Nez said in an interview with The Associated Press. "We're very proud of it."

Nez tells the story succinctly. He is the last of the original group able to do so. One can hardly speak or hear, and the memory of the third is severely tested by Alzheimer's disease.

The 89-year-old Nez is limited, too. He is in a wheelchair after diabetes led to the amputation of both legs. These days, he'd rather "just sit around, take it easy," he said.

As a boy, Nez lived in a traditional Navajo home and helped his family tend to sheep in Two Wells on the eastern side of the vast 27,000-square-mile reservation.

He played with toy cars, went barefoot, and spoke only his native language. That changed when he was sent to one of the boarding schools set up by the federal government to assimilate American Indian children into the broader culture.

At boarding school, Nez said he had his mouth washed out with soap for speaking Navajo—ironic indeed, considering the vital role that the unique language—and Nez—would come to play.

Nez was in 10th grade when a Marine recruiter came looking for young Navajos who were fluent in Navajo and English to serve in World War II. He jumped at the chance to defend his country, and to leave boarding

school. He kept the decision to enlist a secret from his family and lied about his age, as did many others.

"I told my roommate, 'Let's try it out,' and that's what we did," Nez said. "One reason we joined is the uniform—they were so pretty, dress uniforms."

About 250 Navajos showed up at Fort Defiance, Ariz., then a U.S. Army base. But only 29 were selected to join the first all-Native American unit of Marines. They were inducted in May 1942.

After basic training, the 382nd Platoon was tasked with developing the code.

There Nez met Allen Dale June and Lloyd Oliver, among the others. Using Navajo words for red soil, war chief, clan, braided hair, beads, ant and hummingbird, for example, they came up with a glossary of more than 200 terms, later expanded, and an alphabet.

At first, Nez said, the concern was whether or not the code could work. Then it proved impenetrable. "The Japanese did everything in their power to break the code but they never did," he said.

Nez no longer remembers the code in its entirety, but easily switches from English to Navajo to repeat one instruction he delivered during fighting on Guadalcanal.

"I always remember this one," Nez said. "Enemy machine gun on your right flank, destroy!"

The Navajos trained in radio communications were walking copies of the code. Each message read aloud by a Code Talker was immediately destroyed.

"When you're involved in the world of cryptology, you not only have to provide information, you have to protect that," said Patrick Weadon, curator of the National Cryptologic Museum. "And there's no better example than the Navajo Code Talkers during World War II."

The Code Talkers were constantly on the move, often from foxhole to foxhole. Nez had a close call in Guam with a sniper's bullet that whizzed past his head and struck a palm tree.

Once while running a message, Nez and his partner were mistaken for Japanese soldiers and were threatened at gunpoint until a Marine lieutenant cleared up the confusion, his son, Michael, said.

"Of course Dad couldn't tell them he was a Code Talker," Nez's son said.

The Code Talkers had orders not to discuss their roles—not during the war and not until their mission was declassified 23 years later.

In 2001 Nez, Dale and June traveled aboard the same plane to Washington, D.C., to receive the Congressional Gold Medal. The recognition, which they didn't receive when they returned home from war, propelled them to a sort of celebrity status, along with the release of a movie based on the Code Talkers the following year.

They appeared on television, rode on floats in parades and were asked to speak to veterans groups and students.

Nez threw the opening pitch at a 2004 Major League Baseball game and blessed the presidential campaign of John Kerry. Oliver traveled with other Code Talkers as guests of honor in the nation's largest Veterans Day parade in New York last year.

When residents of Longmont, Colo., heard that June and his wife did not have a permanent home, they raised money to buy one for the couple.

The last three survivors of the Original 29 don't live on the Navajo Nation, where they are celebrated with a tribal holiday. They wonder about each other, but it's unlikely they'll reunite again.

After World War II, Nez volunteered to serve two more years during the Korean War and retired in 1974 after a 25-year career as a painter at the veterans hospital in Albuquerque.

June, 88, has spent the past few weeks in and out of hospitals in Wyoming and Arizona, and requires round-the-clock care. His third wife, Virginia, calls herself "the charm" and the protector of an endangered species.

She's a walking promotion for him and the Marine Corps, yet she's careful of how much she says because he thinks it is unwelcome bragging.

Oliver's wife, Lucille, echoes similar sentiments about her husband. Oliver displayed few reminders in what, until earlier this year, was his home on the Yavapai Indian reservation in Camp Verde, Ariz.—a few framed pictures, a Marine cap above his bedroom window and a U.S. flag above the doorway.

"He just put the past behind him, I guess," she says.

Oliver, 87, speaks audibly but his words are difficult to understand. His hearing is impaired and he prefers not to have a hearing aid.

Both June and Oliver had brothers who later served as Code Talkers.

Nez tells the tourists seeking autographs in Albuquerque that he's part of the Original 29, but few appear to grasp what that means.

"Most of them," he says of the tourists, "they just thank me for what we did."

[From the Fronteras Desk, Nov. 11, 2011]

#### THE LAST OF THE NAVAJO CODE TALKERS

(By Laurel Morales)

FLAGSTAFF.—Only one veteran Navajo code talker remains of the original 29 Navajo Marines who used their native language to devise an unbreakable code during World War II.

Growing up in New Mexico, Chester Nez and many of his fellow Navajo were punished for speaking their language. In the 1920s, Nez attended one of many government run boarding schools that attempted to erase Indian culture and language.

"I often think about the things I went through, all the hardships," Nez said. He was being interviewed at the studios of KUNM in Albuquerque for Veterans Day.

Years later, Nez was shocked to learn he'd been recruited by the Marines, specifically to devise a code using the same language the government tried to beat out of him. Judith Avila helped Nez write his memoir Code Talker, which was just published.

"It was extremely ironic one of the very things they were forbidden to do—speak Navajo—ended up helping save us during the war," Avila said.

During World War II, the Japanese had cracked code after code the U.S. military used to hide their communications. Then, a Marine by the name of Philip Johnston, who had been raised on the Navajo Nation by white missionaries, suggested enlisting the help of the Navajo tribe. They became known as the code talkers.

Navajo, or Dine as it's called, is a spoken language. And few non-Navajos understand its complexities. Nez and his fellow code talkers first developed an alphabet using every day Navajo words to represent letters, like the Navajo word for ant became "A."

Chester Nez, seen here during World War II, is 90 and the last of the original 29 Navajo Code Talkers.

Then they came up with words for military terms. In Navajo, there is no word for bomb.

So they called it an egg. A fighter plane was the Navajo word for hummingbird.

"And the Japanese tried everything in their power to try to decipher our code, but they never succeeded," Nez said.

He and his fellow code talkers were faced with many cultural challenges during the war. The most difficult was dealing with so much death.

The Navajo believe when you encounter a dead body that person's spirit stays with you. Coming home after the war, Nez remembered being haunted by these spirits.

"They were all around me. I actually see them alongside my bed," Nez said. "This was one of the bad omen."

His family performed a ceremony called the "enemy way" to cleanse him. After that, Nez said, he felt free of the ghosts.

The code talker program was secret. When Nez and the others arrived home in 1945, there was no fanfare. The code remained active for years after the war; it wasn't declassified until 1968. Still, it took decades before the men were officially recognized.

In 2000, New Mexico Senator Jeff Bingaman introduced legislation to honor the code talkers. The following year—nearly six decades after the code was written—president George W. Bush awarded them Congressional Gold Medals.

"Today we give these exceptional Marines the recognition they earned so long ago," President Bush told a televised crowd at the Capital Rotunda.

Only five of the original 29 were still alive.

Chester Nez stood tall, puffed out his chest and saluted the president, while the crowd—many relatives of code talker families—gave the group a standing ovation.

"This gold medal is something I will treasure for as long as I live," said Nez, now 90-years-old.

The last original code talker lives in Albuquerque with his son. The father of six children, he has nine grandchildren and eight great grandchildren.

Today with so many people leaving the reservation, Navajo elders like Nez fear their language is dying. Nez hopes Navajo children learn the story of the code talkers, so they understand just how critical it is to learn and use their own language.

Mr. GOSAR. I thank the gentleman from New Mexico for his contribution.

I would also like to start by going through the further list of the Navajo Code Talkers in the honor roll:

#### NAVAJO CODE TALKER LIST

CONFIRMED BY MARINE CORPS, AS OF 17 JULY 2001

1. Akee, Dan 818638
2. Anthony, Franklin 990074
3. Apache, Jimmie 936773
4. Arviso, Bennie 894438
5. Ashike, Earl 990140
6. Ashley, Regis 894674
7. Attikai, Harold 990084
8. Augustine, John 894402
9. Ayze, Lewis 990075
10. Bahe, Henry 479876
11. Bahe, Woody 875423
12. Baldwin, Benjamin 818564
13. Beard, Harold 894537
14. Becenti, Roy L. 831055
15. Bedoni, Sidney 479771
16. Begay, Carlos 818566
17. Begay, Charlie Sosie 830976
18. Begay, Flemming 830977
19. Begay, George 990132
20. Begay, Henry 990142
21. Begay, Jerry C. 830979
22. Begay, Joe 990094

23. Begay, Lee 990116
24. Begay, Leo 990126
25. Begay, Leonard 990210
26. Begay, Notah 875405
27. Begay, Paul 479917
28. Begay, Samuel H. 358525
29. Begay, Thomas H. 537144
30. Begay, Walter 990073
31. Begay, Willie K. 1000016
32. Begay, Wilson J. 894417
33. Begody, David M. 990209
34. Begody, Roger 875422
35. Belinda, Wilmer 875407
36. Belone, Harry 936837
37. Benallie, Jimmie D. 964665

It is with that I submit those names on a wonderful treasure from the Four Corners to America, and what they gave this country is so valuable. You look back on their life and what they gave us is immeasurable. What I would also like to do is honor them on today, the anniversary of Pearl Harbor; and I hope that we would look fondly on their attributes and what they gave to this great country because we are all great because of them.

I also want to take the liberty of acknowledging one other person. It's her birthday today. It's my mom. She turned 78. Happy birthday, Mom.

I yield back the balance of my time.

## NAVAJO CODE TALKERS

(Mr. LAMBORN asked and was given permission to address the House for 1 minute.)

Mr. LAMBORN. Mr. Speaker, on this, the 70th anniversary of the attack on Pearl Harbor, I want to recognize a group of unique Americans who made an invaluable contribution to winning the war in the Pacific—Native American Code Talkers.

John Werito of southwest Colorado was assigned to the 4th Marine Division in Maui, Hawaii. He first saw action when his division landed on Roi Namur, part of the Marshall Islands, then a Japanese stronghold.

From there, the 4th Division took Saipan where Werito was wounded. After recovering from his injuries, he took part in the invasion of Iwo Jima, where he was wounded a second time. He recovered from his injuries on a hospital ship at sea after refusing to be sent home to the U.S. because he wanted to be part of the invasion of Japan, should that be necessary.

Back home, Werito settled in Denver where he served as a letter carrier for

the U.S. Postal Service. He passed away in 1983 and is buried at Fort Logan National Cemetery in Colorado.

Werito was posthumously awarded the Silver Congressional Medal of Honor in 2002. His widow, Rose, and children, Nellie and Michael, attended the ceremony in Window Rock, Arizona, on the Navajo Nation.

I thank Mr. Werito for his courage in fighting a brutal enemy in the Pacific.

The Code Talkers of all tribes are a special class of brave warriors who deserve our continued recognition.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. NADLER (at the request of Ms. PELOSI) for today and December 8 on account of a family matter.

## SENATE ENROLLED BILLS SIGNED

The Speaker announced his signature to enrolled bills of the Senate of the following titles:

S. 1541. An act to revise the Federal charter for the Blue Star Mothers of America, Inc. to reflect a change in eligibility requirements for membership.

S. 1639. An Act to amend title 36, United States Code, to authorize the American Legion under its Federal charter to provide guidance and leadership to the individual departments and posts of the American Legion, and for other purposes.

## ADJOURNMENT

Mr. LAMBORN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 8 minutes p.m.), under its previous order, the House adjourned until tomorrow, Thursday, December 8, 2011, at 9 a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XIV, executive communications were taken from the Speaker's table and referred as follows:

4176. A letter from the Acting Administrator, Department of Agriculture, transmitting the Department's final rule — Christmas Tree Promotion, Research, and Information Order [Doc. No.: AMS-FV-10-0008-FR-1A] (RIN: 0581-AD00) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4177. A letter from the Management and Program Analyst, Directives and Regulations, Forest Service, Department of Agriculture, transmitting the Department's final rule — Community Forest and Open Space Conservation Program (RIN: 0596-AC84) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4178. A letter from the Director, Defense Procurement and Acquisition Policy, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulations Supplement (DFARS

Case 2009-D036) (RIN: 0750-AG66) received November 18, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

4179. A letter from the Director, Defense Procurement and Acquisition Policy, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulations Supplement (DFARS Case 2011-D050) (RIN: 0750-AH44) received November 18, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

4180. A letter from the Director, Defense Procurement and Acquisition Policy, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulations Supplement (DFARS Case 2011-D053) (RIN: 0750-AH46) received November 18, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

4181. A letter from the Director, Defense Procurement and Acquisition Policy, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulations Supplement (DFARS Case 2011-D031) (RIN: 0750-AH30) received November 18, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

4182. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Changes in Flood Elevation Determinations [Docket ID: FEMA-2011-0002] received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

4183. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Final Flood Elevation Determinations [Docket ID: FEMA-2011-0002] received November 16, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

4184. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Changes in Flood Elevation Determinations [Docket ID: FEMA-2011-0002] [Internal Agency Docket No.: FEMA-B-1225] received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

4185. A letter from the Assistant General Counsel for Regulatory Affairs, Consumer Product Safety Commission, transmitting the Commission's final rule — Virginia Graeme Baker Pool and Spa Safety Act; Incorporation by Reference of Successor Standard received November 16, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4186. A letter from the Deputy Archivist of the United States, National Archives and Records Administration, transmitting the Administration's final rule — NARA Records Reproduction Fees [NARA-11-0002] (RIN: 3095-AB71) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

4187. A letter from the Deputy Assistant Administrator for Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Monkfish; Framework Adjustment 7 [Docket No.: 101119575-1554-02] (RIN: 0648-BA46) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4188. A letter from the Deputy Assistant Administrator for Operations, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final

rule — Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; Amendments 20 and 21; Trawl Rationalization Program; Correcting Amendments [Docket No.: 110721401-1470-01] (RIN: 0648-BB31) received November 16, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4189. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Pacific Cod by Vessels Harvesting Pacific Cod for Processing by the Inshore Component in the Central Regulatory Area of the Gulf of Alaska [Docket No.: 101126522-0640-02] (RIN: 0648-XA759) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4190. A letter from the Deputy Assistant Administrator for Regulatory Services, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; Biennial Specifications and Management Measures; Correction [Docket No.: 100804324-1496-05] (RIN: 0648-BA01) received November 16, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4191. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Snapper-Grouper Fishery of the South Atlantic; Closure of the 2011-2012 Recreational Sector for Black Sea Bass in the South Atlantic [Docket No.: 0907271173-0629-03] (RIN: 0648-XA686) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4192. A letter from the Deputy Assistant Administrator for Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Western Pacific Bottomfish and Seamount Groundfish Fisheries; 2011-12 Main Hawaiian Islands Deep 7 Bottomfish Annual Catch Limits and Accountability Measures [Docket No.: 11071384-1534-02] (RIN: 0648-XA470) received November 16, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4193. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Gulf of Mexico Reef Fishery; Closure of the 2011 Gulf of Mexico Commercial Sector for Greater Amberjack [Docket No.: 040205043-4043-01] (RIN: 0648-XA766) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4194. A letter from the Director Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Atka Mackerel in the Bering Sea and Aleutian Islands Management Area [Docket No.: 101126521-0640-02] (RIN: 0648-XA783) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4195. A letter from the Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Western Pacific Pelagic Fisheries; American Samoa Longline Gear Modification to Reduce Turtle Interactions [Docket No.:

100218104-1485-02] (RIN: 0648-AY27) received November 16, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4196. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Reallocation of Crab Prohibited Species Catch Allowances in the Bering Sea and Aleutian Islands Management Area [Docket No.: 101126521-0640-02] (RIN: 0648-XA784) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4197. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Atlantic Herring Fishery; Adjustment to the Atlantic Herring Management Area 1A Sub-Annual Catch Limit [Docket No.: 0907301205-0289-02] (RIN: 0648-XA767) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4198. A letter from the Director Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Harvesting Pacific Cod for Processing by the Inshore Component in the Western Regulatory Area of the Gulf of Alaska [Docket No.: 101126522-0640-02] (RIN: 0648-XA790) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4199. A letter from the Director Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Harvesting Pacific Cod for Processing by the Inshore Component in the Western Regulatory Area of the Gulf of Alaska [Docket No.: 101126522-0640-02] (RIN: 0648-XA790) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4200. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Atlantic Herring Fishery; Sub-ACL (Annual Catch Limit) Harvested for Management Area 1A [Docket No.: 0907301205-0289-02] (RIN: 0648-XA764) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4201. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod and Octopus in the Bering Sea and Aleutian Islands Management Area [Docket No.: 101126521-0640-02] (RIN: 0648-XA794) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

4202. A letter from the Federal Liaison Officer, Patent and Trademark Office, transmitting the Office's final rule — Rules of Practice before the Board of Patent Appeals and Interferences in Ex Parte Appeals [No.: PTO-P-2009-0021] (RIN: 0651-AC37) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on the Judiciary.

4203. A letter from the Senior Program Analyst, Department of Transportation, transmitting the Department's final rule — Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments [Docket No.:30809; Amdt. No. 3449] received November 21, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4204. A letter from the Chief, Publications and Regulations, Internal Revenue Service, transmitting the Service's final rule — Update List of Areas Included in "North American Area"; Under IRC Section 274(h) (Rev. 4205. A letter from the Management and Program Analyst, Directives and Regulations, Forest Service, Department of Agriculture, transmitting the Department's final rule — Prohibitions — Developed Recreation Sites (RIN: 0596-AC98) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); jointly to the Committees on Agriculture and Natural Resources.

#### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WEBSTER: Committee on Rules. House Resolution 487. Resolution providing for consideration of the bill (H.R. 1633) to establish a temporary prohibition against revising any national ambient air quality standard applicable to coarse particulate matter, to limit Federal regulation of nuisance dust in areas in which such dust is regulated under State, tribal, or local law, and for other purposes (Rept. 112-317). Referred to the House Calendar.

#### PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

By Mrs. BLACK (for herself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr. YOUNG of Indiana, Mr. CHAFFETZ, Mr. LANKFORD, Mr. MULVANEY, and Mr. STUTZMAN):

H.R. 3575. A bill to amend the Congressional Budget Act of 1974 to establish joint resolutions on the budget, and for other purposes; to the Committee on Rules, and in addition to the Committee on the Budget, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. CAMPBELL (for himself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr. GUINTA, Mr. ROKITA, Mr. CHAFFETZ, and Mr. STUTZMAN):

H.R. 3576. A bill to amend the Balanced Budget and Emergency Deficit Control Act of 1985 to establish spending limits and deficit control; to the Committee on the Budget, and in addition to the Committee on Rules, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. RIBBLE (for himself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr.

STUTZMAN, Mr. ROKITA, Mr. GUINTA, and Mr. LANKFORD):

H.R. 3577. A bill to establish biennial budgets for the United States Government; to the Committee on the Budget, and in addition to the Committees on Rules, and Oversight and Government Reform, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. WOODALL (for himself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr. YOUNG of Indiana, Mrs. BLACK, Mr. LANKFORD, Mr. CHAFFETZ, and Mr. STUTZMAN):

H.R. 3578. A bill to amend the Balanced Budget and Emergency Deficit Control Act of 1985 to reform the budget baseline; to the Committee on the Budget.

By Mr. CHAFFETZ (for himself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr. ROKITA, Mrs. BLACK, and Mr. STUTZMAN):

H.R. 3579. A bill to require greater accountability in spending in direct spending programs, and for other purposes; to the Committee on the Budget, and in addition to the Committees on Rules, Education and the Workforce, and the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. MULVANEY (for himself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr. ROKITA, Mr. STUTZMAN, Mr. CHAFFETZ, and Mr. LANKFORD):

H.R. 3580. A bill to amend the Balanced Budget and Emergency Deficit Control Act of 1985 to provide for long-term budgeting, and for other purposes; to the Committee on the Budget, and in addition to the Committees on Rules, Agriculture, Ways and Means, Energy and Commerce, and Education and the Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. GARRETT (for himself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr. PRICE of Georgia, Mr. HUELSKAMP, Mr. CHAFFETZ, and Mr. STUTZMAN):

H.R. 3581. A bill to amend the Balanced Budget and Emergency Deficit Control Act of 1985 to increase transparency in Federal budgeting, and for other purposes; to the Committee on the Budget, and in addition to the Committees on Oversight and Government Reform, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. PRICE of Georgia (for himself, Mr. GARRETT, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mr. CHAFFETZ, and Mr. STUTZMAN):

H.R. 3582. A bill to amend the Congressional Budget Act of 1974 to provide for macroeconomic analysis of the impact of legislation; to the Committee on the Budget, and in addition to the Committee on Rules, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. LANKFORD (for himself, Mr. RYAN of Wisconsin, Mr. HENSARLING, Mrs. BLACK, Mr. YOUNG of Indiana, Mr. CHAFFETZ, Mr. STUTZMAN, and Mr. BUCSHON):

H.R. 3583. A bill to amend title 31, United States Code, to provide for automatic continuing resolutions; to the Committee on Appropriations.

By Mr. OWENS (for himself, Mr. CONNOLLY of Virginia, and Mr. DEUTCH):

H.R. 3584. A bill to authorize the United States Postal Service to co-locate post offices at retail facilities and municipal buildings, and for other purposes; to the Committee on Oversight and Government Reform.

By Mr. PRICE of North Carolina:

H.R. 3585. A bill to amend the Federal Election Campaign Act of 1971 to require personal disclosure statements in all third-party communications advocating the election or defeat of a candidate, to require the disclosure of identifying information within communications made through the Internet, to apply disclosure requirements to prerecorded telephone calls, and for other purposes; to the Committee on House Administration.

By Mr. STEARNS (for himself and Mr. MATHESON):

H.R. 3586. A bill to amend the Public Health Service Act to limit the liability of health care professionals who volunteer to provide health care services in response to a disaster; to the Committee on Energy and Commerce, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BILBRAY (for himself and Ms. ESHOO):

H.R. 3587. A bill to amend title XIX of the Social Security Act to provide for the application of Medicaid prompt pay requirement to claims for payment for covered items and services furnished by any Medicaid health care entity; to the Committee on Energy and Commerce.

By Mr. WELCH (for himself and Mr. CHAFFETZ):

H.R. 3588. A bill to require the proposal for debarment from contracting with the Federal Government of persons violating the Foreign Corrupt Practices Act of 1977; to the Committee on Oversight and Government Reform.

By Mr. SMITH of New Jersey (for himself and Mr. ISSA):

H.R. 3589. A bill to authorize appropriations for fiscal years 2012 and 2013 for the Trafficking Victims Protection Act of 2000, and for other purposes; to the Committee on Foreign Affairs, and in addition to the Committees on the Judiciary, Ways and Means, and Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. MALONEY (for herself, Mr. PALLONE, Mr. GUTIERREZ, Ms. BORDALLO, Mr. HONDA, Mr. FALBOMAVEGA, Mr. GRIJALVA, and Mr. POLIS):

H.R. 3590. A bill to allow certain Indonesian citizens to file a motion to reopen their asylum claims; to the Committee on the Judiciary.

By Mr. DEFAZIO (for himself, Mr. HINCHAY, and Ms. SLAUGHTER):

H.R. 3591. A bill to recalculate and restore retirement annuity obligations of the United States Postal Service, eliminate the requirement that the United States Postal Service pre-fund the Postal Service Retiree Health Benefits Fund, place restrictions on the closure of postal facilities, create incentives for

innovation for the United States Postal Service, to maintain levels of postal service, and for other purposes; to the Committee on Oversight and Government Reform, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. DEFazio:

H.R. 3592. A bill to provide that the Postal Service may not close any post office which results in more than 10 miles distance (as measured on roads with year-round access) between any 2 post offices; to the Committee on Oversight and Government Reform.

By Ms. HAYWORTH (for herself, Mr. KING of New York, Mrs. MCCARTHY of New York, Mr. ACKERMAN, Mr. GRIMM, Mrs. MALONEY, Mr. RANGEL, Mr. SERRANO, Mr. ENGEL, Mrs. LOWEY, Mr. GIBSON, Mr. TONKO, Mr. OWENS, Mr. HANNA, Ms. BUEKLE, Ms. HOCHUL, and Mr. REED):

H.R. 3593. A bill to designate the facility of the United States Postal Service located at 787 State Route 17M in Monroe, New York, as the "National Clandestine Service of the Central Intelligence Agency NCS Officer Gregg David Wenzel Memorial Post Office"; to the Committee on Oversight and Government Reform.

By Mr. WALSH of Illinois (for himself, Mr. HUELSKAMP, Mr. GINGREY of Georgia, Mr. CONAWAY, Mr. POSEY, Mr. KING of Iowa, Mr. BARTON of Texas, Mr. WESTMORELAND, Mr. DUNCAN of South Carolina, and Mr. BROUN of Georgia):

H.R. 3594. A bill to express the sense of the Congress that the United States should not adopt any treaty that poses a threat to national sovereignty or abridges any rights guaranteed by the United States Constitution, such as the right to keep and bear arms, and to withhold funding from the United Nations unless the President certifies that the United Nations has not taken action to restrict, attempt to restrict, or otherwise adversely infringe upon the rights of individuals in the United States to keep and bear arms, or abridge any of the other constitutionally protected rights of citizens of the United States; to the Committee on Foreign Affairs.

By Ms. WILSON of Florida:

H.R. 3595. A bill to establish a mandatory mediation process for servicers of residential mortgages and borrowers; to the Committee on Financial Services.

By Mr. BISHOP of New York (for himself, Mr. MCKINLEY, Mr. MICHAUD, and Mr. GENE GREEN of Texas):

H.R. 3596. A bill to require a publicly available list of all employers that relocate a call center overseas and to make such companies ineligible for Federal grants or guaranteed loans and to require disclosure of the physical location of business agents engaging in customer service communications; to the Committee on Energy and Commerce, and in addition to the Committees on Oversight and Government Reform, Armed Services, and Education and the Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BRALEY of Iowa (for himself and Mr. BOSWELL):

H.R. 3597. A bill to authorize the Secretary of Education to make grants to 10 institutions of higher education for the expansion of master's degree in physical education pro-

grams that emphasize technology and innovative teaching practices; to the Committee on Education and the Workforce.

By Ms. CLARKE of New York:

H.R. 3598. A bill to prohibit fees with respect to electronic benefit transfer debit cards used in connection with unemployment compensation; to the Committee on Ways and Means.

By Mr. HEINRICH (for himself, Mr. LUJÁN, Ms. BERKLEY, and Mr. MATHE-SON):

H.R. 3599. A bill to reauthorize the Secure Rural Schools and Community Self-Determination Act of 2000, to provide full funding for the Payments in Lieu of Taxes program, and for other purposes; to the Committee on Natural Resources, and in addition to the Committee on Agriculture, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. JONES (for himself and Mr. CLEAVER):

H.R. 3600. A bill to restore the Free Speech and First Amendment rights of churches and exempt organizations by repealing the 1954 Johnson Amendment; to the Committee on Ways and Means.

By Mr. KINGSTON (for himself and Mr. FARENTHOLD):

H.R. 3601. A bill to amend title III of the Social Security Act to require a substance abuse risk assessment and targeted drug testing as a condition for the receipt of unemployment benefits, and for other purposes; to the Committee on Ways and Means, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. PAUL:

H.R. 3602. A bill to amend title 5, United States Code, to provide that an employee or Member who dies within the 2-year notification period with respect to a survivor annuity shall be presumed to have elected to provide a former spouse with such an annuity, and for other purposes; to the Committee on Oversight and Government Reform, and in addition to the Committee on House Administration, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. ROTHMAN of New Jersey:

H.R. 3603. A bill to authorize 150,000 incremental vouchers for tenant-based rental assistance under section 8 of the United States Housing Act of 1937 to help meet the housing needs of low-income families; to the Committee on Financial Services.

By Mr. YOUNG of Alaska:

H.R. 3604. A bill to amend the Alaska Native Claims Settlement Act to provide for equitable allotment of lands to Alaska Native veterans; to the Committee on Natural Resources.

By Mr. JONES (for himself, Mr. POE of Texas, and Mr. WHITFIELD):

H. Res. 485. A resolution expressing the sense of the House of Representatives regarding the declassification of information related to missing and unaccounted-for members of the Armed Forces; to the Committee on Armed Services.

By Mr. BECERRA:

H. Res. 486. A resolution electing a Member to a certain standing committee of the House of Representatives; considered and agreed to.

By Mr. BISHOP of New York (for himself and Mr. HANNA):

H. Res. 488. A resolution honoring Americans who served as volunteers for the United States Office of Civilian Defense during World War II; to the Committee on Armed Services.

By Mr. LAMBORN:

H. Res. 489. A resolution expressing the sense of the House of Representatives that the symbols and traditions of Christmas should be protected for use by those who celebrate Christmas; to the Committee on Oversight and Government Reform.

## CONSTITUTIONAL AUTHORITY STATEMENT

Pursuant to clause 7 of rule XII of the Rules of the House of Representatives, the following statements are submitted regarding the specific powers granted to Congress in the Constitution to enact the accompanying bill or joint resolution.

By Mrs. BLACK:

H.R. 3575.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. CAMPBELL:

H.R. 3576.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. RIBBLE:

H.R. 3577.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. WOODALL:

H.R. 3578.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. CHAFFETZ:

H.R. 3579.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. MULVANEY:

H.R. 3580.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. GARRETT:

H.R. 3581.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. PRICE of Georgia:

H.R. 3582.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. LANKFORD:

H.R. 3583.

Congress has the power to enact this legislation pursuant to the following: Article I, Section 9, Clause 7.

By Mr. OWENS:

H.R. 3584.

Congress has the power to enact this legislation pursuant to the following:

This bill is enacted pursuant to the power granted to Congress under Article I, Section 8, of the United States Constitution.

By Mr. PRICE of North Carolina:

H.R. 3585.

Congress has the power to enact this legislation pursuant to the following:

The General Welfare Clause, Art. I, Sec. 8, of the Constitution

By Mr. STEARNS:

H.R. 3586.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1

By Mr. BILBRAY:

H.R. 3587.

Congress has the power to enact this legislation pursuant to the following:

Under Article 1, Section 8 of the U.S. Constitution The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

By Mr. WELCH:

H.R. 3588.

Congress has the power to enact this legislation pursuant to the following:

Article 1, Section 8, Clause 18: The Congress shall have Power To . . . make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof

By Mr. SMITH of New Jersey:

H.R. 3589.

Congress has the power to enact this legislation pursuant to the following:

article 1, section 8 of the Constitution

By Mrs. MALONEY:

H.R. 3590.

Congress has the power to enact this legislation pursuant to the following:

Article 1, Section 8, Clause 4, which reads: To establish a uniform rule of naturalization, and uniform laws on the subject of bankruptcies throughout the United States.

By Mr. DEFAZIO:

H.R. 3591.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 7 "To establish Post Offices & Post Roads"

By Mr. DEFAZIO:

H.R. 3592.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 7 "To establish Post Offices & Post Roads"

By Ms. HAYWORTH:

H.R. 3593.

Congress has the power to enact this legislation pursuant to the following:

The constitutional authority on which this bill rests is the power of Congress to establish Post Offices and post roads, as enumerated in Article I, Section 8, Clause 7 of the United States Constitution.

By Mr. WALSH of Illinois:

H.R. 3594.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 14 of the United States Constitution.

By Ms. WILSON of Florida:

H.R. 3595.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 3 of the Constitution.

The Congress shall have Power . . . To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes.

By Mr. BISHOP of New York:

H.R. 3596.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 3.

By Mr. BRALEY of Iowa:

H.R. 3597.

Congress has the power to enact this legislation pursuant to the following:

This bill is enacted pursuant to the power granted to Congress under Article I, Section 8, Clause 18 of the United States Constitution.

By Ms. CLARKE of New York:

H.R. 3598.

Congress has the power to enact this legislation pursuant to the following:

This bill to prohibit fees with respect to electronic benefit transfer debit cards used in connection with unemployment compensation is enacted pursuant to the power granted to Congress under Article I of the United States Constitution and its subsequent amendments, and further clarified and interpreted by the Supreme Court of the United States.

By Mr. HEINRICH:

H.R. 3599.

Congress has the power to enact this legislation pursuant to the following:

Congress has the power to enact this legislation pursuant to Article IV, Section 3 of the United States Constitution.

By Mr. JONES:

H.R. 3600.

Congress has the power to enact this legislation pursuant to the following:

The constitutional authority of Congress to enact this legislation is provided by the 1st Amendment of the United States Constitution, which states Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

By Mr. KINGSTON:

H.R. 3601.

Congress has the power to enact this legislation pursuant to the following:

Congress has the power to enact the Ensuring Quality Unemployment Insurance Program (EQUIP) Act pursuant to Article I, Section 8 of the Constitution.

By Mr. PAUL:

H.R. 3602.

Congress has the power to enact this legislation pursuant to the following:

The Spouse Equity Election Clarification Amendment Act is justified by Article 1, Section 8 of the constitution which vests all legislative authority in the United States Congress. This section clearly gives Congress the power to pass laws amending federal rules regarding benefits of federal employees and their current and former spouses.

By Mr. ROTHMAN of New Jersey:

H.R. 3603.

Congress has the power to enact this legislation pursuant to the following:

This bill is enacted pursuant to the power granted to Congress under Article I, Section 8, Clause 18 of the United States Constitution.

By Mr. YOUNG of Alaska:

H.R. 3604.

Congress has the power to enact this legislation pursuant to the following:

article 1 section 8 clause 3.

H.R. 157: Mr. HANNA.

H.R. 210: Ms. WASSERMAN SCHULTZ, Mr. BUTTERFIELD, Mr. BISHOP of New York, Mr. CLAY, and Mr. ACKERMAN.

H.R. 374: Mr. DENHAM.

H.R. 452: Mr. BILIRAKIS.

 H. Res. 480: Mrs. MILLER of Michigan and Ms. JENKINS.

#### CONGRESSIONAL EARMARKS, LIMITED TAX BENEFITS, OR LIMITED TARIFF BENEFITS

Under clause 9 of rule XXI, lists or statements on congressional earmarks, limited tax benefits, or limited tariff benefits were submitted as follows:

The amendment to be offered by Representative RUSH, or a designee, to H.R. 1633, the Farm Dust Regulation Prevention Act of 2011, does not contain any congressional earmarks, limited tax benefits, or limited tariff benefits as defined in clause 9 of rule XXI.

## EXTENSIONS OF REMARKS

### A TRIBUTE TO KYRIE HILLS

#### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Ms. Kyrie Hills for her passionate devotion as a leader to inspire others through the performing arts.

Ms. Hills is the daughter of Harold and Patricia Hills and the second oldest of three siblings. Ms. Hills and her family are active members at Berean Baptist Church in Brooklyn, NY where Dr. Arlee Griffin, Jr. is their Pastor and Rev. Byron Benton is the Youth Pastor.

Ms. Hills is currently a sophomore at Clark Atlanta University where she is pursuing a degree in psychology with the aspiration to become a psychotherapist. One of her greatest passions is dance and the performing arts, where she strives to bring her community together. During the summer of 2011 Ms. Hills worked as a camp counselor at Inspired, a performing arts camp in Brooklyn, NY. That same summer she was recruited to perform in the acclaimed play "For Christian Girls", written and directed by Termaine Price at Berean Baptist Church.

Ms. Hills also attends Chapel on CAU campus, and is a member of the choir and sings praises. Currently Ms. Hills is the CCO Rep of CAU Dance Theater and aspires to be President of the Dance Theater next academic year. Ms. Hills has previously served as the section leader of BCD "Royal Dame" dance line and she is the former Vice President of the Ministry of Sacred Dance at Berean Baptist Church.

Ms. Hills has been awarded several awards and was recognized for her performing arts throughout Brooklyn. In 2009 Ms. Hills performed in Dance Africa at the Brooklyn Academy of Music, was recognized by the National Council of Negro Women, and received the Joseph A.E. Jones "Youth of the Year Award" for outstanding and dedicated service to the Youth Ministry at Berean Baptist Church.

Aside from her extraordinary accomplishments in the performing arts, Ms. Hills also performs community service in Atlanta with the NAACP, while also mentoring children at the Booker T Washington Middle School with a group called Lady B Fly.

Mr. Speaker, I urge my colleagues to join me in recognizing the accomplishments of Ms. Kyrie Hills.

### MR. WALLACE L. BOYLE

#### HON. LOU BARLETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mr. BARLETTA. Mr. Speaker, today I rise to honor Wallace L. Boyle Jr. of Hazleton, Penn-

sylvania, for his faithful and dedicated service to the United States of America through turbulent times.

Wallace Boyle joined the Army Air Corps in 1940. At that time, there was no draft, so an enlistee could choose where he wanted to be stationed. Mr. Boyle selected Hawaii as his duty station, and he was sent to Wheeler Air Field. This put him about 24 miles from Pearl Harbor on the morning of December 7, 1941. The Japanese flew over and attacked Wheeler Air Field on the way to the naval base. The Japanese attack on Wheeler destroyed two-thirds of the aircraft at the field.

On that morning, Wallace Boyle was in the mess hall. He was just handed a plate of pancakes when the first bomb struck. Mr. Boyle ran outside and began helping his wounded comrades. More than 2,400 American lives were lost on that day, and almost 1,300 were injured.

During World War II, Mr. Boyle served at Andover Airfield in England, in France, in Belgium, and in Germany. He was discharged from the Army in 1945.

Mr. Speaker, Wallace L. Boyle Jr., who is only months away from his 90th birthday, is a fine example of the faithful and dedicated men and women that make up our Armed Forces. His selfless actions, and those of his generation, should forever be remembered and cherished by a grateful Nation.

### BILL LIVINGOOD, HOUSE SERGEANT AT ARMS

#### HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mr. POE of Texas. "Mr. Speaker, the President of the United States."

The announcement of the President at the State of the Union is how Americans have come to know the House Sergeant at Arms, Bill Livingood.

This duty is just one of many responsibilities of the House Sergeant at Arms.

He most importantly ensures the safety of Members, staff, and visitors as the chief law enforcement officer in the House.

And sadly Mr. Livingood, the third longest serving Sergeant at Arms, is retiring.

Bill is a wonderful person and accomplished public servant.

He has served the House since 1998 through some of the most trying times in our history and previously served our country as a member of the Secret Service.

I've known Bill for over 25 years beginning when I was a Judge in Texas, and he was the head of the Secret Service field office in Houston. His agents would file cases that were sometimes heard in my court.

I am sad to see him go but he has made a mark on this institution with improvements in

security and steadfast leadership that is a model for all who serve in the people's house.

Congratulations on your retirement, Bill, and thank you for your service to the House of Representatives and the United States of America.

And that's just the way it is.

### HONORING BRENT BAIR

#### HON. MIKE ROGERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mr. ROGERS of Michigan. Mr. Speaker, I rise today to honor a man that needs no introduction in Michigan, nor the transportation and intelligent transportation network in the country.

After 34 years of public service to the Road Commission for Oakland County, Brent Bair will be retiring at the end of the year. A pillar of the community, Mr. Bair has a long and distinguished resume.

Serving as the Managing Director of the Road Commission for Oakland County, his department is responsible for the largest county road system in Michigan, second in size to the state highway system, and currently operates the second largest system of adaptive traffic signals in the nation. He is widely respected as a leading expert on road funding in Michigan and has been an advocate on behalf of Intelligent Transportation Systems (ITS) and ITS funding. He is a founding member and past president of the Intelligent Transportation Society of Michigan as well as an active member in and former chairman of the national ITS association, ITS America.

As the Chairman of the Intelligent Transportation Systems' Caucus in the House of Representatives, I have long looked to Brent for advice and guidance on good governance and ITS policy. Early on I recognized the benefits to including technological advances in our cars, highways and infrastructure. Through educational programs and ongoing efforts by Brent and ITS Michigan, Congress has recognized that in this economic climate of doing more with less, ITS solutions are an important step towards fiscal responsibility and more importantly, smart solutions.

A tireless advocate for his community, Brent Bair will be missed. I wish him and his family all the best in the years to come.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

HONORING SUPREME COURT  
JUSTICE FRANK A. SEDITA, JR.

**HON. BRIAN HIGGINS**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. HIGGINS. Mr. Speaker, I want to take a moment to have the House pause in its deliberations this morning to honor New York State Supreme Court Justice Frank A. Sedita, Jr., whose three decade judicial career will end this year. The Judge, best known to friends and family as "Chickie," is among the most lovable and well-respected legal figures in the Western New York community.

A lifelong Buffalonian, Judge Sedita is the scion of one of the most famous and well-respected 20th century Buffalo political families. While the Judge's father was one of Buffalo's most well-liked 20th century political figures and someone looked back upon nostalgically as one of Buffalo's most favorite mayors; Judge Sedita's career as an attorney and a jurist has been tremendously substantial, as have been the Judge's contributions as a public servant to the hometown region he loves so much.

Born and raised in Buffalo, Judge Sedita was graduated summa cum laude from the Canisius College of Buffalo, and in 1960 earned his J.D. at the University at Buffalo Law School. During extensive legal practice in the office of the City of Buffalo's Corporation Counsel, Judge Sedita developed substantial expertise in the area of education law, serving for many years as the counsel to the city's Board of Education.

Judge Sedita's career on the bench began in the mid-1970s, upon his election as an Associate Judge of the Buffalo City Court. Following successful service as a Judge of the Erie County Family Court, he was elected as Chief Judge of the Buffalo City Court, administering the city's court system within the very building named for his late father. During this period, Judge Sedita assumed responsibility for the city's Housing Court, raising that court's profile and restoring its work to its rightful level of prominence. His work in that court was probably among the most impactful judicial work performed in Western New York during that period, and resulted in Judge Sedita's selection as a Buffalo News "Citizen of the Year."

For the better part of the past two decades, Judge Sedita has served with tremendous distinction as a Justice of the New York State Supreme Court, continuing to bring honor to not only his own career but also to his storied family name. Notwithstanding his retirement, all residents in Erie County are fortunate that the Sedita family's tradition of effective public service will continue—hopefully for many years to come. In 2012, the judge's son—Frank A. Sedita III, will complete his first term as Erie County's District Attorney. Frank Sedita III has proven a tenacious and effective prosecutor throughout his legal career, and he too, like his father the judge, continues to be a credit to his family, and to the community that he serves with such effectiveness.

In closing, Mr. Speaker, I ask that the whole House join with those of us in Western New

York who wish good luck and Godspeed to New York State Supreme Court Justice Frank A. Sedita, Jr., upon the occasion of his retirement from the bench.

HONORING THE SEVENTH CYCLE  
BIRTHDAY ANNIVERSARY OF  
KING BHUMIBOL ADULYADEJ

**HON. DANA ROHRBACHER**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. ROHRBACHER. Mr. Speaker, I rise today to join the people of Thailand in celebrating the seventh cycle birthday anniversary of His Majesty King Bhumibol Adulyadej on December 5th. During his reign of over 65 years, Thailand continues to be the United States' long-term military ally, trade and economic partner, and friend in southeast Asia.

King Bhumibol holds a special relationship with our country beginning with his birth in Cambridge, Massachusetts while his father was attending Harvard University. As part of his continuing efforts to strengthen the ties between the United States and Thailand, the King visited America in 1960 and 1967. Under King Bhumibol's stewardship, Thailand has become a model of democracy and economic development in the region. Thailand's role as a regional democratic leader is a critical factor in the development of a stable Bangkok-Washington relationship.

I had the distinct honor and privilege of visiting King Bhumibol on my past visits. His continued efforts to provide guidance to improve the lives of his people were evident. Fittingly, he was awarded the United Nations Development Programme's first Human Development Lifetime Achievement Award in 2006.

Mr. Speaker, I extend my best and warmest wishes on his 84th birthday and for a long life of good health. I am pleased to join our Thai friends in recognizing this special day.

IN SUPPORT OF THE 16 DAYS OF  
ACTIVISM AGAINST GENDER VIOLENCE

**HON. SAM FARR**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. FARR. Mr. Speaker, I rise today to speak about the 16 Days of Activism Against Gender Violence. This campaign draws attention to the impact of violence against women around the world.

The 16 Days of Activism Against Gender Violence is an international campaign of activism. It lasts for 16 days and starts on November 25, which is the International Day Against Violence Against Women, and ends on December 10, International Human Rights Day. The campaign highlights the links between violence against women and human rights, and stresses that this type of violence is a violation of human rights.

Since 1991, over 3,700 organizations in approximately 164 countries have participated in the 16 Days of Activism campaign.

Violence against women remains a serious problem both domestically and throughout the world. It has been estimated that nearly a billion women globally will be beaten, raped, mutilated or otherwise abused during their lifetimes. That is 1 in 3 women. Those statistics are extremely frightening for both men and women and are simply unacceptable.

Mr. Speaker, I urge my colleagues to join the call to end violence against women and girls around the world.

A TRIBUTE TO KEITH HICKS

**HON. EDOLPHUS TOWNS**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Mr. Keith Hicks for his leadership throughout his community and focus on education and professionalism.

Mr. Hicks was born the youngest of five children, to his parents John Henry and Marie Antoinette in South Jamaica, Queens. As a child Mr. Hicks learned to cultivate a strong sense of leadership that would transcend into his future career.

In his early career, Mr. Hicks joined the Private Industry Council, an organization committed to youth development. As a program monitor, he completed his BA degree at John Jay College. He would also serve as instructor before moving to the Fortune Society, focusing his efforts on developing both the educational and professional lives of former prisoners. His career focus of providing resources to assisting the economically disadvantaged and at risk youth would continue with stops at the Hope Program where he served as Learning Center Director and the WAY Program where he served as Assistant Director, and Director.

Mr. Hicks' continued leadership role would extend to the YMCA, when he served as Director of the Cross Island branch in Queens. At the YMCA, Mr. Hicks ascended to serve as the Assistant Executive of the Northern Brooklyn branch and now as the executive Director of the Greenpoint Brooklyn branch, where he continues to serve. In this capacity, Mr. Hicks manages a budget in the millions, over 100 professional staff members, and offers services to thousands.

While serving at the YMCA, Mr. Hicks had the opportunity to pursue his Masters Degree from Queens College, further providing a great example to those he has influenced over the years. Mr. Hicks' accomplishments at the YMCA and throughout his career are extensive, but professionally he remains most proud of the role he has been able to play in the lives of our youth.

Mr. Hicks is the proud father of a daughter Tyler Marie Hicks who is presently a senior at Townsend Harris School and will enter college next year. Mr. Hicks' favorite scripture serves as a guiding force in his life, Hebrews 12:1: "wherefore seeing we also are compassed about with so great a cloud of witnesses, let us lay aside every weight and the sin which doth so easily beset us, and let us run with patience the race that is set before us".

Mr. Speaker, I urge my colleagues to join me in recognizing the life and accomplishments of Mr. Keith Hicks.

IN RECOGNITION OF THE 100TH  
BIRTHDAY OF RUBY HARTLEY  
BARTON

**HON. MIKE ROGERS**

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. ROGERS of Alabama. Mr. Speaker, I would like to request the House's attention today to pay recognition to the special life of Ruby Hartley Barton of Talladega, Alabama.

Mrs. Barton was born on December 15, 1911 in Georgia to James and Victoria Hartley. Mrs. Barton's father died while she was a baby, and her mother raised her and her six brothers and sisters. Mrs. Barton grew up in a fanning and textile family.

She was married to the late B.W. Barton for over 50 years and was blessed with two sons, Charles D. Barton and Larry H. Barton and one daughter, Edith Barton Bishop. Mrs. Barton now has three grandchildren, three great-grandchildren and one great-great grandchild.

Mrs. Barton worked at Bemis Mills for close to 40 years and has spent her life serving God and volunteering in her church as a Sunday School teacher, choir director and pianist.

On December 15th, her friends and family will celebrate her birthday in her room at Talladega Health Care in Talladega. Today I would like to wish Mrs. Ruby Hartley Barton a very Happy 100th Birthday.

PERSONAL EXPLANATION

**HON. ANNA G. ESHOO**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Ms. ESHOO. Mr. Speaker, I was not present during the rollcall vote No. 875, on December 1, 2011.

On rollcall vote No. 875 I would have voted "yes."

MERGER OF TRANSPORTATION  
COMMUNICATIONS UNION AND  
INTERNATIONAL ASSOCIATION  
OF MACHINISTS AND AEROSPACE  
WORKERS

**HON. CORRINE BROWN**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Ms. BROWN of Florida. Mr. Speaker, I rise today to commemorate the January 1, 2012 merger of the Transportation Communications Union (TCU) and the International Association of Machinists and Aerospace Workers (IAMAW).

These two great unions, with railroad roots, are on pace to become one strong voice for hundreds of thousands of middle-class working men and women across our great nation.

It was in 1888 that 19 Machinists meeting in a locomotive pit in Atlanta, Georgia formed what is now the International Association of Machinists and Aerospace Workers, commonly known as the "Fighting Machinists".

Today's TCU is one union made of many. At its core is the Union founded in 1899, which became the Brotherhood of Railway Clerks. Then in 1919 the name expanded, becoming the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. To further reflect the diversity of the union's membership, the delegates at the 1987 Convention voted to become the Transportation Communications International Union (TCU).

TCU, joining the ranks of the Machinists, makes its membership and the labor movement that much stronger. Both of these unions are constantly fighting for the dignity, welfare and prosperity of their members. Workers are the foundation of our nation; they drive our economy and our country forward. TCU and the IAM understand the values of hard work, faith, family and community—they are the keys of success. These four pillars are what make TCU and IAM stronger.

This merger not only unites two unions but two dedicated union presidents as well. The determination of these two men to fight for the rights for fair wages and working conditions for everyone has its roots in Tom Buffenbarger, who started out as a journeyman tool and die maker at GE's jet engine plant in Evendale, Ohio. In 1997 he was the youngest IAM President in its history. And Bob Scardelletti, a lifelong railroader, started out as a yard clerk in Cleveland with the New York Central Railroad in 1967; in 1971 took on his first union position and by 1991 was elected president and has been re-elected by acclamation four times.

TCU and IAM were fundamental in building the American middle-class, and have a vital role today in preserving the American dream for working families. Their unions were unified by a common purpose: to do the very best they can—every single day—for the members they serve. The TCU/IAM merger now creates a powerful force representing close to a million active and retired Americans. Their combined strength will provide leadership throughout the labor movement; particularly, the transportation industry. TCU/IAM is now one of the largest rail unions in the United States.

I ask my colleagues to join me in honoring this historic merger for the betterment of the hard-working middle-class men and women of our country.

HONORING THE SCOTLAND HIGH  
SCHOOL FOOTBALL TEAM ON ITS  
2011 NORTH CAROLINA 4-A STATE  
CHAMPIONSHIP TITLE

**HON. LARRY KISSELL**

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. KISSELL. Mr. Speaker, I rise today to recognize the Scotland High School football team in honor of the school's first-ever North Carolina 4-A State Football Championship. The Fighting Scots rallied for 35 points in the second half on their way to a 42-16 victory over a talented and determined Porter Ridge High School team, Saturday, Dec. 3.

Scotland finished the 2011 season with a perfect 15-0 record, the first undefeated sea-

son in school history. I congratulate Scotland head coach Chip Williams, who in his fourth year leading the program, posted an undefeated record, won the Southeastern 4-A Conference title and brought home a State Championship to Scotland County, the county's first football state championship since 1944, when Laurinburg High School captured the Class-A state title.

Game Most Valuable Player honors were awarded to Scotland quarterback Kwashaun Quick, who threw for 172 yards and two touchdowns in the second half. Running back Tony McRae, who received offensive MVP honors, rushed for 75 yards and two scores. Defensive MVP honors were awarded to nose tackle Kris Tyndall. Scotland's superb defense forced four Porter Ridge turnovers and allowed just 161 yards of offense.

I recognize the Scotland County community and congratulate them on the success of their team and the support they have given these young men throughout the year. In the days following his team's victory, Coach Williams has cited the community's support as a driving force behind this year's team. It is always great to see a community get behind a program that supports and encourages young people and teaches them the value of perseverance and teamwork. Before Congress and our great nation, I am proud to recognize Coach Williams, his dedicated coaching staff and players, and the Scotland County community as a whole for their championship season. Thank you.

FIGHTING MALARIA: PROGRESS  
AND CHALLENGES

**HON. CHRISTOPHER H. SMITH**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. SMITH of New Jersey. Mr. Speaker, yesterday, the Subcommittee on Africa, Global Health, and Human Rights, which I chair, held a hearing on malaria, one of the most serious health issues facing the developing world, and particularly Africa, today.

For the last century, America has been a leader in the fight against malaria. While the United States and several other countries have been able to eliminate malaria, this deadly disease still presents a serious challenge to other parts of our world.

The World Health Organization estimates that 781,000 people died from malaria in 2009 and that 225 million people suffered from infection. Malaria is the fifth leading cause of death from infectious diseases worldwide. It inflicts a particularly severe toll on the people of sub-Saharan Africa, where ninety percent of deaths are caused by malaria. Moreover, approximately 85 percent of malaria deaths occur in children under 5 years of age. Every 45 seconds, a mother and father in Africa lose their child to malaria.

There is also a far-reaching impact on the wealth and development of countries with endemic malaria. Africa may lose up to \$12 billion in productivity due to malaria each year due to the disease, while the disease in turn consumes about 40 percent of Africa's public

health expenditures. These numbers and statistics are staggering, but they have a greater impact when one has been to Africa and met the individuals who must live with the disease.

Anyone who spends any meaningful amount of time in Africa and mingles with the African people will soon notice the prevalence of malaria. When you ask someone whether he or she has ever had malaria, they likely will respond not with a yes but with the time that has passed since they last suffered from it.

More astounding than the sad reality that malaria is killing or harming so many millions of people is the reality that malaria is preventable and treatable. The world has the tools to prevent and treat malaria. No one in the twenty-first century should have to suffer from it, let alone die from it.

When I last visited Uganda, I visited several homes, including a home in the remote region of Bushenyi. The three-room dwelling of white-washed walls and dirt floors was practically empty, and this made the insecticide-treated mosquito net over the floor mats all the more striking. These nets may seem like insignificant items when listed on paper, but they are noticeably visible in the modest homes of those families who rely on them for protection from this ravaging disease.

What began for the United States as an effort to protect our troops abroad and citizens here at home has become for us a larger global health objective.

In the last decade we have seen a renewed commitment by the United States, international organizations, and private foundations to eliminate all malaria deaths. The effort received a notable boost in 2007 when Bill and Melinda Gates renewed the challenge of worldwide malaria eradication.

While much progress has been made in combating malaria, as we have seen from past eradication efforts, malaria can resurge when treatment becomes ineffective through drug resistance. While the global commitment remains to beat this disease, and to beat it as soon as possible, the stakes are too high to bet it all on doing so before the tools we have lose their impact.

At yesterday's hearing the subcommittee received an update on the progress toward malaria elimination in the most endemic countries with a focus on the vitality and effectiveness of the treatment component. The hearing examined the future of anti-malarial drug and vaccine development, and challenges in ensuring an adequate supply of effective medicines. We also heard about the continued availability, affordability, and safe distribution of quality anti-malarial medicines.

Our distinguished witnesses explored means for achieving the immediate goal of saving lives, and the ultimate goal of eradicating malaria from our world.

#### A TRIBUTE TO IRIS ROBERTSON

### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Iris Robertson for her contribu-

tions to her community in the role of mentor, educator and community coordinator.

Mrs. Robertson was taught at an early age to treat people with respect and integrity, and to approach any task with rigor and importance. Her mother and grandmother instilled this discipline upon her. These pillars allow her to impact the community in a positive way through growth and development.

Mrs. Robertson devotes herself to several charitable and educational organizations and sits on the board of directors for Brownville Heritage House Inc. (BHH) as secretary. Since joining BHH in 1995, Mrs. Robertson and her fellow board members worked tirelessly to bring forth the vision of founder Mother Rosetta Gaston to form an intergenerational exchange in order to teach African American children of their heritage.

Mrs. Robertson is a member of and has been recognized by the National Association of Professional Women (NAPW) as Woman of the Year for 2009, 2010, and 2011 for excellence and proficiency in her work as an advertising executive. She has also received high achievement award from the National Association of Hispanic Publishers in 1994 for her work with AT&T.

Working in the advertising industry for more than 30 years, she currently holds the position of media supervisor at UniWorld Group Inc, a multicultural agency owned by Mr. Byron Lewis Sr. In this capacity, Mrs. Robertson has had the privilege of working with fortune 500 companies, recommending media strategies that best showcase their products.

In 1965, Mrs. Robertson met and married her husband Larry Robertson. She is the proud mother of six children. She attended New York City School of Technology and is currently enrolled at Kaplan University.

Mr. Speaker, I urge my colleagues to join me in recognizing the achievements of Mrs. Iris Robertson.

#### A TRIBUTE TO KITTY O'NEAL ON THE OCCASION OF BEING NAMED PERSON OF THE YEAR BY THE CARMICHAEL CHAMBER OF COMMERCE

### HON. DANIEL E. LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. DANIEL E. LUNGREN of California. Mr. Speaker, I rise today to congratulate Kitty O'Neal on being named Person of the Year by the Carmichael Chamber of Commerce.

Over the last 20 years, Sacramentans have known Kitty as the voice of our afternoon radio. With exceptional class and professionalism, Kitty has given us the news on our drive home from work, anchoring the award winning KFBK Afternoon News. As an ambassador of Sacramento, she has represented us at the Grammy Awards, Academy Awards and on national programs such as A&E Channel's Biography.

Those of us who live in the region know Kitty as more than simply the voice coming through our speakers; she is a pillar within the Sacramento community. Her roots run deep

there as she donates much of her time and talent to community events and charitable organizations. Growing up, Kitty's father was the Base Commander at Mather AFB in the 1970's, and before embarking on her path in radio, Kitty attended Sacramento State graduating with a degree in Communications. Along with being one of the Sacramento region's most notable figures, Kitty is married to restaurateur Kurt Spataro, and together they are partners in several well known Sacramento area restaurants.

If you have ever dined, listened to Sacramento radio or have been involved in our surrounding community, more than likely you have benefited from Kitty's legacy. The Carmichael Chamber couldn't have chosen a better person to recognize and again it is with great pleasure that I congratulate Kitty O'Neal on her achievements and recognition as Person of the Year by the Carmichael Chamber of Commerce.

#### A TRIBUTE TO THE LIFE OF GEORGIA FAYE BAKER

### HON. JIM COSTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. COSTA. Mr. Speaker, I rise today to pay tribute to the life of Georgia Faye Baker who passed away on November 24, 2011 at the age of 95. Georgia was a loyal friend, loving mother, and respected community leader who touched the lives of many in the great San Joaquin Valley. Georgia was born on March 30, 1916 to James and Susan Herd in Ozark County, Missouri.

Georgia made her way to Madera, California in 1938, where she quickly became an icon and a source of inspiration due to her involvement in the community. On April 14, 1946, Georgia married Aubrey Baker, the love of her life. Together they worked on several projects to improve the quality of life in Madera, the place they called home. They were married for 55 years until his passing in 2001.

Through her leadership and willingness to serve, Georgia became a role model for her friends and neighbors. For 33 years, she was a committed and reliable member of the Madera Community Hospital Board. Her membership demonstrated her dedication to fostering and preserving the health and safety of residents throughout Central California, and her compassion and concern for our community served as a testament to her extraordinary character.

A principled and engaged citizen, Georgia was very active in local, state, and national elections. She served on a number of state committees and boards, including the Madera County Fair Board. In addition, Georgia was also an energetic member of the Democratic Party. In 1960, her wisdom and capability allowed her the opportunity to campaign with President John F. Kennedy during his bid for the presidency.

In 1991, the State of California honored her strength of character and zest for life when she was recognized as "Woman of the Year."

A generous and graceful woman, Georgia was a faithful parishioner at the Madera Trinity

Episcopal Church and would often be seen attending weekly services at the historic site. Her long-lasting participation in our community and commitment to the well-being of future generations will ensure that her legacy lives on for years to come.

Georgia lived an exemplary life and will undoubtedly be missed by many. She is survived by her daughter, Claudia Steinauer; her sister, Mable Russell; three grandchildren; seven great-grandchildren and five great great-grandchildren.

Mr. Speaker, I ask my colleagues to join me in honoring the life of Georgia Faye Baker, a beloved leader and true champion for the people of Central California.

#### TRIBUTE TO THE HAZARD HIGH SCHOOL FOOTBALL TEAM 2011

### HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. ROGERS of Kentucky. Mr. Speaker, I rise today to pay tribute to the 2011 Hazard High School Football Team, who captured the Kentucky High School Athletic Association Class 1-A State Championship Title for the first time in history. This group of student-athletes should be proud of this remarkable achievement and I am honored to recognize them as champions.

The State Championship title has been a highly coveted achievement for the Hazard Bulldogs. After their third appearance in a Class 1-A title game in four years, the Bulldogs tenaciously took the field with experience, heart and determination, earning every yard to lead them to a well-deserved victory and their first-ever State Championship.

The Hazard Bulldogs defeated a tough team from Mayfield, winning 24-6. More than five thousand fans filled the Houchens Smith Stadium in Bowling Green, Kentucky to witness these focused young men put their athletic ability and knowledge of the game to the highest test. Redeeming themselves from last year's 47-6 loss to Mayfield, the Bulldogs dominated the majority of the game and put an end to Mayfield's state-best 29-game winning streak. Holding the Cardinals to just 237 yards offensively, the Hazard Bulldogs forced five Mayfield turnovers and sealed their victory with an interception returned for a touchdown in the last two minutes of the game.

This season, Coach Mark Dixon led the Bulldogs to a near perfect 12-2 season. Despite defeat in last year's title game, the Bulldogs persevered and came back this season with unwavering determination to bring the state title home to the mountains of eastern Kentucky. These experiences and life lessons learned on the field will be carried on after the game and continue to shape these football players into men of promise and outstanding character.

Mr. Speaker, I ask my colleagues to join me in honoring Coach Dixon and the Hazard High School 2011 Football Team as the KHSAA Class 1-A State Champions. This team has successfully carried on a sports tradition of pride in the mountains and I wish them all the best in the years to come.

#### A TRIBUTE TO ELIZABETH CROSLAND

### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. TOWNS. Mr. Speaker, I rise today to honor Ms. Elizabeth Crosland for her commitment to her community and for her service to the children of Brooklyn as a Family Assistant with PS 13.

Ms. Crosland was born in Philadelphia, Pennsylvania to the late William T. and Annie Lee Pinchback. She was the eldest of five siblings, and later moved to Brooklyn, New York.

Ms. Crosland has been employed with the Department of Education at PS 13 as a Family Assistant for 24 years. During her years of service, she has enjoyed working with the administrators, her colleagues, and the students. Ms. Crosland prays everyday that she will empower the lives of the students and their families to become productive citizens in the community.

Ms. Crosland attends the Mount Lebanon Baptist Church on the Hill in Bedford Stuyvesant, where she has been a member for 74 years. She is active on the usher board, serving the needs of the congregation. She also sings in the Robert A. Laws Millennium Choir and was a member of the Allstate Club.

Ms. Crosland is an Honorary past Matron in the order of the Maria Chapter #18 Order of Eastern Stars. She has also been a great contributor to the community by working with the district leaders and working the primary and general election polls for many years.

Mr. Speaker, I would like to recognize Ms. Elizabeth Crosland for her exceptional service to her district as a dedicated member of her local religious and government institutions, and as a long serving employee of the Department of Education.

#### RECOGNIZING THE NOVEMBER 25, 2011 DEMOCRATIC ELECTIONS OF MOROCCO

### HON. STEVE COHEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. COHEN. Mr. Speaker, I congratulate the people of Morocco for the free and fair Parliamentary election that took place on November 25, 2011. Participation rates were 20 percent higher than the previous election held in 2007. The Justice and Development Party (PJD), a moderate Islamist party, secured the largest number of seats in the new Parliament. Morocco's King Mohammed VI, in line with the new constitution, has already tasked the leader of the PJD, as Head of Government, to form a new coalition government. This election marks the first time the Moroccan people have gone to the polls within the framework of the new constitution. With this election, Morocco has crossed yet another major milestone in its democratic progress. I extend my warm wishes to the King of Morocco for his leadership and the Moroccan people for their achieve-

ments so far and hope they continue on the path of reform and progress.

#### A TRIBUTE TO DEACON AUDREY WRIGHT

### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Deacon Audrey Wright who has dedicated her life to the teachings of Jesus Christ, and to her family, colleagues, and community.

Deacon Wright was born to Anna Mae King-Gordon and Mitchell Gordon in Princeton, West Virginia where her parents regularly attended Golden Gate Church. With her strong convictions, Deacon Wright completed high school in a very segregated district of West Virginia, and soon relocated to Brooklyn, New York to complete her undergraduate studies at Medgar Evers College.

Later in life Deacon Wright spent 25 years as an assistant teacher in the Ocean Hill Section of Brooklyn before retiring. Prior to teaching, Deacon Wright was employed by Abraham Strauss for several years in the sales department. After retiring as an assistant teacher, she turned to the Lord and became a member at Berean Baptist Church.

Joining Berean Baptist Church in 1994, she worked as a volunteer with children in the "Time Release Program" for seven years. At Berean, Deacon Wright was ordained on December 13, 1998 and continued her deep involvement with the church. She became a member of the First Lady's Ministry and served as the Deacon Advisor as well as the Spiritual Advisor to the Hospitality Ministry. Presently, she is a member of the Deacon Ministry, Pastoral Care Ministry, the Sunday School Ministry and the Sisterhood Ministry.

Several of her hobbies include writing, reading and exercising. During her tenure at Berean, Deacon Wright wrote and directed seven plays; two of which were performed to raise funds for Women's Day and five others that were written to raise funds for the church. In addition to being an avid reader and writer, Deacon Wright has been dedicated to her health and exercise—walking two miles every day.

Deacon Wright is married to Samuel Wright, and has been blessed with three sons—Bobby, David, and Dominic. She is thankful for God in her life, and gives thanks to the Lord every day for loving and caring for her.

Mr. Speaker, I urge my colleagues to join me in recognizing the life and accomplishments of Deacon Audrey Wright.

#### HONORING DR. EDWARD WAITE MILLER

### HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Ms. WOOLSEY. Mr. Speaker, I rise in sadness today to honor my friend, Dr. Edward

Waite Miller, who passed away October 27, 2011, at the age of 92. He was a prominent surgeon and writer in Marin County, California, as well as a loving family man.

Born in Oyster Bay, New York, in 1919, Dr. Miller studied at Union College in Schenectady and at Cornell Medical School with an internship at Boston City Hospital. He then served at the US Naval Hospital in Corpus Christi and in the South Pacific during WWII. He was awarded the American Theatre, Asiatic-Pacific, and Victory Medals. Reactivated in 1953, his service varied from making training films in the California desert to witnessing nuclear testing at the Bikini Atoll. He then received the Korean Service, United Nations, and National Defense Medals.

Dr. Miller also had a distinguished medical career. While working as a research fellow at the Cleveland Clinic with Dr. Willem Kolff in the 1950s, he published some seminal studies on the angiography of the heart that led to research in the new practice of coronary bypass surgery. He later worked as a surgeon in Mann General Hospital in Greenbrae, CA, and Children's Hospital in San Francisco, CA, and as a physician at Novato Community Hospital in Novato, CA.

In retirement Dr. Miller became well known in the community and around the world for his writing in the Coastal Post newspaper, a Marin County publication that gave him free rein to speak out on issues he was passionate about. From advocacy for peace and human rights to his sometimes controversial pro-Palestinian stance, he penned opinion pieces that reflected his deeply held beliefs and his great knowledge of world events.

I had many conversations with Ed Miller about these issues, and, although I sometimes didn't agree with him, I always enjoyed our time together and appreciated his commitment and his compassion. He loved discussing everything from politics to poetry (which he quoted from memory) with friends and family.

A long-time resident of the Lucas Valley area, Dr. Miller enjoyed landscaping his yard, and he was a board member and President of the Lucas Valley Homeowners' Association.

Dr. Miller is survived by his wife Fusae Ito Miller; his children and stepchildren, Trudy Vriethoff, Susan Ray, Lori Callahan, Jeffrey Miller, Grace Bransford, and Robert Fleming and their spouses; and 5 grandchildren.

Mr. Speaker, I always looked forward to seeing Ed Miller and will miss our lively discussions. Please join me in offering condolences to his family and friends.

#### TRIBUTE TO RONNY L. BEESLEY

#### HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. PAUL. Mr. Speaker, on December 31, 2011, US Army Corps of Engineers, Galveston District employee, Ronny L. Beesley will retire after 40 years of service to his country. It is my pleasure to pay tribute to Mr. Beesley for all he has done for the people of Texas and the United States.

Mr. Beesley's long and distinguished career with the Federal Government began in October

1968 when he joined the US Army. Mr. Beesley served in Vietnam as part of the 1st Infantry Division, 101st Airborne Division until June 1971. After leaving the Army, Mr. Beesley earned a Bachelor of Science degree in Civil Engineering at Texas A&M University, in Kingsville, Texas.

Mr. Beesley started working with the Galveston District, Army Corps of Engineers in July 1975. He has held numerous positions with the Corps over the past forty years including: Civil Engineer in the Fort Point Area Office, Civil Engineer and Project Engineer in the Houston Area Office, he worked in the Construction Branch of the Construction Operations Division, General Engineer in the Plant Branch of the Construction Operations Division, and he was promoted to Chief of the Plant Branch in 1990 until he became the Chief of Management Support Branch in 1995. In July 1998, Mr. Beesley was again promoted to Senior Operations Project Manager, Project Operations Branch, and Operations Division. Mr. Beesley's outstanding work was recognized by the Galveston District in 2004 when he was selected as Employee of the Year.

In July 2010, Mr. Beesley was promoted to Chief of Project Operations Branch in the Operations Division of the Galveston District. His duties include managing and supervising Operations and Maintenance of the District's projects including Addicks/Barker Dams and Reservoirs, Brazos River Floodgates, Wallisville Lake Project and the Colorado River Locks. He is also responsible for overseeing expenses for Operations and Maintenance at the Neches Saltwater Barrier, as well as for inspection of projects built by the Government and operated by local sponsors. Mr. Beesley provides support/assistance to the Chief, Operations Division in areas of land and water resource management and is responsible for maintenance of the district's floating plant. Under Mr. Beesley's leadership, the Operations Division acquired a new floating plant for the Galveston district.

Mr. Speaker, Mr. Ronny Beesley provided outstanding services to his country and his town as both a soldier and an employee with the U.S. Army Corps of Engineers, Galveston District. It is therefore my pleasure to once again extend my congratulations and thanks to him as he prepares for retirement.

#### HONORING RETIRED MASTER SERGEANT NATHAN WEISER

#### HON. THADDEUS G. McCOTTER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. McCOTTER. Mr. Speaker, today I rise to honor and acknowledge retired Master Sergeant Nathan Weiser, on this the 70th anniversary of the attack on Pearl Harbor, a horror which by the grace of our Almighty God, Mr. Weiser survived.

After graduating from Albion College with a teaching degree in 1939, Nate Weiser enlisted in the newly formed United States Army Air Corps along with two of his friends in October 1940. All three men were sent to Hawaii as part of the 15th Fighter Group, 45th Fighter

Squadron and were stationed at Pearl Harbor on the horrific day of December 7, 1941.

Retired Master Sergeant Weiser and his two friends were in the mess hall waiting in line for breakfast when the attack began. He recalls the planes flying low enough to be able to see the red scarves and goggles of the pilots hell-bent on destruction. After surviving the initial wave and the smaller second wave of enemy planes, it began to rain. Having lost the friends he enlisted with to the Japanese fury, Weiser and his unit headed toward a mountain fox-hole and spent some very uncomfortable nights in the flooded dugout.

In 1943, Staff Sergeant Nate Weiser was sent back to the mainland to attend special schooling. He was asked to serve as an Army officer and declined. Weiser requested to be sent back to the Army Air Corps and was assigned to Jefferson Barracks in St. Louis. From there he was detailed to the 365th Fighter Bomber Group, 386th Squadron based out of Richmond, Virginia. Nate Weiser arrived in Normandy, France on June 13, 1944, a mere seven days after the initial invasion. As 1944 gave way to 1945, Weiser served in the grueling 40 day Battle of the Bulge. Master Sergeant Nate Weiser undoubtedly saw some of the fiercest combat in the history of these great United States and was released from service in August, 1945.

Mr. Speaker, Nathan Weiser has faithfully served and dutifully protected the citizens of the United States. Our nation owes him a deep debt of gratitude. He has been retired since 1996 after 55 years as a small business owner. He is blessed to enjoy life with his beloved wife of 65 years, Norma, their daughters Karen and Kendra and two granddaughters. Today, I ask my colleagues to join me in honoring and acknowledging Master Sergeant Nathan Weiser for his years of loyal service to our community and country.

#### A TRIBUTE TO DR. R. SANDLIN LOWE, III

#### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. TOWNS. Mr. Speaker, I rise today to honor Dr. R. Sandlin Lowe, III, MD for his outstanding contribution to Neuroscience and the treatment of brain disorders and injuries.

Originally from Coosa County, Alabama, Dr. Lowe obtained his MD from Tulane University in 1987. Currently on the Faculty of New York University School of Medicine with appointments in both the Department of Psychiatry and the Department of Physiology and Neuroscience, he is the Consulting Neuropsychiatrist to the NYU School of Medicine Brain Research Laboratories and Collaborating Psychiatrist at the NYU Langone Center for Neuromagnetism. After 18 years of service and research (for which he was honored with a Congressional Award), Dr. Lowe has become a member of various research councils and health centers.

Dr. Lowe is an expert in Translational Clinical Neuroscience and Therapeutics and has created new paradigms for the

conceptualization, evaluation, and treatment of consciousness spectrum disorders associated with brain injuries. In the past few years, for personal reasons, his efforts have focused on autism spectrum disorders.

Currently, Dr. Lowe and his colleagues are exploring small molecules, biological, cellular and regenerative medicine therapeutics, and applied field energy techniques to find new treatments for autism and brain injuries.

Dr. Lowe is a co-founder of the Global Alliance for Innovation in Neuroscience, to which he brings his experience and ability to creatively approach the study and management of coma and other brain injuries. Dr. Lowe possesses a remarkable energy with an unparalleled faith and optimism that are apparent in his approach to research and his dedication to patient care.

Dr. Lowe has recently been awarded a grant of over \$3.2 million from the Marcus foundation to study the safety and efficacy of cellular and regenerative medicine therapeutics in the treatment of autism. This work will be done by the GAIN labs at New York City Health and Hospitals Corporation in collaboration with the Stem Cell Institute in Panama, along with Inverion Technologies, Ltd. and Xplora Interactive India. Preliminary data from the individuals with autism who have received these treatments shows that these new methods are both safe and promising.

Mr. Speaker, I would like to recognize Dr. R. Sandlin Lowe, III, MD for the advancements he has made in the study and treatment of autism spectrum disorders, brain injuries, and other disorders.

#### RECOGNIZING THE CONTRIBUTIONS OF NANCY COWLES

##### HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Ms. SCHAKOWSKY. Mr. Speaker, I rise today to recognize Nancy Cowles, who was honored last week with the Consumer Product Safety Commission Chairman's Circle of Commendation Award for her tireless advocacy for children's product safety. This is the first time that this award has been presented, and I cannot think of anyone more deserving.

Nancy is the Executive Director of Kids in Danger (KID), an advocacy organization dedicated to protecting children by improving the safety of the products they play with or otherwise use. In the more than a decade that Nancy has headed KID, she has served on the front lines, educating parents and caregivers about the dangers of certain products, promoting the development of safer children's products, and advocating for important legislative and regulatory improvements. She has worked on numerous issues both as a member of panels and as an outside advocate for safety improvements in CPSC standards and recall efforts.

Nancy has played a significant role in the improvement of consumer product safety, ensuring that children and families have a voice and that product-makers are held accountable. In Washington, Nancy's work has served as

an invaluable contribution to the creation of CPSC standards and the implementation of recalls, no doubt saving many lives in the process. She has served as an invaluable resource for me and many of my colleagues who are committed to protecting the health and well-being of children.

The Consumer Product Safety Improvement Act (CPSIA) became law in 2008, and it is the most significant reform of the CPSC and its responsibilities in decades. With Nancy's input, I authored several provisions to the bill, including mandatory standards and testing for infant and toddler products such as cribs and high chairs and a provision requiring that post-age-paid recall registration cards must be attached to products. I am proud of those provisions, and the overall bill, which would not have been as strong or protective without Nancy's guidance.

I would like to thank the CPSC, and Chairman Inez Tenenbaum, for recognizing the contributions of Nancy Cowles toward making products safer for children and families. As the Chairman said, Nancy's "contributions to product safety are invaluable."

As a mother and grandmother deeply concerned about preventing injuries to children, I could not be more grateful for Nancy's efforts and I am proud to call her a friend.

#### CONGRATULATING WILLIAM (BILL) H. OSBORNE ON 50 YEARS OF OUTSTANDING FEDERAL SERVICE WITH THE U.S. ARMY CORPS OF ENGINEERS

##### HON. THOMAS J. ROONEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. ROONEY. Mr. Speaker, today I wish to congratulate Mr. William (Bill) Osborne of Atlanta, Georgia for 50 years of dedicated Federal service to the U.S. Army Corps of Engineers. He has also served as the Commandant of the 3388th USARF School in Tampa, Florida with prior assignments in the Office of the Deputy Chief of Staff for Logistics at the 81st U.S. Army Reserve Command in Atlanta, Georgia. He retired from the Army Reserve in April 1993 at the rank of Colonel. I hope Members will join with me today to thank Mr. Osborne for his contributions to the Corps of Engineers, his local community and the United States of America.

Mr. Osborne began his career with the Corps of Engineers in 1957 as a summer hire in the Operation Division in the Nashville District. After graduating from the University of Tennessee with a Bachelor's Degree in Engineering he joined the Jacksonville District as a Civil Engineer. In 1970, he transferred to the South Atlantic Division and took a position as the Assistant Chief of the Program Management Office. Since 1988 he has been the Chief of the Civil Works Integration Division. In this position he puts together the South Atlantic Division's portion of the President's Civil Works Budget for Congressional consideration.

Some of the major projects for which he has provided Congress justification documentation

include the Tennessee Tombigbee Waterway, Herbert Hoover Dike, Portugues and Bucana Rivers, and two of the largest environmental projects in the country; South Florida Ecosystem Restoration and the Comprehensive Restoration of the Mississippi Barrier Islands projects. Over his stellar career he has justified billions of Federal dollars in support of these and countless other much needed projects. For over two decades he has provided exceptional support to Division Commanders, Chiefs of Engineers and the Assistant Secretaries of the Army in their annual testimony before Congress. Through his expert knowledge of the Civil Works process Mr. Osborne consistently provided outstanding service in the relationship with the public, Congressional Members and their staffs, involving controversial and complex issues.

Mr. Osborne has received numerous awards in recognition of his outstanding efforts to include Superior Civilian Service Awards, the Meritorious Civilian Service Award and he has been nominated for the prestigious Decoration for Exceptional Civilian Service from the Secretary of the Army.

Bill Osborne is a tremendous asset not only to the U.S. Army Corps of Engineers, but also to Members of Congressional Delegations throughout the Southeast and his country. I want to sincerely wish Bill and his wife, Fran, every success in the future.

#### OUR UNCONSCIONABLE NATIONAL DEBT

##### HON. MIKE COFFMAN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. COFFMAN of Colorado. Mr. Speaker, on January 26, 1995, when the last attempt at a balanced budget amendment passed the House by a bipartisan vote of 300-132, the national debt was \$4,801,405,175,294.28.

Today, it is \$15,071,624,794,970.66. We've added \$10,270,219,619,676.38 dollars to our debt in 16 years. This is \$10 trillion in debt our nation, our economy, and our children could have avoided with a balanced budget amendment.

#### A TRIBUTE TO DEBRA DAVIS-SMITH

##### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Debra Davis-Smith for her service to the health and well-being of those living in the 10th Congressional District of New York.

Ms. Davis-Smith was born to the late Joyce and Robert Davis, and raised in an extended family that included her maternal grandparents and aunts in Brooklyn, New York. Being the eldest of three, Ms. Davis-Smith always had the instinct to care for and look after others.

Ms. Davis-Smith was educated in both the public and parochial school systems. It was

during this time that she recognized her interest in helping others outside of her family by volunteering her services after school as the Candy Striper at Kings County Hospital. On weekends and during the summer months, she volunteered with the Department of Aging which allowed her to work with elders in various senior citizen centers and also work with her local precinct in mentoring teenagers.

After high school, Ms. Davis-Smith attended The City College of New York where she majored in Sociology. During her studies, she continued to volunteer and intern with several non-profit groups. Her focus was always on educating and empowering others whether they be youth or senior citizens.

Following her undergraduate studies, she attended Fordham University and received her Master's in Social Work. While at Fordham her studies focused on individuals and families which eventually led her towards the field of mental health. The National Institute of Mental Health provided support to Ms. Davis-Smith which would also determine her future employment.

Upon graduating Fordham, Ms. Davis-Smith was employed by The Catholic Guardian Society where she worked with children in foster care and adoption service. She remained there for a year until she began working as a social worker at Woodhull Medical and Mental Health Center in their Inpatient Psychiatric Unit. Ms. Davis-Smith would spend the next 25 years with the health center, working alongside dedicated professionals who shared her passion in working with the mentally ill. Within this time she held several positions within the discipline of social work, and is currently in the position of acting Director of Social Work Services.

Ms. Davis-Smith is married to Clifford Smith and has two daughters, Brittany and Morgan. With her family's continued love and support she is able to continue her community service.

Mr. Speaker, I urge my colleagues to join me in recognizing the community achievements of Ms. Debra Davis-Smith.

#### A TRIBUTE IN HONOR OF THE LIFE OF THE HONORABLE JAMES E. BURCH

**HON. ANNA G. ESHOO**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Ms. ESHOO. Mr. Speaker, I rise today to pay tribute to the extraordinary life and work of the Honorable James E. Burch, known to all as 'Jim', who died on Monday, November 28, 2011, at the age of 85.

Jim Burch was born on February 27, 1926, in Evanston, Illinois to a World War I veteran and a religious pacifist. He, his parents and two brothers moved to San Mateo, California in 1940. Jim graduated from San Mateo High School in 1943 and served in the U.S. Army until 1946.

He returned to civilian life and launched a very successful career in advertising, retiring in 1974 to serve his community as a volunteer. He co-founded San Francisco's Urban Coalition and was President of Palo Alto's

Creative Initiative Foundation, which evolved into Beyond War and then into the Foundation for Global Community, organizations he volunteered with for 36 years. He gave so generously of his time and considerable talents to many other organizations, including the Boy Scouts, United Way, NAACP, and most recently he served on the Palo Alto Police Chiefs Advisory Committee, where his wise counsel earned the respect of the entire committee.

In 1999, Jim was elected to the Palo Alto City Council, and he was elected Mayor in 2005. At the age of 78, he was the City's oldest Mayor, but he served in the role with energy, enthusiasm and distinction. He was honored for his Lifetime of Achievement by Avenidas in 2011.

I was privileged to know and work with Jim Burch for many years. He was a friend, a mentor, and an inspiration to me. The memory of this strong and gentle, wise and funny, proud and humble man will live long after him, as will his countless contributions which have made our community better and our country stronger.

Jim's son, Bill, is quoted as saying "My father led a life of giving to his family, of giving to his community, of giving to his city and giving to the world." His daughter, Barbara Lindsay, said "He was the most giving person in terms of what he sought to do out in the world and his hometown." There can be no greater tributes than these from his beloved children.

I ask the entire House of Representatives to join me in honoring the life and the accomplishments of Jim Burch, and extend our deepest sympathy to his wife Wileta, and his children, Barbara, and Bill.

#### RECENT EVENTS IN BAHRAIN

**HON. CHRIS VAN HOLLEN**

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. VAN HOLLEN. Mr. Speaker, the U.S. and Bahrain share a decades-old economic and strategic partnership that spawned a free trade agreement in 2006 and influenced the decision to locate the U.S. Fifth Fleet in the port-city of Jaffair. That partnership has endured for years in part because the U.S. viewed Bahrain as a nation committed to evolving toward a political system that allowed greater public participation and respect for religious tolerance. Events over the last year have dealt a serious blow to that long held belief.

The Arab Spring inspired Bahrain's Shi'a majority to seek the full human and political rights that they say they have been denied since the Al Khalifa family became the rulers of the tiny island nation over 200 years ago.

The Bahraini government's response to the largely peaceful demonstrations of the opposition groups who seek only a better life for themselves and their families has been violent and systematic. Dozens of demonstrators lost their lives; independent media outlets were silenced; Shi'a mosques were burned; thousands of Bahrainis were incarcerated and thousands more lost their jobs.

Our worst suspicions were confirmed by the report recently released by the Bahrain Commission of Inquiry. The report described the disproportionate and indiscriminate use of force by security forces. Opposition members were abused, beaten and even tortured.

I associate myself with the public statements of President Obama and Secretary of State Clinton as they strongly urge the Bahraini government to follow through on its promises and to systematically and expeditiously implement the forthcoming recommendations of the newly established follow-on committee.

To achieve a meaningful and lasting reconciliation, all parties must engage in comprehensive political dialogue geared toward a mutually satisfactory power-sharing solution. The long-standing commitment of the United States to a strong partnership with the government and people of Bahrain will be influenced by how the government of Bahrain chooses to negotiate this challenging moment in its nation's history.

We all will be watching closely.

#### INTRODUCTION OF THE INDO- NESIAN FAMILY REFUGEE PRO- TECTION ACT OF 2011

**HON. CAROLYN B. MALONEY**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mrs. MALONEY. Mr. Speaker, today I am introducing legislation with my colleagues, Rep. FRANK PALLONE, Rep. LUIS GUTIERREZ, Rep. MADELINE BORDALLO, Rep. MIKE HONDA, and Rep. ENI FALEOMAVAEGA, which would simply allow Christian Indonesian citizens fleeing persecution, many of whom arrived during a five-year timeframe (January 1, 1997–November 30, 2002) and were denied asylum solely for missing the one-year filing deadline, the opportunity to reopen their claims during the two-year period following enactment.

Beginning in 1997, many Indonesian Christians fled religious persecution in Indonesia, where extreme violence and destruction of churches drove them from their homes. These individuals came to this country, seeking relief from extreme violence and persecution for their religious beliefs, but were unable to make the one-year filing deadline. They deserve the opportunity to have their claims heard.

The United States has long sought to protect refugees fleeing persecution and provide a process to fairly consider their claims. This bill does not, in itself, grant asylum, but merely removes a procedural barrier to their claims being considered. These individuals seeking asylum deserve a second chance to avoid the persecution they have fled and remain united with their families.

## A TRIBUTE TO CRUZ FUKSMAN

**HON. EDOLPHUS TOWNS**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Ms. Cruz Fuksman for her continued efforts to rebuild and improve her community through health and educational services.

Ms. Fuksman was born and raised in the Dominican Republic by her single mother and six siblings. Ms. Fuksman came to the United States to seek a better education to provide for herself and her family. She attained her bachelor's in Human Services from Boricua College and later received a Master's degree in Social Work from Hunter College School of Social Work. Currently Ms. Fuksman works as the Community Liaison at the New York Psychotherapy and Counseling Center where she uses her expertise in social work to serve as the director for a variety of mental health and family service programs. She likewise served in this capacity at the American Red Cross of Greater New York for more than a dozen years, where she was routinely honored as Caseworker of the Month.

The work that Ms. Fuksman has done reflects her ambition to reform her community at the highest levels. The social work discipline she learned throughout her schooling has been a guiding tool that Ms. Fuksman frequently relies on to help families. Recently Ms. Fuksman was honored by Bushwick Impact for her enthusiasm, wisdom, collaboration, and support in helping them serve over 2000 families in the Bushwick area.

Ms. Fuksman also displays her strong community ties by serving as one of the co-chairs of the Community Partnership Project of East New York, Chair of the Seed Committee of the Cypress Hills Local Development Corporation and by participating in many community projects and events in East New York. Aside from her community involvement, Ms. Fuksman understands the importance of educating our youth, and has had the opportunity to work as an adjunct professor at La Guardia Community College.

Ms. Fuksman has a very genuine and unique passion for helping children and families to improve the quality of their lives and for getting the community involved in efforts to improve the quality of life for the residents. Ms. Fuksman is an excellent cook and uses her cooking skills to fundraise for many causes. Among them are victims of the earthquake in Haiti, Habitat for Humanity, Breast Cancer Foundation and various Catholic charities.

Mr. Speaker, I urge my colleagues to join me in recognizing the accomplishments of Ms. Cruz Fuksman.

HONORING REVEREND LEON H.  
MATTHIAS

**HON. DONNA M. CHRISTENSEN**

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mrs. CHRISTENSEN. Mr. Speaker, I rise today to pay tribute to a devoted servant of

God, the Reverend Leon H. Matthias who will retire from active ministry on December 31, 2011.

Sunday, December 8, 1946 seemed to be a perfect day for the arrival of Leon Henson Matthias to George and Ethel Matthias. His humble home provided his first real setting where Christian nurture would take place. The family were members of Gracefield Moravian Church in Cedar Grove and Adrian Joseph, the grandfather, was the sexton of this small congregation.

After primary and High School he gained four subjects at Ordinary Level from the University of London. In September 1967, he entered the teaching profession and was appointed as an uncertified teacher at the St. James Government School in Cedar Grove where he had received his early primary education.

At 19, he was elected as chairman of the Board of Stewards at Gracefield. The members of the congregation recognized that God was calling him to a special task in His church.

Leon Henson Matthias began his theological training on the island of Trinidad in 1970 and in 1974 he completed the Licentiate in Theology at the United Theological College of the West Indies in Kingston, Jamaica. He served as student pastor in the Antigua and Tobago Conferences and on August 24, 1975 Brother Matthias was ordained a Deacon. On September 1, 1975, he began his first appointment as a Moravian Pastor in St. Kitts. Six years after his ordination as a Deacon in the Moravian Church, Rev. Matthias was consecrated a Presbyter.

On August 28, 1976, Rev. Leon Matthias made another decision in his life. He joined in matrimony to Mable Hall in that beautiful western Jamaica Town of Montego Bay. God blessed this marriage with three wonderful sons, Lennox, Leon Jr. and L. Richard.

From all accounts, Brother Leon was as popular as he was active. He has always had an abundance of energy that seems contagious, and this has manifested itself throughout his life and the life of anyone with whom he has had contact. As an executive of the Rivals Sports Club in Cedar Grove, where he was a serious cricketer and concert performer, to Youth Soccer Coach in Richmond, Virginia, he displayed versatility and his love of sports.

Rev. Matthias has always enjoyed leadership roles in the church and the community. He however developed a new interest in 1992. In 1990, he was invited by the Lutheran Church in the United States Virgin Islands to participate in an oral history workshop led by Judy Saxton of Baylor University. This opened for him a vast new field of inquiry and an unquenchable thirst for the unwritten folk history of his people. This he has pursued in his visits to Tanzania, London, Johannesburg and Cape Town.

The versatility of the good Reverend has also been manifested in his editing of many publications including Rapport' magazine and the writing of four books—Boy from Popeshead (1995), Against the Odds (1996), A history of the Friedensberg Moravian Church, Tales from the Hill (1997) and Winds of Change (1999) Gracefield—A Northern Star (2005) Down Punty Hill (2008) A Cloud of Great Witnesses (2011).

Brother Matthias holds a Licentiate in Theology from the University of the West Indies and a Master of Arts Degree from the Presbyterian School of Christian Education. In 2002, he obtained an MLS Degree from Catholic University of America in Washington, DC, specializing in Archival Studies.

His ministry has spanned forty years and the Western Hemisphere—beginning in Jamaica as a Student Pastor in 1971, serving the Virgin Islands Conference in St. Croix from 1988 to 1996 and St. Thomas and Tortola from 1996 to 2000, then New York from 2002 to 2009 and lastly in Washington DC.

In that time he has served in many positions of church leadership, has mentored many young pastors and served every congregation and community with excellence, dedication and compassion. We are thankful to God for his service, which overcame many obstacles over the years, and for his family who served by his side these many years.

I ask my colleagues to join me in asking God's blessings on Reverend Leon H. Matthias, his wife, Mable and the entire family with gratitude for a life of exemplary service.

## PERSONAL EXPLANATION

**HON. JOSEPH CROWLEY**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. CROWLEY. Mr. Speaker, on December 6, 2011 I voted "no" on H.R. 2471; I intended to vote "yes."

THE PASSING OF MY DEAREST  
FRIEND AND CBC FOUNDATION  
FOUNDING MEMBER, OFIELD  
DUKES**HON. CHARLES B. RANGEL**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 7, 2011*

Mr. RANGEL. Mr. Speaker, as a Member of Congress, I have been blessed to call many wonderful people my friend, but none more than Ofield Dukes. I am extremely saddened by the passing of such great man who had significant impact in not only my life, but that of my Colleagues in the Congressional Black Caucus, dating back to its founding. Aside from his many accomplishments in business, politics and his personal life, Ofield was simply a true and kind person who sought to make our country a better place for all. I will forever miss his virtue, justness and sincerity.

Ofield was the best communications strategist in Washington. He helped organized the first Congressional Black Caucus (CBC) dinner in 1971 and served as an advisor to numerous CBC chairpersons. He was a founding member of the CBC Foundation and served on the Foundation Board (CBCF) for 14 years. As the first chairman of the Foundation's Finance and Fundraising Committee, Ofield was instrumental in developing strategies for fundraising including recruiting business support and active involvement.

Ofield's devotion to his craft was esteemed by everyone. In 1988, Ofield was selected by CBC Chairman Julian Dixon to serve as chairman of a historic black-tie dinner in salute of U.S. Supreme Court Justice Thurgood Marshall. When the CBC Chairman Clyburn needed a person to organize and edit the first news letter of the CBC-CBCF, he called Ofield and for seven years he did a superb job in editing the CBC-CBCF newsletter.

In addition to his work with the CBC & CBCF, Ofield was dedicated to fighting for racial equality. He served for 10 years on the board of the MLK, Jr. Committee for Non-Violent Social Change and as an advisor to Mrs. Coretta Scott King. He also served as an advisor to Dr. Leon Sullivan, organized the first Stevie Wonder March to make Dr. King's birthday a national holiday and was an advisor to Alex Haley, author of the epic book "Roots" which provided the impetus for the historic TV series.

Aside from all his public service achievements, Ofield always found time to nurture the next generation of communicators and political minds. As an adjunct professor for 25 years at the Howard University John H. Johnson School of Communication, Ofield is credited with influencing hundreds of students to enter the field of public relations. He also taught public relations at the American University for eight years.

In politics, Ofield served as a communications consultant to the Democratic National Committee in six presidential campaigns. In 1998, Ofield worked very closely with me in developing the national African American media strategy that helped generate a large black voter turnout that helped Democrats to gain control of the House of Representatives.

Ofield is credited with having tremendous impact on the professional lives of many. Radio One Founder Cathy Hughes says there would not be a Radio One without the early support and continuing advice of Ofield. Upon receiving his graduate degree from Princeton University, Robert Johnson called Ofield who arranged the first two jobs for Johnson in Washington, D.C. prior to his founding BET.

In 2001, Ofield became the first African American to win the Public Relations Society of America's Gold Anvil, the highest individual awards given in the public relations industry. In 2004, PRWeek named him one of this nation's top five national communicators. In 2009, Dukes succeeded Dr. C. Delores Tucker as President of the Bethune-DuBois Institute.

Ofield's other professional recognition includes: being named by the Washington Post as one of the top five PR persuaders in Washington; among the first to be inducted into the Washington, D.C. Public Relations Hall of Fame; inducted into the Commonwealth of Virginia Communications Hall of Fame; and receiving the Wayne State University 2010 Alumni Achievement Award.

Ofield's list of accomplishments goes on and on, but what his friendship meant to me and so many people is immeasurable. I want to express my deepest condolences to his beautiful family. Ofield Dukes was one of a kind and he will be deeply missed. His legacy will last throughout Washington and our country.

#### A TRIBUTE TO ALBERT WILTSHIRE

#### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Albert Wiltshire for his unwavering service.

Mr. Wiltshire's career would not be as successful as it is if it weren't for his stellar academic track record. He graduated from Brooklyn's Boys High School when it was regarded as one of the city's top schools for learning. Mr. Wiltshire then received his Bachelor's degree from St. Francis College, a Masters in Public Administration from New York University, and a Senior Managers in Government Program Certificate from the prestigious Harvard University, John F. Kennedy School of Government.

Mr. Wiltshire's illustrious career began with the New York City Police Department, where he served for 20 years during the civil rights era. Following his retirement, Mr. Wiltshire worked for 13 years at the Brooklyn Navy Yard Development Corporation serving as President and CEO. It was here that he made an indelible mark by strengthening the company's financials while also providing countless opportunities for minorities and women to enter the business community.

Mr. Wiltshire went on to work as Vice President Keyspan Corporation, one of the nation's largest energy conglomerates. He would work as a liaison between the company and the government to ensure the needs of the community were met, and to spearhead environmental awareness.

Since 2007, Mr. Wiltshire has worked as my Chief of Staff, helping me represent the people of New York's 10th congressional District in Brooklyn. Managing personnel in two Brooklyn offices and the nation's capitol, Mr. Wiltshire is one of my most trusted advisors on key legislative issues and public policies. Mr. Wiltshire's vast experience with the community in Brooklyn has been invaluable, providing sound leadership and direction in the 10th district.

While his service in the public and private sector has consumed most of his time, Mr. Wiltshire continues his involvement with the Madison Boys and Girls Club, Brooklyn School of Music, and the vestry of the Church of St. Luke and St. Matthew.

Mr. Wiltshire is a proud father, grandfather, and mentor to many. The life he chose to lead is one that is admired by many and should be emulated by all. Mr. Speaker, I urge my colleagues to join me in recognizing the many achievements of Mr. Albert Wiltshire.

#### PERSONAL EXPLANATION

#### HON. JO ANN EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mrs. EMERSON. Mr. Speaker, on rollcall No. 882, 883, 884, 885, 886, 887, and 888 I

am not recorded because I was absent due to a family event. Had I been present the week of December 2nd, I would have voted "aye" on rollcall No. 888. I would have voted "nay" on rollcall No. 882, 883, 884, 885, 886, and 887.

IN SUPPORT OF MOTION TO INSTRUCT CONFEREES ON H.R. 1540, NATIONAL DEFENSE AUTHORIZATION ACT

#### HON. LAURA RICHARDSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Ms. RICHARDSON. Mr. Speaker, today I rise in support of the Motion to Instruct Conferees, which instructs House conferees to insist on the inclusion of certain amendments intended to improve the sexual assault prevention and response in the Armed Services that were contained in the version of National Defense Authorization Act passed by the House on May 26, 2011.

While 1 in 6 women in the United States will experience some type of sexual assault in her lifetime, as many as 1 in 3 veteran women report that they have experienced some form of Military Sexual Trauma during their service. Due to shame, guilt or fear of not being believed, countless victims do not report their assault and it has been reported that as few as 13 percent of these sexual assaults are reported to the proper authorities.

Mr. Speaker, not only do cases of sexual assault largely go unreported, but response protocols necessary to protect victims of assault need to be improved.

In addition, more must be done to protect these victims after they report their abuse. Victims of sexual assault face a lack of confidentiality, protection, support, and access to legal counsel once an incident is reported.

Currently, victims of rape or sexual assault do not have the right to a unit or duty location transfer following an assault. The result is that victims of these unspeakable crimes often have to continue serving alongside their assailant. As of this date, the Department of Defense has not yet adopted policies that will enable sexual assault victims to escape constant contact with their attackers.

Mr. Speaker, this is a huge problem. Something must be done.

Fortunately, the problem of rape and sexual assault in the military has been addressed by provisions in both the House- and Senate-passed versions of the National Defense Authorization Act for FY 2012 (NDAA). In both the House and Senate versions, the NDAA makes improvements in the military's response to sexual assault and to provide greater protections for our service men and women in the armed forces. Our hope is to ensure zero tolerance for sexual assault in the military.

However, the House and Senate versions of this act differ significantly. The House version of the NDAA has stronger provisions regarding sexual assault in the military by strengthening legal protections for the victims, providing support and guidance to victims, and by strengthening the systems in place to prevent future

assaults. That is why the Motion to Instruct directs House conferees to insist on the inclusion of these provisions in the compromise legislation negotiated in the Conference.

Among the House-passed improvements are provisions:

ensuring that sexual assault victims be afforded legal counsel if desired;

protecting the confidentiality and victim advocates;

requiring that commanders transfer duty stations; and

requiring adequate training and education programs to prevent sexual assault.

Mr. Speaker, we have a duty to protect our men and women in the military, who put their lives on the line for our country. We have a duty to make our armed forces safe for all men and women who wish to serve. It is dangerous enough risking one's safety in defense of our country on foreign shores. It is simply intolerable for American servicewomen and men to have to assume the risk of sexual assault from their comrades.

The provisions in the version of H.R. 1540 passed by the House reflects a zero tolerance policy when it comes to the sexual assault of members of the Armed Forces by members of the Armed Forces. That is why I strongly support this Motion to Instruct Conferees on H.R. 1540. I urge all of my colleagues to do likewise.

MR. CHARLES L. NEUBERT

HON. LOU BARLETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mr. BARLETTA. Mr. Speaker, today I rise to honor Charles L. Neubert of Hazleton, Pennsylvania, for his faithful and dedicated service to the United States of America through turbulent times.

Charles Neubert was serving in the National Guard in the State of Washington when he decided to transfer to active duty in 1941. He was assigned to the 16th Truck Company, Quartermaster Corps. At the time, Charles Neubert was only 20 years old. He was stationed in Pearl Harbor, Hawaii.

Mr. Neubert was working in the motor pool during the surprise military attack conducted by the Imperial Japanese Navy on the morning of December 7, 1941. Mr. Neubert watched helplessly as 353 Japanese fighters and bombers launched their assault on the naval base. When he recalls this day, Charles Neubert can remember thinking that the planes just kept coming and coming. More than 2,400 American lives were lost on that day, and almost 1,300 were injured.

Charles Neubert continued to serve his country in the 357th and the 356th Truck Companies on both Pearl Island and on Tinian in the Marianas Islands.

Charles Neubert would be discharged from active duty in the Army in June 1945, just a few months before the end of the war. He would join the Naval Reserves in 1950, and he served aboard the USS *Douglas H Fox* (DD779) for 15 months during the Korean War. He was discharged in 1953.

Mr. Speaker, Charles L. Neubert, who only a few months ago celebrated his 90th birthday, is a fine example of the faithful and dedicated men and women that make up our armed forces. His selfless actions, and those of his generation, should forever be remembered and cherished by a grateful nation.

#### A TRIBUTE TO ABU BEKR COURT NO. 74

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 7, 2011

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Abu Bekr Court No. 74 for its long history of community involvement through activities and sponsorships.

Abu Bekr Court No. 74 has participated in all of the programs and projects of the Imperial court, Daughters of Isis. Individual Court members have been actively involved in numerous community volunteer activities on behalf of the organization.

The projects supported by Abu Bekr Court No. 74 and its members include: homeless women's shelters, a hospital for children with special needs, gifts of love baskets to elderly and needy community residents, donations to local community churches and the NAACP. Under the leadership of their Illustrious Commandress, Dt. Shirley Holliday, Abu Bekr Court has been in partnership with Tilden Hall by sponsoring multiple clothing drives.

The Court has served in many capacities throughout the community. They attended a World Day of Worship at Berean Baptist Church and gave a sizable monetary donation to their Drum Line Youth group, while also raising hundreds of dollars to participate in the Breast Cancer Walk. The Court has also donated school supplies to several schools in Brooklyn and Long Island, as well as donating over 200 knit hats to cancer patients through the American Cancer Society.

Abu Bekr Court No. 74 is pleased to have had 57 Daughters lead this Court and serve as Illustrious Commandress since 1949. As part of Abu Bekr Court's great history, two of their Daughters served the Imperial Court Daughters of Isis as Imperial Commandress, which is the highest honor that can be bestowed upon a Daughter. Dt. Phyllis McKoy who was elected and served as Imperial Commandress in 1984 and now Dt. Ruth Mayfield Ellerbe who was elected and installed as Imperial Commandress of the Imperial Court Daughters of Isis on August 18, 2011.

The Court looks forward to continuing their long tradition of service to the community and to remain supportive to the Imperial Court, Daughters of Isis.

Mr. Speaker, I urge my colleagues to join me in recognizing the community achievements that Abu Bekr Court No. 74 has made in Brooklyn and throughout New York City.

#### SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a sys-

tem for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, December 8, 2011 may be found in the Daily Digest of today's RECORD.

#### MEETINGS SCHEDULED DECEMBER 13

10 a.m.  
Agriculture, Nutrition, and Forestry  
To hold hearings to examine MF Global bankruptcy. SH-216

Judiciary  
To hold hearings to examine the nomination of Paul J. Watford, of California, to be United States Circuit Judge for the Ninth Circuit. SD-226

Environment and Public Works  
Water and Wildlife Subcommittee  
To hold hearings to examine our nation's water infrastructure, focusing on challenges and opportunities. SD-406

10:15 a.m.  
Health, Education, Labor, and Pensions  
Children and Families Subcommittee  
To hold hearings to examine child abuse, focusing on protection, prevention, intervention, and deterrence. SD-106

2:30 p.m.  
Banking, Housing, and Urban Affairs  
Housing, Transportation and Community Development Subcommittee  
To hold hearings to examine helping homeowners harmed by foreclosures, focusing on ensuring accountability and transparency in appeals. SD-538

#### DECEMBER 14

9:30 a.m.  
Banking, Housing, and Urban Affairs  
Securities, Insurance and Investment Subcommittee  
To hold hearings to examine investor risks in capital raising. SD-538

10 a.m.  
Foreign Relations  
European Affairs Subcommittee  
To hold hearings to examine the state of human rights and rule of law in Russia, focusing on United States policy options. SD-419

Health, Education, Labor, and Pensions  
Business meeting to consider S. 1855, to amend the Public Health Service Act to reauthorize various programs under the Pandemic and All-Hazards Preparedness Act, and the nominations of

Wendy M. Spencer, of Florida, to be Chief Executive Officer of the Corporation for National and Community Service, Deepa Gupta, of Illinois, to be a Member of the National Council on the Arts, Christopher Merrill, of Iowa, to be a Member of the National Council on the Humanities, Stephanie Orlando, of New York, and Gary Blumenthal, of Massachusetts, both to be a Member of the National Council on Disability, and a nomination list in the Public Health Service.

SD-430

Homeland Security and Governmental Affairs

Business meeting to consider pending calendar business.

SD-342

Judiciary

To hold an oversight hearing to examine the Federal Bureau of Investigation.

SD-226

Veterans' Affairs

To hold hearings to examine the nominations of Margaret Bartley, of Maryland, Coral Wong Pietsch, of Hawaii, and Gloria Wilson Shelton, of Maryland, all to be a Judge of the United States Court of Appeals for Veterans Claims.

SR-418

DECEMBER 15

10 a.m.

Health, Education, Labor, and Pensions

To hold hearings to examine prescription drug shortages, focusing on examining a public health concern and potential solutions.

SD-430

11 a.m.

Foreign Relations

Western Hemisphere, Peace Corps and Global Narcotics Affairs Subcommittee  
To hold hearings to examine the United States-Caribbean shared security partnership, focusing on responding to the growth of trafficking narcotics in the Caribbean.

SD-419

2:15 p.m.

Foreign Relations

African Affairs Subcommittee

To hold hearings to examine improving governance in the Democratic Republic of Congo.

SD-419

2:30 p.m.

Aging

To hold hearings to examine implementing the "Physician Payment Sunshine Act".

SD-562

United States  
of America

# Congressional Record

PROCEEDINGS AND DEBATES OF THE 112<sup>th</sup> CONGRESS, FIRST SESSION

## SENATE—Thursday, December 8, 2011

The Senate met at 9:31 a.m. and was called to order by the Honorable JON TESTER, a Senator from the State of Montana.

### PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

King and judge of the universe, You rule with righteousness and govern with justice. You have been good to us, restoring our strength and directing our footsteps.

Today guide our Senators in their labors. In these difficult days empower them to produce dividends of character and grace. We pray not for tasks fitted to their strength but for strength which fits them for their tasks. In the hard decisions of this day, guide them by Your word and spirit.

We pray in Your loving Name. Amen.

### PLEDGE OF ALLEGIANCE

The Honorable JON TESTER, a Senator from the State of Montana, led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

### APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. INOUE).

The assistant legislative clerk read the following letter:

U.S. SENATE,  
PRESIDENT PRO TEMPORE,  
Washington, DC, December 8, 2011.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JON TESTER, a Senator from the State of Montana, to perform the duties of the Chair.

DANIEL K. INOUE,  
President pro tempore.

Mr. TESTER thereupon assumed the chair as Acting President pro tempore.

### RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

### RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

### SCHEDULE

Mr. REID. Mr. President, following leader remarks, the Senate will be in executive session to consider the nomination of Richard Cordray to be Director of the Consumer Financial Protection Bureau. At 10:30 a.m., there will be a cloture vote on the Cordray nomination. If cloture is not invoked, the Senate will resume consideration of the motion to proceed to S. 1944, the Middle Class Tax Cut of 2011. As a reminder to all Senators, cloture has been filed on the motion to proceed to S. 1944. Unless an agreement is reached, that will be tomorrow morning.

### CORDRAY NOMINATION

Mr. REID. Mr. President, shortly the Senate will vote on the confirmation of Richard Cordray to lead the Consumer Financial Protection Bureau. Again, the Consumer Financial Protection Bureau. I stress "consumer." By now we all know my Republican colleagues will filibuster Mr. Cordray's nomination. They said they will. This is not an up-or-down vote. In the Republicans' effort to not allow this vote, they are stopping a vote on this very qualified man.

They are not blocking this nomination because of any fault, real or perceived, in this candidate. He has bipartisan support and is eminently qualified. He has a long history of protecting consumers against the unfair practice of financial predators. He currently serves as chief of enforcement at the Bureau.

Before that, Mr. Cordray served as Ohio's attorney general, a very impor-

tant job in a very heavily populated State. While there, he recovered billions of dollars from pension funds on behalf of retirees, investors, and others. He took action against fraudulent foreclosures and predatory lending. He is qualified, and he is a man of diligence.

The Republicans are blocking his nomination and not allowing a vote because they don't like the Federal agency he would lead, an agency established by law. This is the first time in the Senate's history that a party has blocked a qualified candidate solely because they disagreed with the existence of an agency that has been created by law.

Republicans are doing this to undermine the system of law we have in our country. Democrats fought to pass Wall Street reform last year to protect against the greed of big banks. Well, without a director, the Consumer Financial Protection Bureau doesn't have the tools it needs to get the job done. It is shocking that despite the economic crash in our rearview mirror—it is easy to look back and see what happened because of Wall Street greed—Republicans, in spite of that, would leave consumers without a watchdog to guard against the greed of Wall Street. That is unfortunate.

Would the Chair announce the business of the day.

### EXECUTIVE SESSION

### NOMINATION OF RICHARD CORDRAY TO BE DIRECTOR, BUREAU OF CONSUMER FINANCIAL PROTECTION

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will proceed to executive session to consider the following nomination, which the clerk will report.

The assistant legislative clerk read the nomination of Richard Cordray, of Ohio, to be Director, Bureau of Consumer Financial Protection.

The ACTING PRESIDENT pro tempore. Under the previous order, the

● This "bullet" symbol identifies statements or insertions which are not spoken by a member of the Senate on the floor.

time until 10:30 a.m. will be equally divided and controlled between the two leaders or their designees.

Mr. REID. I ask that a quorum be called and the time be equally divided between the two sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MCCONNELL. Mr. President, I ask that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

#### RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

Mr. MCCONNELL. This morning the Senate will vote whether the new Consumer Financial Protection Bureau should be able to put a director in place before concerns about its accountability to the American people are addressed. Let me stress that is all today's vote is about. Today's vote is about accountability and transparency. It is a debate about whether we think Americans need more oversight over Washington or less.

Republicans made our position clear more than 7 months ago when 44 of us signed a letter saying we will not support a nominee for this Bureau, no matter who the President is, until three commonsense conditions are met that would bring some transparency and accountability to the CFPB. That letter now has 45 signatories.

The President knew about these concerns months ago and he chose to dismiss them. Now he is suddenly making a push to confirm his nominee because it fits into some picture he wants to paint about who the good guys are and who the bad guys are here in Washington. So, once again, Democrats are using the Senate floor this week to stage a little political theater. They are setting up a vote they know will fail so they can act shocked about it later. This is what passes for leadership at the White House right now.

The President has made his choice about how to deal with this issue, and we have made ours. What we have said is that until this or any other President addresses these legitimate concerns, we cannot and will not support a nominee. Here is what we said in that letter 7 months ago: First, replace the single Director with a board of directors who would oversee the Bureau. Second, subject the Bureau to the congressional appropriations process. Third, allow other financial regulators to provide a check on CFPB rules so they don't imperil the health of financial institutions and lead to unnecessary bank failures.

Look, everybody supports strong and effective oversight, but that has to in-

clude the overseers as well. Unelected bureaucrats must be held accountable to the American people, and that is exactly what our proposal would do. So it is up to the President. Republicans have outlined our concerns and they are well known. We are not going to let the President put another unelected czar in place, unaccountable to the American people. And, frankly, his refusal to work with us only deepens our concerns. The CFPB requires reforms before any nominee can be confirmed. It is time the President takes these concerns seriously.

I look forward to hearing from the President on this issue so we can put in place the kind of oversight and accountability the American people expect in an agency of this size and this scope. Until then, I will vote against this nominee for the CFPB and any others that this or any other President sends until he works to fix the problems, until he brings transparency to this bureaucracy and accountability to the American people.

I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SHELBY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SHELBY. Mr. President, I rise today in opposition to the motion to invoke cloture on the nomination of Richard Cordray to be the Director of the Bureau of Consumer Financial Protection.

Earlier this year, I and 44 of my colleagues sent a letter to the President expressing our concerns with the unaccountable structure of the Bureau. It is now 7 months later and the President has yet to respond.

The majority has called for a vote they know will fail today. It is evident the White House and the majority have decided to place politics ahead of good policy. They have chosen to fabricate a political issue rather than do what is in the best interests of consumers. Nonetheless, they claim this debate is about consumer protection.

There is no disagreement, however, that consumer protection, as the Acting President pro tempore knows, needs to be enhanced. The only real point of contention is whether the new Bureau of Consumer Financial Protection will be accountable to the American people.

If we believe regulators never fail, then the current structure of the Bureau is just fine. Yet we all know regulators do fail and their failures harm consumers.

Members of the majority, I believe, have repeatedly made this point with

their criticism of the Fed's failure to regulate subprime mortgages and the OCC's preemption of State consumer protection laws.

I strongly agree with the majority that our regulators failed to do their jobs in the lead-up to the financial crisis. But the lesson we should learn from the financial crisis is not that we need more unaccountable regulators. Instead, all of our financial regulators need to be held more accountable.

Just as banks should be held accountable for their failures, regulators should also be held accountable for theirs. After all, if regulators know Congress can hold them accountable, they will have a far stronger incentive to do their jobs. That will be good, as we all know, for consumers. That is why, if the Bureau is reformed, the biggest winners will be the American consumers.

Today, however, the majority will show that they are now more concerned with insulating bureaucrats from accountability and rewarding political allies than looking out for consumers. The administration and the majority will try to argue that the Bureau already is accountable. Indeed, they will say it is more accountable than any other financial regulator. But let's look at the facts. The facts tell a different story.

First, it is necessary to appreciate the amount of power placed in the hands of the Director of this Bureau. No bureaucrat will have more power over the daily economic lives of Americans than this Director. The Director, in effect, will decide which Americans can access credit to buy homes, purchase cars, and pay for college. The Director will regulate not only financial companies but also tens of thousands of Main Street businesses. Also, the Director will unilaterally decide how the Bureau spends its up to \$600 million budget.

Despite the vast power vested in the hands of the Director, there are no effective checks on the Director's authority. To truly understand just how unusual the structure of the Bureau is, one need only compare it to other independent agencies.

Unlike the Chairman of the SEC, the CFTC, and the Federal Reserve, the Director of the Bureau does not have to obtain the agreement of other board members or other government officials before acting. Unlike other consumer protection agencies, the Bureau is not subject to the congressional appropriations process. Indeed, other consumer protection agencies, such as the Federal Trade Commission and the Securities and Exchange Commission, are both subject to appropriations and are governed by five-member boards.

To further ensure against one party domination, the FTC and the SEC can have no more than three members from

the same political party. Another important comparison is with the Consumer Product Safety Commission. This agency actually served as the template for Professor Warren when she first advocated for the creation of a consumer protection agency in an article several years ago. How is the Consumer Product Safety Commission structured? It is, first, funded through appropriations, and there is a five-member commission.

Opponents of accountability have sought to justify the structure of this Bureau by pointing to the Office of the Comptroller of the Currency and the Federal Housing Finance Agency. Once again, the facts refute their argument.

First, the Comptroller can be removed at any time by the President for any reason. In contrast, the President can remove the Director of the Bureau only for limited grounds of "inefficiency, neglect of duty or malfeasance." This means the Director of the Bureau cannot be removed even if the Director pursues policies that are harmful to the American people. How is that good for consumers?

As for the Federal Housing Finance Agency, its Director is far less powerful than the Director of the Bureau. The Director of the Federal Housing Finance Agency oversees the regulation of only 14 financial institutions. He does not have sweeping powers over all consumers and tens of thousands of Main Street businesses like the Director of the Bureau would have.

It should be common sense that the more power an agency has, the more accountable it needs to be. Moreover, rather than attempting to point to other regulators to justify the structure of the Bureau, a more responsible approach would be to make all of our financial regulators more accountable. And we should begin right here with the Bureau.

To make the Bureau more accountable, we have proposed three commonsense reforms.

First, the Bureau should be led by a board of directors, as I have said. This is such a commonsense measure that the President and the Democratic-controlled House originally called for the consumer agency to be structured as a commission.

Second, the Bureau's funding should be subject to congressional appropriations.

Currently, the Federal Reserve is required to transfer up to \$600 million to the Bureau each year. These are funds that could otherwise be remitted to the Treasury and used for deficit reduction or other things. Diverting this money to fund an unaccountable Federal agency sets a dangerous precedent of using the Federal Reserve as an off-budget mechanism for funding programs. It had not happened before.

In addition, funding the Bureau through the Fed removes any check on

runaway spending. I believe the fiscally responsible way to fund the Bureau is through the congressional appropriations process just as every other consumer protection agency is funded.

Our third reform proposal is to create an effective safety and soundness check for the prudential bank regulators.

Some have said the Bureau already has a check under the so-called Financial Stability Oversight Council veto. But this veto was designed so it would never actually constrain the Bureau. The council can only overturn a rule in an extremely rare case: The rule must put at risk the safety and soundness of the entire U.S. banking system or the stability of the U.S. financial system.

Under this construct, a rule could cause the failure of multiple banks, but the council still would not have standing to alter the rule. Additionally, the procedure is rigged to prevent the council from acting. It takes an affirmative vote of at least two-thirds of the council's members to set aside one of the Bureau's rules, and the Bureau's Director is a voting member of the council.

In addition, only 3 of the council's 10 members are actually bank prudential regulators. This veto is not a check on the powers of the Bureau. It is a sham that they have today. We need to change that.

Recent history shows that taxpayers are ultimately on the hook for bank failures. For this reason, consumer protection needs to be carefully coordinated with bank regulation to prevent against unnecessary bank failures.

As presently structured, the Bureau can ignore any advice offered by banking regulators, even if it undermines the safety and soundness of banks. Unless this structural flaw is remedied, a real possibility exists that the consumer bureau will one day cause bank failures that end up harming consumers, taxpayers, and our economy.

In light of the reasonableness of the reform proposals we have requested, the question remains: Why are the administration and the majority so insistent that the Bureau be unaccountable?

Clearly, they want to use the Bureau as a political issue. A second reason is that they believe nonbank financial institutions are not currently regulated. But this is false. The Federal Trade Commission, the State attorneys general, and State financial regulators all have authority over nonbanks. A more likely reason for today's vote is that the Bureau will provide funding to key liberal activists, such as ACORN.

Other agencies must return to the Treasury funds what they receive from enforcement actions. This consumer bureau, as now structured, is allowed to dole out money it collects from fines and penalties to liberal consumer groups. This reveals why the administration and the majority want so des-

perately for the Bureau to be unaccountable. They want the Bureau to be a permanent funding machine for their political allies.

Finally, we are going to hear that our methods to achieve reform are unprecedented in the history of the Senate. It has been said:

Never before has the consideration of a nominee been conditioned on a change in the law.

This, of course, is ridiculous on its face. It is nonsense. Nominees are held routinely in the Senate by both parties, for any number of reasons, including the desire to make changes in existing law. The only thing different in this particular case is that it is completely transparent. No secret backroom deals. We are right here in the open.

After all the harm caused to consumers by financial regulators, it is time the majority stops using consumer protection as a political football and starts taking actions that actually help consumers. We can take the first step by reforming the Bureau to make it accountable to the very consumers it purports to protect.

Until that time, however, we cannot, we should not, and we will not move forward on the nomination of the Director to lead this massive and unaccountable bureaucracy. I urge my Democratic colleagues to stop obstructing reform and join with us to move forward on real consumer protection.

I yield the floor.

The PRESIDING OFFICER (Mr. UDALL of New Mexico). The Senator from Rhode Island.

Mr. REED. Mr. President, I ask unanimous consent to be recognized for 5 minutes at the conclusion of Senator JOHNSON's remarks.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. JOHNSON of South Dakota. Mr. President, 2 months ago the Senate Banking Committee voted along party lines to send to the full Senate the nomination of Richard Cordray to be the first Director of the Consumer Financial Protection Bureau. Due to an unprecedented and irresponsible display of political gamesmanship, Mr. Cordray's nomination and strong protections for American consumers are being held hostage.

Before any candidate was put forth, Senate Republicans pledged to block the nomination, and their objections have nothing to do with Mr. Cordray's qualifications, his politics, or his character. Republican Senators have actually admitted as much, with a public pledge to block any nominee for the new consumer agency until a list of legislative demands, which would greatly weaken the agency, are met. That those demands were debated and rejected by a bipartisan Congress last

year is beside the point. The minority party is distorting the Senate confirmation process, mandated by the Constitution, to rewrite a law against the wishes of the American people.

Why do Senate Republicans remain opposed to consumer protection despite national surveys showing 3-in-4 bipartisan voters support the new agency's creation? Whatever the motivation, it appears to outweigh any concerns about protecting families buying homes, students borrowing for college, and service members or older Americans falling prey to financial scams.

This vocal minority opposed to strong consumer protection and helped by special interests have drummed up misleading claims to hide behind. They claim the CFPB Director will put the economy at risk—ignoring the effects of the foreclosure crisis, which was itself fueled by irresponsible and predatory lending. They claim the agency lacks accountability—ignoring the fact that it is bound by accountability measures comparable to or exceeding that of other independent financial regulators. And they claim restrictions on abusive financial products will hurt lenders—ignoring the damage those products inflicted on consumers tricked into signing unfair contracts filled with hidden fees and penalties.

In reality the CFPB was created as an accountable yet independent regulator in bipartisan negotiations last year. Its mission is to protect consumers—by cracking down on predatory lenders and streamlining disclosures so families can make better informed financial choices. But until it has a confirmed director in place, the CFPB's authority over nonbank financial institutions, like private student lenders and mortgage brokers, will be stifled. Every day Mr. Cordray's confirmation is blocked, vital protections are delayed, millions of Americans—including service members, veterans and older Americans—are left vulnerable, and the Nation's community banks and credit unions remain at a disadvantage to their less-regulated competitors.

The question we consider today should not be whether the minority party can hijack this constitutional process and demand as ransom legislative changes that would hamstring the consumer agency. The question should be whether Mr. Cordray is qualified for the job. And I believe that Mr. Cordray is an outstanding candidate. For years Richard Cordray has worked tirelessly as a public servant. As Ohio's Attorney General he aggressively pursued financial crimes by banks and mortgage firms, and won more than \$2 billion in settlements for the State. And as Ohio's first solicitor, he argued cases before the Supreme Court to protect consumers and enhance the quality of our financial markets.

American families paid a steep price for the financial crisis, battered by lay-

offs and foreclosures. Yet incredibly, many of the bad actors that contributed to the crisis remain poorly regulated and continue to lobby against tougher regulation. Congress created the CFPB to protect consumers and clean up the marketplace, but it needs a director. Richard Cordray has proven himself capable for the job, and there is no legitimate reason to block his confirmation.

I urge my colleagues to reconsider their political game playing and do the right thing.

Stop blocking Richard Cordray's nomination and allow him to have an up or down vote.

I yield to my colleague from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. REED. Mr. President, I wish to thank the chairman for his leadership on this important issue and so many others before the Banking Committee.

Since September 2008, we have learned many hard lessons about the factors that contributed to the financial crisis. To address systemic risks and to fix the system, we passed the Dodd-Frank Wall Street Reform and Consumer Protection Act. One of the most important reforms we made in that legislation was the creation of the Consumer Financial Protection Bureau, or the CFPB. The CFPB is charged with stopping abusive mortgage originators, stopping abusive credit card companies, and stopping abusive private student loan lenders.

For years we have had organizations whose purpose was to protect the banking system and, indirectly, consumers. We need to provide a balance. Frankly, if we had this balance in place prior to 2008, we might have avoided some of the incredible costs we have seen not only to consumers but to the entire banking system as a result of predatory behavior by many different financial institutions.

Unfortunately, many of my Republican colleagues are trying not to correct deficiencies in the Dodd-Frank Act or improve it. They want to gut it. One of the things they want to take out is consumer protection, and they want to do that by denying a nominee to head up this important agency.

It certainly is a prerogative of my colleagues to work on improving any piece of legislation, but effectively to say: We will not let legislation that has passed this body by 60 votes and that has ample precedent in the law to take effect because we won't put a person in charge is, I think, abusing the process.

We have worked on this issue, and we know consumers need these types of protections. We know that daily there are scams targeting the elderly. There are unscrupulous mortgage lenders and abusive payday lenders. Most financial firms are not like this—in fact, these individuals probably represent a very

small minority of the financial community, but they are abusive predators, particularly to the most vulnerable people in our society.

There has been a lot of discussion about the 1 percent and the 99 percent. Well, guess what, the 99 percent are consumers, and the 1 percent are probably those people who are running some of these financial institutions, some of them fairly and scrupulously, but others who are not.

We want to protect consumers in this country—all of us—certainly the 99 percent, but because of Republican opposition of this nominee, we are running into a real problem. If we do not have a head of this organization, then it cannot effectively implement regulations and effectively enforce the laws it has been given the task to oversee and implement.

We have to have rules that apply across the country that get at the shadow banking system, that provide the kinds of protections consumers can rely on, and that, in fact, improve the operation of the marketplace. Again, I think some of the people who regret what happened the most in the 2007, 2008, 2009 time period are financial leaders looking around and saying: Why wasn't anyone checking the behavior of some of the financial companies out there that have ruined my marketplace and ruined my reputation? Well, we have to do that.

The longer Richard Cordray is blocked, the longer such disreputable practices in the financial marketplace can continue. And Richard Cordray is entirely qualified: as former treasurer of the State of Ohio, he knows the financial business and worked closely with banks at the Treasury, as former attorney general of Ohio, he worked to protect consumers, and as an individual, he has the intellect and the character to do an outstanding job. We have to get him in place.

Who suffers if we don't do this? Well, among those who are suffering are military personnel. I had the privilege of commanding a paratrooper company in the 82nd Airborne Division in the 1970s. I was an executive officer, and I handled all the complaints, all the dunning, all the letters that were coming in from my soldiers. It has gotten worse.

Holly Petraeus, who is the head of the Office of Servicemember Affairs at the CFPB, testified before the committee. She talked about Internet lenders who target military personnel—vulnerable soldiers and their families—who are about to deploy or who just came back from Afghanistan. They will give loans of up to 40 percent of a soldier's pay. Of course, the interest rate can be as high as 584 percent APR. We can't stop that until we get somebody such as Richard Cordray in charge of this organization.

She also talked about the dunning calls, 20 times a day, threatening them:

We will go to your commander. We will have you court-martialed. We will take away your security clearance. We will ruin your career.

We have to stop that. This is about real people, real consumers. We have to confirm Richard Cordray.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. MENENDEZ. Mr. President, I understand I have 5 minutes.

The PRESIDING OFFICER. There is no order. The Senator may use 5 minutes.

Mr. MENENDEZ. Thank you very much.

Let me first thank Chairman JOHNSON for his leadership in this regard and in so many other major issues before the Banking Committee. He has really exercised a lot of our oversight obligations in making sure we implement Wall Street reform in a way that protects all of us as taxpayers in the country but creates a system that can still let us economically flourish, and this is one of those.

For too long too many in Washington protected Wall Street from common-sense regulations and let consumers fend for themselves. For too long Republican economic policy, when it should have protected the 99 percent of American consumers from the reckless financial games that led us to the brink of economic disaster in 2008, protected the 1 percent on Wall Street instead.

Banks played Russian roulette with the future and economic security of middle-class families, and no one—no one—was watching. Backed up by too-big-to-fail government guarantees, they wreaked havoc on our economy and on the jobs and retirement savings of families who played by the rules.

We have lived through the unfortunate results of lax oversight, and now it is time to work together to correct it. It is time to stop the political games and govern. It is time to act. It is time to work together to make sure middle-class families get the protection they deserve and the watchdog they need.

This is really about whose side a person is on. Cordray and consumer protection are being blocked simply because Republicans want to protect Wall Street. Wall Street already has a legion of lobbyists protecting its interests. We need someone who can protect Main Street's interests, and that is what Richard Cordray would do as the Director of the Consumer Financial Protection Bureau.

Richard Cordray is an unquestionably well-qualified nominee, and no one is disputing that fact—no one. I have not heard anyone dispute his qualifications for the job. We know the Consumer Financial Protection Bureau would be off to a good start with Richard Cordray at the helm, despite efforts

by special interests to derail the process. It will be a strong but fair agency under Richard Cordray—to protect financial consumers who are tired of being tricked by the fine print, the “gotcha” paragraphs that no one but a bank lawyer would understand.

Despite hysterical claims from Wall Street, the Bureau actually won widespread praise from both consumers and the industry for its first major initiative when it created a new and greatly simplified Know Before You Owe mortgage loan disclosure form so that consumers understand what kind of mortgage they are getting into before they take it. Had we had that type of language early on, maybe we wouldn't have had part of the crisis in which consumers were led to bad mortgage products—products that ultimately had skyrocketing interest rates—when they qualified for a conventional mortgage. Maybe we wouldn't be in the great predicament we have been in since 2008.

Under Wall Street reform, Richard Cordray will be there to prevent those families from being ripped off again. Fixing our broken system was not easy, and it is still not over. We are still fighting to keep the ground we have gained against special interests.

The longer this nomination is delayed, the more consumers will suffer. Without a Director, the Consumer Financial Protection Bureau cannot carry out some of its most vital functions, including regulating payday lenders, pawn shops, private student loan companies, those that make unscrupulous and predatory loans on our military families—we heard Senator REED, who has great experience in this, talk about that—giving them an unfair advantage at the same time as they do that over community banks and credit unions that are regulated, that are good and that play by the rules.

Now is a time to work together to make that happen. I ask that my colleagues stop playing games. Let us go to a final up-or-down vote on Mr. Cordray.

Republicans have continued to couple Mr. Cordray's nomination to weakening the Consumer Financial Protection Bureau, which is unprecedented. Never in Senate history has a nominee been opposed in the Senate because of opposition to the whole agency for which he or she has been nominated.

I say to my Republican colleagues, let's stop playing games with the protections American consumers need. Work with us to do the job we were elected to do and confirm this nominee. Work with us to protect consumers.

We have come a long way toward a middle ground in creating this agency with checks and balances to begin with. The time has come for Republicans to join us in governing.

I yield the floor.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. VITTER. Mr. President, there has been a lot of wild rhetoric, quite frankly, hyperbole, exaggeration. I wanted to try to bring this discussion and this debate back to reality. To do that, I wanted to remind folks that conservatives objecting to this nomination have, from the very beginning, laid out three very narrow, specific, concrete reforms we are seeking. So this notion that we are against consumer protection, we are trying to gut CFPB, is silly. Let's get back to reality. Let's get back to what we have said from the very beginning: We want these three important reforms.

First of all, we think it is very important for the single Director, a new czar quite frankly, a credit czar, to be replaced with a board to oversee this Bureau. That is how other comparable agencies operate. The best example—the best comparison—is the SEC. I think that is a critical check on the Bureau's authority to have a board that can discuss and come up with a consensus, not a single agency.

Secondly, related to that, there should be safety and soundness checks for the prudential financial regulators who oversee the safety and soundness of financial institutions. One of the core reasons we had the 2008 financial crisis is we had political agendas run amok with regard to financial institutions with no safety and soundness checks.

We are putting that same problem on steroids in this new all-powerful bureaucracy. Again, point No. 1, very specific, very concrete, very commonsense reform that we have proposed from the beginning is a safety and soundness check.

Third, and perhaps most important, the Bureau should be subject to the congressional appropriations process so there is some oversight and accountability from the American people and their representatives. That is the norm. That sort of check and balance, that oversight and accountability, is absolutely the norm. It is way outside the norm to have no oversight and accountability because, as it stands now, this new superbureaucracy has an unlimited check that it gets from the Federal Reserve—never has to get an appropriation, never has to answer a single question from the people or their representatives.

Again, the CFPB, as it sounds now, draws its budget directly from the revenue of the Federal Reserve. By the way, this revenue would otherwise be deposited into the Treasury paying down the debt. The CFPB is not just about mega institutions, mega banks—more hyperbole that has been thrown on the floor—but anyone, any business, for instance, that offers four or more payment installments and an installment plan.

Sure, that includes Citibank. It also includes your dentist, your vet, your local electronics store. CFPB right now is so unlimited in their authority that they are able to limit or prohibit the terms of any such product or service, has power over marketing of any such product or service in its jurisdiction with, again, the Federal Reserve as its basically unlimited piggy bank.

I think these concerns we have are pretty darn fundamental and have a lot of common sense in them. Again, we have three very specific, concrete reforms we want advanced. We are not trying to gut the CFPB. Those reforms would not gut it—not against consumer protection. Those reforms would still have a sound, strong consumer protection agency in place.

I think the American people deserve a more honest debate than, quite frankly, they are getting in a lot of this. This notion that if we are against ObamaCare, we are against all improvement of the health care system is silly. I think Americans get that as their health insurance premiums go up significantly now, by every accounting, by every independent source, well beyond what they would have gone up otherwise.

Being against that is not being against health care reform. We heard even earlier, if we are against the stimulus plan, we are against economic recovery. That is silly. I think Americans know that now that we are still stuck at very high unemployment. How is that recovery working out for everyone?

I was against the stimulus because I was for economic recovery, and it is the same thing here. We need to advance the interests of the American people, certainly including consumers. But we do not need an all-powerful, new czar in Washington who can hurt everyone, including consumers.

So we continue to advance three very specific, concrete, commonsense reforms. That is all we want. That does not gut CFPB. That is not against consumer protection. It is against unbridled, unprecedented authority. The American people, agency after agency, issue after issue, have seen the effects of that sort of unbridled, virtually unlimited Federal Government authority in the last 2 years. They do not like it.

Mr. RUBIO. Earlier this week in Kansas, President Obama tried to score political points by chiding Senate Republicans for refusing to vote on the confirmation of Richard Cordray to be Director of the so-called Consumer Financial Protection Bureau—CFPB—saying we refuse to let him do his job. And the President asked, Why? I am happy to answer his question, again.

Earlier this year, I joined 44 other Senators in recommending to the President three necessary reforms for the CFPB in order to improve accountability in its operations. Specifically,

we asked that a board of directors be established to oversee it, that the agency be subjected to the regular congressional appropriations process, and for the establishment of a safety and soundness check for the prudential regulators.

We made clear to the President that without these reforms we would not vote to confirm any nominee to run the CFPB, regardless of political affiliation or qualifications. The President chose to ignore our suggestions. Although the President frequently pays lip service to accountability in the regulatory process, when push came to shove, he made this serious issue just another talking point.

President Obama is now trying to pressure my colleagues to vote to confirm Mr. Cordray by traveling around the country giving speeches. I want to reiterate that I will not vote to confirm any director for this rogue bureaucracy until appropriate checks and balances are put into place. President Obama promised that “transparency and accountability will be a hallmark of my administration”, making his refusal to make CFPB more transparent especially disappointing.

Without reform, CFPB’s director would serve with unprecedented and unconstitutional amounts of power. The director would have the power to decide what rules are issued in the name of consumer protection, how funds are spent, and how its enforcement authority will be used. In short, it empowers a single, unelected person with seemingly endless and unchecked authority. This bureaucracy holds the sweeping ability to limit choices when it comes to commonly-used financial products such as home equity loans, credit cards, and student loans. Simply put, a designation from the CFPB director saying these products are “abusive” could restrict the availability of credit to consumers and increase the cost of goods or services for all Americans.

This year alone, over 70,000 pages of new regulations have been added to the books from agencies such as the Environmental Protection Agency and the National Labor Relations Board, oftentimes without any compelling justification for their existence. The last thing job creators in America need is more uncertainty from a powerful government agency such as the CFPB that will receive a blank check for a half billion dollar budget with virtually no input from Congress.

President Obama has urged the American people to “help hold [him] accountable”. I stand with my Republican colleagues in an effort to do just that. The truth is we need transparency in government that provides greater confidence that regulations are designed to protect consumers from unfair practices, without destroying jobs. Until basic transparency requests are

made, I will not support allowing the CFPB to operate with unaccountable leadership.

Mr. CRAPO. Mr. President, both sides agree that everyone benefits from a marketplace free of fraud and other deceptive and exploitative practices. The disagreement is over the best way to structure our Federal regulatory agencies to accomplish this goal and provide accountability.

One of the lessons of the financial crisis is that we need a supervisory program that looks and considers how safety and soundness and consumer protection work together and reinforce better and safer services to banking customers. Far too often, supervision either looked at consumer issues in isolation—promoting access to credit and home ownership—or it looked at safety and soundness in isolation, such as ensuring that customer information was legally accurate but not asking whether it was understandable to bank customers.

We should have strengthened the link and coordination between prudential supervision and consumer protections rather than severing it. Instead Congress institutionalized this separation by creating a Consumer Financial Protection Bureau and blurred the role and accountability of the prudential regulators and the new Bureau.

Mortgage underwriting is a good example of an issue that was found lacking before the financial crisis and has the potential to be subject to an even more bureaucratic regulatory system going forward. I say potential because it is unclear to me where the authority of the Bureau stops and where the authority of the prudential regulators overlaps on several important issues that will likely cause confusion and potentially inconsistent regulatory approaches. Already we are seeing conflicts among regulators with different regulators adopting different consumer protection rules and duplication in examinations.

From my perspective, the new Bureau is a massive, expensive government bureaucracy that is immunized against meaningful oversight by either Congress or the President, and dramatically extends the Federal Government’s control over the economy.

According to analysis from Andrew Pincus, a partner in the law firm Mayer Brown LLP:

The Bureau’s structure has a number of features that, when taken together, concentrate an amount of unchecked authority in a single individual—the Director—that is unprecedented for a federal agency that regulates private entities and individuals:

First, the Bureau will be headed by a single Director with complete, unilateral authority to make all regulatory and enforcement decisions and to hire and fire all personnel, including his or her own deputy.

Second, the Bureau’s Director does not serve at the pleasure of the President. Rather, during his or her five-year term, the Director may be removed only for inefficiency,

neglect of duty, or malfeasance in office. That standard eliminates the President's power to remove the Director based on a policy disagreement: once nominated and confirmed, the Director cannot be overruled by the President.

Third, the Bureau is exempt from the congressional appropriations process. It is funded instead by a transfer of money from the Federal Reserve in an amount determined solely by the Director, subject only to a cap that already exceeds \$550 million, will increase 10% for the next fiscal year, and is subject to automatic inflation adjustments thereafter.

While I appreciate the willingness of Richard Cordray to serve and answer questions, I can't support the consideration of any nominee to be the Director of the Bureau until the agency is reformed to make it more accountable and transparent.

First, we would establish a board of directors to oversee the Bureau. This would allow for the consideration of multiple viewpoints in decisionmaking and would reduce the potential for the politicization of regulations. A board of directors structure is consistent with the organization of the Federal Reserve Board, National Credit Union Administration, FDIC, SEC, CFTC, and Federal Trade Commission.

Second, we would subject the Bureau to the congressional appropriations process to ensure that it doesn't engage in wasteful or unnecessary spending. This also gives Congress the ability to ensure that the Bureau is acting in accordance with our legislative intent. The SEC, CFTC, and the Federal Trade Commission have long been subject to the appropriations process for the same reasons.

Finally, we would establish a safety and soundness check. This would strengthen the link and coordination between prudential supervision and consumer protections.

Given the enormous impact the Bureau will have on the economy, it is important for Congress to revisit its structure and authorities to make it more accountable and transparent.

Mrs. MURRAY. Mr. President, I come to the floor to speak about the nomination of Richard Cordray to lead the Consumer Financial Protection Bureau and to urge my colleagues to join me in voting in support of his confirmation.

In July of last year, I was proud to join many of my colleagues in the Senate to pass comprehensive Wall Street reform legislation that is already working to protect middle-class families, hold Wall Street accountable, and put in place policies to make sure taxpayers will never again be left holding the bag for the big banks' mistakes. I supported this legislation because for far too long the financial rules of the road had not favored the American people. They were tilted toward big banks, credit card companies, and Wall Street, and they were twisted and abused to make sure no matter what happened, the financial industry would come out ahead.

When the economy was roaring, the big banks made enormous sums of money and handed out huge bonuses to their employees. But when the products they created brought down the banks and pulled Main Street down with them, it was the taxpayers who had to foot the bill to prevent absolute calamity. Wall Street had a pretty good system going for a while: Heads they won, tails the taxpayers lost. To correct this, we fought to pass Wall Street Reform last year over Republican objections, and we took a huge step in the right direction. We strengthened the rules. We increased the oversight. And critically, we created the first-ever agency dedicated to protecting middle-class families, seniors, and small business owners from the financial fraud and scams that have devastated so many.

The mission of this new Consumer Financial Protection Bureau is clear: to make sure that consumers come first—that the financial industry can no longer pull fast-ones on their customers—and, fundamentally, that the markets for consumer financial products and services actually work for all Americans. The CFPB's job is to help consumers understand the financial products that are being marketed to them every day because we know the big banks win when the American people don't understand the fine print. And it is to make sure that the financial firms are playing by the rules and to stand up for the American people and enforce those rules if consumers are being lied to, scammed, or cheated.

Over the last year the CFPB has been staffing up and ramping up and has already started working to protect consumers. But without a confirmed Director, they are simply unable to do everything possible to stand up for middle-class families. Their hands are tied. Without a confirmed Director, the CFPB doesn't have the full authority to protect consumers who use non-bank financial institutions such as payday lenders, credit-reporting agencies, and debt collectors, which are services many working families depend on, as well as so many of our Nation's veterans and servicemembers. This isn't right. We created the CFPB to protect all families and consumers, and we need to confirm a Director to give them the tools they need to do that.

I was proud to support President Obama's appointment of Elizabeth Warren to help set up the new Bureau. I think she did a fantastic job, and I am deeply disappointed that Republicans were so opposed to her work standing up for middle-class families against the big banks that they said they would block any attempt to name her as full-time Director. I thought the way Elizabeth Warren was treated by Senate Republicans was truly shameful. But she hasn't given up, and she is still fighting for the middle-class fami-

lies and consumers she has always been such a passionate advocate for.

I am very glad that President Obama nominated another strong advocate for the middle-class to fill this role. Richard Cordray has been serving as the Chief of Enforcement at the CFPB, so he understands the mission and the need to fight for the rules that protect consumers. He previously served as attorney general and State treasurer in Ohio, where he amassed a strong record of standing up for seniors, investors, business owners, and consumers. He has received support from Democrats and Republicans, and he is the right man for the job.

But the Republicans who have come out in opposition to this nomination don't seem to be opposing Richard Cordray. They seem to be opposed to the very idea that anyone should be in a position to stand up for consumers and families in the financial products market. They want to keep this position open because they are worried that this agency is going to have too much power.

Well, the Consumer Financial Protection Bureau was designed to have power. It was created to put that power in the hands of middle-class families and consumers and to take some away from the big banks and credit card companies that had it all before.

So once again we have a simple choice before us in the Senate: Do you stand up for middle-class families who deserve to be protected from scams and financial gimmicks or do you stand up for the big banks and Wall Street firms that are scared to death that a powerful consumer advocate will cut into their fat profits and big bonuses? I know where the American people stand. I stand with them. And I truly hope that Republicans have a change of heart and stand with us to confirm this highly capable and effective nominee so the CFPB can do the job the American people expect and deserve.

Mrs. BOXER. Mr. President, I wish to express my strong support for the President's nomination of Richard Cordray to be the first Director of the Consumer Financial Protection Bureau, CFPB. Mr. Cordray is an exceptionally well-qualified nominee who deserves an up-or-down vote in the Senate.

The opposition to this nomination has nothing to do with Mr. Cordray's credentials and is yet another attempt by Republicans to undermine the CFPB and stop it from cracking down on unscrupulous and fraudulent practices by big banks, credit card companies, payday lenders, and other financial firms.

The CFPB was established as part of the Dodd-Frank financial reform legislation that overhauled our banking system. Before the financial crisis, no single agency coordinated Federal consumer protection. Banks and financial companies could choose their own regulator, which enabled them to avoid

regulations with real teeth. The failure of Federal agencies to coordinate and the lack of any effective consumer watchdog agency allowed financial firms to pursue deceitful lending practices that hurt American families and caused the worst recession since the Great Depression.

The CFPB was created to solve this problem and to make sure that financial markets work for all Americans, not just big business. The CFPB has already begun reviewing many areas of consumer protection law, including mortgage disclosure forms. It will enforce new rules for credit cards, require mortgage servicers to better assist homeowners in avoiding foreclosure, and enforce new rules on bank overdraft fees.

President Obama appointed Elizabeth Warren, a respected law professor and dedicated consumer advocate, to set up the CFPB. Elizabeth Warren was selected for her long history of independent, unflinching consumer advocacy, and under her leadership the CFPB had a running start. But Republicans adamantly opposed her as CFPB director, before she had even been nominated. They knew she would crack down on abusive practices in the banking and credit card industries. And they know that by law, the CFPB cannot exercise its full authority without a confirmed Director. That is why 44 Republican Senators signed a letter promising to oppose any nominee, of any party, until their demands to cut back the agency's power and independence are met.

Mr. Cordray would be an outstanding leader of the CFPB. He currently leads the CFPB's Enforcement Division. He has built his career around protecting the public interest, reflecting his commitment to consumers and his dedication to fairness. After having been a State Representative, Solicitor General and Treasurer in the State of Ohio, Mr. Cordray was elected Attorney General of Ohio in 2008. In this role, he prosecuted fraudulent foreclosures and predatory lending, and recovered more than \$2 billion for Ohio's retirees, investors, and business owners.

Mr. Cordray's nomination has broad, bipartisan support. Attorneys General from 37 States, representing both political parties, signed a letter in support of this nomination, calling him "both brilliant and balanced," with a "superior knowledge of the financial services marketplace." Sixty-one mayors from around the country, led by Mayor Villaraigosa of Los Angeles, also wrote to support his confirmation. The California Reinvestment Coalition, Center for Responsible Lending, Consumers Union, Main Street Alliance, NAACP, National Association of Consumer Advocates, AFL-CIO, AFCSME, International Brotherhood of Teamsters, SEIU, UAW, and UFCW have all expressed support for Mr. Cordray, and

for confirming a director so that the CFPB can operate as intended.

It is stunning that Republicans continue to block any effort to rein in the type of reckless and abusive behavior that caused the worst economic crisis since the Great Depression.

I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN of Ohio. Mr. President, it never ceases to amaze me to hear my colleagues whose first loyalty is to Wall Street banks, who continue to make excuses for being against putting a consumer cop on the beat. This is an office that will be a few-hundred-million-dollar office, this consumer protection—this consumer cop on the beat.

But this consumer cop on the beat has to look at trillions of dollars in mortgages, has to protect consumers when there are \$30 billion in overdraft fees alone that banks are charging, when many times those overdraft fees are because consumers simply cannot figure out the fine print and do not understand the terms of the agreement.

In the end, again, people on this floor and their special interest friends in the Congress, the friends of the Wall Street banks, the friends of these interest groups that continue to fleece the American people—if we had had Rich Cordray or Elizabeth Warren, for that matter, the consumer cop on the beat, would we have had those kinds of foreclosures in places such as Cleveland and Dayton? Would we have had these fly-by-night mortgage brokers from Ameriquest and New Century and others moving in and taking advantage of people? I am not sure we would have.

But my Republican colleagues, my colleagues who always do the bidding—not all of them, but many of them always do the bidding of these special interest groups that have inflicted far too much damage on this economy—I hear all this, that if we would just make some changes in the agency. I talked to the Senate Historian because I have heard these arguments: If we just change this agency, I would vote for it. First of all, I talked to the Senate Historian, who said: Never in the history of the Senate has one political party tried to block the nomination of a Presidential appointee based on wanting to change the agency. It is nothing about the qualifications of Rich Cordray. I know Rich Cordray better than anybody in this institution. He is from my State. He was our attorney general. He was the State treasurer. He was county treasurer. He was a State legislator. I have known Rich for over 20 years. I know he is qualified. Many of my colleagues on both sides say he is qualified.

But they say: We want to change the agency. We worked with Republicans to change this agency as it went through the process in Dodd-Frank.

They kept shifting the goalposts. In order to accommodate Republican concerns, we made the CFPB a bureau at the Federal Reserve. Many of us thought it should be totally independent. We were willing to make that concession in order to get Republican support.

They then, after we did that, asked for regular GAO audits of the books. They got them. The GAO said the CFPB passed with flying colors. They said: We do not like Elizabeth Warren, give us someone else. Elizabeth Warren withdrew. She was a great consumer activist, would have been very good at this. We are replacing her—the President is—with Richard Cordray from Ohio. He will do this job well.

Then, after he is appointed, they say—and Richard Cordray has support from banks and credit unions and consumer groups. That is still not good enough. They asked the President not to recess appoint a Director. The President agreed to that. They are moving the goalposts. Now they are saying they will not approve anyone to serve as the Director of the consumer bureau unless we change the Bureau.

In other words, to protect their Wall Street friends, they are saying: We are not going to allow a Director to be in place unless we weaken this agency. As Senator REED from Rhode Island said, would we not appoint a Director of the Food and Drug Administration in the future until we rolled back all food safety laws? Are we not going to protect the Consumer Products Bureau in the government, in the Department of Commerce, until we roll back child toy safety laws? That makes no sense.

This was voted with more than 60 votes—61 or 62, if I recall—a supermajority in this Congress 2 years ago. We allowed all kinds of amendments. We accepted many changes that Republicans wanted. But in the end, it is a choice: Are we for consumers or are we for Wall Street? We know who it is. I am not asking my colleagues to vote for him. I am asking my colleagues to let us have an up-or-down vote. Let us vote on it. Do not filibuster. Do not block the vote.

Understand, this is a vote coming up that is to break a filibuster, to break a Republican filibuster, where Republican Senators almost always are flacking for Wall Street. They do that. It never ceases to amaze me.

So all we ask is an up-or-down vote. Vote yes for cloture so we can have an up-or-down vote for Attorney General Cordray.

I yield the floor and ask for a "yes" vote.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SHELBY. I yield back my time.

CLOTURE MOTION

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows.

# CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the nomination of Richard Cordray, of Ohio, to be Director, Bureau of Consumer Financial Protection:

Harry Reid, Joseph I. Lieberman, Jeff Bingaman, Patty Murray, Patrick J. Leahy, Kent Conrad, Sheldon Whitehouse, Jack Reed, Benjamin L. Cardin, Barbara Boxer, Al Franken, Max Baucus, Richard J. Durbin, Robert Menendez, Jon Tester, Sherrod Brown, Tom Harkin, Tim Johnson.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call is waived.

The question is, Is it the sense of the Senate that debate on the nomination of Richard Cordray, of Ohio, to be Director, Bureau of Consumer Financial Protection, for a term of 5 years, shall be brought to a close?

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The legislative clerk called the roll.

Ms. SNOWE (when her name was called). Present.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KERRY) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 53, nays 45, as follows:

[Rollcall Vote No. 223 Ex.]

## YEAS—53

Akaka	Gillibrand	Nelson (NE)
Baucus	Hagan	Nelson (FL)
Begich	Harkin	Pryor
Bennet	Inouye	Reed
Bingaman	Johnson (SD)	Reid
Blumenthal	Klobuchar	Rockefeller
Boxer	Kohl	Sanders
Brown (MA)	Landrieu	Schumer
Brown (OH)	Lautenberg	Shaheen
Cantwell	Leahy	Stabenow
Cardin	Levin	Tester
Carper	Lieberman	Udall (CO)
Casey	Manchin	Udall (NM)
Conrad	McCaskill	Warner
Coons	Menendez	Webb
Durbin	Merkley	Whitehouse
Feinstein	Mikulski	Wyden
Franken	Murray	

## NAYS—45

Alexander	Enzi	McCain
Ayotte	Graham	McConnell
Barrasso	Grassley	Moran
Blunt	Hatch	Murkowski
Boozman	Heller	Paul
Burr	Hoeven	Portman
Chambliss	Hutchison	Risch
Coats	Inhofe	Roberts
Coburn	Isakson	Rubio
Cochran	Johanns	Sessions
Collins	Johnson (WI)	Shelby
Corker	Kirk	Thune
Cornyn	Kyl	Toomey
Crapo	Lee	Vitter
DeMint	Lugar	Wicker

ANSWERED "PRESENT"—1

Snowe

NOT VOTING—1

Kerry

The PRESIDING OFFICER. On this vote, the yeas are 53, the nays are 45,

and one Senator responded "present." Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

# VOTE EXPLANATION

• Mr. KERRY. Mr. President, I was necessarily absent for the cloture vote on the nomination of Mr. Richard Cordray to be Director of the Consumer Financial Protection Bureau. If I were able to attend today's session, I would have supported cloture on this nomination.●

## LEGISLATIVE SESSION

### MIDDLE CLASS TAX CUT ACT OF 2011—MOTION TO PROCEED

The PRESIDING OFFICER (Mr. BINGAMAN). Under the previous order, the Senate will resume legislative session and the motion to proceed to S. 1944, which the clerk will report.

The legislative clerk read as follows:

Motion to proceed to the bill (S. 1944) to create jobs by providing payroll tax relief for middle-class families and businesses, and for other purposes.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. LEE. I ask unanimous consent to enter into a colloquy with my Republican colleagues for up to 30 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. LEE. Mr. President, I stand today to urge my colleagues to support efforts to bring forward a balanced budget amendment, one that can be passed out of both Houses of Congress and submitted to the States for ratification.

Article V of the Constitution gives us the power to change the Constitution from time to time, to modify our laws, that 224-year-old document that has fostered the development of the greatest civilization the world has ever known.

We have done this 27 times. We have done it at times in order to protect and preserve the Nation our ancestors fought so valiantly to create and later again to defend. We have to modify our government, the manner in which we do business, in order to preserve that system, in order to make it strong, in order to ensure that it will continue to be strong for future generations.

We made it stronger when, for example, we added the Bill of Rights shortly after the ratification of the Constitution. We made it stronger again when, for example, we added the so-called Civil War amendments, amendments XIII, XIV, and XV, ending slavery and the badges and incidents thereof. We made it stronger when we made clear that women must always be given the right to vote. We have made it stronger a number of times. And the time to make it stronger has come yet again.

It is time to modify the Constitution to limit—to restrict—Congress's current power granted by article I, section 8, clause 2 of the Constitution to borrow money on credit of the United States. The reason we need to do this is because this power has been so severely abused over such a prolonged period of time that it is causing devastating consequences for our economy and for our ability to fund the operations of the government.

We have now accumulated over \$15 trillion in debt as a country. That works out to about \$50,000 for every man, woman, and child in America. It works out, arguably, to about \$120,000 to \$150,000 for every taxpayer in America. This is lot of money. It also represents between 90 and 100 percent of our gross domestic product annually, depending on whose statistics you follow. This is troubling, given that there is an abundant amount of research indicating that once a country's sovereign debt-to-GDP ratio crosses the significant 90-percent threshold—which we have now done—economic growth tends to slow, tends to slow to a point that an economy as large as ours can expect to lose as many as 1 million jobs a year. We can't afford to lose jobs, especially when we know one of the major causes is our national debt. It is time we change the way we do business. It is time to change the manner in which Congress acquires new debt.

This is no longer an issue that is either Republican or Democrat, that is either liberal or conservative. It is simply American. I remind my colleagues, whether you are concerned on the one hand about preserving America's leading edge, its ability to fund its national defense program or, on the other hand, if you are most concerned about funding our entitlement programs, you should want a balanced budget amendment because this is what we need to do, this is what we have to do in order to protect our ability to fund both of those things and everything else we do, you see, because by the end of this decade, according to the White House's own numbers, we will be paying close to \$1 trillion every year to pay the interest on our national debt. Just the interest alone. We are currently spending a little over \$200 billion a year on interest—still a lot of money but about \$800 billion lower than what we are likely to be spending by the end of this decade.

Where will that additional \$800 billion every single year come from? This isn't a discretionary sum. This is money we have to pay. It is the first thing we have to pay. Where will that \$800 billion difference be made up? At that point, we can't expect simply to raise taxes to make up that difference. I am not aware of any tax increase plan that could bring in that much additional revenue every year, without stagnating our economy to the point

that we might, within 1 year or 2 years, bring in less revenue rather than more—certainly not \$800 billion more. Nor am I aware of any plan whereby we could simply borrow an additional \$800 billion to pay that interest, because doing so, of course, would cause our interest rates to skyrocket, grow out of control, and our interest payments would be even more significant at that point, thus further impairing our ability to fund everything from defense to entitlements. So at that point, the only option on the table would be dramatic, severe, abrupt, even Draconian cuts to everything from defense to entitlements and everything in between. We don't want this. There is a better way. And the better way forward consists of a severe permanent structural spending reform that can be achieved only through a balanced budget amendment.

Let me explain what I mean by that. And, more importantly, let me explain what I don't mean by that.

We have to be aware of things that masquerade as balanced budget amendments, things that will actually do the job instead of purporting to do the job, distracting the public's attention away from the need to do this while in effect doing nothing. We need to be aware of what I sometimes call the Trojan horse balanced budget amendment proposal.

There are a few hallmarks of what a real, effective balanced budget amendment would accomplish. First and foremost, it has to apply to all spending in requiring Congress to provide a supermajority vote for any borrowing authority. There are some who have suggested we should have a balanced budget amendment that exempts certain categories of entitlement spending. But, of course, as we all know, it is entitlement spending that continues to consume a larger and larger share of our national budget each and every year. It is entitlement spending that is anticipated to have shortfalls for sums that will have to be expended for Americans alive today. It could range anywhere from \$50- to \$60- to \$110 trillion in unfunded entitlement liabilities. So simply exempting entire categories of entitlements is one of these hallmarks of a Trojan horse balanced budget amendment. We can't do that. We need it to apply to all Federal outlays, all Federal spending.

Second, an effective balanced budget amendment must cap spending at the average historic level of Federal revenue. Over the last 40 years, our average take, our average income as a percentage of GDP, has been about 18 to 18.5 percent of our gross domestic product. We need to make sure we are not spending more than that; that Congress can't, without a supermajority vote, spend more than 18 percent of GDP in any given year. Otherwise, we run the risk that Congress will find a way through tricky accounting

schemes to circumvent the restrictions to make sure it is not spending more than it takes in.

Third, the supermajority requirement must apply to the folks in both Houses of Congress every time Congress wants to spend more than it takes in. Any balanced budget amendment proposal that allows for a simple majority to bring about an exception to these spending limitations is one that Congress can and will use to circumvent the amendment entirely. Let me explain what I mean.

We have had in the past certain statutory legislative limitations on Congress's spending and borrowing power. Some of these have been known as the Graham-Rudman-Hollings legislation, and also the pay-go rules. But because Congress makes those laws and because they haven't been reduced to a constitutional amendment, just as Congress giveth, Congress taketh away, and Congress has seen fit to exempt itself of those rules. A balanced budget amendment, even while enshrined in our Constitution, becomes no more effective than those statutory or internal rules unless every time Congress wants to get around those limitations Congress is required to cast a supermajority vote to justify that excess.

Finally, an effective balanced budget amendment must require that Congress cast a supermajority vote anytime we raise the debt limit. This will give us an additional guarantee that tricky accounting mechanisms will not be used to circumvent some of these most important restrictions. Without these restrictions, Congress will continue to spend out of control, because Members of Congress tend to be rewarded when they spend and they tend to be criticized when they cut, and political pressures are such that I fear this spending will continue out of control in perpetuity until that moment in which we reach our natural mathematical borrowing limit—not our statutory debt limit, our natural mathematical borrowing limit. It is at that point when the most abrupt, the most painful, the most Draconian cuts will have to be made. We can do this in a way that makes sense. We can do this in a way that is sensitive to the needs of the most vulnerable Americans, those who have become the most dependent upon our entitlement State, most dependent for their day-to-day existence on these very programs. Those programs will have to be cut abruptly and in a most painful manner unless we take the necessary steps right now and start moving onto a smooth glidepath toward a balanced budget amendment.

We may not be able to balance our budget overnight, but we can do it over the course of a few years. That is exactly what this would allow us to do.

I have worked closely with a number of my Republican colleagues in sup-

porting S.J. Res. 10, a balanced budget amendment proposal that has the support of all 47 Republicans. One of my close allies in this endeavor has been my friend and colleague, the junior Senator from Kentucky. I would like to ask him to share his perspective on why this is necessary.

So I ask Senator PAUL why does he think this is so important for us to have this amendment right now.

Mr. PAUL. I think Congress has failed. We have not passed a budget in 2 years, much less a balanced budget. We cannot even pass a budget under the normal procedures, and we are showing no signs of being able to balance our own budget.

They say the American public, when we ask them are they for a balanced budget, 70 to 75 percent of the people are for it—Republicans, Democrats, and Independents. Congress currently has about a 10-percent approval rating. My thought is maybe our approval rating is so low because we are not listening to what the people want. The people want us to balance our budget. They want us to do the responsible thing. But they also do not want to say: Oh, Social Security, we are going to put that off to the side. They want the Social Security fund to be sound too.

What are we doing right now? We are reducing the funding to Social Security. We are doing exactly the things we should not be doing. So it is important, as my colleague said, that the balanced budget amendment include all spending, and we need to balance our budget.

Mr. LEE. If the Congress is consisting of a Senate and House, and the Members of the Senate and House are elected representatives of the people who stand for reelection at regular intervals, and if the American voting public overwhelmingly supports a balanced budget amendment, why haven't we then passed it and given the States an opportunity to ratify such an amendment?

Mr. PAUL. The big driving force here is the entitlements. If we look at the revenue coming into the government, it is all being spent on entitlements and interest. Forty percent of every dollar is borrowed, but that means we have to borrow all the money for national defense, for our roads, all the rest of government. Forty percent of every dollar, \$40,000 a second, is being borrowed. Why don't we come to an agreement?

I have been asking many people on the other side that, and they say we will not fix entitlements until we have a \$1 trillion tax increase. If that is the starting point, we are never going to fix entitlements because many of us think raising taxes is a mistake, in the middle of a recession, and we think more money left in the private sector would be better spent for jobs.

We have the balanced budget debate as part of this debate on how to reduce spending on the entitlement programs because they consume 60 percent of the budget. But there is this unwillingness up here. I think people would like us to find solutions. When I go home to my State, it doesn't matter whether they are a Republican or Democrat or Independent; they want us to fix the entitlement programs. They don't want it to be dependent on increasing taxes on everyone also.

Mr. LEE. What is my colleague's sense as to how the various State legislatures are likely to respond to a constitutional amendment proposed by both Houses of Congress? Does he think they would likely ratify such an amendment by the necessary three-fourths margin?

Mr. PAUL. In the last year, I spoke before my State legislature to a joint session of the House and Senate, and there was overwhelming support for a balanced budget amendment. I think there is actually a movement out there to do it if we do not do it. There is so much feeling among the public that this enormous debt is hurting us.

When I go home and talk to people, I say: Look, the people the debt hurts the worst are those on fixed incomes, senior citizens, and those in the working class. Those are the people who are being hurt by this debt because it causes rising prices. As we print the new money, those people are hurt every time they go buy gas at the pump, every time they go to the grocery store. The rising prices are hurting senior citizens and the working class. The only way we are going to fix it is to have rules that must be obeyed.

Mr. LEE. So they are paying for Washington's fiscal irresponsibility in the form of job losses and in the form of increased prices for goods and services and in the form of inflation.

It is likewise my experience with my State legislature that they seem to be very supportive of it. In fact, I have a document here signed by the legislative leaders of my State: by Governor Gary Herbert, by Utah house of representatives speaker Rebecca Lockhart, and by Utah State Senate President Michael Waddoups. It concludes essentially as follows:

We urge the United States Senate and House of Representatives to pass a balanced budget amendment and send it to the states for ratification. Additionally, we urge Congress to make Utah's current resolution part of the CONGRESSIONAL RECORD.

They also proceed to explain why they feel so strongly about this. They say:

Not only for our own sake, but for future generations as well, the states must now combine in an unwavering resolve with convincing action to put the nation's financial house in order. Passage of your own state's resolution urging the support for a balanced budget amendment can help make this happen. Please join with Utah to call upon Con-

gress to immediately pass a balanced budget amendment. We respectfully encourage you to urge your congressional delegation to act in your behalf.

They are calling not only on Congress but also their fellow State legislators throughout the country to urge this same action from Congress. In the same breath, they also adopt it, and they supported wholeheartedly the specific balanced budget amendment proposal that is found in S.J. Res. 10.

I thank them for doing that. I think they reflect the views of so many of our State legislatures which balance their budgets every single year. Most of them do. It is not news when they do it. It is not news because it is what is expected. It is expected because that is what they do.

I look forward to the day and age when it is no longer news when Congress balances its budget.

I would like to ask Senator PAUL another question. Why is it that so many are fond of saying, as our President has recently said, "We don't need a balanced budget amendment; what we need is for Congress to just do its job"? Why isn't that enough to carry the day?

Mr. PAUL. The problem is, in the past we have had rules—as the Senator mentioned, Gramm-Rudman-Hollings, pay as you go. I think pay as you go, which was passed in the late 1990s, was broken 700 times. There doesn't seem to be the spine or willpower here to say no. Everybody wants something from government, but they do not realize that by getting things from government we do not pay for has ramifications.

Admiral Mullens said last year that the biggest threat to our national security right now is our debt. Erskine Bowles, head of the Debt Commission, said the most predictable crisis in our history is going to be a debt crisis.

For those on the other side who will oppose a balanced budget, they will need to explain to the American people when chaotic situations come and we are having trouble paying for those things that come from government, when the value of the money is destroyed and when prices are rising dramatically, they will have to explain to the American people why they thought it was not necessary to balance the budget.

I have seen no willpower to attack entitlements. There are simple ways. We could gradually raise the age of the entitlement eligibility and means test the benefits. We could fix Social Security tomorrow. We could fix Medicare tomorrow. But the other side is unwilling to talk about entitlement reform unless—they believe they are owed some obligation of raising taxes by \$1 trillion. That would be a disaster for the economy, and it is beyond me why the other side will not say let's fix Social Security.

What would it take to fix Social Security? What would it take to fix Medicare? I think we could fix all of these problems, but I do not think the dialog is there. I have been trying to ask questions to the other side for months now, and we are not getting anywhere.

Mr. LEE. I think most Members of Congress would acknowledge that their constituents want the Federal budget balanced. Why is it not enough for us just to tell Members of Congress: Please balance it. We don't want to have to restrict your authority. We don't want to have to take the keys away from the irresponsible driver. We just want you to be responsible. Why doesn't that work?

Mr. PAUL. I think because so much of government spending is considered to be mandatory, so it just keeps enlarging and expanding. Also, because people have great big hearts and they want to help everyone, but they do not realize the ramifications of accumulating such a massive debt. As we accumulate this debt there are ramifications. There are higher prices and the threat of an economic collapse.

Greece is going under. Italy is behind them. Portugal, Spain—they are struggling under this burden of debt. They say when a country's debt equals its economy, when it is about 100 percent of its gross domestic product, it is losing 1 million jobs a year.

Our debt is stealing American jobs, it is making us weaker as a country, making us vulnerable, making our national security vulnerable. But we have to do something. There is no evidence in this body we can even pass a budget, much less a balanced budget.

I think everything about this body shows a failure to be fiscally responsible and we need stronger rules.

Mr. LEE. Perhaps it is inherent in the institution itself, in the forces at play, that have made Congress uniquely vulnerable to this kind of massive deficit spending. Whatever the reason, we know Congress is not willing, is not able, or at least in recent years has not been inclined except in rare, unusual circumstances to balance its own budget.

That being the case, we cannot assume that Congress will all of a sudden start doing its job, as those who have used this argument have insisted. Part of Congress's job, as Congress has come to perceive it, is to engage in deficit spending. One of Congress's powers, as Members of Congress who read the Constitution will point out, is to borrow money on the credit of the United States. So it is not enough to simply tell Congress to do its job because it has regarded this kind of massive deficit as consistent with that mandate, consistent with that injunction.

Meanwhile, Congress is continuing to occupy a larger and larger share of the American economy. We have to remember that for the first 150 years or

so of our Republic's existence, we were spending between 1 percent and 4 percent of gross domestic product at the Federal national level, with only two brief exceptions—once during the Civil War and once during and then the immediate aftermath of World War I. But that all started to change in the 1930s when we broke into double digits for the first time ever during peacetime. We have never really gone back.

Now the Federal Government is spending about 25 percent of GDP annually. Roughly a quarter out of every dollar that moves through the American economy every year is taken out of the real economy by Washington. It is absorbed within the Federal morass that is our government. That is a problem. That needs to change.

I fear, I suspect, I firmly believe that it will not change until we take this power away, until we at least impose severe restrictions on Congress's borrowing power because it has become part of Congress's nature to engage in this kind of out-of-control deficit spending.

I would like to ask Senator PAUL another question. How does he think it would impact the lives of Americans, of Kentuckians, on a day-to-day basis, if we were to pass an amendment such as this and have it ratified by the States?

Mr. PAUL. People maintain that they are for jobs, for getting the economy growing again. If we were to pass a balanced budget amendment and send it to the States this year, it would create more jobs and create a better psychology than we have had in this country in decades. I think we would see a rise in the stock market like we have never seen before if we said to Wall Street and said to investors worldwide: We are going to balance our budget; we are not going to spend more than we take in.

I think we would see an economic recovery begin as we have never seen in this country. I think we would see millions of jobs created. That is why we have to do this. That is what the American people want.

What amazes me about this debate is we are going to have this debate and have this vote and the vast majority of the other side said they will not vote for a balanced budget amendment.

I say take that home. Tell your people at home that you are opposed to balancing the budget, and let's run on that. Let's see who wins the elections in the future because our country's future depends on balancing our budget and controlling the debt. I hope we do not wake up when it is too late.

Mr. LEE. I could not agree more with that assessment. It is important for us to remind our colleagues of that because according to a recent CNN poll, the American people overwhelmingly support this by a margin of about 75 percent. Those who oppose it, those

who are Members of this body, those who are Members of our sister body—the House of Representatives—who choose not to support it, will cast their “no” vote at their own political peril because the American people are standing and they are demanding more. They understand that, in the words of Benjamin Franklin: “He'll cheat without scruple who can without fear.”

When Congress is free to spend more than it takes in every single year without political consequence, bad things happen. When Congress starts to manipulate more and more of the economy, that is something the American people understand is hurtful rather than helpful to them, to the people on the ground, to the person who is unemployed and looking for a job, to the person who is underemployed or underpaid for the work he does, to the single mother who is just worried about taking care of her children, to the grandparents who are worried about the future of their grandchildren, worried about the fact that for the first time in American history, Americans fear their posterity will enjoy a lower standard of living than what they have enjoyed.

All this is due to the fact that Congress has no real boundaries to its authority and recognizes no real limits on its ability to spend our hard-earned money. This has real consequences. We can forestall those negative consequences right now if we will act to restrict, on a permanent and structural basis, Congress's ability to engage in deficit spending.

Accept no imitations, beware of the Trojan horse balanced budget amendment, the one that can be circumvented easily by a simple majority vote. Beware of the balanced budget amendment that limits, as a percentage of GDP, Congress's ability to spend money. Look out for these principles. If we get this balanced budget amendment passed, submit it to the States for ratification. They will ratify it, and we will find our best days, as Americans, are yet ahead of us.

I urge my colleagues to cast a vote in favor of S.J. Res. 10.

I thank the Chair.

I yield the floor.

The PRESIDING OFFICER (Mr. BROWN of Ohio). The Senior Senator from Iowa.

#### HEALTH CARE LITIGATION

Mr. GRASSLEY. Mr. President, in a few minutes, the Supreme Court will be addressing four issues in connection with the constitutionality of the Obama health care law. Previously, I spoke about the unconstitutionality of the individual mandate. Today, I wish to discuss the second issue of four: how much of the law must be struck down if the Court finds the individual mandate to be unconstitutional. This legal question is called severability.

When a court rules a law is unconstitutional, it can strike down only those

parts it considers unconstitutional. It can strike down the parts that are intertwined with the unconstitutional provision or it can strike down the whole law. Its action will depend upon whether the remainder of the law can function as Congress intended when it passed it.

There are rules governing severability. Normally, when only parts of a law are held to be unconstitutional, only those parts of the law are struck down by the Court. But when a statute's unconstitutional provisions are severed, the whole law falls when Congress would not have passed the constitutional provisions without the unconstitutional ones being in it as well.

It is not enough that some of the remaining provisions are constitutional. The Supreme Court has asked whether the remaining provisions “would function in a manner consistent with . . . the original legislative bargain.”

The lower courts have reached four different conclusions concerning the health care reform law; first, that the individual mandate can be severed from the rest of the bill; second, that the individual mandate can be severed but only if the law's related provisions that require mandatory issue and community ratings are also severed; third, the opposite position, that the mandate and the related provisions are not severable; and, finally, that the mandate is not severable and that the whole law must fall.

One of my Judiciary Committee colleagues has stated, for the Democrats, “worst-case scenario, the mandate falls.” But even the Obama administration does not take that view. The administration argues that if the mandate falls, the guaranteed issue and community rating provisions must also be struck down. The President's administration says health insurance markets will not function if all Americans are not forced to buy health insurance and insurance companies must, nonetheless, insure everyone who seeks coverage at prices that do not reflect their health risk.

If the mandate falls, keeping any of this law would violate the original legislative bargain. I would like to remind my colleagues of that original legislative bargain. The health care law passed because the majority party—in its own partisan way—was going to pass this bill by any means necessary. The individual mandate was very critical to the ability to pass this law and to particularly pass it only by partisan considerations.

We considered an amendment in the Finance Committee that would have granted exemptions from the individual mandate to everybody who asked for that exemption. My good friend, the chairman—and that is Senator BAUCUS, as we all know—correctly stated: “The system won't work if this amendment passes.” He further called

it "an amendment which guts and kills health reform." He commented that "if we are serious about making sure that the Americans have health insurance, we all have to participate. . . ." So the bill's sponsors knew the whole operation of the law depended upon this very important provision that the Court is now considering on the individual mandate and whether that issue was constitutional.

Let me repeat that. The people promoting this legislation that passed on a partisan vote knew the whole operation of the law depended upon the compulsion of the individual mandate. The legislative bargain also showed this law would not have passed if a single comma had been changed. Congress could not have enacted any part of this law without the individual mandate or any other provision. That situation comes about from the fact that the bill passed the Senate by one vote and individual Senators were able to extract specific provisions that benefited their State in return for agreeing to provide their deciding vote for the bill. I think we all know the outrage that came from the grassroots of America over some of those very special provisions. We also know the American people were disgusted by these deals. But without those arrangements and deals, none of the law would have passed.

Those deals were one of the reasons why the Democrats lost their 60-vote majority in the last election. So when the other body could pass a bill only by accepting the Senate bill, they blocked any amendments that would have changed so much as a comma. Had anything changed, the new 59-vote Senate majority would have prevented passage. The bill was offered on a take-it-or-leave-it basis, all or nothing. If the individual mandate is struck down, then the whole law must fall. Although it is not conclusive, it is certainly relevant that the law does not contain a severability clause. This is one more indication Congress thought the law was a unified whole.

It is simply not reasonable to argue that the law should survive without the mandate. The most important political accomplishment of the law is the additional coverage, not the lower costs we were promised. Without the mandate, coverage under the law evaporates.

Does anyone believe that without the coverage in the law, Congress could have passed the massive Medicaid expansion? Does anyone believe that without the coverage in the law, Congress could have passed the Draconian cuts in Medicare? Does anyone believe that without the coverage in the law, Congress could have passed hundreds of billions of dollars in new taxes? Of course not. It is simply not a legitimate argument that the rest of the bill could have ever stood on its own without the individual mandate enabling additional coverage.

I am pleased the Supreme Court has granted oral arguments devoted to the severability question all by itself. In the past, the Supreme Court has issued very activist severability rulings in which it rewrote a statute in a way Congress never would have passed it.

For instance, it completely rewrote the campaign finance laws in the 1976 *Buckley v. Valeo* decision in a way that produced an unworkable system that no Member of Congress would have ever voted for. In the *Booker* case, the Supreme Court rewrote the sentencing laws in a way that produced a very unworkable system that no Member of Congress would have voted for. This time, the Supreme Court should not use the severability doctrine to rewrite the health care law into something Congress never would have passed in the first place. It should strike down the entirety of the law in keeping with the law on this subject. Such a ruling would give us the chance to do what we did not do before: work in a truly bipartisan way to address these issues.

I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

#### LAS VEGAS HELICOPTER CRASH

Mr. REID. Mr. President, I am saddened to have learned this morning that five people were killed late yesterday in the terrible helicopter crash just a few miles outside Las Vegas. My sympathy is with the families of those who died, including pilot Landon Nield and four passengers. My thoughts are with them as the recovery efforts continue this morning and as they lay their lost loved ones to rest.

Reports indicate the aircraft was on a tour of Hoover Dam. It crashed into a remote and rocky terrain in the River Mountains between Lake Mead and Henderson, NV, a few miles from Las Vegas.

I have taken those helicopter tours. It is an exciting trip. People don't realize this, but we are just a few miles from the Grand Canyon there in Las Vegas. It takes just a short time to travel to that beautiful canyon to see where millions of people go every year to see the Grand Canyon. Hundreds of thousands of tourists come from Las Vegas to see it.

I am truly grateful for the efforts of the National Park Service rangers, the metropolitan police department, the search-and-rescue team, and the Henderson fire departments that responded rapidly to the scene of the accident.

The Federal Aviation Administration and the National Transportation Safety Board are investigating this accident as we speak. I will continue to monitor the investigation as well as the recovery efforts that are in progress.

Hundreds of thousands of tourists, I repeat, enjoy these helicopter tours each year. I am sorry innocent people

lost their lives in such a rare tragedy. Nevada puts great stock in protecting the safety of its tourists, whether flying over the Grand Canyon or walking down the Las Vegas strip. I hope the inquiry into the cause of this crash will help us better protect helicopter pilots and passengers in the future.

Again, my heart goes out to the families as they mourn this awful tragedy.

I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. If the Democrats aren't going to take their time, I would like to take 5 or 6 minutes on another subject, and I ask unanimous consent to do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### BROKEN ACCOUNTING SYSTEM

Mr. GRASSLEY. Mr. President, I come to the floor today to commend Secretary of Defense Leon Panetta for personally focusing top-level attention to what has been a festering problem, and I think it is fair for me to say a festering problem for decades. I am talking about the Defense Department's broken accounting system and lack of financial accountability.

Secretary Panetta has grabbed the bull by the horns and told the military services to get on the stick and move out smartly. He wants them to fix the problem now, not later. Secretary Panetta's bold initiative is laid out in a Department-wide memorandum dated October 11 this year. In this document, he calls for an all-hands-on-deck priority effort to accelerate plans to create a modern, fully integrated finance and accounting system. Such a system, if it ever comes to be, would be designed to generate reliable, accurate, and complete financial information. Such a system should be capable of producing credible financial statements that can earn clean opinions from independent auditors. If that happens, the Department will achieve what is called full audit readiness. But now I want to warn Secretary Panetta about what has happened to so many well-intentioned Secretaries of Defense. That could be a big "if."

Under the Chief Financial Officers Act of 1990, all government agencies were supposed to reach full audit readiness 15 years ago. As I understand it, the Defense Department is now the only delinquent agency. After the passage of so much time, how is it, then, that the Pentagon cannot provide an accurate accounting of all the money it spends? Doing it is a constitutional responsibility. Not doing it is unacceptable. Why are the military services

dragging their feet as they are? What is the problem? Are all of the petty fiefdoms entrenched in Pentagon bureaucracy causing the problem? Is it because they do not want to surrender control of the money to a centralized financial authority?

This is a festering problem Secretary Panetta has tackled. As a former chairman of the House Budget Committee and Director of the Office of Management and Budget, he has the necessary knowledge and the necessary experience to get this job done.

The magic date for achieving full audit readiness at Defense was set in concrete 2 years ago. Unfortunately, this goal has a long and elusive history, and that long and elusive history is best characterized by relentless slippage. It is a rolling target date, and most experts believe the 2017 deadline is unattainable.

I am sure our tax-paying public doesn't understand why the Federal Government wouldn't have the best accounting system in the world, but they don't, particularly in the Defense Department.

Under Secretary Panetta's leadership, I hope all the slippage comes to a screeching halt and all the bureaucratic roadblocks are torn down. He has definitely turned up the heat and turned up the pressure. He has drawn a line in the sand. He wants to see results and see results now. He is calling for a revised plan for achieving audit readiness. It is due on his desk December 13. So Army, Navy, Air Force, Marines, Coast Guard, and everybody else—well, the Coast Guard is not involved but everybody else—get on the stick because that is next week. He has set a near-term goal. He wants the Department to produce partial financial statements by 2014.

As a first step, Secretary Panetta has called for the production of statements of budgetary resources by 2014. A statement of budgetary resources is just one component of a financial statement, but it represents a big important chunk of the whole. If credible statements of budgetary resources can be produced 3 years ahead of schedule, then maybe the full audit readiness by 2017 is, indeed, possible.

I also understand that Secretary Panetta's near-term goal is being incorporated in legislation working its way through Congress right now. That should help to move the ball further down the field.

Secretary Panetta's decision to set a preliminary goal of 2014 will be a good gauge—a good test—of what is and is not possible. Can the Defense Department achieve full audit readiness by 2017? We won't have to wait 6 years to find that out under the process Secretary Panetta is instituting. If problems surface early on, we in Congress can help the Department take corrective action to keep this effort on track and moving in the right direction.

A willingness and a commitment on the part of the Secretary of Defense to take on this problem goes way beyond the production of credible financial statements required by the Chief Financial Officers Act of the late 1970s. It goes right to the heart of a much larger constitutional issue; that is, whether the Department of Defense is going to be held accountable.

The Department must be able to provide a full and accurate accounting of all the money it spends. Under article I, section 9 of the Constitution, such an accounting must be published from time to time. The taxpayers expect and deserve nothing less than that. Today, DOD can't do that. The status quo is unacceptable.

While I began conducting oversight of the Defense Department financial management issues more than 20 years ago, I did not come to fully appreciate the true understanding of the root cause issue until 3 years ago.

After receiving a series of anonymous letters alleging misconduct and mismanagement within the inspector general's audit office, I initiated an in-depth oversight review of audit reporting. Early on in the review, there was a startling revelation: One all-important, central element was adversely affecting every facet of the inspector general's audit effort, and that was the Department's broken accounting system. This dysfunctional system is driving the audit freight train. The success or failure of an audit turns on the quality of the financial data available for audit by competent examiners. The record clearly shows the quality of financial data presented for audit by the Department should be rated poor—or maybe I ought to say even worse than poor. This is what I call the “no audit trail” scenario. It is frequently encountered by auditors trying to examine Department of Defense books of account. That is the exact problem Secretary Panetta is attempting to address.

All my audit oversight work tells me that fixing the accounting machinery is the first step to audit readiness. Once a modern, fully integrated system is up and running, it should be a simple matter of punching the right computer buttons and credible financial statements will roll off of the printer. Doing routine oversight audits should be a piece of cake. Today's labor-intensive and time-consuming audit trail reconstruction work which auditors now endure in the absence of reliable accounting records will be a thing of the past. Most importantly, effective internal controls will be in place to protect the taxpayers' money against fraud, theft, and waste.

What I am saying to my colleagues is this: Secretary Panetta is on the right track. He is trying to take us to a place where we need to go and go soon. I want to help him lead us there, so I

am here today to encourage and support this courageous effort to clean up the books. I admire and respect his personal commitment to such a noble cause.

I am also here to reinforce the words of encouragement contained in a letter that my friend from Oklahoma, Dr. COBURN, and I penned to Secretary Panetta on November 17. We, being Senator COBURN and I, want to work with him to achieve this most worthy goal. And in the process of these remarks to the Senate, I hope other Members of the Senate, particularly those who are on the Armed Services Committee, will also give Secretary Panetta encouraging words of support and thanks.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

#### ORDER OF PROCEDURE

Mr. DURBIN. Mr. President, on behalf of the majority leader, I ask unanimous consent that the time until 2:30 p.m. be equally divided between the two leaders or their designees for debate on the Reid motion to proceed to Calendar No. 251, S. 1944; that at 2:30 p.m., the Senate vote on the motion to proceed to S. 1944; that upon disposition of the Reid motion to proceed, it be in order for the Republican leader or his designee to move to proceed to Calendar No. 244, S. 1931; that there be 2 minutes of debate equally divided between the two leaders or their designees prior to the vote; that both motions to proceed be subject to a 60-vote threshold; finally, that the cloture motion relative to the motion to proceed to S. 1944 be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

#### BALANCED BUDGET AMENDMENT

Mr. DURBIN. Mr. President, a little earlier today the junior Senator from Utah, Mr. LEE, came to the floor to discuss the balanced budget amendment. Under the budget agreement agreed to in Congress in August, both the House and Senate were required to vote on a constitutional amendment to balance the budget before the end of this calendar year. The House has already taken the vote. The measure failed. The Senate still has a responsibility to take it up, which we will do in the closing hours of the session this calendar year.

There are at least two proposals before us for a constitutional amendment, and my subcommittee, the Subcommittee on the Constitution, Civil Rights and Human Rights of the Committee on the Judiciary, held a hearing last week asking questions about these approaches to the Constitution.

The leading approach on the Republican side comes from both Senators HATCH and MCCONNELL. I am not certain which they will offer or whether the language might change at the last minute, but it would enshrine in our

Constitution a disciplinary mechanism to reduce the budget deficit. This has been brought before the Senate and the House before many times. This particular proposed constitutional amendment would:

Require that in each fiscal year Federal outlays shall not exceed receipts unless two-thirds of each House votes to waive.

It caps outlays at 18 percent of gross domestic product each year unless two-thirds of each House votes to waive.

It requires a two-thirds vote in each House for any tax or revenue-raising measure.

It requires a three-fifths vote in each House for raising the debt limit.

It allows for waiver of the amendment in times of declared war or serious military conflict.

It prohibits courts from ordering any increase in revenue to enforce the amendment.

It directs Congress to enforce the amendment through appropriate legislation.

It takes effect 5 years after ratification.

This is far more extreme than the clean House balanced budget amendment, which failed to pass in that Chamber on November 18.

The testimony before our subcommittee from experts in the field said that this amendment, proposed by Senators HATCH and MCCONNELL, will require Draconian cuts in Social Security, Medicare, Medicaid, our military retirement system, and many programs important to working families.

It will make Republican fiscal policies the constitutional law of the land, giving protection to those in higher income categories from any tax increase forever, without an extraordinary vote in either House.

It would delegate the task of resolving budget disputes to our court system.

It would make recessions worse by requiring cuts in countercyclical safety-net programs such as food stamps and unemployment just at the time when those expenditures are most needed.

It would increase the likelihood of debt limit standoffs each year.

It would lead to increased burdens on our States.

During the course of the hearings, several people came forward to testify. I recommend to my colleagues that they carefully read these testimonies, which are available on the Senate Judiciary Committee website.

The first was Robert Greenstein, president of the Center on Budget and Policy Priorities. Mr. Greenstein, who is well recognized and respected on Capitol Hill, spoke about the countercyclical aspect and said that if you cut spending in the midst of a recession, you will not have the resources you need to provide unemployment bene-

fits, food stamps, and the things that save families when they are out of work or making very little money.

I ask unanimous consent that Mr. Greenstein's statement be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TESTIMONY OF ROBERT GREENSTEIN, BEFORE THE SUBCOMMITTEE ON THE CONSTITUTION, CIVIL RIGHTS AND HUMAN RIGHTS HEARING ENTITLED, "A BALANCED BUDGET AMENDMENT: THE PERILS OF CONSTITUTIONALIZING THE BUDGET DEBATE," NOVEMBER 30, 2011

Thank you for the invitation to testify today. I am Robert Greenstein, president of the Center on Budget and Policy Priorities, a policy institute that focuses both on fiscal policy and on policies affecting low- and moderate-income Americans. We, like most others who analyze fiscal policy developments and trends, believe that the nation's fiscal policy is on an unsustainable course. As part of our work, we have been analyzing proposed changes in budget procedures for more than 20 years. We have conducted extensive analyses of proposals to write a balanced-budget requirement into the Constitution, among other proposals.

The purpose of changing our fiscal policy course is to strengthen our economy over the long term and to prevent the serious economic damage that would likely occur if the debt explodes in future decades as a share of the economy. But we need to choose our fiscal policy instruments carefully. We want to avoid "destroying the village in order to save it."

The goal of a constitutional balanced budget amendment is to address our long-term fiscal imbalance. Unfortunately, a constitutional balanced budget amendment would be a highly ill-advised way to try to do that and likely would cause serious economic damage. It would require a balanced budget every year regardless of the state of the economy, unless a supermajority of both houses overrode that requirement. This is an unwise stricture that large numbers of mainstream economists have long counseled against, because it would require the largest budget cuts or tax increases precisely when the economy is weakest. It holds substantial risk of tipping faltering economies into recessions and making recessions longer and deeper. The additional job losses would likely be very large.

When the economy weakens, revenue growth drops and revenues may even contract. And as unemployment rises, expenditures for programs like unemployment insurance—and to a lesser degree, food stamps and Medicaid—increase. These revenue declines and expenditure increases are temporary; they largely disappear as the economy recovers. But they are critical for helping to keep struggling economies from falling into a recession and for moderating the depth and length of recessions that do occur.

When the economy weakens, consumers and businesses spend less, which in turn causes further job loss. The drop in tax collections and increases in unemployment and other benefits that now occur automatically when the economy weakens cushions the blow, by keeping purchases of goods and services from falling more. That is why economists use the term "automatic stabilizers" to describe the automatic declines in revenues and automatic increases in UI and other benefits that occur when the economy turns down; these actions help stabilize the economy.

A constitutional balanced budget amendment, however, effectively suspends the automatic stabilizers. It requires that federal expenditures be cut or taxes increased to offset the effects of the automatic stabilizers and prevent a deficit from occurring—the opposite course from what sound economic policy calls for.

Over the years, leading economists have warned of the adverse effects of a constitutional balanced budget amendment. In Congressional testimony in 1992, Robert Reischauer—then director of the Congressional Budget Office and one of the nation's most respected experts on fiscal policy—explained: "[I]f it worked [a constitutional balanced budget amendment] would undermine the stabilizing role of the federal government." Reischauer noted that the automatic stabilizing that occurs when the economy is weak "temporarily lowers revenues and increases spending on unemployment insurance and welfare programs. This automatic stabilizing occurs quickly and is self-limiting—it goes away as the economy revives—but it temporarily increases the deficit. It is an important factor that dampens the amplitude of our economic cycles." Under the constitutional amendment, he explained, these stabilizers would no longer operate automatically.

Similarly, when a constitutional balanced budget amendment was under consideration in 1997, more than 1,000 economists including 11 Nobel laureates issued a joint statement that said, "We condemn the proposed 'balanced-budget' amendment to the federal Constitution. It is unsound and unnecessary. The proposed amendment mandates perverse actions in the face of recessions. In economic downturns, tax revenues fall and some outlays, such as unemployment benefits, rise. These so-called 'built-in stabilizers' limit declines of after-tax income and purchasing power. To keep the budget balanced every year would aggravate recessions." This summer, five Nobel laureates in economics issued a new statement opposing a constitutional balanced budget amendment for this reason.

Earlier this year, the current CBO director, Douglas Elmendorf, sounded a similar warning when asked about a constitutional balanced budget amendment at a Senate Budget Committee hearing. Elmendorf observed:

"Amending the Constitution to require this sort of balance raises risks . . . [t]he fact that taxes fall when the economy weakens and spending and benefit programs increase when the economy weakens, in an automatic way, under existing law, is an important stabilizing force for the aggregate economy. The fact that state governments need to work . . . against these effects in their own budgets—need to take action to raise taxes or cut spending in recessions—undoes the automatic stabilizers, essentially, at the state level. Taking those away at the federal level risks making the economy less stable, risks exacerbating the swings in business cycles."

Finally, a month ago, Macroeconomic Advisers (MA) analyzed the economic impacts of a constitutional balanced budget amendment. One of the nation's preeminent private economic forecasting firms, Macroeconomic Advisers provides analysis to major corporations and government entities, such as the President's Council of Economic Advisors under Presidents of both parties, including Presidents Reagan and George W. Bush.

MA concluded that if a constitutional balanced budget amendment had already been

ratified and were now being enforced for fiscal year 2012, “the effect on the economy would be catastrophic.” If the 2012 budget were balanced through spending cuts, MA found, those cuts would total about \$1.5 trillion in 2012 alone—and would throw about 15 million more people out of work, double the unemployment rate from 9 percent to approximately 18 percent, and cause the economy to shrink by about 17 percent instead of growing by an expected 2 percent.

Even if a BBA were implemented when the budget was already in balance, MA concluded, it would still put “new and powerful uncertainties in play. The economy’s ‘automatic stabilizers’ would be eviscerated [and] discretionary counter-cyclical fiscal policy would be unconstitutional . . . . Recessions would be deeper and longer.”

MA also warned that “The pall of uncertainty cast over the economy if it appeared a BBA could be ratified and enforced in the middle of recession or when the deficit was still large would have a chilling effect on near-term economic growth.” MA concluded that a BBA would have detrimental effects on economic growth in both good times and bad.

Proponents of a constitutional amendment often respond to these admonitions by noting that the proposed constitutional amendment would allow the balanced-budget requirement to be waived by a vote of three-fifths of the House and the Senate, so the BBA would be set to the side in recessions. But this response is too facile, and the three-fifths waiver provision does not solve the problem. It is difficult to secure three-fifths votes for anything; consider the paralysis that marks much of the work of the Senate. Moreover, it may take months after a downturn begins before sufficient data are available to convince three-fifths of the members of both houses of Congress that a recession is underway. Furthermore, it is all too likely that even after the evidence for a downturn is clear, a minority in the House or Senate would hold a waiver vote hostage to demands for concessions on other matters (such as new, permanent tax cuts). By the time that a recession were recognized to be underway and three-fifths votes were secured in both chambers, if such support could be obtained at all, extensive economic damage could have been done and hundreds of thousands or millions of additional jobs unnecessarily lost.

The bottom line is that the automatic stabilizers need to continue to be able to work automatically to protect American businesses and workers. The balanced budget amendment precludes that.

Nor is a recession the only concern. Consider the savings and loan crisis of the 1980s, or the financial meltdown of the fall of 2008. A constitutional balanced budget amendment would have hindered swift federal action to rescue the savings and loan industry or to rapidly put the Troubled Assets Relief Program in place. In both cases, history indicates that federal action helped save the economy from what otherwise likely would have been far more dire problems.

Moreover, the federal government provides deposit insurance for accounts of up to \$250,000; this insurance—and the confidence it engenders among depositors—is critical to the sound functioning of our financial system so that we avoid panics involving a run on financial institutions, as occurred in the early 1930s. A constitutional prohibition of any deficit spending (unless and until a supermajority of both houses of Congress voted to authorize it) could seriously weaken

the guarantee that federal deposit insurance provides. That is a risk we should not take.

These are illustrations of why fiscal policy should not be written into the Constitution.

A parallel problem is that the proposed constitutional amendment would make it even harder than it already is to raise the debt limit, by requiring a three-fifths vote of both the House and Senate to raise the limit. This is playing with fire. It would heighten the risk of a federal government default. A default would raise our interest costs and could damage the U.S. economy for years to come.

#### MISTAKEN ANALOGIES TO STATES AND FAMILIES

Proponents of a constitutional amendment sometimes argue that states and families must balance their budgets every year and the federal government should do so, too. But statements that the constitutional amendment would align federal budgeting practices with those of states and families are mistaken.

While states must balance their operating budgets, they can borrow to finance their capital budgets—to finance roads, schools, and other projects. Most states do so. States also can build reserves during good times and draw on them in bad times without counting the drawdown from reserves as new spending that unbalances a budget.

Families follow similar practices. They borrow—they take out mortgages to buy a home or student loans to send a child to college. They also draw down savings when times are tight, with the result that their expenditures in those periods exceed their current incomes.

But the proposed constitutional amendment would bar such practices at the federal level. The total federal budget—including capital investments—would have to be balanced every year, with no borrowing allowed for infrastructure or other investments that can boost future economic growth. And if the federal government ran a surplus one year, it could not draw it down the next year to help balance the budget.

I would also note that the fact that states must balance their operating budgets even in recessions makes it all the more important from the standpoint of economic policy that the federal government not be subject to the same stricture. American Enterprise Institute analyst Norman Ornstein addressed this matter in an article earlier this year, where he wrote: “Few ideas are more seductive on the surface and more destructive in reality than a balanced budget amendment. Here is why: Nearly all our states have balanced budget requirements. That means when the economy slows, states are forced to raise taxes or slash spending at just the wrong time, providing a fiscal drag when what is needed is countercyclical policy to stimulate the economy. In fact, the fiscal drag from the states in 2009–2010 was barely countered by the federal stimulus plan. That meant the federal stimulus provided was nowhere near what was needed but far better than doing nothing. Now imagine that scenario with a federal drag instead.”

#### S.J. RES. 10 AND S.J. RES. 23 RAISE ADDITIONAL ISSUES

The foregoing concerns apply to all versions of the balanced budget amendment that have been introduced. Some versions of the balanced budget amendment, such as S.J. Res. 10 and S.J. Res. 23, which are identical, raise additional concerns, because they would write into the Constitution new barriers to raising any revenues—including closing wasteful tax loopholes—to help balance

the budget and also would prohibit federal expenditures in any year from exceeding a figure such as 18 percent of the Gross Domestic Product in the previous calendar year. These constitutional requirements could be overridden only by supermajority votes in both the House and the Senate.

This requirement for a supermajority to raise taxes would be extremely unwise. It would protect what President Reagan’s former chief economic advisor, Harvard economist Martin Feldstein, has called the biggest area of wasteful government spending in the federal budget—what economists call “tax expenditures” and Alan Greenspan has called “tax entitlements.”

In 2010, tax expenditures amounted to \$1.1 trillion, more than the cost of Medicare and Medicaid combined (which was \$719 billion), Social Security (\$701 billion), defense (\$689 billion, including expenditures in Iraq and Afghanistan), or non-defense discretionary spending (\$658 billion, including expenditures from the Recovery Act). Many of these tax expenditures are fully the equivalent of government spending. Let me use child care as an example.

If you are low- or moderate-income, you may get a federal subsidy to help cover your child care costs, and the subsidy is provided through a spending program. If you are higher on the income scale, you still get a government subsidy that reduces your child care costs, but it is delivered through the tax code, as a tax credit. (Moreover, if you are a low- or moderate-income parent with child care costs, you likely will miss out because the spending programs that provide child care subsidies are not open ended and can only serve as many people as their capped funding allows. By contrast, if you are a higher income household—and there is no limit on how high your income can be—your child care subsidy is guaranteed, because the tax subsidy that you get operates as an open-ended entitlement.) It is difficult to justify making the tax-code subsidy sacrosanct and the program subsidy a deficit-reduction target merely because one is delivered through a “spending” program and the other is delivered through the code.

And as the child care example illustrates, sharply distinguishing between subsidies delivered through the tax code and those delivered through programs on the spending side of the budget also has a “reverse Robin Hood” aspect. Low- and moderate-income households receive most of their government assistance through spending programs; affluent households receive most of their federal subsidies through tax expenditures. Effectively barring reductions in tax expenditures from contributing to deficit reduction is a prescription for placing the greatest burden of deficit reduction on those who can least afford to bear it.

The problems do not stop there. If it requires a supermajority to raise any revenue, another likely outcome is a proliferation of tax loopholes. New loopholes—including loopholes that Congress did not intend but that high-priced tax lawyers and accountants have found ways to create—could become untouchable once they appeared, because it would require a supermajority of the House and Senate to raise any revenue. It would become more difficult to close tax loopholes that opened up, since (under S.J. Res. 10 and S.J. Res. 23) special-interest lobbyists could block such action simply by securing the votes of one-third plus one member in one chamber.

Finally, as noted, S.J. Res. 10 and S.J. Res. 23 would bar federal spending from exceeding

18 percent of GDP in the prior calendar year, which translates into a limit of about 16.6 percent of the current fiscal year's GDP. To hit that level would require cuts of a truly draconian nature. Consider the austere budget that the House of Representatives passed on April 15, sometimes referred to as the Ryan budget. Under that budget, Medicare would be converted to a voucher system under which, the Congressional Budget Office has said, beneficiaries' out-of-pocket health-care costs would nearly triple by 2030 (relative to what those costs would be that year under the current Medicare program). CBO also has written that under the Ryan budget, federal Medicaid funding in 2030 would be 49 percent lower than it would be if the Affordable Care Act's Medicaid expansion were repealed but Medicaid otherwise was unchanged. And funding for non-security discretionary programs would be cut more than one-third below its real 2010 level. Yet CBO says that under this budget, total federal spending would be 20¼ percent of GDP in 2030, so it would breach the allowable limit under S.J. Res. 10 and S.J. Res. 23 by four percentage points of GDP. This illustrates the draconian nature of the proposed 16.6 percent-of-current-GDP requirement.

Another way to look at this stricture is to examine federal expenditures under Ronald Reagan. Under President Reagan, who secured deep budget cuts at the start of his term, federal expenditures averaged 22 percent of GDP. And that was at a time before any members of the baby boom generation had retired and when health care expenditures throughout the U.S. health care system (including the private sector) were one-third lower as a share of GDP than they are today. It also was before the September 11 terrorist attacks led policymakers to create a new category of homeland security spending, and before the wars in Iraq and Afghanistan led to increases in veterans' health-care costs that will endure for a number of decades.

#### ESTIMATING THE EFFECTS OF SPENDING CAP IN S.J. RES. 10 AND S.J. RES. 23

To provide a more precise and detailed analysis of the impact that the spending cap in S.J. Res. 10 and S.J. Res. 23 would have, we recently conducted an analysis of its effects, using the latest Congressional Budget Office ten-year budget projections. We considered the impact if the balanced budget requirement would take effect in fiscal year 2018, as would occur if Congress approved it now and the requisite number of states ratified it by September 30, 2013. Here are the results.

—Congress would have to cut all programs (except interest on the debt) by an average of 24.9 percent in 2018. It would have to cut programs by \$1.1 trillion in 2018 alone, and by \$6.1 trillion through 2021.

—If all programs were cut by the same percentage, Social Security would be cut \$265 billion in 2018 alone and \$1.7 trillion through 2021; Medicare would be cut \$168 billion in 2018 and \$1.1 trillion through 2021; and Medicaid and the Children's Health Insurance Program (CHIP) would be cut \$115 billion in 2018 and \$724 billion through 2021.

—Veterans disability payments, compensation, and other such benefits would be cut \$19 billion in 2018 and \$122 billion through 2021.

—Defense spending would be cut \$141 billion in 2018 and \$879 billion through 2021, on top of the reductions made to comply with the discretionary spending caps that the Budget Control Act establishes and the reductions made under the sequestration order that is expected to be issued in January 2013, pursuant to that act.

Congress would not, of course, have to cut all programs by the same percentage and likely would not do so. But if Congress chose to spare certain programs, others would have to be cut even more deeply. For example, if Social Security were spared, the average cut to all other programs would rise by more than one third, from 24.9 percent in 2018 to 34.2 percent. Similarly, if the defense budget were increased by placing it at 4 percent of GDP (exclusive of war costs) and maintaining it at that level, as presidential candidate Mitt Romney has proposed, then all other programs—including Social Security—would have to be cut an average of 38.2 percent in 2018 under S.J. Res. 10 and S.J. Res. 23.

Even if the so-called "plain vanilla" version of the BBA is pursued, rather than S.J. Res. 10 and S.J. Res. 23, the required level of budget cuts would be massive, assuming taxes are not raised to help balance the budget. Congress would have to cut everything an average of 17.3 percent in 2018, an average of 23.8 percent if Social Security were protected, and an average of 29.4 percent if the defense budget were set at 4 percent of GDP and Social Security were not protected.

#### CONCLUSION

Policymakers need to begin to change our fiscal trajectory. As various recent commissions have indicated, we need to stabilize the debt as a share of GDP in the coming decade and to keep it stable after that (allowing for some fluctuation over the business cycle). But establishing a balanced budget amendment in the Constitution would be exceedingly unwise. It would likely exact a heavy toll on the economy and on American businesses and workers in the years and decades ahead. It is not the course that the nation should follow.

Mr. DURBIN. Mr. President, another testimony that I thought was extremely compelling came from Alan Morrison. Alan Morrison is an accomplished attorney and has argued many cases before the U.S. Supreme Court. He is the Lerner Family Associate Dean for Public Interest & Public Service Law at George Washington University Law School.

Professor Morrison really asked us to think through what we are doing. In fact, he asked us the most important question: If you put an amendment to the Constitution that requires a balanced budget, who will enforce it? Who will make it work? Who will decide if you have lived up to its terms? He concluded, based on his background in constitutional law and arguing before the Supreme Court, not the President. The President is not in that position to do it. The President, of course, with his budget, has his own favorites when it comes to spending and revenue.

Professor Morrison said this case ultimately has to find its way to our court system. But he made it clear that any constitutional balanced budget amendment must expressly give to the Federal courts the standing to decide the question. He raised a question that without that expressed language, he really was doubtful that the courts would take it up. They might view it as just a political question to be resolved by Congress itself.

Now, Senator LEE, who spoke on the floor earlier, has a version of the balanced budget amendment that expressly gives standing to Members of Congress, if I am not mistaken. But the point made by Professor Morrison is that any balanced budget amendment has to expressly give to our Federal court system the power of judicial review. In other words, who is going to call the fouls, the balls, the strikes, and the outs? It is going to have to be the court system when it comes to whether the balanced budget amendment is being complied with.

That is the first question but certainly not the last question.

Professor Morrison then went on to say: Now, put this in the real world. In the real world, where Congress has passed a budget, appropriations bills, and now someone is arguing that what Congress did does not comply with the new provision of the Constitution requiring a balanced budget—arguing that, in fact, Congress is overspending the amount it is allowed to spend, for example—then, of course, that case has to find its way from the Capitol Building to the President, who signed the bill, and then over to the court system.

Keep in mind, while we are in doubt about the outcome on appropriations bills and the budget, there is a serious question about how we will continue to fund our government, whether we can continue to make important payments to military retirees, Social Security recipients, Medicare recipients. All of it is in doubt while there is a question raised as to whether the budget passed by the Congress is unconstitutional.

This is the thicket we are being led into by those who very glibly say: All we need to do is mandate in the Constitution a balanced budget, and it will just flow naturally from that mandate.

Well, listen to what Professor Morrison said:

The federal courts will (rightly) be extremely reluctant to wade into these budget battles and thus will want to be sure that there is likely to be a violation before agreeing to decide the merits. But budgets are inherently uncertain in their impact, depending on such factors as whether revenue targets are met, whether the demand for entitlements is higher or lower than anticipated, whether discretionary spending is fully realized, and whether an existing war winds down or a new one starts, each with great uncertainties accompanying them. Thus, it will be far from clear on October 1st of a given fiscal year whether a duly enacted budget will or will not be in balance, assuming that the question is reasonably close, as it is likely to be in at least some years. Unless Congress makes it clear, either in the [constitutional] amendment or perhaps by subsequent legislation, that the courts should resolve all doubts in favor of finding claims ripe, the courts are likely to be very reluctant to reach the merits even for those persons who are expressly given standing in the amendment.

Then, of course, is the question of a remedy. What if Congress passes a budget and appropriations bills, the

President signs them, and they are challenged in court, and the court says: Yes, in fact, Congress has overspent beyond the requirements of the Constitution. What is next? What remedy would the courts order? What can the court do?

Can they order the recipients (of salaries, social security benefits, Medicare payments, payments under Government contracts etc) to "pay back" [a certain percentage]? Or can it order Congress to rectify the balance in the next year's budget, which would almost certainly trigger a new lawsuit? To be sure, the courts will not dismiss as moot claims that are capable of repetition, yet evade review because the duration of the violation is so limited that the courts cannot decide its legality before it has ceased.

Professor Morrison asks us to get beyond the bumper stickers and to think twice before we amend our Constitution.

In the 220 years since the enactment of the Bill of Rights, we have amended this Constitution precious few times. We have done it for compelling national reasons. We have done it to extend the right to vote to women. We have done it to make it clear that African Americans treated as slaves will be treated as citizens in the United States. We have done it to deal with questions of Presidential disability and succession. These are things which were compelling, major, national issues which could be resolved in a clear, definitive way by our Congress, working with the States for ratification.

Now comes the flavor of the day. In the midst of the deficit crisis debate, there are those who are arguing that we should not accept our responsibility in the Senate and the House to balance the budget. No, we should just put in the Constitution that we are required to do it. And then they go further. If we are going to address it, they say, we are going to draw certain lines that future Congresses, forever, as long as this constitutional amendment applies, will be bound by—to make it more difficult to raise taxes on anyone in the United States; to make it imperative, if not mandatory, that cuts be made in programs such as Social Security and Medicare. These are questions that should be decided by Congress and the President on a timely basis.

I have been involved in the past 2 years with a lot of debate about our national budget deficit, both on the Bowles-Simpson Commission and with the voluntary effort by six Democratic and Republican Senators. It is not easy. It is very hard. But it can be done if the political will is there.

I think we need to summon the courage, the political courage and the will to do it. But we should reject—summarily reject these efforts to amend our Constitution. They are not well thought out. The Constitution is too important a document, a historical guidepost for our Nation, and an inspi-

ration for nations around the world to put in a fatally flawed constitutional balanced budget amendment in the heat of the moment.

This is a significant vote. Those of us—and that includes every single Member of the Senate—who have sworn to uphold and defend the Constitution need to take that document very, very seriously. Those who want to amend it in quick fashion, changing their amendment language by the day, should be dismissed. If they do not show the reverence for this document that it deserves, if they do not take the time to make certain their proposals are consistent with the sanctity and importance of this document, they should not be taken seriously.

I do not believe any of my colleagues can go home having voted for that amendment and expect wild applause from audiences across America. They will understand that this was just a political reaction to a very important issue. Let's not amend the Constitution with a balanced budget amendment.

(Mrs. HAGAN assumed the chair.)

Mr. DURBIN. Madam President, I would like to make one additional brief statement. I see the Senator from Ohio in the Chamber.

The holiday season is upon us, and a lot of us are thinking about our families, and we are thinking about being with them as quickly as we can. It is a time of year that has a special significance for so many of us. But what was made clear by President Obama yesterday—and my colleagues should take note—we are not going home for Christmas, Hanukkah, or any holiday season until we have done our job for the people of this country.

Millions of people in Illinois and across America are counting on Congress to extend the payroll tax cut. What does it mean in my State? With an average income of \$50,000 a year, it is worth more than \$1,000 a year to those families. It is worth about \$125 to \$150 a month to have a payroll tax cut—money that working families, struggling from paycheck to paycheck, desperately need to fill the gas tank, to pay the utility bills, to provide clothing for their kids, to make sure they can stay in their home. These are the basics.

No Member of Congress is going to be allowed to go home and ignore the imposition of such a new payroll tax on America. President Obama met with the Democratic leaders of the Senate yesterday, and he said point-blank—he has told the First Lady, Michelle, and his girls that, if necessary, they can have their Christmas vacation in Hawaii, which they go to each year, by themselves, and he will wait here until this job is done. I hope that does not happen for the sake of his family or for the sake of any family of any Member of Congress, but in order to avoid that,

we have to do the right and responsible thing.

This afternoon, there will be a vote on the payroll tax cut offered by Senator CASEY of Pennsylvania. It is a payroll tax cut that would help millions of America's working families have more to spend and help the economy to recover. And he pays for it. He does not add to the deficit. He pays for it by imposing a surtax—listen closely—on the second million dollars earned by a person in a year, not the first million. You do not pay a penny on the first million you earn. On the second million, you will pay a surtax, and I think it is 2 percent, maybe less.

The Republicans have said: Absolutely unacceptable. We will not allow you to impose this onerous tax on these people.

People who are already making \$20,000 a week, we cannot ask them to pay 2 percent more on the next dollar they make? I do not think it is unreasonable. And if it leads to a payroll tax cut that helps families across this country, if the economy continues to recover even at a faster pace, if we see more business activity and business life and more people working, do you know what is going to happen? Those same wealthy people will prosper again, as they always do. It is in their best interests for this economy to get well. For our Republican friends to fold their arms and say: We are just not going to let you touch the wealthiest people in America, is an irresponsible position.

Senator CASEY has led this effort. It is the second effort we have made. We had one last week. The Republicans offered their alternative last week. It had 20 votes on the floor of the Senate—20 out of 47 Republican Senators. Twenty voted for it. They want to bring it up again today. They will probably get more than 20 votes this time, but it is pretty clear that the Republican Senators are halfhearted in their support of this Republican alternative.

One Republican Senator from Maine had the courage to step across the aisle last week and join us. We salute Senator COLLINS for doing that. We hope others will do it today.

We can bring this challenge to a close the right way by extending the payroll tax cut, paying for it with a tax on the wealthiest people in America. We can do our job and go home and be with our families. If Republicans will not come to the table to work with us on a reasonable compromise, I am afraid the American people will know very clearly who is to blame for continuing a tax on working families across America.

The facts are that we want working Americans to have a good year, get through a difficult time, and the economy to recover.

We should be doing this on a bipartisan basis. The President said: Roll out your Christmas trees and blankets

here in the Senate because you are going to stay here, even through the holidays if necessary. We are not going to go home to celebrate until we can celebrate with American families who are counting on us across America.

I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN of Ohio. Madam President, I go home every weekend, back to northeast Ohio where I live in a town called Avon in Lorain County. I want to go home at Christmas. I want to be with my 3-year-old grandson and my three daughters and son. But I also think our obligation, as Senator DURBIN said, the assistant majority leader, is to stay here and get our work done. And "get our work done" means extend the payroll tax cut and extend unemployment benefits.

If we do not do that, frankly, we are ruining the holiday season for tens of thousands and dozens of tens of thousands, if you will, of Ohioans and Illinoisans and North Carolinians. If we do not do that, we do not deserve to be able to go home and be with our families. I am not trying to be a martyr, but I think it is shameful a group of people, in order to protect the highest income taxpayers in this country—those making over \$1 million a year—continue to block an extension, a continuation, if you will, of this tax cut for working families.

In my State the average tax cut that we will vote for today, and continue until it happens is about \$100, \$110, \$120 per family per month. It is absolutely unconscionable not to do that.

Senator DURBIN also talked about the constitutional amendment to balance the budget. I want to recount something I heard earlier today on the Senate floor. Two of my conservative colleagues—one from Kentucky, one from Utah—spoke about the importance of a balanced budget amendment. I supported a balanced budget amendment in the past when I was in the House of Representatives. In here I have actually voted—it was part of an effort to get us to a balanced budget in reality in the 1990s. When President Bush took office we had the largest budget surplus. We balanced the budget and then some. We had the largest budget surplus in American history.

I was part of that. I was proud of that. We accomplished what we set out to do. We accomplished what we said we would, and we accomplished something very important for our country. It was then in the first years of the last decade—in 2001, 2002, and 2003—that we went to war, two wars, Afghanistan and Iraq, and we did not pay for them.

President Bush, in those days, pushed through two tax cuts—one in 2001, one in 2003—that went overwhelmingly to the wealthiest Americans, without paying for it, without offsets, cuts, or other taxes. Then President Bush also

pushed through—at a very close, middle-of-the-night vote in the House of Representatives, by, I believe, one vote or two votes—a Medicare privatization bill that basically was a bailout for the drug companies and the insurance companies and did not pay for that. That is why we got to this situation, unfortunately, where we have had this terrible budget problem.

What I wanted to address is what the solution of a couple of my colleagues seems to be. To their minds, there seems to be sort of a moral equivalent of, on the one hand, asking millionaires, people making a million dollars and up, to pay their fair share and making Medicare beneficiaries and Social Security beneficiaries take big cuts.

So I heard my two colleagues basically say this: that if the Democrats were serious about moving toward a balanced budget—and, again, 15 years ago we did it. We absolutely did it with President Clinton, got to a balanced budget, got to a surplus.

They said if the Democrats are serious about that, they will raise the retirement age for Social Security, and they will raise the eligibility age of Medicare. Let me tell you why that is a bad thing. I was in Youngstown not too long ago at a townhall meeting. A 63-year-old woman stood up and said—62, 63 years old.

She said: I just need to stay healthy and stay alive until I am 65 so I have health insurance. I need to be able to stay alive for another couple of years so I can get on Medicare and have health insurance.

Imagine living your life that way, when you are thinking: I just have to stay alive until I am 65. Then I will have good government Medicare health insurance. So some people here say: Well, tough luck. We are going to have to raise the eligibility age of Medicare to 66, 67, 68, whatever my very conservative colleagues are proposing—from Utah and Kentucky—raise the eligibility age for Medicare as if that is going to make them better.

When you think about it—I want 62-year-olds—one reason we passed the health care reform, I want 62-year-olds to have health insurance. One, it is good for them. Second, it is way better for the country, including taxpayers, that they get health care before they get sicker and sicker and end up in the emergency room or end up with cobbled-together health care that is much more expensive, let alone what it does to this lady and her family.

Second, they proposed to raise the eligibility age for Social Security. Now, it is easy for people around here to dress like this who, for all intents and purposes, talk for a living—work hard at what we do but talk for a living and work in offices and, you know, do not do heavy lifting and are not exposed to the elements and all of that.

It is easy for us to say: Let's raise the Social Security age to 70 because, God willing, we will still be here if the voters vote us in and we can keep doing this. Most of us are pretty healthy and do not work around asbestos and are not doing heavy lifting, are not working in the snow, in the rain, in the heat.

Well, when I think about raising the retirement age to 70, here is who I think about. I think about construction workers. I think about women who cut hair. I think about a waitress who works at a diner. I think about someone who works at a factory in Brunswick, OH. I think about people who walk the floors in retail. We are going to tell them that—we who dress like this, we who have jobs like this are going to tell those constituents—and there are millions in my State and tens and tens and tens of millions around the country, working-class citizens of this country who simply cannot work until they are 70.

If you are cutting hair, if you are changing sheets in a hotel, cleaning out bathrooms in a hotel, if you are working as a carpenter or a laborer or sheet metal worker, if you are working as an auto worker, a steel worker or nonunion in a tool-and-die or machine shop, you probably cannot work until you are 70. Your body probably will not be able to function in the workplace, with the physical and mental demands now to work in the workplace until 70. Yet people here think it is OK to do that.

The people here, I would add, can retire if they have 20 or 25 years in the House and Senate. They can retire at 60 or 62 or whatever and get a full pension. That is why I have introduced legislation—not opposed to their balanced budget amendment. I think it has all kinds of mechanisms in it that lock in low tax rates for the richest people in this country. I will not get into that. Senator DURBIN talked about that.

But I have introduced the legislation that simply says if we raise the retirement age to 70, then Members of Congress cannot retire with a pension until 70. Why should Members of Congress be able to get a pension at 62 or 58 if they served enough years, but a Social Security beneficiary should not until a decade or so later?

So it is important, as we talk about balancing the budget, as we talk about our fiscal situation, not to make a moral equivalence between the richest people, the richest 1 percent in this country paying their fair share in taxes, making that a moral equivalence to Social Security and Medicare beneficiaries having to endure significant cuts.

Some people around here call Medicare and Social Security entitlements. They can be dismissive: We have to fix entitlements. Well, talk to a 72-year-

old in Dayton or a 68-year-old in Zanesville or an 81-year-old woman in Xenia or Springfield, OH, and they will tell you oftentimes this is not really an entitlement, this is an investment. They paid into Social Security. They paid into Medicare. They want to make sure the government fulfills the covenant that we made over the last 75 years in the case of Social Security, 45 years in the case of Medicare, the covenant that we made between our government and the citizens of this country. That is the importance of that. We need to think twice.

That is why my legislation was introduced, in part, that Congressmen and Congresswomen cannot receive a pension before the same retirement age as Social Security beneficiaries. We need to think twice before we are going to tell a carpenter or a barber or a retail worker or a steel worker that we are going to raise the retirement age and make them work until 70 so they can receive Social Security benefits.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. COBURN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. I ask unanimous consent that I be allowed to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MAKING TOUGH CHOICES

Mr. COBURN. I am coming to the floor now because we will not have an opportunity to debate on the payroll tax cuts because the vote is going to be at 2:30 and that time is taken.

I think it is important for the American public to look at what is happening in Washington right now. There is not a disagreement in Washington about whether we want people to continue to receive this tax cut. The disagreement is, should it come out of Social Security? Should we continue to undermine Social Security or should we do it a different way? That is No. 1.

No. 2 is, if we are going to borrow \$117 billion against our children knowing that we have significant waste, fraud, abuse, and duplication in the Federal Government of in excess of \$350 billion a year, should we not eliminate some of that, pay for this rather than borrow the money?

So we have the posturing between the two parties based on the election that is coming to create a predicate that some people only care for the rich and some people only care for those who are less fortunate, which is all smoke and mirrors. There is unanimity that we want this to continue. So what the American people are not hearing is the real debate.

The real debate is, should we eliminate some of the waste, some of the stupidity, some of the duplication in the Federal Government and actually do that to be able to pay for this so that as we do this thing that we all want to do—in other words, keep this \$1,000 to \$2,000 per family in the economy now—that we do not do that by crippling the children of the very people who are in the economy.

You know it is a zero-sum game. Somebody is going to pay the bill sometime. If it is us who refuse to do the hard work of ferreting out waste, duplication, fraud, then our service will have been in vain because what we are really doing is transferring to our children the responsibility for us today. Actually, it is going to come doublefold because the way this bill is lined out is we are going to borrow the money in the market to pay for this continued decrease in Social Security taxes.

We have already stolen \$2.6 trillion from Social Security, Congresses have the last 20 years. When we borrow that money and put it back in, there is no reduction in what is owed, so our kids are actually going to get to pay for it twice. They are going to pay for it now with the new debt that we are taking, and the fact that new payment was not recognized as a reduction, they are going to get to pay it again.

So it is going to cost our children a quarter of a trillion dollars. There is a lack of honesty in talking plainly with the American people. They know we are in trouble. The question is, Will we be honest with them, treat them as adults in terms of how we go about solving the problem? We hear the mess. The press takes advantage of that. There is not a lot of difference between the Senator from Ohio who just spoke, in terms of what we want to do in terms of protecting seniors. But the politics surrounding it and the game playing poorly serves our country.

So for all the press that is watching, we are going to get this done. I know it is the game Blood Sport that is happening right now, with the press saying: Will they or will they not? It is going to happen. We are going to fix unemployment so that we have a continuation of that. The real question is, Will we fix the real things that the country needs fixed or are we just going to kick the can down the road?

What we are doing is kicking the can down the road because we won't make the tough choices to pay for it. We won't pay for the unemployment benefits. The first 26 weeks is what is earned; that is what people contributed to. We are up to 99 weeks, and that comes directly from the American taxpayer—it actually comes from the future American taxpayer.

Some real questions ought to be asked. What is the game being played in Washington by both sides—trying to

get advantage in the next election? As our country drowns in debt, we continue to further mortgage our children's future, and we continue to treat the American people like children rather than the adults they are. Everybody knows we are all going to have to sacrifice. Does that mean we are going to abandon the social safety net? No, it doesn't. Does that mean a 62-year-old who is trying to get on Social Security is not going to get there? No; they are. Those are the tactics of fear that something will not be there. As a fiscal conservative or a constitutional conservative, I want us to fulfill our obligation to the promises we have made and to our oath, which is to uphold the Constitution. Thomas Jefferson said you should never borrow money which you have not laid a tax to pay for. He is a Founder—one of the Founders of our country. We would do well to go back and revisit the wise and prudent advice of our Founders. You don't see that or hear that much anymore in the U.S. Congress.

These are big problems our country is facing. I am 63—soon to be 64—years old. We have never faced anything close to what we are facing today. How we react and how we respond is going to make all the difference in the world—not only for our short-term future but also for our long-term future.

I hope the American people who are listening right now understand that we are going to do what is necessary to help get the economic process of our country running again in a better and viable way. I hope you will dismiss the partisan rhetoric and the class warfare rhetoric that is all too commonplace today. If we will focus on what the problem is rather than the next election, we will have a great deal more success in coming together and forging solutions the American people can be proud of and we will actually move our country ahead.

With that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BEGICH. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CORDRAY NOMINATION

Mr. BEGICH. Madam President, first, I want to comment on the Cordray appointment that was attempted a little bit ago, and then I want to bring up some more good news on the economic front.

First, I was somewhat disappointed in the vote of 54 to 45, garnering only 1 Republican from the other side—only 1—and on such an important agency that ensures the protection of consumers in a variety of areas. It seems illogical to me that we would not find

compromise in a vote to appoint someone to run an agency that this body, in a 60-vote margin, approved to help protect consumers, particularly considering what has happened over the last several years and the glaring problems and challenges consumers have had to endure with the financial institutions of this country as well as from other entrepreneurs, such as pawnshops and payroll check cashers. All of these institutions would have firm regulations and provide the consumer an opportunity to respond, or those who get abused by those programs.

I am a little disappointed. I wasn't intending to come and speak on that issue, but I wanted to have my voice on the floor that I was disappointed that an appointment could not happen, which I believe is raw politics. It has nothing to do with the individual's ability to make this agency run properly. They didn't want to appoint him because they didn't like the agency—the 45 or so who didn't vote for it. And I think it all boils down to one very simple thing: Consumers are now, once again, left without someone running an agency that will help protect them against these people who prey on individuals in the financial arena.

#### THE ECONOMY

Again, Madam President, I am somewhat disappointed, but let me get to the real reason I came to the floor. I came down yesterday and had a lot to say about the economy and where we are and the headlines that were reported yesterday. And in less than 48 hours—27 hours—there are more good news headlines.

These are some of the headlines I talked about yesterday: "Jobless Rate Dips to Lowest Level in More Than 2 Years." New York Times. CNN: "Dow Closes With the Largest Gain Since March 2009." "Private Sector Jobs Soar. Payroll Forecasts Rise." That is Reuters. The Wall Street Journal: "Online Sales Reached Record \$1.25 Billion on Cyber Monday."

On top of that, we had record sales for Thanksgiving weekend—Black Friday they call it, and Small Business Saturday. Again, an incredible impact for our economy.

What this tells me—even though we get a lot of criticism from the other side and others who complain maybe we are not doing our job and are frustrated that Washington isn't working as well as it could—and I agree there are a lot of areas where we are not able to move forward, such as the appointment I mentioned a few minutes ago—is there are good examples of policies we have worked through over the last 3 years during this great recession. We have fought kind of a lonely war to get these policies in place.

Once again, more good news, and let me read off a couple. This week's Time magazine has a whole article entitled "How America Started Selling Cars

Again." Why is this important? Because this is a manufacturing base for our country. It employs people not only in jobs in the automobile industry but it trickles all the way through the economy of the country. It doesn't matter if they are at a port, for example.

I remember meeting recently with the folks from the Detroit Port Authority talking about ships and the movement of product from the automobile industry across this country, but also manufacturing and other activities throughout the country that support the automobile industry. It is moving forward. It is growing.

We took a dramatic step and got a lot of criticism for it. As a matter of fact, no one wants to even mention the words, because everyone is so nervous about it. Some call it an auto bailout. And, yes, we did do that. That result is a healthy, strong, profitable industry that is bringing jobs to America and creating jobs in America. As a matter of fact, there was an article in the Wall Street Journal not long ago talking about how we are importing jobs from Japan and China back to the United States, to the automobile industry, because it is successful.

And, oh, by the way, they are paying back all those loans they got from the Federal Government with interest. So the taxpayers are getting their money back in full. The net result is, because we helped at the right time, we have ensured we are still a player in the automobile industry not only in this country but in the world market. So for those who want to continue to complain and to demonize that action, the net result is we are bringing jobs back to the United States in this industry.

The Cash for Clunkers Program was another piece of legislation that barely passed. Again, many of us on this side of the aisle took that lonely road because we thought it was the right thing to help move this economy forward. Again, the net result is this industry is profiting more in the last several years. They are producing more jobs not only in their industry directly but indirectly. And the naysayers on the other side rarely bring this up anymore, because in less than 3 years—really, less than 2 years—this industry has turned itself around because of American ingenuity and with the help and support from the U.S. Government, and that help and support is being paid back with interest in the good old American way.

So from my perspective, once again, this is a great story, and I commend Time magazine for talking about the future.

Let me also talk about another one. This is from CNBC. I pulled this off because I like looking at all the business magazines and Web sites every morning. I glance through quickly to see what is happening, what the markets

are doing, what the industry is doing, who is investing, what are the new businesses, and what is happening out there. Here is this one: "U.S. Mortgage Applications Jumped Last Week."

This is the industry that fell apart in the beginning of the great recession—the housing industry. A lot of people say that was the main reason the economy collapsed. It was a significant portion of it, no question about it. But let me read this.

The Mortgage Bankers Association said its seasonally adjusted index of mortgage application activity, which includes both refinancing and home purchase demand, spiked 12.8 percent in the week December 2. The MBA's seasonally adjusted index of refinancing applications also jumped, gaining 15.3 percent, while the gauge of loan requests for home purchases rose 8.3 percent.

By loan requests, these are people who are now saying, I want to think about buying a home. I want to purchase today. I want to start examining what is out there.

Here is what the Mortgage Bankers Association's vice president of research and economics said. These are his words:

Applications increased significantly as mortgage rates dropped to their lowest levels in about 2 months.

Actually, overall, it is the lowest level in decades. But we now measure things by an eighth of a point. So when you are at 4.125 or 4.25, we are now measuring which is lower overall, but it is lower for the last several decades. Incredible.

Let me read another one. This is from Politico, but it is reporting on the Bloomberg Global Poll—which they started doing in 2009 to sort of see where foreign investors will put their money. Where will they invest? Where will they take the dollars they have accumulated or will gather through investors and shareholders and so forth? Where are they going to put their money?

More than . . . 41 percent, said they expect the U.S. will have one of the strongest performing economies in the world in the coming year—the highest percentage the country has seen since the Bloomberg Global Poll began in October 2009.

Here is another one. Today, again MSNBC. "Jobless claims drop to 9-month low."

. . . jobless claims dropped 23,000 to adjusted 381,000—

That is actually below the magical threshold of 400,000, which people watch. The question is, Will it be consistently under 400,000? We have received more of these under 400,000 recently than in the last 3 years. That is a good signal that the economy is moving.

I know some will say it is not enough. Well, when I came here, half a million people were losing their jobs every single month. So we have now had 21 consecutive months of job growth in the private sector. That is a

great statement for us as an economy, this 21 consecutive months of job growth. It is an indication our economy is moving.

Do we want it to move faster? Of course we do. That is what America is about. We want to see things happen right now—today. But this has been called a great recession. Yet we are pulling ourselves out of it. It takes time and it takes good policy. And, yes, it takes some opportunity and taking a little risk, and we did some of that here. We made some decisions that were tough and were not necessarily very popular at times.

I remember many of the calls I received on some of these issues. But what is the end result? That is what we have to measure by. Leadership is not about waiting for a poll to tell us what is right or wrong or waiting for someone to say, here is the right move because your constituency will vote for you if you do this thing this way. It is about leadership. Sometimes the leadership role is tough. It means getting a few trucks running over you a little bit, leaving some tire tracks on your back, but the end result is what we look for.

Today, where we are, we have job growth—not as significant as we want but job growth. Where were we? Half a million jobs a month disappearing.

Let me cite another one. This is a big issue people are concerned about. As a former mayor, managing a city, you are always looking at the revenues because the revenues tell you how your local economy or, if it is State revenue, how your State is doing. If you remember, at the end of 2008, 2009, and beginning of 2010, there was incredible concern about local governments collapsing under the debt and deficit spending and unable to manage.

As a matter of fact, the markets were concerned about municipal and State debt and what that might mean. Oddly enough—and I wish I had brought that article—it hasn't panned out as people thought. Local governments, State governments are doing better than people anticipated. It is still a tough road, no question about it. We still have firefighters, police officers, and teachers who have been laid off. We tried to pass a bill here to help that out, but that didn't happen because too many on the other side opposed it.

But for State and local governments, here is the latest State revenue report by the Nelson A. Rockefeller Institute of Government, University at Albany, NY: "Overall Tax Revenues Show Strong Growth in Second Quarter." The article speaks to State tax revenues growing by 10.8 percent in the second quarter of 2011.

As a matter of fact, the year ending June 2011—which is the end of a lot of fiscal years for State and local governments—the period corresponding to 46 States—almost all of the States' fiscal

years—total State collections increased by \$58 billion in that year, or 8.4 percent, from the previous year, the strongest annual gain since 2005.

What does that mean? That means local economies, State governments, are starting to recover. It is still a rough road but starting to recover. Good signs. That means there is more economic activity within their communities. It means businesses are replanting and redesigning their opportunities in those communities. People are buying homes, as I mentioned, which means they are paying property taxes, which means those local governments can hire police and fire and paramedics and teachers.

Again, I could probably come here every day and give this kind of good news. Because what we all hear—today, the market is down. I forget what it is—70, 80 points, maybe 100 today—but the headlines will be: market crashes or market dips significantly.

Here is the reality. Since March of 2009, the market is up, even with today's activity, 81 percent. That means my son's 529 account is better today than it was 3 years ago. That is good because that means my wife and I can afford to make sure he can go to college someday. But it also means retirement accounts have more resources in them today than they did 2½ or 3 years ago. It means public pension programs and investment retirement programs that invest in these kinds of markets also are doing better. But, again, the headline will be that the sky is falling because that is what people like to do. They like to prey on fear rather than opportunity.

I think a lot of us on this side believed in the opportunity, in the future of this great country 3 years ago when we sat here and made some tough decisions over the first 18 months in my term. Tough decisions. But we believed in what was possible. We believed that this economy would turn around with a little help from the people who live here, work here, and see the future.

We also knew we had to do a little bit. We had to do something extraordinary to create the opportunities for the future of this great country. As I mentioned, private sector jobs increased, the automobile industry better than ever before, home sales doing better than they were 2½ years ago, the market is up by 80 percent—all good news. But we don't hear a lot of those as the front-page, above-the-fold, big, bold headlines because they are not sexy. They are not controversial. But that is what is happening. If a lot of us around here had more belief in the potential, it would be incredible what could happen.

Let me end on this note; that is, we are in the middle of the debate on continuing tax relief for the folks who are working every day, the people I just talked about who are buying homes,

buying cars, paying taxes. We are saying to them: We want to make sure you continue to receive the dollars in your pocket.

In my State, that is \$300 million—just in my State, \$300 million with the payroll tax deduction that they get to keep for 400,000 Alaskans instead of the IRS taking it. I don't know about you, but I think that is a good thing.

I know some will say: We have no proof this works. Well, I just gave proof. I will give proof every day if necessary. Yes, we can't say this certain industry came back because of this one little item. But I will tell you, if we put \$300 million in my State into the hands of 400,000, Alaskans, a little over \$1,000 per person, the net result is they are going to spend that money in the economy. They are going to buy that car, that washing machine, or go on that vacation. They are going to spend that money in this economy. Yes, there is no fancy report that said this business succeeded because we gave them this special tax break—which we shouldn't do. We gave to the people of this country an incredible opportunity to take their money and put it to work.

Mr. President, 160 million families will benefit—160 million families will benefit by this action today. People making \$50,000 or less will put back about \$1,000 into their pockets again—not in the IRS's pocket but into the consumers' pockets that they will spend.

Again, I will hear from the other side how bad it is, that there is no proof, that this may not work. It is working. They can deny it all they want, but I will continue to lay all the facts down. It is not me producing this out of some government document. It is mostly some very conservative publications reporting on the good news.

I hope the folks on the other side—and I know we picked up a Republican from when we had this before. This is a modified, compromised version that didn't pass last week to say: OK, we are trying to compromise. But we are keeping it simple and trying to do it in a way that ensures that middle-class Americans, and Alaskans whom I represent, put more money in their pockets, people who are working every day, making a difference in the economy—not people who are just on the top end of the cycle. I know that is the great debate, and we differ and I differ with several people on the other side.

I do believe people who make \$1 million or more should pay a little bit more. I don't have any heartburn over that. It is 235,000 people we are talking about versus 160 million. That is who I want to put my investment in because I know those people, who are individuals, families, and a significant portion of small businesspeople who will continue to build this economy.

As a matter of fact, the best growth period and growth pattern right now is

small business. They are the ones that are the backbone of this economy. Those are the ones that we need to help. That is what this bill does. I hope we find the magical success.

I wish we would have 50 majority votes like the rest of this world operates under. For some reason, this place has to have special rules and make it complicated and hard for anything to get done. But maybe there will be some people who join and want to support the American people and support giving them tax relief and making sure their lives are better, especially at this time of year with Christmas around the corner. I would love to give them a good Christmas gift. I think all of us would. Let's do it. Let's do it today. Let's do it for the American people. Let's do it for my constituency in Alaska, for your constituency, Mr. President, and all the rest in this room.

Mr. President, if there is one thing I look for, if it makes a difference for Alaska, if it is about Alaska, I am there. This is not only about Alaska, it is about this country. It is about the middle class. Not only am I there, I am double there, and I hope we find opportunity in this Chamber to do the right thing.

Mr. President, I ask unanimous consent that any time spent during a quorum call between now and 2:30 p.m. be equally divided.

The PRESIDING OFFICER (Mr. BLUMENTHAL). Without objection, it is so ordered.

The Senator from Nevada.

Mr. HELLER. Mr. President, today the Senate will consider my legislation again to extend the temporary payroll tax cut.

This week, the Senate has been given another opportunity to do the right thing and provide much needed relief to the American worker.

It shouldn't be news to anyone that Americans are desperate for solutions. Millions of Americans are unemployed, underemployed, or have simply given up looking for a job.

In between looking for a job or higher paying employment, Americans are busy trying to figure out how to handle high health care costs, looming bankruptcy, and the threat of foreclosure.

As a Senator from Nevada, I understand how difficult it is, perhaps more than any of my other colleagues. My State has the unfortunate distinction of leading the Nation in unemployment, in bankruptcies, and in foreclosures. I hear from my constituents every day on these issues. Nevadans—Democrats, Independents, and Republicans—are looking to Congress for answers, and they are frustrated that they are not getting them.

Even with the economic difficulty Americans across the country are experiencing, Congress appears to be prepared to stage a partisan standoff rather than extending a payroll tax cut for

hard-working Americans. I cannot allow this to happen. Americans deserve solutions.

The plan I have introduced to extend the payroll tax cut is a workable solution that will provide relief for Americans responsibly. In fact, the solution I am proposing today borrows a cost-cutting idea from the bipartisan Simpson-Bowles Commission that can actually pass Congress and be signed into law.

My proposal allows American taxpayers to hold on to more of their hard-earned wages while not punishing the Nation's job creators as the majority proposes. Under my plan, American taxpayers will not see a tax increase. In fact, my plan prevents a tax increase on those already receiving a payroll tax credit. Today, Congress can do the right thing by allowing employers to continue to invest in their businesses so they can plan for the future and, of course, hire more workers.

I understand that Democrats would prefer to pay for the payroll extension by raising taxes on employers. But treating tax dollars responsibly is absolutely necessary if we are going to see long-term economic growth in this country. In this case, we can extend the payroll tax cut and still pay for it.

I also understand that not all Republicans support my plan. To be honest, I disagree with some of my colleagues who claim a payroll tax holiday is not necessary. I believe that we should allow more Americans to hold on to their hard-earned wages. For those who are already struggling to live within their means, this payroll tax cut will continue some much needed relief.

Today, I am asking my Republican and Democratic colleagues to come together and join me to help continue the payroll tax holiday without raising taxes on businesses in America. This will help preserve long-term job growth in the future.

My proposal is a workable solution containing provisions endorsed by both the majority and my colleagues in the House of Representatives. This is the only version of the payroll tax cut that has the potential to pass Congress and to be signed into law.

My proposal pays for the payroll tax cut by reducing government spending where it is no longer needed and requires the richest Americans to pay higher premiums for Medicare. This will allow us to strengthen and preserve Medicare for those Americans who rely on the program the most.

This is the same approach endorsed by Democrats who say the richest Americans should do more. Americans want solutions. They do not want more partisan bickering.

This week Congress has another opportunity to do the right thing to help hard-working Americans extend the payroll tax cut holiday.

I make calls back to my home State every week. In those calls, I ask Nevad-

ans if they think their children will have access to a better, brighter future than their own. For the first time in history, a majority of Americans and a majority of Nevadans believe their children will have less opportunity. By continuing down this path of partisanship, Congress is robbing the American people of the dream for their children. This needs to stop.

We in this body need to seriously consider the high stakes of the political games that continue to unfold on this Senate floor. American workers need solutions and they need relief right now. Congress should come together today, put partisanship aside, and pass meaningful legislation that will benefit all Americans.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CASEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASEY. Mr. President, I also ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASEY. Mr. President, I rise this afternoon to speak about an issue we will be voting on today and we have been discussing and debating now for a number of days. We are into our second week of debate about a cut in the payroll tax. Just by way of review—and so many Americans have been following this debate—here is where it basically stands between what we did last year and what we are trying to do this year.

Last year, as part of a larger tax bill, we reduced the payroll tax for employees across the country from 6.2 percent to 4.2. So that 2-percent reduction meant millions of American families were able to have about \$1,000 in their pocket of take-home pay they wouldn't have had otherwise absent that action in the tax bill. What we are trying to do this year—and I should start with what I tried to do last week, and we got 51 votes for this—is to say we should not only continue or extend that cut in the payroll tax but we should expand it. So instead of saying it should go from 6.2 to 4.2, we take it down to 3.1. In essence, what we tried to do last week was cut in half the payroll taxes that relate to employees. We wanted to add to that cutting in half the payroll tax for small businesses, and they would benefit disproportionately. Thirdly, we wanted to add to that a tax credit so that if an employer hired or increased wages for employees, if an employer expands their payroll in one of several ways, they can get a tax credit equal to an elimination of the payroll tax. So instead of the usual 6.2,

you would be down to zero. So the combination of those three would mean we would be helping employees by cutting their payroll tax in half, helping employers by cutting their payroll contribution in half, and then have this third element as well for employers who actually hired people or added to their wage base.

Unfortunately, in the Senate, because we needed 60 votes and got 51, we knew at that point we couldn't get enough support from the other side of the aisle. So what I did, in working with our leadership and working with folks in the Senate, was to refashion the legislation so that we made it smaller. We reduced the cost of the overall proposal by some \$80 billion. We also concentrate on just the element we worked on together last year, which was the employee side.

Here is where we are in this debate about cutting the employee payroll taxes. It is down to this question: Should we cut it to 4.2, as we did last year, or should we cut it further and reduce it in half? I believe we should, and I think most Americans believe that.

Here is what it means to folks out there. Instead of saying we will continue what we did last year—which would be about \$1,000 per worker, in essence, per family, on average—if we cut it in half, we can get that number up to \$1,500. So it is not just putting money in people's pockets and continuing to do that for another year, but it is more money. It would go from roughly \$1,000 to approximately \$1,500.

That is where we are. Unfortunately, we are not yet sure we can get the support we need to do that.

Here is what it means to Americans. It means more money in their pockets, more take-home pay, but it also means that if we don't, at a minimum, extend the payroll tax cut from last year—here is what it means on two issues: GDP—gross domestic product—and jobs. According to Mark Zandi of Moody's—someone we have quoted often on both sides of the aisle and relied on his expertise—not extending the payroll tax at least to the 4.2 level would reduce 2012 growth of real GDP in a State such as Pennsylvania, by way of example, by 0.52 percentage points. That means we are talking about gross domestic product or gross State product, in a sense, in a State such as Pennsylvania, cutting it in half instead of allowing it to grow. So this has a real adverse consequence for Pennsylvania and for the country if we don't do what we did last year.

Of course, if we did more than we did last year, as I think we should and I think most people do, we could not only not fall behind, but we could move forward dramatically.

Here is another way to look at it: Jobs. According to Mark Zandi, not extending the payroll tax cut will cost

Pennsylvania 19,700 payroll jobs in the calendar year 2012. For context, in the State of Pennsylvania last year, the payroll tax job creation number—or payroll jobs added last year—was 54,500. So we created last year in a State such as Pennsylvania almost 55,000 jobs. But if we don't extend the payroll tax cut this year, we are talking about losing as many as almost 20,000 jobs. This is a substantial factor in the discussion about our economy. It would have a substantially adverse impact if we don't keep the payroll tax cut in place.

As I said before, we should do more than we did last year. We should cut it in half. It would give people across the country peace of mind in two time periods: The next couple weeks when they are going out and shopping and enjoying the holidays. We want people to spend as much as they feel they can, and if they know they are going to get \$1,000 to \$1,500, they can spend more in this upcoming holiday season. But it is especially important for 2012. Why should taxpayers have to live with a tax increase because Washington just didn't get along and the same old political games were played in Washington instead of saying let's come together in a bipartisan way and extend and expand the payroll tax cut from last year.

We have lots to do in the next couple days and weeks. But maybe the most important thing we can do in the next few days is to make sure we cut the payroll tax again. Because this is about whether we are going to give people peace of mind as we head into a new year and whether we are going to put more money in their pockets in order to jump-start the economy, to give the economy the jolt we got at the end of last year. Last year, we came together and passed a tax bill and we had average job growth from February, March, and April 2011—those 3 months—average private sector job growth of just about 240,000 jobs. We need another 3-month period similar to that. In fact, we need another 6 or 7 or 8 months similar to that. But the only way to get there is to put in place this payroll tax cut.

I hope when we vote later today, we will get at least 60 votes for this effort to make sure we are giving Americans peace of mind and more money in their pockets.

With that, I yield the floor and note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BLUMENTHAL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SANDERS). Without objection, it is so ordered.

Mr. BLUMENTHAL. Mr. President, I ask unanimous consent to speak de-

spite the expiration of the majority's time.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. BLUMENTHAL. Thank you, Mr. President.

Mr. President, I begin by thanking my colleagues, many of whom served in the last Congress. I thank them for extending the payroll tax cut at that time, providing a payroll tax cut from 6.2 percent to 4.2 percent. I thank them on behalf of myself. I was not a Member of this body at that time. I thank them on behalf of the American people. They are due that thanks and appreciation for that vision and courage in extending that measure in cutting the payroll tax so as to lessen the recession. We have only to listen to the virtually unanimous opinion of economists to the effect that we saved the Nation, this body saved the Nation from a deeper recession.

Now I ask my colleagues to undertake a similar mission, to accomplish the same goal, to once again save the Nation from a deeper recession. The recovery of this Nation's economy has been fragile and slow. Many economists—notably, Mark Zandi, who has been quoted by my distinguished colleague from Pennsylvania—say that a failure to extend it will mean a new recession. We are talking about average Americans, ordinary people who are hurting and struggling. They are hurting economically and struggling to find jobs. They are struggling to stay in their homes and keep their families together at a time of year when joy and satisfaction ought to be the quality of their lives. They deserve this measure of peace of mind, as my colleague from Pennsylvania, BOB CASEY, has referred to it. But all of us—the entire Nation—deserve the economic security, which is a matter of national security.

Rescuing this country from continuing debt and deficit means returning to full employment. Twenty-five percent of our deficit can be eliminated by going back to lower rates of unemployment.

Economic recovery is a means to countering and curtailing what the former Chairman of the Joint Chiefs of Staff called a national crisis and a security threat.

Economic recovery depends on consumer demand. As I go around the State of Connecticut, businesspeople tell me what they need most is consumer demand. Their confidence and certainty about the future of the economy, their willingness to invest, depends on consumer demand. That kind of factor, that need is what ought to motivate all of my colleagues—every Member of this body—to vote for this measure, not only extending that payroll tax cut but also reducing it by 3.1 percent.

We are talking about anywhere from \$1,400 to \$1,500 or more in the pockets

of people around the country, people around the State of Connecticut. The average middle-class family in Connecticut earns \$83,797 per year and would save \$1,676 in taxes under the current payroll tax cut. Let me give you those numbers again. The average middle-class family in Connecticut earns \$83,797 per year—back in their pockets \$1,676 in taxes under the current payroll tax cut as proposed in this measure.

We are talking here about a compromise. Our side of the aisle has modified this bill to make it about one-third smaller in size and cost. This legislation will no longer give employers a tax break. We have pulled back on the magnitude of this measure. But it will still affect 160 million workers who will receive nearly \$1,500 in additional take-home pay.

This bill will be paid for by measures that were coming from the deficit reduction proposals contained in a number of the supercommittee's ideas. It is paid for by fees charged by Fannie Mae and Freddie and by a proposal suggested by my colleague, the Republican leader. The cost-saving reform suggested by him would make millionaires ineligible for unemployment compensation and food stamps.

This legislation also levies a surcharge, a temporary 10-year surcharge, on the highest earners in American society, who can well afford it when their own interests would be extraordinarily well served by the consumer demand and economic recovery that would be generated.

I know many of my colleagues, including the Presiding Officer, are concerned about the effect on Social Security, and so am I. The Social Security trust fund is a trust, a sacred trust that we are honor bound to protect. And I would not vote for this measure if I thought it created a threat, a real threat, to the viability of that fund. But I believe the assurance we have received from the chief actuary of that fund—and it is contained in a letter to Secretary Geithner and to Jacob Lew, it was printed in the CONGRESSIONAL RECORD yesterday by Senator CASEY, and it assures that the effect would be negligible. In fact, it says the trust funds would be "unaffected." It uses that word, and I will quote directly from the letter.

We estimate that the projected level of the OASI and DI Trust Funds would be unaffected by enactment of this provision.

That letter comes from the chief actuary of the trust fund, and I am prepared to rely on that assurance and to say that I believe this kind of measure is the responsible thing to do at this point in our economic history to make sure our recovery is continuing.

The effects of failing to do so: The economists differ whether the rate of growth will suffer by .5 percent, which is Mark Zandi; or .66 percent, Goldman

Sachs; or 1 percent, RBC Capital Markets; or 1.5 percent, Michael Pond. Whatever the specific percentage, we know it will be grave and serious in the damage to our economy if we fail to extend and enlarge the tax cut.

So I urge my colleagues to heed the voices they are hearing back home, as I am hearing from ordinary citizens, middle-class families.

We are talking about a middle-class family measure that will benefit people like Marilyn in Bloomfield, who writes to me:

I believe these cuts need to remain in effect in order to avoid deepening the recession we are in. I urge you to support the President's jobs plan and pass as much of it as you can in upcoming legislative sessions, for the benefit of struggling families.

She writes and she says "to urge you to vote in favor of extending the payroll tax cut for workers beyond Dec 31."

Listen to people like Ginny. They are in every one of our States. Ginny, who is from Southport, CT, writes:

I know you will do the right thing when the payroll tax cut and increasing the taxes of only the 2nd million and above of wealthy Americans comes up for a vote. I have faith in you.

With the economy still struggling to recover and millions of Americans struggling to put food on the table this holiday season, we cannot afford to raise taxes on working Americans.

Those voices from middle-class families are reaching this body every day. We have heard them before. This body heeded them last year in enacting this tax cut. I thank every Member who voted for it. It was a bipartisan vote. I hope this one will be as well. I will be proud to join Members from both sides of the aisle, and I hope this measure will have support—overwhelming support—from both sides of the aisle in showing the American people we can come together, bridge our differences, and compromise.

This measure reflects a compromise on both sides. I hope it will be passed later in the day.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WHITEHOUSE. I thank the Chair.

The PRESIDING OFFICER. Under the previous order, the question occurs on agreeing to the motion to proceed to S. 1944, which is subject to a 60-affirmative-vote threshold.

Mr. WHITEHOUSE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The clerk will call the roll.

The bill clerk called the roll.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KERRY) and the Senator from Wisconsin (Mr. KOHL) are necessarily absent.

The PRESIDING OFFICER (Mrs. MCCASKILL). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 50, nays 48, as follows:

[Rollcall Vote No. 224 Leg.]

#### YEAS—50

Akaka	Franken	Nelson (NE)
Baucus	Gillibrand	Nelson (FL)
Begich	Hagan	Pryor
Bennet	Harkin	Reed
Bingaman	Inouye	Reid
Blumenthal	Johnson (SD)	Rockefeller
Boxer	Klobuchar	Schumer
Brown (OH)	Landrieu	Shaheen
Cantwell	Lautenberg	Stabenow
Cardin	Leahy	Tester
Carper	Levin	Udall (CO)
Casey	Lieberman	Udall (NM)
Collins	McCaskill	Warner
Conrad	Menendez	Webb
Coons	Merkley	Whitehouse
Durbin	Mikulski	Wyden
Feinstein	Murray	

#### NAYS—48

Alexander	Graham	McConnell
Ayotte	Grassley	Moran
Barrasso	Hatch	Murkowski
Blunt	Heller	Paul
Boozman	Hoeven	Portman
Brown (MA)	Hutchison	Risch
Burr	Inhofe	Roberts
Chambliss	Isakson	Rubio
Coats	Johanns	Sanders
Coburn	Johnson (WI)	Sessions
Cochran	Kirk	Shelby
Corker	Kyl	Snowe
Cornyn	Lee	Thune
Crapo	Lugar	Toomey
DeMint	Manchin	Vitter
Enzi	McCain	Wicker

#### NOT VOTING—2

Kerry Kohl

The PRESIDING OFFICER. On this vote, the yeas are 50, the nays are 48. Under the previous order requiring 60 votes for the adoption of this motion, the motion is rejected.

The Republican leader.

#### TEMPORARY TAX HOLIDAY AND GOVERNMENT REDUCTION ACT—MOTION TO PROCEED

Mr. MCCONNELL. Madam President, I move to proceed to S. 1931.

The PRESIDING OFFICER. Under the previous order, the motion is now pending.

The majority leader.

Mr. REID. Madam President, this will be the last vote of this week. We will have a couple of votes on Monday night. I will announce later as much of the schedule as I am able to do. Right now, I can't do that, but I will before the day is out.

The PRESIDING OFFICER. Under the previous order, there will be 2 minutes of debate equally divided.

The Senator from Pennsylvania.

Mr. CASEY. Madam President, what is about to happen is we are going to be

taking a vote on a measure that got 20 votes last week—this same vote. I don't know what the vote will be today, obviously, but this is an exercise in futility to vote on this again.

What we should do is cut the payroll tax in half for American workers. That is what we have been trying to do. I hope we can continue to work together, but we should move beyond this measure that got 20 votes last week and cut the payroll tax in half for 160 million American workers. We should do that and give people the peace of mind and dollars in their pockets they would not have otherwise.

I urge a "no" vote on this motion, and I hope we can continue to work together to support the American worker.

The PRESIDING OFFICER. Who yields time?

Time is yielded back.

Under the previous order, the question is on agreeing to the motion to proceed to S. 1931, which is subject to a 60-affirmative-vote threshold.

Mr. CORKER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KERRY) and the Senator from Wisconsin (Mr. KOHL) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 22, nays 76, as follows:

[Rollcall Vote No. 225 Leg.]

#### YEAS—22

Ayotte	Heller	Portman
Barrasso	Hoeven	Risch
Brown (MA)	Hutchison	Rubio
Cochran	Lugar	Snowe
Collins	McCain	Vitter
Crapo	McConnell	Wicker
Enzi	Murkowski	
Grassley	Paul	

#### NAYS—76

Akaka	Franken	Moran
Alexander	Gillibrand	Murray
Baucus	Graham	Nelson (NE)
Begich	Hagan	Nelson (FL)
Bennet	Harkin	Pryor
Bingaman	Hatch	Reed
Blumenthal	Inhofe	Reid
Blunt	Inouye	Roberts
Boozman	Isakson	Rockefeller
Boxer	Johanns	Sanders
Brown (OH)	Johnson (SD)	Schumer
Burr	Johnson (WI)	Sessions
Cantwell	Kirk	Shaheen
Cardin	Klobuchar	Shelby
Carper	Kyl	Stabenow
Casey	Landrieu	Tester
Chambliss	Lautenberg	Thune
Coats	Leahy	Toomey
Coburn	Lee	Udall (CO)
Conrad	Levin	Udall (NM)
Coons	Lieberman	Warner
Corker	Manchin	Webb
Cornyn	McCaskey	Whitehouse
DeMint	Menendez	Wyden
Durbin	Merkley	
Feinstein	Mikulski	

#### NOT VOTING—2

Kerry

Kohl

The PRESIDING OFFICER. On this vote, the yeas are 22 and the nays are 76. Under the previous order requiring 60 votes for the adoption of this motion, the motion is rejected.

#### VOTE EXPLANATION

• Mr. KERRY. Mr. President, I was necessarily absent for the votes on the motion to proceed to the Casey Middle Class Tax Cut Act of 2011, S. 1944, and the motion to proceed to the Temporary Tax Holiday and Government Reduction Act, S. 1931. If I were able to attend today's session, I would have supported the motion to proceed to the Casey Middle Class Tax Cut Act of 2011, S. 1944, and opposed the motion to proceed to the Temporary Tax Holiday and Government Reduction Act, S. 1931. •

The PRESIDING OFFICER. The majority leader is recognized.

#### MORNING BUSINESS

Mr. REID. Madam President, I ask unanimous consent we proceed now to a period for morning business, with Senators allowed to speak for up to 10 minutes each until 6 o'clock this evening.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Vermont.

(The remarks of Mr. SANDERS pertaining to the introduction of S.J. Res. 33 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Senator from Florida.

#### MEDICARE

Mr. NELSON of Florida. I wish to thank the Senator from Tennessee for his graciousness to make a very few brief remarks.

I wish to call to the attention of the Senate that there are some good things that are happening in Medicare. In the health care bill—which was a very complicated piece of legislation—there are a lot of good things. There were some things that are implemented over time, that if mistakes had been made, we can correct those mistakes as they are starting to be implemented.

I wish to point out some of the salutary things that are happening under the new health care reform bill with regard to Medicaid. It was just this week that the agency that runs Medicare, the Centers for Medicare and Medicaid Services, CMS, announced that more seniors and people with disabilities on Medicare are seeing significantly lower costs for important health care because of this new law.

For example, what we are seeing for the first time is that millions of Americans on Medicare are now getting free

physical exams as part of their preventive medicine. Because of the doughnut hole, which is that complicated black hole senior citizens would fall into when they were getting assistance for their prescription drugs, well, lo and behold, that doughnut hole is being filled by the Federal Government assisting them in paying for those drugs. Therefore, they are getting a lot more of their drugs without having to pay for them.

For example, Nationwide has over 2.5 million people on Medicare who have saved more than \$1.5 billion on their prescriptions. If we boil that down to my State of Florida, we have 172,000 Medicare recipients who save \$96 million, which is an average for the senior citizen in Florida of \$563 per person per year.

In the case of physical exams, we have over 24 million people in the country who now have taken advantage of having one of these free physical exams in order to help with the preventive health care aspects that the bill was aimed at. In my State, where there are a lot of senior citizens, close to 2 million senior citizens have taken advantage of those physical exams.

Remember how we were discussing the doom and gloom of Medicare Advantage? What has happened to Medicare Advantage? We had to change it because Medicare Advantage before, under the previous law, had a 14-percent bump over and above Medicare fee-for-service. The Federal Government was going to go broke if we did not do something about that. Where was that money going? It was going to the insurance company because Medicare Advantage is a fancy term for Medicare given through an insurance company and HMO.

What has happened? If we look all across the country at Medicare Advantage, enrollments are up and the premiums senior citizens pay are down. Look at the State of Florida in this last year. Enrollment was up by 6 percent, premiums decreased by about 10 percent. What is happening now in 2012? Enrollments are up almost 20 percent and the premiums are going down by a whopping 26 percent. That means more seniors are going to have access to higher quality care while paying less, and it is a win-win-win. It is clearly a win for the country that we are leveling out all of the excess bumps. It is clearly a win to the senior citizen and, in the process, the insurance companies are giving better quality care.

I wanted to bring this to the attention of the Senate, and I do thank my colleague from Tennessee for his generosity in allowing me to make these comments prior to his.

I yield the floor.

The PRESIDING OFFICER. The Senator from Tennessee.

## MARKETPLACE FAIRNESS ACT

Mr. ALEXANDER. Madam President, we hear a lot about tax breaks and tax loopholes around the Senate. I wish to talk about a tax loophole, a big one, that is on its way out. It is a \$23 billion tax loophole. It is not a loophole in the tax code of Washington, DC. It is a loophole in virtually every State in the country. It is a loophole that prefers some taxpayers over other taxpayers. It subsidizes some businesses over other businesses. Because of that loophole, it causes tax rates in States to be higher, and it causes States to have less money to fund the universities or the State parks or the schools or the other expenses that are legitimate in the operation of a State.

I say it is a tax loophole that is on its way out because after 10 years, Senator ENZI of Wyoming and Senator DURBIN of Illinois have produced a piece of legislation that is rare in Washington, DC. It is only 10 pages long. It is very simple. It is a States rights piece of legislation that gives each State the right to decide for itself how to collect its State sales tax from everybody who owes it, whether that person buys a pair of cowboy boots in Nashville or whether that person buys a pair of cowboy boots online.

Senator ENZI and Senator DURBIN introduced the Marketplace Fairness Act 4 weeks ago. It has five Republican sponsors and five Democratic sponsors. I am one of those sponsors. This is the bill that solves the problem of the online sales tax loophole, the one I described a little earlier. I mentioned cowboy boots. Let me describe what I am talking about in practical terms.

I called the owner of the Nashville Boot Company a couple weeks ago. His name is Frank Harwell. He sold boots online, and he sells them to people who walk into his store in west Nashville. When he started the company, almost all of his boots were sold online. Here is what he says is happening to him today: People come into the store in Nashville and they try on cowboy boots. They find a pair they like and then they go home and buy the cowboy boots online in order to save the State sales tax.

They owe the sales tax. Many people don't know they owe it. They owe the sales tax as much as if they had bought the boots at the cowboy boot store in Nashville. They don't pay it. Why is that? Under the State law, when Frank Harwell sells a pair of cowboy boots in his store in Nashville, he collects the sales tax and sends it to the State.

But under the law, the Supreme Court said 20 years ago, the State of Tennessee or the State of Missouri or the State of Washington could not require an out-of-State seller to collect the same sales tax. They had a reason for doing so, and it was a good reason. They said it was so complicated to do that it put a burden on interstate com-

merce. But at the same time, the Supreme Court invited the Congress to fix the problem. By fixing the problem, that means the Congress could act in order to create a fair way for States to require retailers that are out-of-State to collect the same sales tax retailers on Main Street collect.

Over that 20 years, the online sales tax loophole got to be a big loophole. It subsidizes some businesses at the expense of others and, as I said earlier, prefers some taxpayers at the expense of others.

Last week, the Hudson Institute, a generally conservative organization, released a new report that explains how the subsidizing of out-of-State sellers works and how the Federal Government—those of us in Washington—are keeping States from closing this loophole. Hudson concludes that this online sales tax loophole is distorting the marketplace, and I urge my colleagues to take a serious look at the Hudson Institute report.

Governors and legislators are up in arms because they are being deprived of the right to enforce their own sales tax law. This is a little different loophole—actually, a little worse one. Usually, loopholes are written into the law. Those are the kind we are trying to change in our tax reform proposals in Washington. This is a tax that is already owed. This is a tax that is already owed that Governors and legislators want to collect. It is used to pay for the things States need to pay for or reduce a tax. In the State of Tennessee, which has a very high sales tax, if the State was allowed to collect sales tax from out-of-State retailers the same way it does from Main Street retailers, then we might postpone the day of a State income tax, which are probably three of the most hated words in the tax vocabulary in Tennessee.

I said, when Senator ENZI and Senator DURBIN introduced their bill, that I believed they had solved the problem and that if I were an out-of-State retailer or an online retailer, I would begin to make plans to collect sales tax the same way Main Street collectors collect it today, and many have. For example, Amazon—which had opposed for a long time this kind of legislation because, in their view, it was too complicated for them to figure out what the tax might be—changed their mind, and said the Enzi-Durbin bill is a good bill and Amazon now supports it. That is not all. Mississippi Gov. Haley Barbour, a strong conservative Republican Governor and former chairman of the Republican Governors Association, wrote a letter on November 29 which I wish to quote:

In the early days of the Internet, the complexities of collecting State sales taxes across thousands of State and local sales tax jurisdictions were major obstacles. The technology simply didn't exist to expect startups to comply with the various tax compliance rules in every part of the country. But today,

e-commerce has grown, and there is simply no longer a compelling reason for government to continue giving online retailers special treatment over small businesses who reside on the Main Streets across Mississippi and the country.

Governor Barbour continues:

The time to level the playing field is now, as there are no effective barriers to complying with state sales tax laws.

Here is what Governor Barbour is saying: Twenty years ago we didn't have the kind of software and information we do today. If I want to know what the weather is in Maryville, TN, where I live, I put in "weather" and my ZIP Code, 37886. Under this new bill and under the technology that exists today, States will be required to give out-of-State retailers or online retailers the software that will permit them to do the same thing. If I order a pair of cowboy boots, they can put in my name, the cost of the boots, and the ZIP Code, and the software will compute the tax and even find a way to send it on to the State. It will be just as easy, or maybe even easier, for the out-of-State retailers to collect the sales tax that is owed as it will be for a cowboy boots store selling it out of the front door in Nashville.

The National Governors Association sent a letter last week saying that the Enzi-Durbin bill represents a common-sense approach that will allow States to collect taxes they are owed, help businesses comply with different State tax laws, and provide fair competition between retailers that will benefit consumers.

Last week, the Judiciary Committee in the House of Representatives held an oversight hearing to discuss all three bills that have been introduced to address this issue and there was a lot of good discussion. I wish to share a few things that were said and I hope we can have a similar hearing in the Senate soon.

MIKE PENCE of Indiana, one of the leading conservatives in Congress and a fellow who knows a tax when he sees one, said:

I don't think Congress should be in the business of picking winners and losers. Inaction by Congress today results in a system that does pick winners and losers.

Congressman PENCE also talked about something I want to make sure my colleagues understand. The Enzi-Durbin bill is not talking about taxing the Internet. It is not talking about creating a new tax. As far as the Internet access tax goes, the Senate debated that a few years ago. I was in the middle of that debate and I was in the middle of the solution that imposed a moratorium on the Internet access tax. That law is still there. We are not talking about an Internet access tax. Neither are we talking about a new tax. We are talking about the plain old State sales tax that already exists. It is very hard to imagine how anyone

can say collecting a tax that is already owed is a new tax.

Governor Barbour and Congressman PENCE are correct; 20 years ago the technology didn't exist. Today it does. About the only ones complaining are the taxpayers and businesses that enjoy being subsidized by other taxpayers and other businesses, and that, in our opinion, is not correct tax policy.

As Republicans, I believe our party should oppose government policies that prefer some taxpayers over others or some businesses over others. As Republicans, I believe we should support States rights, and our bill does that by giving the State the right to make the decision about how to collect its own taxes: Do you want to collect taxes from everybody who owes the tax, or do you not want to? Do you want to prefer some out-of-State businesses over in-State businesses, or do you not want to? Do you want to collect the tax, reduce tax rates, or spend the money on services? That is up to the States.

These sentiments are also shared by the late William F. Buckley and Al Cardenas, chairman of the American Conservative Union. Ten years ago William Buckley, who many people see as the father of the modern conservative movement, wrote in the *National Review*:

The mattress maker in Connecticut is willing to compete with the company in Massachusetts, but doesn't like it if out-of-State businesses are, in practical terms, subsidized; that's what the non-tax amounts to. Local concerns are complaining about traffic in mattresses and books and records and computer equipment which, ordered through the Internet come in, so to speak, duty free.

That is William F. Buckley.

Then Al Cardenas, the chairman of the American Conservative Union, a distinguished man from Florida, and the head of an outfit that is arguably as strong and influential as any conservative organization in Washington, said in his recent essay:

There is no more glaring example of misguided government power than when taxes or regulations affect two similar businesses completely differently.

As I have said many times before, I believe the Enzi-Durbin legislation solves the problem. I believe it is going to happen. I hope that out-of-State sellers and online sellers will move ahead to work with States to make voluntary agreements as, for example, Amazon has in Tennessee, and begin to allow States to enforce their tax policy properly.

Our bill is a remarkable feat in Washington, DC. I have mentioned it before and I wish to emphasize it again. It is only 10 pages long. It is only about allowing States to make a decision about whether they want to close a tax loophole. It is about stopping the subsidization of some taxpayers over others. It is about stopping the subsidization of

some businesses over others. I am glad others are starting to share this view, and as more Senators learn about the Marketplace Fairness Act and look at the options it gives each State, I hope and I believe we will have more cosponsors.

Ten years ago the bills introduced weren't adequate to solve the problem. Fortunately, today, Senator ENZI and Senator DURBIN have solved the problem. I agree, Democratic Senators agree, the chairman of the American Conservative Union agrees, a former chairman of the Republican Governors Association agrees, Congressman MIKE PENCE agrees: It is a matter of marketplace fairness.

I ask unanimous consent to have printed in the RECORD the letter to which I referred from Mississippi Governor Barbour, a letter from the National Governors Association, and the National Journal article published last week regarding the House Judiciary Committee hearing on this subject.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATE OF MISSISSIPPI,  
OFFICE OF THE GOVERNOR,  
Jackson, MS, November 29, 2011.

Hon. MIKE ENZI,  
U.S. Senate, Russell Senate Office Building,  
Washington, DC.

Hon. LAMAR ALEXANDER,  
Senate, Dirksen Senate Office Building, Wash-  
ington, DC.

DEAR SENATOR ENZI AND SENATOR ALEXANDER: I am writing to congratulate you on the introduction of the Marketplace Fairness Act and offer my support for its timely passage.

Fifteen years ago, when e-commerce was still a nascent industry, it made sense to exempt startups like Amazon.com from collecting and remitting sales taxes in states where they had no facilities. As chairman of the Republican Party, I was there when discussions surrounding the Internet commerce tax moratorium took place, and this was only to last until e-commerce had truly taken root. I supported this effort then, because I believed this budding industry needed every opportunity to thrive and grow. Looking back, I think it's clear we made the right call as America is home to the largest and most dynamic e-commerce companies in the world.

In the early days of the Internet, the complexities of collecting sales taxes across thousands of state and local tax jurisdictions were major obstacles. The technology simply didn't exist to expect startups to comply with the various tax compliance rules in every part of the country. But today, e-commerce has grown, and there is simply no longer a compelling reason for government to continue giving online retailers special treatment over small businesses who reside on the Main Streets across Mississippi and the country. The time to level the playing field is now, as there are no effective barriers to complying with states' tax laws.

As Governor of Mississippi, I value the important role that our Main Street retailers play in our communities. Failure to level the playing field threatens to, and in fact has, run many of them out of business, taking with them jobs and the sizable contribution they make to not just our community cul-

ture, but to the Organizations who have long benefited from their charitable involvement.

States should not be deprived of their right to establish and collect taxes as they see fit. I've stood for lower taxes and smaller government my entire career in public life, but I've also stood for the authority of states to devise their own tax laws without being overridden by the federal government for no existing purpose.

Finally, government shouldn't be picking winners and losers. In this area, at least, the Marketplace Fairness Act will end that practice, and that's something conservatives should be proud to support.

I again applaud you for addressing this important issue and I look forward to working with you to end the special treatment for online retailers and give everyone the opportunity to compete fairly.

Sincerely,

HALEY BARBOUR,  
Governor.

NATIONAL GOVERNORS ASSOCIATION,  
Washington, DC, November 28, 2011.

Hon. RICHARD DURBIN,  
U.S. Senate, Washington, DC.  
Hon. TIM JOHNSON,  
U.S. Senate, Washington, DC.  
Hon. MICHAEL ENZI,  
U.S. Senate, Washington, DC.  
Hon. LAMAR ALEXANDER,  
U.S. Senate, Washington, DC.

DEAR SENATOR DURBIN, SENATOR ENZI, SENATOR JOHNSON AND SENATOR ALEXANDER: The National Governors Association applauds your efforts to level the playing field between Main Street retailers and online sellers by introducing S. 1832, the "Marketplace Fairness Act."

As you know, years ago the Supreme Court opinion in *Quill Corp. v. North Dakota* stated that Congress has the authority to require out-of-state sellers to collect sales taxes. At present, states are unable to collect more than \$22 billion in sales taxes annually from remote sales made through catalogues or over the Internet. This also creates a price disparity between goods bought from the corner store and those bought online, effectively giving a continuing and growing subsidy to Internet sales.

Since the *Quill* ruling, at least two facts have changed: (1) the proliferation of computers to calculate taxes due on sales—just as shipping costs are determined based on Zip Code—and (2) a state agreement on streamlining and simplifying sales taxes so that it is easier to collect and remit sales taxes wherever a company does business.

The Marketplace Fairness Act recognizes these changes and uses them to grant authority to states that simplify their tax systems to make it easier to do business. This common sense approach will allow states to collect the taxes they are owed, help businesses comply with different state laws, and provide fair competition between retailers that will benefit consumers.

NGA looks forward to working with you as you work to enact the Marketplace Fairness Act and create a more level playing field for all sellers and consumers.

Sincerely,

GOVERNOR BILL HASLAM,  
Tennessee.

GOVERNOR CHRISTINE O. GREGOIRE,  
Washington.

[From the National Journal Daily, Nov. 30, 2011]

STATES TELL CONGRESS ONLINE TAX  
LOOPHOLE COSTLY

(By Juliana Gruenwald)

State officials and some retailers urged Congress on Wednesday to finally close a loophole that they say benefits online retailers by allowing them to avoid collecting sales taxes from out-of-state customers.

The issue the House Judiciary Committee examined relates to a 1992 Supreme Court decision in *Quill v. North Dakota* that found catalog and other retailers do not have to collect sales taxes from customers in states where they do not have a physical store or other facility. Since then, online retailers have exploited the loophole to the tune of billions in lost tax revenue, according to state officials.

"It is estimated that currently in the state of Texas between \$600 million and \$800 million is not collected on out-of-state sales. . . . That points out to me the unfair competition that my storefronts are competing against," Texas state Rep. John Otto, a Republican, told the committee.

Even some tax-averse lawmakers such as Rep. Mike Pence, R-Ind., said congressional action is warranted.

"I don't think Congress should be in the business of picking winners and losers," Pence said. "Inaction by Congress today results in a system today that does pick winners and losers."

State calls for congressional action on the issue got a big boost earlier this month when Amazon, after years of battling efforts to address the loophole, endorsed bipartisan online-sales-tax legislation introduced by Sens. Michael Enzi, R-Wyo., Dick Durbin, D-Ill., and others. That bill would authorize states that meet certain minimum standards to require online retailers to collect sales taxes from customers even in states where those firms have no facility. A similar bill has been introduced in the House by Reps. Steve Womack, R-Ark., and Jackie Speier, D-Calif.

Mr. ALEXANDER. Madam President, I yield the floor, and I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURBIN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Ms. KLOBUCHAR.) Without objection, it is so ordered.

Mr. DURBIN. Madam President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### THE DREAM ACT

Mr. DURBIN. Madam President, it has been 10 years since I introduced the DREAM Act, legislation that will allow a select group of immigrant students with great potential to contribute to America. The DREAM Act would give these students a chance to become legal in America. They came to the United States as children. They have to be long-term residents of our coun-

try, have good moral character, graduate from high school, and complete 2 years of college or military service in good standing. Those are the basic standards we apply.

I think if we enacted the DREAM Act, as I have tried to for many years, it would make America a stronger country, giving these talented young immigrants a chance to serve in our military and make us a stronger nation. Tens of thousands of highly qualified, well-educated young people would enlist in the Armed Forces if the DREAM Act becomes law. We have the support of the Department of Defense and the President. They understand that these young people could make us a stronger and safer nation by serving in our military. And they are willing. Many of them are willing to risk their lives for this country.

Studies have also found that these DREAM Act participants could literally build our economy in years to come with their talent.

Remember, these students we are talking about were brought to America as children and as infants. They grew up here believing they were Americans. They went to class every day, pledged allegiance to the only flag they knew, and sang the only national anthem they had ever heard. They are American in their hearts, and they should not be punished because their parents made a decision to bring them here.

These young people are tomorrow's doctors, engineers, soldiers, teachers. They are the people with whom we can build an America on. We should not squander their talent by deporting them to countries they may not remember at all.

Last year, Republican Senator RICHARD LUGAR of Indiana joined me in asking the Department of Homeland Security to suspend the deportation of these DREAM Act students. Now, for the record, if there is any evidence of wrongdoing by these students, they are completely disqualified from this conversation. We are talking about students of good moral character who are in the United States basically without a country.

Earlier this year, Senator LUGAR and I were joined in our request by 21 other Senators, including majority leader HARRY REID, Judiciary Committee chairman PATRICK LEAHY, and Senator BOB MENENDEZ, asking that these DREAM Act students be given an opportunity to stay and not be deported. In response to our letters, John Morton, the Director of Immigration and Customs Enforcement, issued a memo in June of this year establishing new priorities for deportation. The Morton memo says: It is a high priority to deport those who have committed serious crimes or those who are a threat to public safety, while it is a low priority to deport individuals who have been in the United States since childhood, like

those who are eligible for the DREAM Act.

During hearings this summer on the DREAM Act, Homeland Security Secretary Janet Napolitano told me and my subcommittee that the Department of Homeland Security would establish a process to implement the Morton memo. Under this new process, high-priority cases will be expedited, and low-priority cases will be closed in many instances.

Recently, the Department of Homeland Security announced the next step in the process. Immigration and Customs Enforcement officers and attorneys will receive comprehensive training on the new deportation policy. By January, all ICE officers and attorneys will have the training they need. ICE attorneys will review all new deportation cases to identify low-priority cases that should not be placed in the immigration court.

A review of the cases currently in immigration court is also underway. Department of Homeland Security attorneys will review pending deportation cases in Baltimore and Denver to identify low priority cases that should be removed from the docket. This trial review of new and pending cases will be completed by mid-January and then expanded nationwide.

Let me commend the President and his administration for these thoughtful and humane steps to implement this new deportation policy.

Today, there are approximately 11 million undocumented immigrants in the United States. It would take billions and billions of dollars to deport all of them. It would likely lead to the collapse of many parts of our economy. You can't go to a hotel or restaurant in the city of Chicago—I have been told this by restaurant owners—and not find at least some place in that establishment an undocumented person doing the tough, hard work immigrants do.

DHS has to set priorities about which people to deport—and not deport—using its limited resources. Some of my Republican colleagues have claimed that this is kind of a backdoor amnesty. That could not be further from the truth. This is simply a temporary decision not to use limited government resources to deport low-priority individuals who are no threat to the United States of America. Individuals whose cases are closed will not receive any permanent legal status. So there is no amnesty involved.

Ironically, some Republican critics of the administration's new policy called on the Clinton administration to establish deportation guidelines—exactly what the Obama administration has done here. In response to this request from some Republicans in Congress, the Clinton administration established a policy on prosecutorial discretion. The Bush administration kept the policy in force from the Clinton years and

issued several followup memos without any criticism from any Republicans in Congress. The Bush administration also stopped deportations of a number of DREAM Act students, again without any criticism from Republican Members.

Let's be clear. What the Obama administration has done in establishing this new process for prioritizing deportations is perfectly appropriate and legal. Throughout our history, our government has had to decide who to prosecute and who not to prosecute based on law enforcement priorities and available resources.

I strongly support the administration's new deportation policy but more needs to be done to implement this policy and it needs to be done quickly. Many young people who would be eligible for the DREAM Act are still facing deportation proceedings. Almost every day my office is contacted by DREAM Act students who are at risk of being deported in a matter of hours or days. Today, let me tell you the story of two of these young people.

Here is a photo of Minhaz Khan. Eighteen years ago, in 1992, Minhaz Khan's parents brought him to the United States from Bangladesh. At the time, he was 4 years old. Today, Minhaz is 22—18 years later—and he has overcome amazing obstacles to complete his education. In 2009, Minhaz graduated from the University of California Riverside with a bachelor's degree in neuroscience.

Minhaz sent me a letter, and here is what he said about his future:

My dream is to make several contributions to science, and become a physician's assistant as a career, and eventually a teacher as well. I have great aspirations, but I do not dream of big houses or tons of cars. I want normality, stability, and liberty.

Today, Minhaz lives in Palo Alto, CA, with his wife, who is an American citizen. Minhaz's wife has filed an application for her husband to become an American citizen, but under our broken immigration laws he has been placed instead in deportation proceedings. Eighteen years in the United States, a bachelor's degree in neuroscience, aspiring to become a researcher or teacher, married to an American citizen, and he is under threat of being deported. What threat is he to America? The threat is losing a person who is talented and can make such a difference in the lives of so many people.

Minhaz was scheduled to be deported last month. Under President Obama's new deportation policy, the Department of Homeland Security put his deportation on hold for 3 months so that his application for legal status can be considered. I think that was the right thing to do. Minhaz grew up in America, he is married to an American, and he wants to make America a better nation.

In his letter to me, Minhaz spoke about what it would mean to him if the DREAM Act became law.

Imagine the countless numbers of individuals ready to contribute to our society as law-abiding, successful individuals who live life with a sense of strength and morality. Abraham Lincoln once said, "I have always found that mercy bears richer fruit than strict justice," and this is more true now than ever. I have a great amount of hope, optimism, and belief in this country and that one day we shall see the DREAM Act enacted into law.

Here is another DREAMer. This is a photo of Jose Librojo. In 1995, when he was a child—16 years ago—Jose's parents brought him from the Philippines to the United States. Shortly after they arrived here, Jose's parents filed an application to stay in this country as legal permanent residents. For more than 15 years, their immigration application has been stuck in the courts.

In the meantime, Jose grew up in America. He graduated from San Francisco State University with a bachelor's degree in biology. As a member of Alpha Phi Omega National Service Fraternity, Jose volunteers, working with the elderly and young Asian Americans, among other things.

Jose has been authorized to work while his immigration case is pending. For more than 10 years, he worked as a registered dental assistant and a dental laboratory x-ray technician. The dentist who employs him was so impressed by his work, he filed papers to sponsor Jose for legal permanent residency in the United States. The employer's petition was approved, but because of our broken immigration laws, Jose has been placed in deportation proceedings. After all of these years in America—16 years—and earning a bachelor's degree in biology, currently working in the health field in dentistry, and one who has done such a good job that his employer wants to have him here permanently, he is now facing the prospect of being deported to a country he cannot even remember.

Jose was scheduled to be deported last month, 3 days before Thanksgiving. But the Department of Homeland Security put his deportation on hold, so he will have a chance to apply for legal status and keep working.

Jose sent me a letter, and this is what he said:

I have followed the laws of our system, but the logjam in the courts has put me in this untimely predicament. I have lived in the U.S. for 16 years, and I consider this country as my home. I have always felt like an American. I wish to stay, live my dreams, and build my own family here in the United States. I hope that someday the DREAM Act becomes a reality so that I may continue making contributions to the country I call home.

I ask my colleagues who are critical of the administration's deportation policy, would America be better off if we deported Minhaz or Jose back to Bangladesh and the Philippines? I don't think so. These two young men were brought here as infants, children. They grew up in our country. They have

overcome great odds and achieved great academic success, without the support of Federal assistance. They didn't qualify for it. They have no problems with moral character, and they pose no threat to America. They would make us a better country if we gave them a chance.

Minhaz and Jose are not isolated examples. There are literally thousands of others like them in this country. We have a responsibility in the Senate to give them a chance to let them prove what they can do for America.

I commend the Obama administration for its new deportation policies. I urge the Department of Homeland Security to move forward on an expedited basis. As long as young people such as Minhaz Khan and Jose Librojo are facing deportation, work still needs to be done.

It is also clear that this policy is only a temporary solution. The deportations of many DREAM Act students will be temporarily suspended. Ultimately, the responsibility lies with Congress and with us to fix these broken immigration laws and give these good young people a chance.

I ask my colleagues to support the DREAM Act. It is the right thing to do. It will make America a stronger nation.

I yield the floor.

THE PRESIDING OFFICER (Mr. DURBIN). The Senator from Minnesota.

#### THE COLLAPSE OF MF GLOBAL

Ms. KLOBUCHAR. Mr. President, I rise today to discuss the collapse of MF Global. While its demise hasn't triggered the sort of economic turmoil we saw in 2008, let me assure you it is having a devastating impact on the livelihoods and savings of many in my State.

Sadly, the story of MF Global is all too familiar. It is the story of another overleveraged financial firm that took on too much risk and did little to disclose its bets. Once again, the folks whom the system was supposed to protect have been left holding the short end of the stick. Three years after the U.S. financial system was nearly toppled by this sort of recklessness, it seems little has changed on Wall Street.

Today, Mr. Corzine appeared before the House Agriculture Committee to testify on events that led to the bankruptcy of MF Global—the firm he led—as well as the whereabouts of roughly \$1.2 billion in customer funds that remain missing. While taking responsibility for the collapse of the firm in his testimony today, Mr. Corzine chose to use much of his testimony defending the strategy that ultimately led to the firm's demise and that left many in my State with their life savings on the line. In regard to the missing customer funds, he responded that, as CEO of MF

Global, he wasn't really in the position to know what happened.

If executives at MF Global were willing to steer their ship into dangerous waters, they should be able to account for the safety of their customers' funds held in segregated accounts—something considered sacred within these markets.

If anybody still doubts that Wall Street has not learned from its mistakes, I would have you talk with the farmers in my State who can't access their life savings and aren't sure when or how much of it they will ever get back.

Dean Tofteland, from Luverne, MN, a town of 4,600 people—his family grows corn, soybeans, and raises pigs on their farm in southwest Minnesota. He currently has over \$200,000 in what was supposed to be a segregated MF Global account, which he cannot access and which he may never fully recover. He is not a speculator. He invested to reduce his risk—locking in prices ahead of the growing season so he is protected from price fluctuations that can eat into his profits.

Talk to Dennis Magnuson, a pork producer from Austin, MN, who had a substantial amount of money with MF Global that he used to stabilize the cost of feed for his pigs. Both Senators in the Chamber are from States that have livestock, and they know the cost of feed has been escalating. That is why he vested. He knows the risks—price swings, poor crops, bad weather. These are all part of farming. But his account at MF Global was supposed to help manage those risks, not become one.

It is not just individual farmers; the effects of MF Global's collapse are rippling through the whole agricultural community.

Here is a letter from Philip Deal, who writes:

I am the CEO and General Manager of Wheaton-Dumont Co-Op Elevator in Wheaton, MN.

Wheaton is located on the western edge of Minnesota by the North Dakota/South Dakota border. Our cooperative has approximately 1,200 active members and a total membership of more than 5,000. So the MF Global situation affects a great number of people here.

We employ about 115 people, and we are easily the largest nongovernment employer in all of the communities we operate in.

Our business uses a Chicago Mercantile Exchange and Minneapolis Grain Exchange to hedge grain purchases and sales. We do not speculate. We have always relied on the implied fiduciary responsibility of the Commodity Futures Trading Commission and the Chicago Mercantile Exchange to safeguard our segregated funds.

The impact to our business has been huge. We have been forced to double-margin the missing funds. This has increased our interest expenses and decreased our ability to buy and sell grain.

Simply put, we cannot afford to lose any money on this deal. On a local level, the very future of our business is at stake. On a larger

level, if segregated funds are lost, market participants will leave the market, open interest will decline, and market liquidity will fall. Everyone loses.

Sadly, Philip Deal is correct. The failure of MF Global has caused millions in investor losses, created significant uncertainty in the markets, and has left many in my State confused and angry—and they should be angry. Just 3 years after the 2008 financial collapse, and what has changed? How can ordinary folks trust this system? Who can they trust to protect them?

Two weeks after the collapse of MF Global, it was announced the Commodity Futures Trading Commission, which is leading the investigation into the missing funds, will receive only two-thirds of their budget request for 2012, potentially limiting the agency's ability to do its job at a time when the markets they oversee are expanding exponentially. This is not acceptable. We need to make sure our regulatory agencies aren't allowing Wall Street bankers to go down the street in their Ferraris while those standing up for the middle class—those at the agencies that are supposed to regulate them—are not following behind in a Model T Ford.

We don't know with certainty what the ongoing investigations into MF Global will find, but there is little doubt Congress has work to do. Already the CFTC, after our hearing in the Senate Agriculture Committee last week, has come up with some changes they are proposing to how these funds can be invested. I think more needs to be done. There are also rules of disclosure being considered and that were discussed today at a House hearing, as well as in our Senate Agriculture hearing, that need to be changed. These changes were made to the CFTC rules in 2000 and in 2005 they loosened the rules and expanded things. They need to go back to where they once were, where they protected investor savings.

Investor trust in segregated accounts is vital to market confidence and is the cornerstone of customer protection in the commodity futures market. This trust has been breached. I urge my colleagues to join me in demanding those responsible for the MF Global failure be held accountable for their actions and that steps are taken to prevent this from ever happening again.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Ms. KLOBUCHAR). The Senator from Wyoming.

Mr. ENZI. Madam President, I ask unanimous consent to speak as in morning business for whatever time I might use.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### SPENDING VERSUS REVENUE

Mr. ENZI. Madam President, I wanted to take this opportunity to share

with you what has been keeping me awake, and I am sure, if I explain it well enough, it will keep you awake as well. Misery loves company. This is misery that is going to affect your future, and the Senate has to make some changes to have a future for this country.

For 14 years, I was the only accountant in the Senate. I have been joined by Senator JOHNSON of Wisconsin, who is an accountant, and these kinds of numbers always bother us a little bit. I have put together a couple of pie charts here. This one on the left represents the spending we are doing; the one on the right represents the revenue we are receiving to do the spending. These are proportionately correct. This is the spending; this is the revenue to do the spending. Dramatically different. The revenues are dramatically lower.

There are a number of pieces to this that I think probably will reveal more. The spending, incidentally, is \$3.456 trillion. We are spending \$3.456 trillion. We are taking in \$2.2 trillion. That is \$1.3 trillion less than we are spending. So we are spending a third more than we are taking in.

How long can you do that? There is no end in sight. What is that made up of? Well, one of the things we worry about is Medicare, Medicaid, and Social Security. I have the revenues represented here for Social Security and other social insurances, and we are taking in \$865 billion a year to support these programs. This piece of the pie is what we are having to put out for those same programs. We are having to put out \$1.494 trillion; so \$865 billion versus \$1.494 trillion.

When we say these programs are going broke, I think that fact is pretty evident. If you don't make any changes, this kind of spending will eliminate a program that seniors rely on. I used to say when we are spending at this rate, we are stealing from our grandkids. Now we are to a point where we have spent so much, it is no longer our grandkids we are stealing from, it is our kids. And in a matter of months the bill could come due.

Europe is having some difficult financial times, and they are changing the way money is going to be available to secure the bonds that allow us to do this kind of spending. These actions could have widespread implications for the United States very soon. We also took Social Security money and put it in a trust fund. I always say, don't trust the trust funds. What we did is put IOUs in a drawer and we spent the money. We are spending some of the money twice. How long can you spend the money twice?

Let us take a look at some of the other parts of this pie, because we always talk about the nondiscretionary spending. Well, to cover our discretionary spending, which includes Defense and all of the nonmandatory

items, we are spending \$1.349 trillion. And the income? Individual income tax is paying \$899 billion. Corporate income tax pays \$191 billion. I bet people thought there was a lot more corporate tax than that.

Part of the reason for this corporate number is that a lot of people have single proprietorships, partnerships, or small business corporations. If a business is in one of those three categories, the money their company makes goes straight to their tax line, even though hardly anybody in business can take out all of the money they make. If they do not reinvest that money into the business, it business would go broke. So they do not get to take the money out, but have to count it through the individual tax code. That goes in this \$899 billion of individual income, as opposed to the corporate tax of \$191 billion. There is also an excise tax of \$67 billion. These are the kinds of numbers that have to fund \$1.349 trillion of spending.

We have discretionary spending of \$660 billion and we have military spending of \$689 billion. I mentioned Social Security, Medicare, and Medicaid, but besides that we have other mandatory spending adding another \$416 billion in spending. That \$416 billion accounts for the other items we have said will definitely be paid no matter what kind of shape the Federal Government is in. There are all sorts of programs included in that tally.

This little yellow sliver here, a very important one, is the interest we have to pay. That is mandatory as well. We don't have an option on whether we are going to pay the interest on the bonds that we owe. Those interest costs come to \$197 billion a year and that is at the lowest interest rate in the history of the United States. What happens when that goes up? As European countries have more trouble trying to sell their bonds, they are going to have to pay a higher rate to be able to sell those bonds. When they have to pay a higher rate, we will have to pay a higher rate. We are all competing for the same dollars, and there aren't enough dollars out there to fund this kind of an increase in spending each and every year. How do we make up the \$1.2 trillion more we are spending than we are taking in? It's a huge difference we aren't coming close to addressing.

I hope people can grasp the difference between spending and revenues. If you look at your own personal budget, your spending better be lower than your revenues, or at least no greater than the revenues. We haven't grasped that concept here yet. We did eliminate earmarks for the most part, and that helps, but it was still a rather small amount and we are still adding programs.

Sometimes we add programs as a demonstration project. A group of Senators get together and they say, our

five States could do something beneficial with this new program we have devised, so we will put a little money in the budget and draw up the criteria so just those five States can receive these monies. And the purpose is to see whether the program is effective. In my 14 years here, I have rarely seen one of these types of tailored programs that wasn't effective. I suppose there are some I never heard reported on, but I yet to see one that isn't effective. This means the following year the same group comes back and says, we just had this revelation, this marvelous experiment that happened in our State. It was spectacular and it ought to be expanded to every State in the Nation. Well, if it is that good, it probably ought to be expanded to every State in the Nation. But with whose money? With what money? We are already spending more than we are taking in.

We can't do the demonstration programs on new ideas unless we can eliminate some of the old ideas, which brings up another problem. Another thing we do around here is we say we are going to eliminate this program, and over 10 years it will bring in the \$5 billion needed to fund a new program. Well, that savings is accrued over 10 years, but the money on the new program is going to be spent over 1 year or 2 years at the most. That is pretty bad accounting. That is how you get to a situation where you have the current spending level versus the current revenues, by using creative accounting to pay for that new program.

Well, you can't bind a future Congress, so there is no assurance that the current method of getting the revenue will stay around. There is also no assurance we won't use that same pot of revenue two or three times. We will probably be told this is not the case, but I have seen some instances around here where revenue has been spent more than once.

One of the other problems we have around here is that we have too many spending decisions to make. There isn't a business in the world, with the exception of a business like Wal-Mart, that spends \$3.456 billion in a year—1 year. There aren't many businesses that comes close to that. And they have a bevy of accountants figuring out how to make expenditures, cuts, and balance the budget for the year.

What we do here in the United States Senate is an appropriations process. We have broken that process down into 12 pieces to make it more manageable, but 12 pieces doesn't cut it. You can't get into the detail for spending the billions. One of those numbers is \$689 billion. How long would it take to go through the expenditures on \$689 billion? We have to trust some of the past spending and some of the past obligations, but we can't be as conscientious and detail-oriented as we should be.

So what do we do about it? Well, we do omnibus bills. That is where we look

at what we spent last year, and we put everything into one package and hurry up and pass it so the government can continue to operate. Before that happens, we might do a series of continuing resolutions. We say, we can't shut down government because there are so many things people need that we have already approved—to the tune of \$3.456 trillion—so we have to keep government operating. What we end up with is a continuing resolution.

A continuing resolution allows a government agency to spend one-twelfth of what they had the previous year each month until we get a funding agreement for the remainder of the fiscal year. In 2008, we spent 27 percent less than we spend right now. I think a lot of the agencies would be delighted to have us keep continuing one-twelfth of their last year's allotted spending each month this year. That is what we have been doing, and it's not getting us anywhere.

I think there ought to be a penalty, which would be reflected in every one of the budgets. I think every time we pass a continuing resolution there ought to be a reduction in the amount spent each month until we get a final resolution. That could be 1 percent or  $\frac{1}{2}$  percent or  $\frac{1}{4}$  percent, but there should be some kind of a reduction if we are ever going to reduce spending and pay down our debt.

There is another responsibility, and that is for appropriators to figure out how to get this spending circle down to the size of the revenue circle. This is the only part that the Appropriations Committee has worked on—this little third of the square that contains discretionary spending.

What we are going to have to do now is come up with some solutions. I have some solutions. I am not going to go into those today, but what I want people to do right now is to think about how much we are spending versus the revenue we have. Every person in America needs to be thinking about the way the programs they are involved in can be a part of getting the spending circle down to the size of the revenue circle. It is everybody's responsibility.

What we continually run into are the groups—particularly from our States—that come in and say: I have this fantastic program and we just need a little increase for inflation because it is such a phenomenal program. For years, we have been able to do that. That is how the balloon got this big. We are not going to be able to do that anymore.

What would be helpful is if people could suggest how, in their program, they could make it better for less money. It is either going to have to be better for less with a little pain right now, or wait a couple years and have it worse for less with a lot of pain.

We are at a point right now where we reduce spending 1 percent for each of 7

years and get to a balanced budget; that is, 1 percent true cuts. That isn't 1 percent less growth. It is 1 percent true cuts each and every year, and it has to cover the whole circle, not just the discretionary part of the spending circle—which is what we usually concentrate on—and then have some discretionary capability on it. The fact is, the largest amounts we spend in this whole piece of the pie is spent on mandatory spending, and it is conversely funded by a much smaller amount. We can't do that for long. We are going to have to propose solutions.

Instead we have been in scenario where people come in and say we need a little bit more money or don't cut my program; keep it the same size. I ask for suggestions on how we could keep this practice going in light of our disproportionate revenues and expenditures. The usual approach is to tell me and my fellow senators there are a couple of other programs that we ought to eliminate. We are looking at those too.

We looked at them in the Health and Human Services areas, Senator COBURN and I did, and found there was \$9 billion of duplication. Do we need duplication? I would hope not. Senator COBURN got so excited, he did this same study for the entire Federal Government and found \$900 billion in duplication. Does that mean a whole lot of other agencies were a whole lot less efficient than Health and Human Services? No. It means we have duplicative programs in every single agency.

We also have financial literacy programs in every single agency. If we are spending \$3.456 trillion and only getting \$2.2 trillion in revenue, is the financial literacy in our government working? I don't think so.

When I first got here, there were 119 preschool education programs. Preschool is important. The start children get from when they are first born until they go to school makes a huge difference in their growth and development for the rest of their lives. However, we had 119 programs and once we took a closer look, we found many of them, according to their own evaluation, were failing. We now have that number down to 69 programs. Do you know why we can't go below 69? My jurisdiction as Ranking Member of the Health, Education, Labor, and Pensions Committee is over the Department of Education, which only has 8 programs—8 of 69 preschool programs. The Department of Agriculture has the most preschool programs.

That's why, when Senator COBURN is talking about duplication and looking at the complete picture of everything the Federal Government does, there is duplication in each and every agency. What we are going to have to do is pick out those that operate with the most efficiency and results, give them a little more funding and eliminate the other duplicative programs. Getting rid

of duplication is a surer way of solving the problem than some of the other ways that have been talked about.

One other avenue we keep talking about is waste, fraud, and abuse. Yes, there is waste, fraud, and abuse. We need everybody in America to help us find that waste, fraud, and abuse, but in reality, the total cost of waste, fraud, and abuse is a rather elusive number. Does anybody know how big that is? Everybody is guessing. It is only a guess how much there is. We need to find it, and we need to be taking the money from eliminating these actions before we spend it.

We will sometimes attempt to use the waste, fraud, and abuse numbers as the pay-for for a new program. We aren't able to spend that money until we actually have it, but what happens it is used as pay-for and the program goes into effect, but nobody follows up to go out and dig up that waste, fraud, and abuse. Instead, the waste, fraud, and abuse money ought to go into a fund before it can be spent on something else.

However, when I am talking about duplication, the \$900 billion worth of duplication, I am talking about numbers that we can go to the Federal budget and look up. We can find out exactly how much those programs are spending. In its duplication, we wouldn't eliminate all of them, but we ought to be able to eliminate half of them. Madam President, \$450 billion alone, half of Senator COBURN's total duplication findings, would be a huge change for this country.

I hope we look at some of those ideas to cut spending. I have a 15-page speech that would explain some ways we could solve this problem, but what I am trying to do is get people to grasp the concept that our Federal tax receipts, and total revenue, is far outweighed by the circle that shows what we are spending. As a family, people know they can't budget this way. As a government, we can't do it for very long, even if we print our own money. Somehow we are going to have to shrink the spending circle down until it is that size or grow the revenue circle until it is—they are comparable in size, or a combination of the two. As I said, I will give some other speeches to outline some of my other ideas. In the meantime, I hope everybody will take a look at the chart I have shown today.

We can't look at it and say don't touch Medicare, Medicaid, and Social Security, we can't have \$½ trillion of extra expenditure spending in that category alone for long. There is another \$416 trillion in mandatory spending in that same category. How long can we keep spending at this rate? What happens if interest rates go up? This piece of the spending pie can become much bigger and probably will. I don't know how long we can keep interest rates as low rate as they are now. If they go up,

it will help some seniors because they have some investments in cash that would get higher interest rates, but for the country as a whole, rising interest rates that already make up 6 percent of our budget will only be more cause for worry. When that one expands above the 1 percent we are spending right now—and it is going to expand in the next couple of years because of what is happening in Europe—we had better be worried about it.

This is the kind of picture shown by the deficit commission that Erskine Bowles and Alan Simpson chaired. I was hoping we would repaint this picture a number of times between the time they released their report 1 year ago and now, because we have to get America to understand. Actually, I can tell you the people in my State understand this. I don't need to explain it to them. They know how much more we are spending versus what we are taking in. They can even tell you the numbers. They are concerned, and they need to be concerned. We all need to be concerned.

I am open to suggestions on this. I will have some speeches I'll give later reiterating this definite problem we are in. I have said a number of times our country has maxed out its credit cards.

A couple weeks ago during a trip to Wyoming, I checked into a hotel and I used my Senate credit card. The lady a few moments later, very embarrassed, said: "I am sorry, but your card is being rejected." I said: "I guess the Federal Government is in worse trouble than I thought," and used my own card and it went through.

We had better be worrying about it now because we do have a problem. We have maxed out our credit cards, and there are not any other places we can go for money. We have been the bastion of money for years.

Keep this in mind. Start thinking of ways we can actually make some cuts and increase some revenues. I have ideas for both in speeches I'll give in the future. We are in a crisis. It will be a more immediate crisis any time and we are no longer spending our grandkids' money; we are spending our kids' money, and it is about to come due on us. When I say "on us," I am even including myself and the seniors in that count. The day of reckoning is not far away.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LAUTENBERG. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. I ask to speak as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### FUTURE OF AMERICA

Mr. LAUTENBERG. Mr. President, we are here now deciding what kind of a country America might be in the future—whether it will be a place we can look back at and remember when everybody had a chance at success.

It is hard to believe that when we look at the vote we just had. It confirmed where the Republicans are on the issue of whether middle-class families should get a tax break. The Republican answer, was no. The answer they gave on the middle-class families tax break was: Absolutely no. No, no, no.

To the struggling single parent who wants to provide for their family, works hard every day, the Republicans said no way. To the recent college graduate trying to start a career but having trouble paying back college loans, paying rent, paying living costs, the Republicans said no. To the working couple, a family with a couple of kids who needs some help in this tough economy, the Republicans said no. No, no, no. The Republicans refuse to help them because their mission is to shield the wealthy from paying their fair share of our country's obligations.

Across our country, Americans are watching Republicans in this Congress and wondering what they are going to do to supply encouragement and hope for people who need it. Are we going to be simply a big accounting firm, simply doing the auditing, or are we going to be there to stimulate activity for people, to give them a chance to elevate their living standards for their family, to get their kids educated, and take care of the family necessities?

Right now, 14 million Americans are jobless, and they are worried about how they are going to stay in their homes, feed their children, and keep their families warm this winter. But unemployed Americans are not the only people who are struggling. Hard-working Americans from all walks of life are struggling to make ends meet. They are coping with skyrocketing grocery prices, surging health premiums, soaring college tuition.

In my home State, 1 in 10 New Jerseyans is on food stamps, the highest level in more than a decade. New Jersey has traditionally been among the top States per capita income in the country, within the top three, often in the first position.

On this side of the aisle, we are trying to help struggling families. I learned the hard way about family struggles when I was growing up. My father took ill with cancer when he was 42; I was 18. My mother, when my father died, was 37 years old. We had all kinds of obligations to pay. My mother took over the family leadership. We owed money for the pharmacy, for hos-

pitals, for doctors. We were virtually bankrupt. I had enlisted in the Army. Next week, it will be 69 years ago that I enlisted in the Army, in December of 1942.

I know how tough it was and how much aggravation accompanies a family who just cannot keep their heads above water.

Here we are, in a day of some incredible wealth around this country—around this room—and Republicans are trying to thwart our efforts to extend and expand the payroll tax cut for working families—for people who depend upon their incomes to take care of their family needs; not on their savings, not on their inheritance, on their jobs.

Millions of American families have benefitted from this tax cut that we have had this year, but it stands to expire at the end of December. Our side is eager to continue this tax cut and increase the size of that cut to help these families. In my State, this means a typical family would receive a total tax cut of \$2,100 next year. For parents who are trying to feed their families, educate their kids, pay their bills, an extra \$2,100 goes a long way. To make sure that all working families receive this much needed relief next year, we are asking America's millionaires to pay their fair share, but the Republicans would rather protect their wealthy friends than continue the payroll tax cut for working families.

First, the Republicans blocked our side's efforts to cut taxes for the middle class. Then the Republicans offered their own plan. It was a disgrace. Their plan calls for a much smaller middle-class tax break, which they would have paid for by laying off 200,000 middle-class government workers. That is how they would solve the problem—fire people. Don't take it out of your bank account, don't take it out of your salary—even if you make over \$1 million a year—fire people. That will make sure they understand we are not as concerned about them as we are about the person who makes over \$1 million a year.

It was a cynical ploy. It showed the other side's true stripes. The Republicans say they are for lower taxes, but we now see that only goes for the jet set. Their tax-cutting zeal doesn't extend to the middle class. Republican priorities? Raise taxes on middle-class families. Middle-class families do not have it easy in America today. Republicans want to raise their taxes to protect the luxuries for the millionaires.

Make no mistake. Working families will suffer if the Republicans continue to block our efforts to extend and expand the payroll tax cut, and so will our economy. Last week, Barclays Bank warned that our GDP will drop 1.5 percent if the payroll tax cut is allowed to expire.

The choice is clear. We can continue the payroll tax cut for working fami-

lies or we can allow the Republicans to continue running their millionaires' protection ring. The fact is, American millionaires are doing just fine. They don't need protection from the Republicans. Since the 1980s, our country's wealthiest 1 percent have seen their average household income increase by 55 percent. But for the bottom 90 percent, average household income has not increased at all.

As we see here, even though incomes are growing for the very wealthy, their taxes are actually going down.

We can also look at CEOs to see how well the wealthy are faring. CEOs at the largest companies are now paid an average salary of \$11 million a year. That is 343 times as much as the average worker's salary of \$33,000.

It used to be a much more modest comparison. In 1980, CEOs made 42 times the average worker's pay. Just look at that. Just a few decades ago the pay was much more reasonable, and the people who were working in the mills and making products and doing the service jobs and all of that were living significantly better than they are today.

Millionaires are making much more money today than they did in those years past. This is something I know something about directly. I was the president of a very large company when I came to the Senate. And you know how I got there: I had a boost from our country. I had enlisted in the Army, and I served in Europe. I got the GI bill. I went to Columbia University. It happened because the country said: Frank, if you can learn we will help you. We will pay your tuition because you served your country. I've done well because my country invested in me, and I'm willing to invest more in my country today to help the next generation.

That company I helped start with two other fellows has 45,000 employees today; 45,000 people are working at ADP, the company I helped start, because we had a chance at an education and to learn what we had to do to be in management, what we had to do to be in leadership.

Our goal should not be to protect millionaires and billionaires who don't need our help. We should focus on the foundation that our society requires to function. We should be focused on protecting Medicare, food safety, Head Start.

Imagine, they want to take seats away from Head Start Programs. I visited a Head Start Program in New Jersey just a few weeks ago, and I saw the children. They were 3, 4, 5 years old. They were interested in learning something. I talked to them, and I wanted—one of the little kids came over and hugged me around the knees. I wanted to pick him up and take him home. He was so beautiful, so nice. I thought: Here is a child, learning. He came from a single-parent family.

The people who need help—we should be focusing on protecting them and giving them a chance to grow. We should be about making sure they have proper Medicare, that food safety is taken care of. Head Start, home heating for the poor, and other essential programs—we should be protecting them from reckless cuts.

The Republicans who served on the supercommittee refused, before the negotiations were started—refused to ask wealthy Americans to pay their fair share. They practically took an oath that they would demand nothing more of the wealthy, when the country is deeply in debt, starving for a better way to solve our problems.

As a result, the poor and the middle class are going to have to make up the difference. These are the people who need help the most right now. We must act now to protect the vital programs on which they rely. If we fail to act, our country and our economy will continue to suffer—especially Americans who are already struggling. It is just plain heartless to continue asking the poor, the middle class, the elderly, and our children to bear the entire burden of these brutal economic times.

It does not hurt any of us who have been successful to pay a fair share. It might cost a few dollars more, but if you are making over \$1 million a year, look in the mirror and see if you have done it all by yourself or whether it took the help of your country to get there. There is a whole cadre of people working across America—they go to work every day because they want to make a week's pay and take care of their kids and take care of their obligations. That is the foundation that built America. It is the foundation of the development of something that was called the "greatest generation."

That was the generation in the last century who served in World War II. All of us had an opportunity to get a college education when we otherwise would not have been near a college.

That built our country. That strengthened our foundation. Now we see people, Republicans, who want to make it tougher for people to make a living, tougher for people to get an education, tougher to provide heat for people who desperately need it in the wintertime, tougher to think ahead and say: You know what. I know my children will do better than I have done in my life.

That used to be a truism in our view of life in this country. We don't hear that much anymore because people are unsure, and it does not help to have the Republicans sticking up for the wealthiest among us and turning their backs on working-class families in this country, the middle-class families. It is not right.

I hope the people across this country will say: No. We are going to say no to these Republican policies. I hope our

Republican colleagues will disband their millionaires' protection game, stop standing in the way, and start standing up for everyday Americans who need our help.

Help us continue the payroll tax cut for working families. Help us protect the programs that benefit the people who need them most. Help us, friends on the Republican side, to make America even stronger than it is today. We can do that.

Countries are failing all over the globe. America need not to do that. We just have to make sure that while we take care of our expenses, we also make sure we have the revenues to do the job.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. FRANKEN). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. SHAHEEN). Without objection, it is so ordered.

#### EXECUTIVE SESSION

NOMINATION OF NORMAN L. EISEN TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE CZECH REPUBLIC

NOMINATION OF MARI CARMEN APONTE TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF EL SALVADOR

Mr. REID. Madam President, I ask unanimous consent that we now proceed to executive session to consider Calendar Nos. 360 and 501, and I send two cloture motions to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the nominations.

The assistant legislative clerk read the nomination of Norman L. Eisen, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Czech Republic.

#### CLOTURE MOTION

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

#### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the nomi-

nation of Norman L. Eisen, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Czech Republic:

Harry Reid, Barbara Boxer, Patrick J. Leahy, Patty Murray, Richard J. Durbin, Kent Conrad, John D. Rockefeller IV, Jeff Bingaman, Tim Johnson, Daniel K. Inouye, Debbie Stabenow, Robert P. Casey, Jr., Max Baucus, Charles E. Schumer, John F. Kerry, Mark Udall, Michael F. Bennet.

The assistant legislative clerk read the nomination of Mari Carmen Aponte, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of El Salvador.

#### CLOTURE MOTION

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

#### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the nomination of Mari Carmen Aponte, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of El Salvador:

Harry Reid, John F. Kerry, Barbara Boxer, Patrick J. Leahy, Patty Murray, Richard J. Durbin, Kent Conrad, John D. Rockefeller IV, Jeff Bingaman, Tim Johnson, Robert Menendez, Daniel K. Inouye, Max Baucus, Charles E. Schumer, Mark Udall, Michael F. Bennet, Al Franken.

Mr. REID. Madam President, I ask unanimous consent the mandatory quorum under rule XXII be waived in each instance; that on Monday, December 12, at 4:30 p.m., the Senate proceed to executive session to consider the following nominations concurrently: Calendar No. 360 and Calendar No. 501; that there be 1 hour of debate, equally divided, in the usual form; that upon the use or yielding back of that time, the Senate proceed without interviewing action or debate to vote on Calendar No. 360; and that if cloture is invoked, the Senate immediately vote on confirmation of the nomination, and following disposition of Calendar No. 360, the Senate proceed to vote on cloture on Calendar No. 501; further, that if cloture is not invoked on Calendar No. 360, the Senate proceed to vote on cloture on Calendar No. 501; that any statements be printed in the RECORD, and the President be immediately notified of the Senate's action and the Senate then resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will resume legislative session.

## TRIBUTE TO JACOB'S TREE

Mr. McCONNELL. Madam President, I rise today to extend my personal blessing this holiday season to the family of Jacob Akin of Somerset, Kentucky. This year, the town of Somerset has graciously chosen to honor the Akin family by accepting their donation of a 20-foot cherry spruce tree to be displayed in the town's Fountain Square as the county Christmas tree. More important, however, is the solemn but heart-warming story of the tree's origin, and the inspiration it brings to the people of the community.

The tree, known as "Jacob's Tree," was planted in remembrance of Jacob Akin, who was tragically killed in a terrible accident on December 6, 1994. Five-year-old Jacob was playing with his older brother, Abraham, in a house when a chimney unexpectedly collapsed on top of him. Thus, the holiday season each year is especially burdensome for his family, as it serves as a constant reminder of the horrific accident that took place 17 years ago.

A year after his death, his family decided to plant a tree to honor young Jacob. Over the years, the tree has helped bring comfort and peace to the family. "We decided to put up the tree in memory of my son," Jacob's mother, Rebecca Buis, says. "I felt like as the tree grew, I could keep up with the years and somehow see how my son might have grown. It's kind of a reminder, and it helps with the grieving process to plant something in memory of someone you love."

Almost two decades later, Jacob's spirit remains ever-present in the magnificent 20-foot cherry spruce tree that Rebecca hopes will bring a joyful light to the community on Fountain Square. "Over the years, it just grew and grew," she says. "It's a beautiful, well-rounded tree and would make a wonderful Christmas tree."

On December 3, Jacob's Tree was scheduled to be lit for the first time in Fountain Square in a special tree-lighting ceremony during this year's annual Christmas parade. In the spirit of the season, Jacob's family hopes that the community will come together around the tree and share in its joy. "Christmas is a time of giving," Rebecca said.

The story of Jacob's Tree and the selflessness of the Akin family is truly inspirational. I would like to extend my personal blessing to Jacob's mother, Rebecca Buis, his father, David Akin, and his brother, Abraham Akin, this holiday season. And I ask my Senate colleagues to join me in wishing the family a very Merry Christmas and a Happy New Year. It is my hope that the tree brings them comfort, and that it shine especially bright in honor of young Jacob.

The Commonwealth Journal, a Somerset-area publication, recently published an article telling the story of Ja-

cob's Tree. I ask unanimous consent that the full article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD as follows:

[From the Commonwealth Journal, Nov. 25, 2011]

'JACOB'S TREE' WILL WARM THE SPIRIT THIS SEASON

(By Chris Harris)

The Christmas season is seen as a time of miracles, a time of redemption for mankind.

This year, one of Somerset's proudest symbols of the Christmas tradition will be its own miracle of sorts—a chance to redeem joy and light out of the clouds of tragedy.

The Christmas tree in the town's Fountain Square is scheduled to be lit in a special ceremony on Saturday, December 3, as is the annual custom.

This year's tree comes from the yard of Rebecca Buis, known to local bank customers as a branch manager and loan officer at First & Farmers National Bank in Somerset.

Anyone who has driven down Denham Street lately has probably noticed the towering cherry spruce standing out with its bold green hue, even as the trees around it have shed their leaves and stand bare and bland.

The tree was planted around the holiday season of 1995—one year after a horrific accident that changed Buis's life forever.

On December 6, 1994, Jacob Akin, Buis's 5-year-old son, was killed in what his mother can only call a "freak accident."

Jacob and his brother Abraham, who was 10 at the time, were playing in a house on Newton Street in Ferguson that their father was in the process of razing.

"(The father, David Akin) did construction work," said Buis. "This wasn't anything that was new to (the children). They were used to playing around that kind of stuff."

This time, however, was different.

After Abraham exited the structure to ask his father a question, a chimney crumbled and collapsed on top of young Jacob.

A parent's worst nightmare had come to pass—and during the holiday season meant to be a happy time for families.

The memories remain painful to this day.

"They couldn't find my son underneath the bricks," recalled Buis, who still finds herself overcome with emotion when talking about the incident. "They had to pull them off brick by brick until they found him."

According to then-county coroner Alan Stringer, Jacob died of multiple skull fractures as a result of the toppled bricks. Buis noted that Jacob's neck was broken immediately, which meant that death came quickly. This and the fact that Abraham survived provided the only sources of solace in that terrible time.

"My worry was that he suffered, and they told me he had not," said Buis. "I'm lucky in the sense that I felt like God could have taken both my boys that day, playing in the house together. I could have lost them both."

Still, the holiday season was unalterably affected for Buis and her family.

"I wasn't able to focus on Christmas at all," said Buis. "We didn't put up a tree that year."

For one thing, Buis felt like she had to stay strong for her other son's sake. The necessity of putting on a brave face took its own toll on the devastated mother.

"You have to carry on because you have two children," she said. "Kids grieve dif-

ferently. It's not an easy thing to deal with; kids don't usually tell you, but they feel responsible. I tried hard not to show grief because I didn't want (Abraham) to feel responsible. Nobody could have done anything. It was a freak accident."

Buis recalls Jacob, in kindergarten at Hopkins Elementary at the time, as "a funny little young man," as well as one who was both handsome and intelligent.

"He was a very smart young man," she said. "He understood lots of things, I think."

The calendar pages turned, and soon enough, it was the Christmas season again. Buis decided it would be appropriate to pay some kind of tribute to Jacob, and decided to plant the household Christmas tree, only about five feet tall at the time, in the ground outside their home.

"We decided to put up the tree in memory of my son," she said. "I felt like as the tree grew, I could keep up with the years and somehow see how my son might have grown. Every time I would pull in the driveway, I would see the tree."

"It's kind of a reminder," she added. "It helps with the grieving process to plant something in memory of someone you love."

Today, the majestic tree stands about 20 feet tall. It's "reached its potential," as Buis put it, and has "overgrown the place."

As such, Buis decided it might be the perfect time to inquire about donating "Jacob's Tree," as it's called, to use on the Fountain Square as the county's official Christmas tree. County officials happily obliged.

"Over the years, it just grew and grew," said Buis. "I'd been thinking for some time about (donating it), and just decided, 'You know, it's time to cut the tree down.'"

Buis said she also took Abraham's feelings into consideration. Now 27, still in Pulaski County working in construction, Abraham "thinks it's a good idea," according to Buis, but she wanted to make sure he was okay with the choice to donate the tree given the effect Jacob's death had on him as well.

Much as the tree reached its adult size, Jacob would have been 22 years old this year. However, his legacy has managed to live on in other ways as well.

After Jacob's death, Buis decided to donate his corneas and heart valves to help save the lives of other individuals. "(Christmas) is a time of giving," she said, noting that Jacob's untimely passing was able to give hope to others.

"I received letters telling me that one of Jacob's corneas went to a child who was born with a birth defect, and another went to an older man in his 60s with an eye injury from a work accident," said Buis. "His heart valves also went to adults. I didn't realize how important heart valves were to people who need them (until then)."

"It's a hard decision to make because you have to make it quickly," she added, referring to the decision to donate Jacob's organs. "You can't think about it for days. You have to know at the time of death, and it's a very hard time."

Just as Jacob's body was donated to bring a new light of hope to those in need, his spirit remains in the tree that has now been donated to bring a similarly joyful light to the community.

"It's a beautiful tree," said Buis. "It's well-rounded and would make a wonderful Christmas tree."

Citizens can see "Jacob's Tree" lit for the first time on December 3. The annual Christmas parade, sponsored and organized by the Chamber of Commerce, begins at 5 p.m. with the tree lighting activities set for 7 p.m.

As a Chamber Ambassador, Buis is looking forward to the yearly festivities that are so beloved by locals—but especially since she will get to see that special memorial to her son shining in all its glory.

"I just hope that (those who see it) will enjoy the tree and that it will be beautifully decorated," said Buis. "I hope that people will get a warm feeling from the tree, and know that it's given in a good spirit."

#### COMPUTER SCIENCE EDUCATION WEEK

Mr. CASEY. Mr. President, I rise today to speak about Computer Science Education Week, which began on December 4, 2011, and continues until December 10, 2011. This celebration includes events in my home State of Pennsylvania that advance the teaching and learning of computer science. These activities help to engage students and build their interest in a field that promises good jobs in a rapidly expanding sector. The week also draws attention to the critical need for strong computer science education in our schools.

E-mails, text messages, financial transactions, cell phone calls and doctor's visits are just a few of the activities that rely on computer science. In the last 20 years, we have undergone a technological revolution that has transformed industry, created entirely new segments of the economy, and transformed our daily lives. Pennsylvania's high-tech industry has played a crucial role in this growth, and we must prepare the next generation to continue innovating. The events of Computer Science Education Week help to build momentum for students to learn computer science.

In Pittsburgh, Carnegie Mellon University, which boasts one of the best computer science and informatics programs in the country, will host high school students and expose them to the multitude of academic and professional opportunities in computer science. At Emmaus High School in Emmaus, young people will demonstrate programmable robots and hear from alumni who have successfully pursued careers in computer science, all while honoring computing pioneer Grace Hopper with a birthday cake. Even the White House is celebrating Computer Science Education Week by honoring the week's organizers and representatives of the Computer Science Teachers Association as "Champions of Change."

I have introduced S. 1614, the Computer Science Education Act, to help students develop the skills to compete for the growing number of jobs in computer science. Our Nation's economy and security depend upon computing professionals, but the current pipeline of graduates will satisfy only 52 percent of the more than 1.4 million computing job openings expected by 2018. The other 48 percent of these jobs will either go unfilled or move to other

countries. America should continue to lead in the high-tech sector by preparing students to take these well-paying jobs. This legislation would strengthen computer science education in elementary and high schools by ensuring that students not only use technology but also learn the technical skills needed to work in computer science and grow our economy.

Computer Science Education Week will help to increase the interest of students who will invent the next mobile technology or start the next technology company. This week was established in 2009 by the Computing in the Core Coalition, a group of organizations, companies, and scientific societies that strive to advocate for computer science as a core academic subject. Computer Science Education Week coincides with the birthday of Grace Murray Hopper, a pioneer in computer science, who was born on December 9, 1906. She rose to the rank of rear admiral in the U.S. Navy, engineered new programming languages and developed standards for computer systems that laid the foundation for many computer science advances.

The economy of the future and the jobs that will accompany it demand that we prepare our students to remain competitive as leaders in the high-tech global marketplace. For that reason, I urge my colleagues to join me in recognizing Computer Science Education Week and to cosponsor the Computer Science Education Act.

#### HOOVER POWER ALLOCATION ACT

Mrs. FEINSTEIN. Mr. President, I rise today to speak about the importance of the Hoover Power Allocation Act of 2011, of which I am a cosponsor.

This legislation passed the Congress after a multiyear effort led by Senator HARRY REID, the bill's lead author, and I thank him for his work.

Upon enactment, Californians will be able to continue buying Hoover Dam's power at the cost of production for the next 50 years.

The legislation allows the people of southern California whose local governments and utilities signed the 50-year contracts that made building Hoover Dam possible to receive 56 percent of the energy produced by the dam for another five decades.

For the people of my State, the Hoover Dam has been a consistent supply of affordable, pollution-free power for decades. The Hoover Dam is one of the largest power plants in the United States, with a capacity of 2,080 megawatts approximately the size of each of California's nuclear powerplants.

Its average production between 1999 and 2008 was about 4.2 billion kilowatt-hours per year, approximately 2.4 billion kilowatt hours of which goes to southern Californians who buy their

power from Southern California Edison, the Los Angeles Department of Water and Power, or members of the Southern California Public Power Agency.

Hoover's power also plays an essential role moving water into parched and populous southern California.

The Metropolitan Water District uses Hoover's power to move its 550,000 acrefeet annual allocation of water from the Colorado River, over five desert mountain ranges, to Los Angeles.

Without Hoover's power, the Metropolitan Water District's cost of moving that water would be inordinately more expensive.

And if California rate payers had to buy that much power at market rates instead of Hoover Dam's 2.5 cents per kilowatt hour cost of production, it would cost approximately \$180 million more each year.

And that power would likely come from dirtier, more distant sources, including coal plants.

Instead, continued access to Hoover's low-cost, renewable hydropower will keep rates low as California's utilities bring on new, more expensive renewable power to comply with the State's 33-percent renewable portfolio standard.

The legislation also sets up a process through which new power recipients in California will be determined by the Western Area Power Administration.

As explained in the House committee report accompanying this bill, Congress expects the agency to conduct an open hearing and review the process to determine power allocations fairly and equitably.

The process should provide the opportunity for irrigation districts, rural electric cooperatives, and other eligible entities to receive allocations.

Congress also expects that Western Area Power Administration will evaluate the relevant power requests of potential new Hoover power recipients in an open, thorough, and transparent process to assess both the applicants' power needs and the classes of customers they serve.

The agency should make allocation determinations in an impartial, unbiased, and objective manner, consistent with State and Federal preference standards, and in a way that provides the most benefit to the most Californians.

My colleagues and I also expect that the process and analytical results will be documented and made available for review.

Finally, no discussion of Hoover Dam would be complete without acknowledging efforts to protect endangered species.

Hoover contractors have committed to providing more than \$150 million over 50 years to support the Lower Colorado River Multi-Species Conservation Program for the protection of 26

endangered, threatened and sensitive species.

The legislation authorizing the MSCP was enacted in the 111th Congress and signed into law on March 30, 2009.

I thank the parties for reaching this agreement.

The Hoover Dam is an American success story. And it is a renewable energy success story.

During the depths of the Great Depression, Americans stepped forward to help build one of the great engineering marvels of all time.

Between 1931 and 1936, our Nation made a massive effort involving thousands of workers more than 100 of whom lost their lives to build a powerplant unlike anything the world had ever seen.

Many in Congress at the time argued the cost of Hoover Dam was too high.

They argued that government should not be making such large investments in infrastructure.

They opposed efforts to invest in an unproven energy technology like hydropower.

The debate was strikingly similar to debates we are having in this body today.

Luckily for the people of California, believers in American infrastructure and technology won the Hoover Dam debate.

The U.S. Congress provided Federal funds, but only after the Department of the Interior arranged power contracts at prices sufficient to both, No. 1, cover the operating and maintenance charges and, No. 2 repay the capital appropriated by the U.S. Congress within 50 years.

When the communities and utilities of California, led by the City of Los Angeles, stepped forward to sign those contracts, construction began.

As the years have passed, the investment has been repaid and the wisdom of Congress's decision has become apparent.

And now we have enacted a law that continues the legacy of Hoover Dam.

I thank the generations before us for having the foresight to fund the Hoover Dam, and I hope we can again rekindle the spirit and invest in America.

#### RECOGNIZING LORELEI SHEPARD

Mrs. FEINSTEIN. Madam President, I rise today to recognize and thank Ms. Lorelei Shepard, who will be retiring from the United States Senate at the end of the year. Lorelei began her career on the Hill in 1993, working for the Secretary of the Senate as an elevator operator in the Capitol. She eventually became a supervisor where she was responsible for managing the weekly schedule of 20 operators and supervising their day to day duties. Her pleasant demeanor and calm nature served her well as she guided and deliv-

ered confused visitors and harried staff and Senators to their destinations in the Capitol.

She joined the staff of the Senate Select Committee on Intelligence in 1995, as the Committee's receptionist, where once again her calm and friendly approach and knowledge of the Capitol served her well. In 2000, Lorelei decided to pursue one of her dreams and she moved to a beautiful home in a little town in Vermont. As a Californian, I think it is safe to say that although beautiful, the winters in Vermont leave something to be desired. Thanks to that New England winter, Lorelei decided she needed to thaw out and she soon returned to Washington. Through a combination of good luck and timing, the Committee was able to have Lorelei join the Committee staff again, at the end of 2001.

She has served for the last 10 years on the Committee's staff, including for the last 5 years as our security assistant, making sure that classified documents are logged and distributed appropriately, handling classified correspondence, and keeping track of the secrets entrusted to the Committee.

It is the Intelligence Committee's constitutional responsibility to oversee the intelligence activities of our nation. Through her many years of service on the Committee, Lorelei has made a quiet but critical contribution to this effort. For that, I thank her.

Though Lorelei will be leaving, the Shepard family still remains a part of the Senate community. Lorelei's daughter, Lori, and son, Peter, have followed in their mother's footsteps and both work in the Senate today. This is quite a testament to their family's commitment and dedication to our nation and one for which they should be proud.

I wish Lorelei all the best as she retires and eventually returns to Vermont. I know she will enjoy the new-found time she will have to pursue her love of quilting, writing and the myriad of other talents with which she has been blessed.

On behalf of the Intelligence Committee, many thanks Lorelei, best wishes, and stay warm.

#### VIOLENCE AGAINST WOMEN REAUTHORIZATION ACT

Mr. WHITEHOUSE. Madam President, I rise to speak in support of the Violence Against Women Reauthorization Act of 2011, which I am pleased to cosponsor today. As attorney general of Rhode Island, I saw firsthand the good work the Violence Against Women Act, VAWA, has done to protect victims of domestic violence, to provide crucial services to those in need, and to hold batterers accountable. The VAWA Reauthorization Act builds on that record of success and makes important updates to strength-

en the law, while cognizant of the challenging budget circumstances we face. I congratulate Senators LEAHY and CRAPO for their hard work and leadership on this bill.

I am particularly appreciative that Senators LEAHY and CRAPO have included the Saving Money and Reducing Tragedies through Prevention Act of 2011, or the SMART Prevention Act, which I previously introduced, within the Violence Against Women Reauthorization Act.

Far too many teens suffer abuse at the hands of a dating partner. According to the Centers for Disease Control, for example, 1 in 10 teenagers reported being hit or physically hurt on purpose by a boyfriend or girlfriend at least once in the past year. The SMART Prevention Act will support innovative and effective programs to protect our children from this dangerous abuse.

Earlier this year, as chairman of the Senate Judiciary Committee's Subcommittee on Crime and Terrorism, I held a field hearing in my home State on "Preventing Teen Violence: Strategies for Protecting Teens from Dating Violence and Bullying." With hundreds of students from Tolman High School in Pawtucket, RI, in the audience, prominent advocates and experts testified about the importance of educational and community programs in preventing dating violence among teenagers.

The witnesses explained that teen dating violence remains a serious problem, but that we can take important preventive measures. Ann Burke, a leading national advocate, explained that school-based teen dating violence prevention programs, especially those focused on middle schools, have proven effective in changing behaviors. The Lindsay Ann Burke Act, named in memory of Ann's daughter, a victim of dating violence, supports abuse education programs for teens in Rhode Island. Since its passage, physical teen dating violence rates in our State have decreased from 14 percent in 2007 to 10 percent in 2009.

These preventive measures are most effective when part of a community-wide approach. As Kate Reilly, the executive director of the Start Strong Rhode Island Project, explained at the hearing, effective prevention programming should not be limited to schools alone, but should "meet kids where they live and play." That requires involving parents, coaches, mentors, and teen and community leaders, as well as using new technology and social media in innovative ways.

One group of children needs particular attention: children who have witnessed abuse in their home. Deborah DeBare, the executive director of the Rhode Island Coalition Against Domestic Violence, explained at the hearing that "growing up in a violent home may . . . lead to higher risks of repeating the cycle of abuse as teens and

young adults." By supporting robust services for children exposed to domestic violence in the home, we can help break the intergenerational cycle of violence.

The SMART Prevention Act builds on each of these insights. It would create a new grant program within VAWA to support dating violence education programs targeting young people, with a particular focus on middle school students. The bill would also support programs to train those with influence on youth, including parents, teachers, coaches, older teens, and mentors. The new teen dating violence prevention program would be coordinated with existing grant programs focused on prevention, including a program directed at children who have witnessed violence and abuse. By requiring coordination with these programs, and focusing resources on prevention, the SMART Prevention Act is also smart policy fiscally. Abuse that is prevented reduces the strain on our already overburdened health and education systems.

New laws in several States, as well as innovative and hard-working organizations such as the Lindsay Ann Burke Memorial Fund and the Katie Brown Educational Program in New England, have demonstrated how effective such prevention programs can be, so now is the time for Congress to act.

I again thank Senators LEAHY and CRAPO for their leadership in reauthorizing the Violence Against Women Act. I look forward to working with them and other Senators from both sides of the aisle toward a country that is free from dating and domestic violence.

#### INTERNATIONAL HUMAN RIGHTS DAY

Mr. CARDIN. Madam President, I rise today to mark International Human Rights Day, a day which celebrates the adoption of the Universal Declaration on Human Rights by the UN General Assembly on December 10, 1948.

In the immediate aftermath of World War II, and reacting with revulsion to the horrors of that global war and the Holocaust, the community of nations organized itself with the goal of protecting international peace and security. Although the United Nations founding Charter recognized the protection of human rights as one of the UN's most basic purposes, it was quickly recognized that it would be necessary to further elaborate these fundamental freedoms in order to ensure their protection. The resulting document—the Universal Declaration of Human Rights—has since served as the foundation upon which all other human rights work at the international level has stood. It remains to this day an enduring guide for human rights advocates around the globe.

This has been an exciting and dramatic year that will be remembered for

the triumphs of the Arab Spring. The fall of so many dictators who have been responsible for the deaths, torture, and other atrocities meted out against so many has opened up the exhilarating prospect of real reform and meaningful human rights improvements. But the final chapter of the Arab Spring has not yet been written, and nothing can be taken for granted.

Progress in this field is not necessarily linear. As Ronald Reagan said in his inaugural address, "Freedom is a fragile thing and is never more than one generation away from extinction."

I believe it is especially critical, at this historic moment, for the United States to remain vigilant in the protection and promotion of human rights—abroad and at home.

Overseas, the United States must continue to use our voice to speak on behalf of those silenced by brutal regimes. We must continue to lift up those who cannot stand on their own. And while we must inevitably pursue a multifaceted foreign-policy that advances American goals in a broad range of areas including hard security and the economy, we must never treat human rights as something expendable.

I take particular note of the countries that stand shoulder to shoulder with us in that effort. I welcome Polish Foreign Minister Radek Sikorski's call for a "European endowment for democracy," similar to the National Endowment for Democracy which the United States has supported since 1983. I commend Poland for the leadership it has shown on human rights issues during its presidency of the European Union.

In all of these efforts, the role of civil society remains critical. On the 50th anniversary of the adoption of the Universal Declaration of Human Rights, the United Nations adopted a declaration on the rights of human rights defenders. They are the first line of defense and they often pay the highest price.

There are, unfortunately, too many cases of human rights defenders who are imprisoned, persecuted or worse, for me to raise them all here. But I would like to mention one in particular that maybe emblematic of many others: the case of Evgenii Zhovtis, Kazakhstan's most well-known human rights activist.

Zhovtis is the Director of the Kazakhstan International Bureau for Human Rights and Rule of Law and even a member of the OSCE Office for Democratic Institutions and Human Rights' panel of experts on freedom of assembly. But he was involved in a tragic car accident in which a pedestrian was killed and, after a trial widely condemned for lacking due process, he was sentenced in 2009 to 4 years in prison.

A year ago, at the OSCE Summit in Astana, civil society activists called for Zhovtis' release. As one NGO participant remarked:

Evgenii is the human rights Everyman. If this can happen to him, it can happen to anyone.

A year later, Evgenii Zhovtis remains in a Siberian penal colony, even as Kazakhstan prepares to host an OSCE election observation mission. In the spirit of the Universal Declaration of Human Rights, I once again urge President Nazarbayev to review his case and to release him.

Thank you.

#### TRIBUTE TO JOAN MCKINNEY

Ms. LANDRIEU. Madam President, I rise today to pay tribute to Joan McKinney, who has been a beloved and respected mainstay of the Senate Press Gallery for almost 40 years.

Joan retired recently after a decade of service on the Press Gallery staff. Prior to that, she served the people of my home State of Louisiana for 2½ decades as Washington correspondent for the Baton Rouge Advocate.

Joan is originally from Greenville, SC, and is a graduate of Winthrop College. She came to Washington in 1971 to work on the press staff of our dear colleague Senator Fritz Hollings.

As her career advanced, she chose to return to journalism, working first as a reporter for the Greenville News, where her father served as editor, and then for another paper from my home state, the Shreveport Journal.

Joan was hired away by the Advocate when she continually beat the Advocate's reporter—who happened to be the son of the publisher—on stories. I came to know and respect Joan during our many hallway meetings that so often occur between Members and the press. I also had the great fortune of getting to know her as a person and as a friend.

In her tenure as the Advocate's congressional correspondent, Joan came to be well respected by members of the Louisiana delegation from both parties. The Members from my State knew her as fair-handed and tough, and most of all, that there was nothing, nothing that could get by her.

Through her work, Joan became an expert on the intricacies of the Senate and the Supreme Court. She took this knowledge with her into her role as a member of the Senate daily press gallery staff. I know her Senate acumen on the institution and its procedure was of great value to the reporters roaming the gallery who relied on her for deep insight about the Chamber they cover.

Joan, who has won reporting awards from the South Carolina and Louisiana press associations, is a longtime member of the elite Gridiron Club of newspaper writers. She was one of the first women to become a member.

I know that one of Joan's biggest interests is dance, something I am told she plans to be very active with in retirement. Long before "American Idol"

and "So You Think You Can Dance," Joan was an excellent competitive dancer. Her specialty is Shag, a regional dance popular in the Carolinas.

This year, Joan won her first national Shag championship. With more time to practice, I am sure more dance titles are on the way.

For those of us who have been fortunate to work with Joan, it is almost impossible to imagine the Press Gallery without her. But I know I join the entire Senate press corps in wishing Joan the best as she embarks on this new adventure in her life.

Joan, thank you for sharing with this institution and our entire country your knowledge, experience and good heart. All of us are better as a result of your service to the best ideals of our democracy.

#### CROWDFUNDING

Mr. MERKLEY. Mr. President, I rise today to address a promising new idea for investors and small businesses: crowdfunding.

In recent years, small businesses and startup companies have struggled to raise capital. The traditional methods of raising capital have become increasingly out of reach for many startups and small businesses. There is another option, but Congress must act to authorize it and provide for appropriate safeguards.

Low-dollar investments from ordinary Americans may help fill the void, providing a new avenue of funding to the small businesses that are the engine of job creation. The CROWDFUND Act would provide startup companies and other small businesses with a new way to raise capital from ordinary investors in a more transparent and regulated marketplace.

The promise of crowdfunding is that investments in small amounts, made through transparent online forums, can allow the "wisdom of the crowd" to provide funding for small, innovative companies. It allows ordinary Americans to get in on the ground floor of the next big idea. It is American entrepreneurship at its best, which is why it has the support of the President and many in the business community.

That said, there are real risks of investment losses at a rate far beyond ordinary investing. Crowdfunding, if done without proper oversight, provides significant opportunity for fraud. Indeed, it was not too long ago that our financial regulators were doing daily battle with scam artists pitching huge returns on fraudulent schemes through small, unregistered securities.

That is why the CROWDFUND Act will tap the opportunity of crowdfunding while reducing the risks.

The CROWDFUND Act provides a capital-raising alternative for startups and other small businesses, while not undercutting essential investor protec-

tions. It allows companies to raise up to \$1 million each year from ordinary Americans. It provides more disclosure, more accountability and accuracy, and limits the exposure of any individual investor.

I thank my colleague Senator BENNET for joining me in this effort, and I hope to partner with more of my colleagues to move this idea forward in the days to come.

#### TRIBUTE TO CHRISTOPHER L. CUGINI

Mr. THUNE. Madam President, today I recognize Christopher L. Cugini, an intern in my Washington, DC, office, for all of the hard work he has done for me, my staff, and the State of South Dakota over the past several months.

Chris is a graduate of Glen Oak High School in Canton, OH. Currently, he is attending the University of Mount Union in Alliance, OH, where he is majoring in communication. He is a hard worker who has been dedicated to getting the most out of his internship experience.

I would like to extend my sincere thanks and appreciation to Chris for all of the fine work he has done and wish him continued success in the years to come.

#### TRIBUTE TO ROBERT CUYLER HASKINS

Mr. THUNE. Madam President, today I recognize Robert Cuyler Haskins, an intern in my Washington, DC, office, for all of the hard work he has done for me, my staff, and the State of South Dakota over the past several months.

Cuyler is a graduate of L.D. Bell High School in Hurst, TX. Currently, he is attending Texas Christian University in Fort Worth, TX, where he is majoring in political science. He is a hard worker who has been dedicated to getting the most out of his internship experience.

I would like to extend my sincere thanks and appreciation to Cuyler for all of the fine work he has done and wish him continued success in the years to come.

#### TRIBUTE TO KATI M. SEYMOUR

Mr. THUNE. Madam President, today I recognize Kati M. Seymour, an intern in my Washington, DC, office, for all of the hard work she has done for me, my staff, and the State of South Dakota over the past several months.

Kati is a graduate of Jones County High School in Murdo, SD. This past August, Kati graduated from Sinte Gleska University in Mission, SD, where she majored in English and American history. She is a hard worker who has been dedicated to getting the most out of her internship experience.

I would like to extend my sincere thanks and appreciation to Kati for all of the fine work she has done and wish her continued success in the years to come.

#### TRIBUTE TO MICHELLE MATTHIES

Mr. THUNE. Madam President, today I recognize Michelle Matthies, an intern in my Sioux Falls, SD, office, for all of the hard work she has done for me, my staff, and the State of South Dakota over the past several months.

Michelle is a graduate of Parker High School in Parker, SD. Currently, she is attending Augustana College, where she is majoring in English and secondary education. She is a hard worker who has been dedicated to getting the most out of her internship experience.

I would like to extend my sincere thanks and appreciation to Michelle for all of the fine work she has done and wish her continued success in the years to come.

#### ADDITIONAL STATEMENTS

##### REMEMBERING ELDEN HUGHES

• Mrs. BOXER. Madam President, last weekend California and the Nation lost one of our great environmental champions when Elden Hughes died at his desert home in Joshua Tree, CA, at age 80.

As a longtime activist with the Sierra Club and former president of its Angeles Chapter, Elden led successful campaigns to protect California's wild rivers and preserve the historic Union Pacific Railroad depot in the desert town of Kelso, CA.

But Elden Hughes is best known and fondly remembered as one of the tireless leaders of the long grassroots effort to enact the 1994 California Desert Protection Act, which created a new national park in the Eastern Mojave Desert and established higher levels of protection for Death Valley, Joshua Tree, and other desert lands.

Elden was born in 1931 in Whittier, CA, the son of cattle farmers from Modoc County. When he was 13, the family moved out of town and bought a ranch where Elden made enough money raising hogs to buy an old car and begin a lifetime of exploring California's wild places. After earning his way through college, he worked in the family plumbing supply business, which he then sold to become the executive vice president of a major computer service company.

Elden's interest in river-running, spelunking, archaeology, nature photography, and the desert led him to join Sierra Club expeditions and gradually become involved in the club's conservation activities. In the early 1980s, he led a grassroots letter-writing campaign that convinced California Senator Pete Wilson to sponsor "wild and

scenic" designation for a major stretch of the Tuolumne River. In the late 1980s, Elden led the successful "three rivers campaign" that obtained wild and scenic designations for portions of the Kings, Kern, and Merced Rivers.

Elden worked with Congressman JERRY LEWIS to save the historic Kelso Depot, in what was then the Eastern Mojave National Scenic Area. Showing their usual flair and creativity, Elvin and his wife Patty galvanized public opinion on the depot issue by convincing Amtrak to run a special "Desert Wind" train from Los Angeles to Kelso, where Elden led the crowd in singing railroad songs.

In 1986, as the new chair of the Sierra Club Angeles Chapter, Elden was invited to attend a press conference on the introduction of the first Desert Bill, authored by Senator Alan Cranston. He brought along some of his photos of the Mojave and was soon leading a group of amateur photographers on a 2-year project cataloguing the fragile beauty of this unique natural area.

In 1990, Elden retired from business to become the west coast spokesman for the Desert Bill. He was a natural, and the media loved him. As Frank Wheat noted in his book "California Desert Miracle," Elden was also "knowledgeable, quotable, pleasant to be with, and willing to go to great lengths to show members of the press what the Desert Bill was intended to protect. Soon he was drawing reporters as a lamp draws moths."

Meanwhile, Elden and Patty had adopted a pair of abandoned pet tortoises and successfully bred a new family. When the babies were 5 months old, Elden and Patty took them on a cross-country tour to raise media and public interest in protecting the desert tortoise. Over the years, they made nine trips to Washington, DC, to gain congressional support for the Desert Bill. Once, when an airline security guard told them they couldn't bring pet tortoises on the plane, Patty said, "They aren't pets, they're lobbyists."

Finally, in 1994, Congress passed the California Desert Protection Act, and I was proud to cosponsor this bill with Senator FEINSTEIN. Elden Hughes was instrumental in passing this landmark legislation. Today, the Mojave National Preserve and the Kelso Depot stand as monuments to this joyous, creative, and inexhaustible man who did so much to protect California's priceless natural heritage.

On behalf of the people of California, who have benefitted so much from Elden's life work, I send my deepest gratitude and condolences to his wife Patty; his sons, Mark, Paul, and Charles; and his three grandchildren.●

## MESSAGES FROM THE HOUSE

### ENROLLED BILLS SIGNED

At 9:39 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 1541. An act to revise the Federal charter for the Blue Star Mothers of America, Inc. to reflect a change in eligibility requirements for membership.

S. 1639. An act to amend title 36, United States Code, to authorize the American Legion under its Federal charter to provide guidance and leadership to the individual departments and posts of the American Legion, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. INOUE).

At 1:03 p.m., a message from the House of Representatives, delivered by Mr. Novotny, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 10. An act to amend chapter 8 of title 5, United States Code, to provide that major rules of the executive branch shall have no force or effect unless a joint resolution of approval is enacted into law.

H.R. 944. An act to eliminate an unused lighthouse reservation, provide management consistency by incorporating the rocks and small islands along the coast of Orange County, California, into the California Coastal National Monument managed by the Bureau of Land Management, and meet the original Congressional intent of preserving Orange County's rocks and small islands, and for other purposes.

H.R. 1254. An act to amend the Controlled Substances Act to place synthetic drugs in Schedule I.

H.R. 1560. An act to amend the Ysleta del Sur Pueblo and Alabama and Coushatta Indian Tribes of Texas Restoration Act to allow the Ysleta del Sur Pueblo Tribe to determine blood quantum requirement for membership in that tribe.

H.R. 2351. An act to direct the Secretary of the Interior to continue stocking fish in certain lakes in the North Cascades National Park, Ross Lake National Recreation Area, and Lake Chelan National Recreation Area.

H.R. 2360. An act to amend the Outer Continental Shelf Lands Act to extend the Constitution, laws, and jurisdiction of the United States to installations and devices attached to the seabed of the Outer Continental Shelf for the production and support of production of energy from sources other than oil and gas, and for other purposes.

The message also announced that the House has passed the following bills, without amendment:

S. 535. An act to authorize the Secretary of the Interior to lease certain lands within Fort Pulaski National Monument, and for other purposes.

S. 683. An act to provide for the conveyance of certain parcels of land to the town of Mantua, Utah.

The message further announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 32. Concurrent resolution to authorize the Clerk of the House of Rep-

resentatives to make technical corrections in the enrollment of H.R. 470, an Act to further allocate and expand the availability of hydroelectric power generated at Hoover Dam, and for other purposes.

### ENROLLED BILLS SIGNED

At 4:40 p.m., a message from the House of Representatives, delivered by Mr. Novotny, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 535. An act to authorize the Secretary of the Interior to lease certain lands within Fort Pulaski National Monument, and for other purposes.

S. 683. An act to provide for the conveyance of certain parcels of land to the town of Mantua, Utah.

The enrolled bills were subsequently signed by the President pro tempore (Mr. INOUE).

## MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 10. An act to amend chapter 8 of title 5, United States Code, to provide that major rules of the executive branch shall have no force or effect unless a joint resolution of approval is enacted into law; to the Committee on Homeland Security and Governmental Affairs.

H.R. 944. An act to eliminate an unused lighthouse reservation, provide management consistency by incorporating the rocks and small islands along the coast of Orange County, California, into the California Coastal National Monument managed by the Bureau of Land Management, and meet the original Congressional intent of preserving Orange County's rocks and small islands, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 1021. An act to prevent the termination of the temporary office of bankruptcy judges in certain judicial districts; to the Committee on the Judiciary.

H.R. 1254. An act to amend the Controlled Substances Act to place synthetic drugs in Schedule I; to the Committee on the Judiciary.

H.R. 1560. An act to amend the Ysleta del Sur Pueblo and Alabama and Coushatta Indian Tribes of Texas Restoration Act to allow the Ysleta del Sur Pueblo Tribe to determine blood quantum requirement for membership in that tribe; to the Committee on Indian Affairs.

H.R. 2351. An act to direct the Secretary of the Interior to continue stocking fish in certain lakes in the North Cascades National Park, Ross Lake National Recreation Area, and Lake Chelan National Recreation Area; to the Committee on Energy and Natural Resources.

H.R. 2360. An act to amend the Outer Continental Shelf Lands Act to extend the Constitution, laws, and jurisdiction of the United States to installations and devices attached to the seabed of the Outer Continental Shelf for the production and support of production of energy from sources other than oil and gas, and for other purposes; to the Committee on Energy and Natural Resources.

## ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, December 8, 2011, she

had presented to the President of the United States the following enrolled bills:

S. 1541. An act to revise the Federal charter for the Blue Star Mothers of America, Inc. to reflect a change in eligibility requirements for membership.

S. 1639. An act to amend title 36, United States Code, to authorize the American Legion under its Federal charter to provide guidance and leadership to the individual departments and posts of the American Legion, and for other purposes.

#### REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mrs. BOXER, from the Committee on Environment and Public Works, with an amendment in the nature of a substitute:

S. 1400. A bill to restore the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches, and coastal wetlands of Gulf Coast States, to create jobs and revive the economic health of communities adversely affected by the explosion on, and sinking of, the mobile offshore drilling unit Deepwater Horizon, and for other purposes (Rept. No. 112-100).

By Mr. LEAHY, from the Committee on the Judiciary, with an amendment:

S. 678. A bill to increase the penalties for economic espionage.

By Mr. LEAHY, from the Committee on the Judiciary, without amendment:

S. 1886. A bill to prevent trafficking in counterfeit drugs.

#### EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of nominations were submitted:

By Mr. ROCKEFELLER for the Committee on Commerce, Science, and Transportation.

\*Rebecca M. Blank, of Maryland, to be Deputy Secretary of Commerce.

\*Ajit Varadaraj Pai, of Kansas, to be a Member of the Federal Communications Commission for a term of five years from July 1, 2011.

\*Jessica Rosenworcel, of Connecticut, to be a Member of the Federal Communications Commission for a term of five years from July 1, 2010.

\*Jon D. Leibowitz, of Maryland, to be a Federal Trade Commissioner for a term of seven years \*pm September 26, 2010.

\*Maureen K. Ohlhausen, of Virginia, to be a Federal Trade Commissioner for a term of seven years from September 26, 2011.

By Mr. LEAHY for the Committee on the Judiciary.

Kathryn Keneally, of New York, to be an Assistant Attorney General.

\*Nomination was reported with recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

(Nominations without an asterisk were reported with the recommendation that they be confirmed.)

#### INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first

and second times by unanimous consent, and referred as indicated:

By Mr. ISAKSON:

S. 1963. A bill to revoke the charters for the Federal National Mortgage Corporation and the Federal Home Loan Mortgage Corporation upon resolution of their obligations, to create a new Mortgage Finance Agency for the securitization of single family and multifamily mortgages, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Ms. STABENOW (for herself and Mr. PORTMAN):

S. 1964. A bill to amend the Internal Revenue Code of 1986 to exempt from the harbor maintenance tax certain commercial cargo loaded or unloaded at United States ports in the Great Lakes Saint Lawrence Seaway System; to the Committee on Finance.

By Mr. MORAN (for himself and Mr. WARNER):

S. 1965. A bill to jump-start economic recovery through the formation and growth of new businesses, and for other purposes; to the Committee on Finance.

By Ms. AYOTTE (for herself, Mr. BEGICH, Mr. VITTER, and Mr. RUBIO):

S. 1966. A bill to direct the Secretary of Homeland Security to reform the process for enrolling, activating, issuing, and renewing Transportation Worker Identification Credentials so that applicants are not required to visit a designated enrollment center more than once; to the Committee on Commerce, Science, and Transportation.

By Mr. JOHNSON of South Dakota (for himself and Mr. COCHRAN):

S. 1967. A bill to amend title XVIII of the Social Security Act to provide for the treatment of certain physician pathology services under the Medicare Program; to the Committee on Finance.

By Mr. WARNER (for himself and Mr. KIRK):

S. 1968. A bill to require the Secretary of Transportation to establish a pilot program to increase accountability with respect to outcomes of transportation investments, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Ms. STABENOW (for herself and Mr. MENENDEZ):

S. 1969. A bill to amend title XI of the Social Security Act to improve the quality, health outcomes, and value of maternity care under the Medicaid and CHIP programs by developing a maternity care quality measurement program, evaluating maternity care home models, and supporting maternity care quality collaboratives; to the Committee on Finance.

By Mr. MERKLEY (for himself, Mr. BENNET, and Ms. LANDRIEU):

S. 1970. A bill to amend the securities laws to provide for registration exemptions for certain crowdfunded securities, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. INHOFE (for himself and Mr. JOHANNES):

S. 1971. A bill to provide for the establishment of a committee to assess the effects of certain Federal regulatory mandates and to provide for relief from those mandates, and for other purposes; to the Committee on Environment and Public Works.

By Mr. COATS (for himself and Ms. AYOTTE):

S. 1972. A bill to amend the Food and Drug Administration's mission; to the Committee on Health, Education, Labor, and Pensions.

By Mrs. GILLIBRAND (for herself, Mr. SCHUMER, Mr. LAUTENBERG, and Mr. KERRY):

S. 1973. A bill to prevent gun trafficking in the United States; to the Committee on the Judiciary.

By Mr. UDALL of New Mexico (for himself, Mr. HELLER, Mr. BINGAMAN, Mrs. FEINSTEIN, and Mrs. GILLIBRAND):

S. 1974. A bill to amend the Tariff Act of 1930 to clarify the definition of aircraft and the offenses penalized under the aviation smuggling provisions under that Act, and for other purposes; considered and passed.

By Mr. DEMINT (for himself, Mr. CORNYN, Mr. VITTER, Mr. TOOMEY, Mr. RISCH, Ms. AYOTTE, Mr. JOHNSON of Wisconsin, Mr. LEE, Mr. PAUL, Mr. BLUNT, Mr. HATCH, Mr. BOOZMAN, Mr. GRAHAM, Mr. KYL, Mrs. HUTCHISON, Mr. CRAPO, Mr. INHOFE, Mr. BARRASSO, Mr. CHAMBLISS, Mr. COBURN, Mr. THUNE, Mr. BURR, Mr. HELLER, Mr. RUBIO, Mr. JOHANNES, and Mr. SESSIONS):

S. 1975. A bill to repeal the authority to provide certain loans to the International Monetary Fund, to prohibit loans to enable the Fund to provide financing for European financial stability and to oppose the provision of such financing, and for other purposes; to the Committee on Foreign Relations.

By Ms. COLLINS (for herself and Mr. COONS):

S. 1976. A bill to authorize educational assistance under the Armed Forces Health Professions Scholarship program for pursuit of advanced degrees in physical therapy and occupational therapy; to the Committee on Armed Services.

By Mr. SANDERS (for himself and Mr. BEGICH):

S.J. Res. 33. A joint resolution proposing an amendment to the Constitution of the United States to expressly exclude for-profit corporations from the rights given to natural persons by the Constitution of the United States, prohibit corporate spending in all elections, and affirm the authority of Congress and the States to regulate corporations and to regulate and set limits on all election contributions and expenditures; to the Committee on the Judiciary.

#### SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. VITTER (for himself, Mr. SHELBY, Mr. COCHRAN, and Mr. WICKER):

S. Res. 346. A resolution expressing the sense of the Senate regarding the Government of Antigua and Barbuda and its actions relating to the Stanford Financial Group fraud; to the Committee on Foreign Relations.

#### ADDITIONAL COSPONSORS

S. 306

At the request of Mr. WEBB, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 306, a bill to establish the National Criminal Justice Commission.

S. 494

At the request of Mr. LIEBERMAN, the name of the Senator from Massachusetts (Mr. BROWN) was added as a cosponsor of S. 494, a bill to amend the

Public Health Service Act to establish a national screening program at the Centers for Disease Control and Prevention and to amend title XIX of the Social Security Act to provide States the option to increase screening in the United States population for the prevention, early detection, and timely treatment of colorectal cancer.

S. 506

At the request of Mr. CASEY, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 506, a bill to amend the Elementary and Secondary Education Act of 1965 to address and take action to prevent bullying and harassment of students.

S. 626

At the request of Ms. CANTWELL, the name of the Senator from Hawaii (Mr. AKAKA) was added as a cosponsor of S. 626, a bill to amend the Internal Revenue Code of 1986 to repeal the shipping investment withdrawal rules in section 955 and to provide an incentive to reinvest foreign shipping earnings in the United States.

S. 752

At the request of Mrs. FEINSTEIN, the names of the Senator from New Jersey (Mr. MENENDEZ) and the Senator from New Jersey (Mr. LAUTENBERG) were added as cosponsors of S. 752, a bill to establish a comprehensive interagency response to reduce lung cancer mortality in a timely manner.

S. 955

At the request of Mr. LEAHY, his name was added as a cosponsor of S. 955, a bill to provide grants for the renovation, modernization or construction of law enforcement facilities.

S. 985

At the request of Ms. MIKULSKI, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 985, a bill to amend the definition of a law enforcement officer under subchapter III of chapter 83 and chapter 84 of title 5, United States Code, respectively, to ensure the inclusion of certain positions.

S. 996

At the request of Mr. ROCKEFELLER, the name of the Senator from Michigan (Ms. STABENOW) was added as a cosponsor of S. 996, a bill to amend the Internal Revenue Code of 1986 to extend the new markets tax credit through 2016, and for other purposes.

S. 1174

At the request of Ms. STABENOW, the name of the Senator from New Hampshire (Mrs. SHAHEEN) was added as a cosponsor of S. 1174, a bill to provide predictability and certainty in the tax law, create jobs, and encourage investment.

S. 1175

At the request of Mrs. HAGAN, the names of the Senator from Minnesota (Mr. FRANKEN) and the Senator from

Ohio (Mr. BROWN) were added as cosponsors of S. 1175, a bill to provide, develop, and support 21st century readiness initiatives that assist students in acquiring the skills necessary to think critically and solve problems, be an effective communicator, collaborate with others, and learn to create and innovate.

S. 1440

At the request of Mr. BENNET, the names of the Senator from Louisiana (Ms. LANDRIEU) and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of S. 1440, a bill to reduce preterm labor and delivery and the risk of pregnancy-related deaths and complications due to pregnancy, and to reduce infant mortality caused by prematurity.

S. 1591

At the request of Mr. KIRK, the name of the Senator from Wyoming (Mr. BARRASSO) was added as a cosponsor of S. 1591, a bill to award a Congressional Gold Medal to Raoul Wallenberg, in recognition of his achievements and heroic actions during the Holocaust.

S. 1629

At the request of Mrs. GILLIBRAND, the name of the Senator from Minnesota (Ms. KLOBUCHAR) was added as a cosponsor of S. 1629, a bill to amend title 38, United States Code, to clarify presumptions relating to the exposure of certain veterans who served in the vicinity of the Republic of Vietnam, and for other purposes.

S. 1680

At the request of Mr. CONRAD, the name of the Senator from Kansas (Mr. MORAN) was added as a cosponsor of S. 1680, a bill to amend title XVIII of the Social Security Act to protect and preserve access of Medicare beneficiaries in rural areas to health care providers under the Medicare program, and for other purposes.

S. 1749

At the request of Mr. WARNER, the name of the Senator from Rhode Island (Mr. WHITEHOUSE) was added as a cosponsor of S. 1749, a bill to establish and operate a National Center for Campus Public Safety.

S. 1866

At the request of Mr. RUBIO, the names of the Senator from Utah (Mr. LEE), the Senator from New York (Mr. SCHUMER) and the Senator from Idaho (Mr. RISCH) were added as cosponsors of S. 1866, a bill to provide incentives for economic growth, and for other purposes.

S. 1872

At the request of Mr. CASEY, the name of the Senator from Nevada (Mr. HELLER) was added as a cosponsor of S. 1872, a bill to amend the Internal Revenue Code of 1986 to provide for the tax treatment of ABLE accounts established under State programs for the care of family members with disabilities, and for other purposes.

S. 1884

At the request of Mr. DURBIN, the name of the Senator from Tennessee (Mr. CORKER) was added as a cosponsor of S. 1884, a bill to provide States with incentives to require elementary schools and secondary schools to maintain, and permit school personnel to administer epinephrine at schools.

S. 1896

At the request of Ms. AYOTTE, the name of the Senator from Utah (Mr. LEE) was added as a cosponsor of S. 1896, a bill to eliminate the automatic inflation increases for discretionary programs built into the baseline projections and require budget estimates to be compared with the prior year's level.

S. 1925

At the request of Mr. LEAHY, the names of the Senator from Minnesota (Mr. FRANKEN), the Senator from New York (Mr. SCHUMER) and the Senator from Rhode Island (Mr. WHITEHOUSE) were added as cosponsors of S. 1925, a bill to reauthorize the Violence Against Women Act of 1994.

S. 1954

At the request of Mrs. HUTCHISON, the name of the Senator from North Carolina (Mr. BURR) was added as a cosponsor of S. 1954, a bill to amend title 49, United States Code, to provide for expedited security screenings for members of the Armed Forces.

S. 1959

At the request of Mr. BURR, the names of the Senator from South Carolina (Mr. DEMINT) and the Senator from Florida (Mr. RUBIO) were added as cosponsors of S. 1959, a bill to require a report on the designation of the Haqqani Network as a foreign terrorist organization and for other purposes.

S. 1961

At the request of Mr. REED, the names of the Senator from Alaska (Ms. MURKOWSKI) and the Senator from South Dakota (Mr. JOHNSON) were added as cosponsors of S. 1961, a bill to provide level funding for the Low-Income Home Energy Assistance Program.

AMENDMENT NO. 1209

At the request of Mr. NELSON of Florida, the name of the Senator from Connecticut (Mr. BLUMENTHAL) was added as a cosponsor of amendment No. 1209 proposed to S. 1867, an original bill to authorize appropriations for fiscal year 2012 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. COLLINS (for herself and Mr. COONS):

S. 1976. A bill to authorize educational assistance under the Armed

Forces Health Professions Scholarship program for pursuit of advanced degrees in physical therapy and occupational therapy; to the Committee on Armed Services.

Ms. COLLINS. Mr. President, I rise today to introduce a bill to allow physical and occupational therapists to enroll in the Armed Forces Health Professions Scholarship Program. I am pleased to be joined in this effort by my colleague, Senator COONS of Delaware. Our legislation provides tuition assistance to critical health care professionals in exchange for service as a commissioned medical officer.

Unfortunately, while the need for physical therapists has grown during the last ten years of combat, neither the Department of Defense nor the military services have conducted a separate analysis of the current or future DoD workforce requirements for occupational and physical therapists, even though such an analysis was required by last year's Defense authorization bill.

This legislation would allow the military services to extend the same kind of educational benefits to physical and occupational therapists that are already afforded to physicians, dentists, physician assistants, and even veterinarians.

Physical and occupational therapists at the military's major medical centers serve approximately 600 wounded warriors every day on their road to recovery. More than 32,000 service members have been wounded in Iraq and Afghanistan, including many who have suffered very serious injuries and amputations. Physical and occupational therapists play a critical role in the prevention of injury, rehabilitation, and recovery of wounded warriors. They not only serve in medical facilities, but are also embedded with combat brigade teams on the battlefield. They use their medical training and skill to overcome impairments, regardless of the cause to enable service members to overcome disability and succeed in all aspects of life.

The idea for this bill came directly from a visit I had with a wounded Marine from Maine at the National Military Medical Center in Bethesda, Maryland in November. He was severely wounded by an IED in Afghanistan. He lost part of one leg and his other leg contains shrapnel wounds. Both of his arms were wounded, and he has a traumatic brain injury as well. In short, he has very serious wounds that are going to require a very lengthy recovery period. But, his spirits are amazingly strong and upbeat.

However, when I asked him if he had any concerns, while he praised the care he was receiving, he said there was a severe shortage of physical therapists and other trained clinical personnel to help him in what is going to be a very long recovery. He is expected to be at

Bethesda for another nine months. It troubles me that he believes there are not a sufficient number of physical therapists to help him and the other wounded warriors who are hospitalized at Bethesda.

While the Department of Defense reports that it does not face a shortage in these professions overall, both the Air Force and the Navy report shortages in physical therapists, physical therapy technicians, and occupational therapists. One out of every four physical therapist positions in the active duty Navy is currently unfilled. So including these medical professions in this existing educational program would help meet this need.

This bill is also endorsed by both the American Physical Therapy Association and the American Occupational Therapy Association, who agree this effort will help curtail a possible shortage of these valuable professionals in the future.

I wish to point out, we are not authorizing additional or new funding in this bill, it is simply an important insurance policy against a shortfall of these medical professions that will help the Navy and the Air Force fill vacancies. After all, it is these talented and committed professionals who are helping our wounded warriors return to living full and independent lives.

Mr. President, I ask unanimous consent that letters of support be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows:

AMERICAN PHYSICAL  
THERAPY ASSOCIATION.

Senator SUSAN COLLINS,  
*Dirksen Senate Office Building,*  
*Washington, DC.*

DEAR SENATOR COLLINS: On behalf of the more than 77,000 members of the American Physical Therapy Association, I write to thank you for your amendment to the National Defense Authorization Act and your introduction of legislation to include physical therapists in the Health Professions Scholarship Program (HPSP).

APTA commends your efforts to add physical therapists to the HPSP. This legislation will enable more of these highly qualified professionals to help treat our nation's wounded warriors and ensure that there will be no shortage in the future. There should never be any disruption in care for the reason of inadequate personnel.

As you know, physical therapists play a critical role in the prevention of injury, rehabilitation, and recovery of wounded warriors around the world. They not only serve at medical facilities like the Walter Reed National Military Medical Center (WRNMMC), but they are also found on the battlefield with the Army Medical Specialist Corps and are embedded with combat brigade teams. They aid in shortening the recovery time of soldiers so they can return to service, and are a necessary and integral part of the health care structure of the armed forces.

Thank you for your commitment to improving the rehabilitation and well being of our wounded warriors. Please contact Mi-

chael Hurlbut, Associate Director of Congressional Affairs, at [michaelhurlbut@apta.org](mailto:michaelhurlbut@apta.org) or 703-706-3160, if you have any questions or would like any additional information.

Sincerely,  
R. SCOTT WARD, PT, PhD,  
*President.*

THE AMERICAN OCCUPATIONAL  
THERAPY ASSOCIATION, INC.,  
*Bethesda, MD, December 7, 2011.*

Hon. SUSAN COLLINS,  
*U.S. Senate,*  
*Washington, DC.*

DEAR SENATOR COLLINS: On behalf of the American Occupational Therapy Association (AOTA), the national professional association representing the interests of more than over 140,000 occupational therapists, occupational therapy assistants and students of occupational therapy, I am writing to thank you for sponsoring legislation to promote occupational therapy within the United States military. This legislation seeks to authorize educational assistance under the Armed Forces Health Professions Scholarship program for the pursuit of advanced degrees in occupational therapy and physical therapy.

Occupational therapy is a skilled health, wellness and rehabilitation service with the goal of improving function, independence and quality of life so that individuals can lead more productive and rewarding lives. Occupational therapists work within the military from the frontlines in Combat Stress Control teams throughout the continuum of care to long-term rehabilitation and stateside community reintegration. While occupational therapists are present in every branch of the service the Army has the largest and most prominent role for occupational therapy; using the professions unique focus on overcoming impairments regardless of the cause to enable soldiers to overcome disability and succeed in all aspects of life.

The current wars in Iraq and Afghanistan have dramatically increased the demand for occupational therapy practitioners within the military. The signature injuries of these conflicts include traumatic brain injury, post-traumatic stress disorder, traumatic amputation and poly-trauma. Within both the military and the Veterans Administration occupational therapists work as critical members of the treatment teams to address each of these conditions.

AOTA and our members in the civilian world and the military appreciate your leadership and vision in promoting occupational therapy education and training for service members so that they can go on to meet the needs of fellow soldiers and society as a whole. Both within the military and the private sector, demand for occupational therapy is expected to increase dramatically and your legislation can help meet those needs.

We look forward to working with you and your staff to enact this legislation during this session of Congress so that more occupational therapists are trained to meet the health care, rehabilitation and reintegration needs of our service members.

Sincerely,  
TIM NANOF, MSW,  
*Director of Federal Affairs.*

By Mr. SANDERS (for himself and Mr. BEGICH):

S.J. Res. 33. A joint resolution proposing an amendment to the Constitution of the United States to expressly exclude for-profit corporations from the rights given to natural persons by

the Constitution of the United States, prohibit corporate spending in all elections, and affirm the authority of Congress and the States to regulate corporations and to regulate and set limits on all election contributions and expenditures; to the Committee on the Judiciary.

Mr. SANDERS. Mr. President, I am submitting a resolution to amend the U.S. Constitution. I do not do this lightly, nor have I ever done something such as this before. The U.S. Constitution is an extraordinary document which has served our country well for over 200 years and, in my view, it should not be amended often.

But in light of the disastrous Supreme Court's 5-to-4 decision in the Citizens United case, I see no alternative but a constitutional amendment. I should add that a similar resolution has been offered in the House by Congressman TED DEUTCH of Florida. This constitutional amendment is supported by such grassroots organizations as Public Citizen, People for the American Way, and the Center for Media and Democracy.

Let me go on record as strongly as I can, and as clearly as I can, in stating that I strongly disagree with the Supreme Court's Citizens United decision. In my view, a corporation is not a person. In my view, a corporation does not have first amendment rights to spend as much money as it wants, without disclosure, on a political campaign. In my view, corporations should not be able to go into their treasuries and spend millions and millions of dollars on a campaign in order to buy elections.

I do not believe that is what American democracy is supposed to be about. I do not believe that is what the bravest of the brave from our country, fighting for democracy, fought and died to preserve. Almost 2 years ago, in its now infamous Citizens United decision, the United States Supreme Court upended over a century of precedent, taking a somewhat narrow legal question and using it as an opportunity to radically change our political landscape, unleashing a tsunami of corporate spending on campaign ads that has just begun. Make no mistake, the Citizens United ruling has radically changed the nature of our democracy, further tilting the balance of power toward the rich and the powerful at a time when already the wealthiest people in this country have never had it so good.

In my view, history will record that the Supreme Court's Citizens United decision is one of the worst decisions ever made by a Supreme Court in the history of our country. While there is no way of knowing for sure, since there are no disclosure requirements in place to track what was spent, it is no secret that already in the 2010 midterm elections, corporations and some very wealthy individuals spent a huge and

unprecedented amount of money to further their political goals. There is no question this is just the beginning of their efforts. At a time when corporations have over \$2 trillion in cash in their bank accounts and are making recordbreaking profits, the American people should be concerned when the Supreme Court says these corporations have a constitutionally protected right to spend, spend, spend shareholders' money to dominate an election as if they were real live persons. There will be no end to the impact corporate interests can have on our campaigns and our democracy if we do not end this Citizens United decision and its impact on our Nation.

All of us in the Senate share one common characteristic. We all run for elections. We all live in the real political world. Let me speak for a moment what I think many of my colleagues in their heart of hearts know to be true; that is, that while the campaign finance system we had before Citizens United was, in my view, a disaster—there is no question it is a disastrous situation where candidates, Members of the Senate, spend huge amounts of time having to raise money, and I know that is distasteful not just for Democrats, it is distasteful to Republicans, it is distasteful for an Independent; that is what we do—now, as a result of Citizens United, that bad situation has become much worse because infinitely more money is going to come into the political process through non-disclosed donations suddenly appearing on TV screens in our States.

According to an October 10, 2011, article in *Politico*:

The billionaire industrialist brothers David and Charles Koch plan to steer more than \$200 million—potentially much more—to conservative groups ahead of Election Day [2012].

What do we think? Do we think American democracy is about a couple of wealthy billionaires putting hundreds of millions of dollars into campaigns without disclosure? Is that the democracy Americans fought and died for in war after war? I think not.

It clearly is not just Republican operatives. There will be Democrats doing the same. So more and more money comes into the system. We do not know where it comes from, and in order to defend ourselves candidates are going to have to raise more money and become more and more dependent on big money interests. Does anybody believe that is what American democracy is supposed to be about?

Let's talk about the practical impacts. What happens on the floor of the Senate? The six largest banks on Wall Street have assets equal to over 65 percent of our GDP, over \$9 trillion—six banks. When an issue comes up that impacts Wall Street—some of us, for example, think it might be a good idea to break up these huge banks. Members

walk to the desk up there and they have to decide am I going to vote for this, am I going to vote against it—with full knowledge that if they vote against the interests of Wall Street, 2 weeks later, there may be ads coming down into their State attacking them. Every Member of the Senate, every Member of the House, in the back of their minds, will be thinking: Gee, if I cast a vote this way, if I take on some big money interests, am I going to be punished for that? Will a huge amount of money be unleashed in my State?

Everybody here understands that is true. It is not just taking on Wall Street, maybe it is taking on the drug companies, maybe it is taking on the private insurance companies, maybe it is taking on the military-industrial complex. But whatever powerful and wealthy special interest we are prepared to take on, on behalf of the interest of the middle-class and working families of this country, when we walk to that desk and we cast that vote, we know in the back of our mind we may be unleashing a tsunami of money coming into our State, and we are going to think twice about how we cast that vote.

I am a proud sponsor of a number of bills that would respond to Citizens United and begin to get a handle on the problem. I would like to acknowledge them very briefly. One is the Disclose Act, sponsored by Senator SCHUMER, which would force corporations spending money on campaign ads to disclose their identity, as candidates have to do. That is a good thing. I support it.

Another is the Fair Elections Now Act, sponsored by Senator DURBIN, which would move us to publicly financed elections. I think that is a very good idea. I support that.

The third piece of legislation is a recent resolution for a campaign finance constitutional amendment, introduced by Senator TOM UDALL of New Mexico, that would make it clear that Congress and the States have the authority to write laws to regulate campaign spending across the country and make sure our State and Federal elections are about what is right for our democracy, and I support Senator UDALL's resolution. But even these excellent pieces of legislation are not enough.

The Constitution of this country has served us well for more than 200 years. But when the Supreme Court says—for purposes of the first amendment—corporations are people, that writing checks from the company's bank account is constitutionally protected speech, and that even attempts by the Federal Government and States to impose reasonable restrictions on campaign ads are unconstitutional, when that occurs, our democracy is in grave danger. Something more needs to be done. There needs to be something more fundamental and indisputable, something that cannot be turned on its

head by a 5-to-4 Supreme Court decision.

We have to send a constitutional amendment to the States that says simply and straightforwardly what everyone—except five members of the U.S. Supreme Court—seems to understand; that is, corporations are not people. Bank of America is not a person. ExxonMobil is not a person.

The resolution I am offering calls for an amendment to be sent to the States that would do that. It would make perfectly clear, No. 1, corporations are not persons with equal constitutional rights as real-life, flesh-and-blood human beings; No. 2, corporations are subject to regulation by the people; No. 3, corporations may not make campaign contributions, which has been the law of the land for the last century; No. 4, Congress and States have the power to regulate campaign finance as Senator UDALL's amendment would also say.

This amendment is cosponsored by Senator BEGICH of Alaska, and I would urge all my colleagues to cosponsor this amendment which, in fact, does what its title suggests, saves American democracy.

#### SUBMITTED RESOLUTIONS

#### SENATE RESOLUTION 346—EX-PRESSING THE SENSE OF THE SENATE REGARDING THE GOVERNMENT OF ANTIGUA AND BARBUDA AND ITS ACTIONS RELATING TO THE STANFORD FINANCIAL GROUP FRAUD

Mr. VITTER (for himself, Mr. SHELBY, Mr. COCHRAN, and Mr. WICKER) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 346

Whereas the Government of Antigua and Barbuda has committed numerous acts against the interests of United States citizens and operated the financial sector and judicial system of Antigua and Barbuda in a manner that is manifestly contrary to the public policy of the United States;

Whereas 20,000 investors, including many United States citizens, lost \$7,200,000,000 in an alleged Ponzi scheme involving fictitious certificates of deposit from Stanford International Bank, an offshore bank chartered in Antigua and Barbuda;

Whereas the Government of Antigua and Barbuda violated the order of the United States District Court for the Northern District of Texas regarding the receivership proceeding initiated at the request of the United States Securities and Exchange Commission (referred to in this preamble as the "Securities and Exchange Commission"), in which the court took exclusive control of all the assets owned by Allen Stanford and Stanford-affiliated entities around the world and documents relating to those assets;

Whereas the Government of Antigua and Barbuda challenged the authority of the United States District Court for the Northern District of Texas by—

(1) initiating a separate and competing liquidation proceeding for Stanford International Bank; and

(2) appointing liquidators who have defied the orders of the court in multiple jurisdictions around the world by litigating for control of hundreds of millions of dollars in bank accounts in the United Kingdom, Switzerland, and Canada;

Whereas the Government of Antigua and Barbuda challenged the authority of the United States Department of Justice by seeking to obtain control of hundreds of millions of dollars in bank accounts in the United Kingdom, Switzerland, and Canada that had been frozen at the request of the Department of Justice in accordance with multilateral criminal asset forfeiture treaties;

Whereas the courts of Antigua and Barbuda have denied recognition of the United States district court-appointed receiver for all assets of Allen Stanford and Stanford-affiliated entities;

Whereas the Stanford International Bank liquidators appointed by the Eastern Caribbean Court of Appeals now seek recognition of the Antigua and Barbuda liquidation proceeding as a foreign insolvency proceeding under chapter 15 of title 11, United States Code, in the United States District Court for the Northern District of Texas;

Whereas the Government of Antigua and Barbuda acknowledged in a statement in March 2010 that—

(1) Stanford International Bank "was operating in Antigua as a transit point and for purposes of registration and regulation"; and

(2) "[t]he business of Stanford International Bank, Ltd. was run from Houston, Texas, and its books maintained in Memphis, Tennessee";

Whereas Allen Stanford, the Stanford Financial Group, and the Government of Antigua and Barbuda enjoyed a mutually beneficial business relationship involving numerous economic development projects and loans to the government of at least \$85,000,000, and forensic accounting reports have identified those loans as having been made from Stanford International Bank certificate of deposit funds;

Whereas, in June 2010, the Securities and Exchange Commission alleged that Allen Stanford bribed Leroy King, the chief executive officer of the Financial Services Regulatory Commission of Antigua and Barbuda, to persuade Leroy King to—

(1) not investigate Stanford International Bank;

(2) provide Allen Stanford with access to the confidential files of the Financial Services Regulatory Commission;

(3) allow Allen Stanford to dictate the response of the Financial Services Regulatory Commission to inquiries by the Securities and Exchange Commission about Stanford International Bank; and

(4) withhold information from the Securities and Exchange Commission;

Whereas, in June 2010, the United States Department of Justice indicted Leroy King on criminal charges and ordered Leroy King to be extradited to the United States;

Whereas the Government of Antigua and Barbuda has failed to complete the process of extraditing Leroy King to the United States to stand trial;

Whereas Dr. Errol Cort, who served as the Minister of Finance of Antigua and Barbuda from 2004 to 2009, allegedly received more than \$1,000,000 of fraudulently transferred Stanford investor funds either directly or indirectly through his law firm, Cort & Cort;

Whereas Cort & Cort, the law firm of Dr. Errol Cort, served as the official registered agent for Stanford International Bank until June 2009;

Whereas the Government of Antigua and Barbuda, along with the Eastern Caribbean Central Bank—

(1) seized control and possession of the Allen Stanford-owned Bank of Antigua without compensation to the United States district court-appointed receiver;

(2) renamed that bank the "Eastern Caribbean Amalgamated Bank"; and

(3) allocated a 40 percent ownership position to the Government of Antigua and Barbuda and 60 percent ownership to 5 Eastern Caribbean Central Bank member banks;

Whereas, after the fraud that the Stanford Financial Group allegedly perpetrated was made public, the Government of Antigua and Barbuda expropriated numerous Allen Stanford-owned properties in Antigua and Barbuda worth up to several hundred million dollars, and the government has not turned over those properties to the United States district court-appointed receiver;

Whereas the Government of Antigua and Barbuda expropriated without compensation the property known as the Half Moon Bay Resort, which is owned by a group of 12 United States citizens; and

Whereas the Government of Antigua and Barbuda—

(1) has sought and obtained loans from the International Bank for Reconstruction and Development and the International Development Association (commonly known as the "World Bank") and the International Monetary Fund; and

(2) is the recipient of other direct and indirect aid from the United States: Now, therefore, be it

*Resolved*, That it is the sense of the Senate that—

(1) provision of all further direct or indirect aid or assistance, including assistance derived from Federal funds, by the United States Government to the Government of Antigua and Barbuda should be suspended until the Government of Antigua and Barbuda provides complete redress of the issues described in the preamble, including through—

(A) the full cooperation of the Government of Antigua and Barbuda and any appointee of that government, including the joint liquidators of Stanford International Bank, with the United States Securities and Exchange Commission, the United States Department of Justice, the United States district court-appointed receiver, and the United States district court-appointed Stanford Investors Committee, in investigating the Stanford Financial Group fraud and marshaling the assets of Allen Stanford and all Stanford-affiliated entities;

(B) an agreement by the Government of Antigua and Barbuda to be subject to the jurisdiction and bound by the judgment of any United States court that adjudicates the claims relating to the Stanford Financial Group fraud;

(C) the transfer of the assets seized by the Government of Antigua and Barbuda, or obtained by the joint liquidators of Stanford International Bank, to the United States district court-appointed receiver for the benefit of victims of the Stanford Financial Group fraud;

(D) a contribution by the Government of Antigua and Barbuda to the United States receivership estate for the benefit of victims of the Stanford Financial Group fraud, in an amount equal to the amount of any funds

that Allen Stanford or any Stanford-affiliated entity provided to the Government or government officials of Antigua and Barbuda;

(E) a contribution by the Government of Antigua and Barbuda to the United States receivership estate for the benefit of victims of the Stanford Financial Group fraud, in an amount equal to any payments that Allen Stanford or the Stanford Financial Group made to Leroy King or any other official of the Government of Antigua and Barbuda for the purpose of subverting regulatory oversight of Stanford International Bank;

(F) the fulfillment by the Government of Antigua and Barbuda of its obligations relating to the expropriation of the Half Moon Bay Resort; and

(G) an agreement by the Government of Antigua and Barbuda to not—

(i) interfere with the receivership commenced by the United States Government; and

(ii) seek control of assets claimed by the United States Government; and

(2) the Secretary of the Treasury should direct the United States Executive Directors of the International Bank for Reconstruction and Development and the International Development Association (commonly known as the "World Bank") and the International Monetary Fund to use the voice and vote of the United States to ensure that any future loan made by the World Bank or the International Monetary Fund to the Government of Antigua and Barbuda is conditioned on providing complete redress of the matters, and satisfaction of the requirements, described under paragraph (1).

#### NOTICE OF HEARING

##### COMMITTEE ON HEALTH, EDUCATION, LABOR, AND PENSIONS

Mr. HARKIN. Mr. President, I wish to announce that the Committee on Health, Education, Labor, and Pensions will meet in open session on Thursday, December 15, 2011, at 10 a.m. in SD-430 to conduct a hearing entitled "Prescription Drug Shortages: Examining a Public Health Concern and Potential Solutions."

For further information regarding this meeting, please contact the committee at (202) 224-7675.

#### AUTHORITY FOR COMMITTEES TO MEET

##### COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on December 8, 2011, at 10 a.m. in room 253 of the Russell Senate Office Building.

The Committee will hold a hearing entitled, "ICANN's Expansion of Top Level Domains."

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and

Transportation be authorized to meet during the session of the Senate on December 8, 2011, in the President's Room, at 10:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on December 8, 2011, at 9:30 a.m., in room 366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on December 8, 2011, at 9:30 a.m., in room 406 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON FOREIGN RELATIONS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on December 8, 2011, at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON HEALTH, EDUCATION, LABOR, AND PENSIONS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions be authorized to meet during the session of the Senate to conduct a hearing entitled "Tales from the Unemployment Line: Barriers Facing the Long-Term Unemployed" on December 8, 2011, at 9:45 a.m., in room 106 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON INDIAN AFFAIRS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet during the session of the Senate on December 8, 2011, at 2:15 p.m., in room 628 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### COMMITTEE ON THE JUDICIARY

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on December 8, 2011, at 10 a.m., in SD-226 of the Dirksen Senate Office Building to conduct an executive business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### SELECT COMMITTEE ON INTELLIGENCE

Mr. DURBIN. Mr. President, I ask unanimous consent that the Select

Committee on Intelligence be authorized to meet during the session of the Senate on December 8, 2011, at 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

##### SUBCOMMITTEE ON WATER AND POWER

Mr. DURBIN. Mr. President, I ask unanimous consent that the Subcommittee on Water and Power be authorized to meet during the session of the Senate on December 8, 2011, at 2:30 p.m., in room 366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CONSENT OF CONGRESS TO AN AMENDMENT TO THE COMPACT BETWEEN THE STATES OF MIS- SOURI AND ILLINOIS

Mr. REID. I ask that the Chair lay before the Senate a message from the House with respect to S.J. Res. 22.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

S.J. RES. 22

*Resolved*, That the resolution from the Senate (S.J. Res. 22) entitled "Joint resolution to grant the consent of Congress to an amendment to the compact between the States of Missouri and Illinois providing that bonds issued by the Bi-State Development Agency may mature in not to exceed 40 years.", do pass with the following amendment:

Strike out all after the resolving clause and insert:

##### SECTION 1. CONSENT.

(a) *IN GENERAL.*—The consent of Congress is given to the amendment of the powers conferred on the Bi-State Development Agency by Senate Bill 758, *Laws of Missouri 2010* and Public Act 96-1520 (Senate Bill 3342), *Laws of Illinois 2010*.

(b) *EFFECTIVE DATE.*—The amendment to the powers conferred by the Acts consented to in subsection (a) shall take effect on the date of enactment of this Act.

##### SEC. 2. APPLICATION OF ACT OF AUGUST 31, 1950.

The provisions of the Act of August 31, 1950 (64 Stat. 568) shall apply to the amendment approved under this joint resolution to the same extent as if such amendment was conferred under the provisions of the compact consented to in such Act.

##### SEC. 3. RIGHT TO ALTER, AMEND, OR REPEAL.

The right to alter, amend, or repeal this joint resolution is expressly reserved.

##### SEC. 4. RESERVATION OF RIGHTS.

The right is reserved to Congress to require the disclosure and furnishings of such information or data by the Bi-State Development Agency as is deemed appropriate by Congress.

Mr. REID. Madam President, I ask unanimous consent that the Senate concur in the House amendment, that the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements related to the measure be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CIVILIAN SERVICE RECOGNITION ACT

Mr. REID. Madam President, I ask unanimous consent that the Homeland

Security Committee be discharged from further consideration of H.R. 2061 and the Senate proceed to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 2061) to authorize the presentation of a United States flag on behalf of Federal civilian employees who die of injuries in connection with their employment.

There being no objection, the Senate proceeded to consider the bill.

Mr. REID. Madam President, I ask unanimous consent that the bill be read the third time and passed, that the motion to reconsider be laid upon the table, with no intervening action or debate, and that any related statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 2061) was ordered to be read a third time, was read the third time, and passed.

#### CORRECTING THE ENROLLMENT OF H.R. 2061

Mr. REID. Madam President, I ask unanimous consent that the Senate proceed to consideration of H. Con. Res. 86, which was received from the House.

The PRESIDING OFFICER. The clerk will report the resolution of title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 86) directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 2061.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. Madam President, I ask unanimous consent that the concurrent resolution be agreed to, the motion to reconsider be laid upon the table, with no intervening action or debate, and that any related statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 86) was agreed to.

#### ULTRALIGHT AIRCRAFT SMUGGLING PREVENTION ACT OF 2011

Mr. REID. Madam President, I ask unanimous consent that the Senate proceed to the consideration of S. 1974.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1974) to amend the Tariff Act of 1930 to clarify the definition of aircraft and the offenses penalized under the aviation smuggling provisions under that Act, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. REID. I ask unanimous consent that the bill be read a third time, passed, and the motion to reconsider be laid upon the table; that there be no intervening action or debate, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1974) was ordered to be read a third time, was read the third time, and passed as follows:

S. 1974

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may cited as the "Ultralight Aircraft Smuggling Prevention Act of 2011".

#### SEC. 2. CLARIFICATION OF DEFINITION OF AIRCRAFT AND OFFENSES UNDER AVIATION SMUGGLING PROVISIONS OF THE TARIFF ACT OF 1930.

(a) IN GENERAL.—Section 590 of the Tariff Act of 1930 (19 U.S.C. 1590) is amended—

(1) by redesignating subsection (g) as subsection (h); and

(2) by inserting after subsection (f) the following:

"(g) DEFINITION OF AIRCRAFT.—In this section, the term 'aircraft'—

"(1) has the meaning given that term in section 40102 of title 49, United States Code; and

"(2) includes a vehicle described in section 103.1 of title 14, Code of Federal Regulations."

(b) CRIMINAL PENALTIES.—Subsection (d) of section 590 of the Tariff Act of 1930 (19 U.S.C. 1590(d)) is amended in the matter preceding paragraph (1) by inserting " , or attempts or conspires to commit," after "commits".

(c) EFFECTIVE DATE.—The amendments made by this section apply with respect to violations of any provision of section 590 of the Tariff Act of 1930 on or after the 30th day after the date of the enactment of this Act.

#### SEC. 3. INTERAGENCY COLLABORATION.

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Defense has worked collaboratively with the Department of Homeland Security to identify equipment, technology, and expertise used by the Department of Defense that could be leveraged by the Department of Homeland Security to help fulfill its missions.

(2) As part of that collaborative effort, the Department of Homeland Security has leveraged Department of Defense equipment, technology, and expertise to enhance the ability of U.S. Customs and Border Protection to detect, track, and engage illicit trafficking across the international borders between the United States and Mexico and the United States and Canada.

(3) Leveraging Department of Defense equipment, technology, and expertise is a cost-effective inter-agency approach to enhancing the effectiveness of the Department of Homeland Security to protect the United States against a variety of threats and risks.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of Defense should—

(1) continue the broad program of cooperation and collaboration with the Secretary of Homeland Security described in subsection (a); and

(2) ensure that the Department of Homeland Security is able to identify equipment and technology used by the Department of Defense that could also be used by U.S. Customs and Border Protection to enhance its efforts to combat illicit trafficking across the international borders between the United States and Mexico and the United States and Canada, including equipment and technology that could be used to detect and track the illicit use of ultralight aircraft.

#### ORDERS FOR MONDAY, DECEMBER 12, 2011

Mr. REID. Madam President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 2 p.m. on Monday, December 12, 2011; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day; that following any leader remarks, the Senate be in a period of morning business until 4:30 p.m. with Senators permitted to speak for up to 10 minutes each; and that following morning business the Senate proceed to executive session under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### PROGRAM

Mr. REID. Madam President, there will be at least two rollcall votes at 5:30 p.m. on Monday in relation to the Eisen and Aponte nominations. Next week, we have additional nominations we expect to consider, and we have to do either a CR or an omnibus spending bill—or one of each, which is possible. We have the balanced budget amendments, the payroll tax, we have unemployment insurance, Medicare reimbursement, tax extenders, including the Medicare reimbursement, and, of course, what we are talking about there is the SGR or the doctor fix.

All of these matters are set to expire at the end of the year.

#### ADJOURNMENT UNTIL MONDAY, DECEMBER 12, 2011, AT 2 P.M.

Mr. REID. If there is no further business to come before the Senate, I ask unanimous consent that the Senate stand adjourned under the previous order.

There being no objection, the Senate, at 6:25 p.m., adjourned until Monday, December 12, 2011, at 2 p.m.

## HOUSE OF REPRESENTATIVES—Thursday, December 8, 2011

The House met at 9 a.m. and was called to order by the Speaker pro tempore (Mrs. MILLER of Michigan).

### DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,  
December 8, 2011.

I hereby appoint the Honorable CANDICE S. MILLER to act as Speaker pro tempore on this day.

JOHN A. BOEHNER,  
*Speaker of the House of Representatives.*

### PRAYER

The Chaplain, the Reverend Patrick J. Conroy, offered the following prayer: Eternal God, we give You thanks for giving us another day.

Once again we come to You to ask wisdom, patience, peace, and understanding for the Members of this people's House.

Give them the generosity of heart, and the courage of true leadership, to work toward a common solution to the many issues facing our Nation. This might call for compromise, even sacrifice on both sides. As true statesmen and -women, may they find the fortitude to make judgments to benefit all Americans in their time of need.

May all that is done this day be for Your greater honor and glory.

Amen.

### THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House her approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. PITTS. Madam Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER pro tempore. The question is on the Speaker's approval of the Journal.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PITTS. Madam Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8, rule XX, further pro-

ceedings on this question will be postponed.

The point of no quorum is considered withdrawn.

### PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Texas (Mr. POE) come forward and lead the House in the Pledge of Allegiance.

Mr. POE of Texas led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will entertain up to five requests for 1-minute speeches on each side of the aisle.

### GONE ROGUE

(Mr. POE of Texas asked and was given permission to address the House for 1 minute.)

Mr. POE of Texas. Madam Speaker, the Justice Department appears to have gone rogue. Instead of enforcing the law, they seem to be recklessly encouraging violations of law.

The Justice Department, with the aid of the ATF, apparently facilitated the smuggling of over 2,000 weapons to the drug cartels south of the border—the national enemy of Mexico. Those weapons were used to kill at least 200 Mexican nationals and two U.S. law enforcement agents.

Who is responsible for this conduct? The Attorney General says he was unaware of Fast and Furious. He claims he either didn't get the memo or he didn't read it. That's a lame excuse. The Attorney General is the chief lawyer and law enforcement officer in the country. If people under him violated U.S. or international law, they need to be held accountable, even if it means somebody goes to jail.

We need an independent special counsel to investigate the Justice Department and the ATF. The Department of Justice cannot be trusted to investigate themselves because the agency has lost credibility. Even Washington insiders responsible for Fast and Furious cannot hide from the long arm of American justice because justice is what we do in this country.

And that's just the way it is.

### CONSUMER FINANCIAL PROTECTION BUREAU

(Mr. MILLER of North Carolina asked and was given permission to address the House for 1 minute.)

Mr. MILLER of North Carolina. Wall Street may be in disrepute with most Americans, but their power here, their political power in Congress, is undiminished.

Americans strongly support a consumer watchdog, the new Consumer Financial Protection Bureau, but the CFPB has become Republicans' new least favorite agency, which greatly pleases their friends on Wall Street.

Months ago, Republicans in the other body announced that they would block the confirmation of the first Director of the new agency, whether the nominee was Elizabeth Warren or anyone else, unless Congress stripped the agency of its independence and of the powers to protect consumers from the abuses that were rampant in the last decade.

In the next day or two, the other body will vote on the confirmation of Richard Cordray to head the CFPB. If the vote goes as expected, Republicans will abuse their constitutional confirmation powers to hobble the new agency. They don't want Elizabeth Warren. They don't want Richard Cordray. They don't want anyone because they don't want the agency, and they don't want the agency because they don't want to protect consumers.

Republicans are willing to leave consumers vulnerable again to predatory lending practices. They're willing to leave the economy vulnerable again to another financial crisis to please their friends on Wall Street.

### OVERREGULATING DIETARY SUPPLEMENTS ENDANGERS AMERICANS' JOBS AND HEALTH

(Mr. HULTGREN asked and was given permission to address the House for 1 minute.)

Mr. HULTGREN. Madam Speaker, I rise today to express my concern over another example of rampant government regulation.

For 17 years, the Food and Drug Administration has sought to ignore congressional intent and create a vast new regulatory regime for dietary supplements. Millions of Americans, including many of my constituents and my family, rely on dietary supplements as part of their everyday health maintenance routine. Moreover, they play an important role in ensuring that people

take individual responsibility for preventative health care. We all can agree that the FDA should not limit Americans' access to dietary supplements.

In January President Obama issued an Executive order to ensure that the FDA's new rules will not limit access. Last week, the comment period on the FDA's draft guidance closed. Now that they've heard from the public, and now that I'm sure they've heard from countless Americans who share my concern, I urge them to go back to the drawing board and ensure that they do not limit Americans' access to dietary supplements.

#### TAX BREAKS FOR RACING INTERESTS—NO ACTION ON PAYROLL TAX CUT AND UNEMPLOYMENT INSURANCE EXTENSION

(Ms. DELAURO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DELAURO. Madam Speaker, at a recent horse sale in Kentucky, Breeder's Cup winner Royal Delta sold for \$8.5 million as part of the sale of the late Saudi Prince Saud bin Khaled's farm. Three of the Saudi's other horses also sold for seven figures. A total of 22 horses were sold that day for \$1 million or more, compared with only eight sold in 2010.

Every millionaire who purchased these horses benefited from a Republican-sponsored taxpayer subsidy written into the last 2008 farm bill. It allows them to recover the cost of the horse. Even as they call for more budget cuts, Republicans used that bill to transfer wealth—nearly \$500 million—from the pockets of ordinary taxpayers to the coffers of wealthy racing interests. This is just one example of how Republicans will go to absurd lengths to support the wealthiest 1 percent of Americans while turning their backs on the middle class and working families.

Now they refuse to take up a payroll tax cut extension and expansion that would mean \$1,500 for 160 million people while they protect the tax breaks for 350,000 millionaires. They refuse to extend unemployment insurance to save 200,000 jobs.

Our Nation deserves better leadership than this. Republicans need to stop giving out handouts to millionaire racing horse owners and start addressing the needs of the vast majority of American families.

□ 0910

#### LIONS CLUB INTERNATIONAL CENTURY OF SERVICE COMMEMORATIVE COIN ACT

(Mr. ALTMIRE asked and was given permission to address the House for 1 minute.)

Mr. ALTMIRE. Madam Speaker, I rise in support of the Lions Club International Century of Service Commemorative Coin Act. This legislation commemorates the Lions Club's 2017 Centennial, at no cost to the taxpayer, as the cost will be paid for by sales to the public.

As former president and zone chairman of my local Lions Club in Allegheny County in Pennsylvania, I know firsthand the great work done by Lions Club International, which now has 1.3 million members and chapters spanning every corner of the globe.

The Lions Clubs focus on the five goals of preserving sight, combating disability, promoting health, serving youth, and disaster relief, for which Lions Club donated over \$50 million in relief funds to Japan, Haiti, and most recently to our own southern States.

I commend the great work carried out by Lions Club International, and look forward to helping them commemorate their 2017 centennial year.

#### SAFEGUARDING SOCIAL SECURITY BENEFITS

(Mr. REYES asked and was given permission to address the House for 1 minute.)

Mr. REYES. Madam Speaker, I rise today on behalf of the millions of people in this country, including the 55 million seniors, disabled workers, widows, and children currently receiving Social Security benefits that have their Social Security unnecessarily targeted as part of the debt reduction talks. Now, more than ever, we cannot jeopardize earned benefits of seniors who have worked so hard over their lifetime to retire with dignity. Every senior deserves dignity in their retirement. Every senior, no exceptions.

For almost two-thirds of America's seniors, Social Security is the primary source of retirement income. Social Security is also a lifeline for workers who became disabled and for families who have lost a breadwinner. In the 16th District of Texas that I represent, over 98,000 El Pasoans receive Social Security benefits. They depend on these benefits to buy groceries, pay utility bills, and fill their gas tanks.

As their Representative, I want to ensure that we uphold the decades-old promise to the American worker, in return for their years of hard work and contributions, that we ensure dignity in retirement, assistance of the disabled, and support for their surviving children.

#### GIVE SOMETHING BACK THIS SEASON

(Mr. BARROW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARROW. Madam Speaker, I rise to encourage my colleagues to give a

little something back this season to those who give so much.

Every year we accumulate thousands of frequent flyer miles as we travel between our districts and Washington, DC. For the past several years, I've donated my frequent flyer miles to the Fisher House's Hero Miles Program, which provides free airline tickets to American soldiers and their families, and to the Children's Miracle Network, a nonprofit organization dedicated to saving and improving the lives of children.

Most of my frequent flyer miles this year came from congressional travel, and I don't think it's right to use them for myself. What I do know is that there is no better way for us to use our frequent flyer miles than to help troops and their families see each other, or to help sick kids get well.

I encourage each of my colleagues to join me and donate the frequent flyer miles you receive for government-funded congressional travel to programs like the Fisher House and the Children's Miracle Network, and to do it this holiday season.

#### MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. 1958. An act to extend the National Flood Insurance Program until May 31, 2012.

#### PROVIDING FOR CONSIDERATION OF H.R. 1633, FARM DUST REGULATION PREVENTION ACT OF 2011

Mr. WEBSTER. Madam Speaker, by direction of the Committee on Rules, I call up House Resolution 487 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 487

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 1633) to establish a temporary prohibition against revising any national ambient air quality standard applicable to coarse particulate matter, to limit Federal regulation of nuisance dust in areas in which such dust is regulated under State, tribal, or local law, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chair and ranking minority member of the Committee on Energy and Commerce. After general debate the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider as an original bill for the purpose of amendment under the five-minute rule the amendment in the nature of a substitute recommended by the Committee on Energy and

Commerce now printed in the bill. The committee amendment in the nature of a substitute shall be considered as read. All points of order against the committee amendment in the nature of a substitute are waived. No amendment to the committee amendment in the nature of a substitute shall be in order except those printed in the report of the Committee on Rules accompanying this resolution. Each such amendment may be offered only in the order printed in the report, may be offered only by a Member designated in the report, shall be considered as read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question in the House or in the Committee of the Whole. All points of order against such amendments are waived. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted. Any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Florida is recognized for 1 hour.

Mr. WEBSTER. Madam Speaker, for the purpose of debate only, I yield the customary 30 minutes to my colleague from Colorado (Mr. POLIS), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

GENERAL LEAVE

Mr. WEBSTER. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. WEBSTER. Madam Speaker, I rise today in support of the rule and the underlying bill. House Resolution 487 provides for a structured rule for consideration of House Resolution 1633, the Farm Dust Regulation Prevention Act.

The rule makes 8 of the 11 amendments submitted to the Rules Committee in order, a majority of which are Democrat amendments, in order to have robust debate here on the floor of the House of Representatives.

H.R. 1633 passed out of the Energy and Commerce Committee with bipartisan support after proceeding through the committee process under regular order. A subcommittee hearing was followed by a subcommittee markup, and then a markup was held by the full committee, which passed the bill with bipartisan support.

The Farm Dust Regulation Prevention Act is quite simple. It seeks regu-

latory certainty in the short term and a regulatory, commonsense approach in the long term. Specifically, this legislation does two things. First, in the short term, the Farm Dust Regulation Prevention Act would temporarily prohibit the EPA from issuing a new coarse particulate matter standard for 1 year.

H.R. 1633 does not prohibit EPA from issuing a revised standard for coarse particulate matter after this 1-year timeout. Coarse particulate matter, or PM<sub>10</sub>, is also known by a much more common name: dust.

Second, in the longer term, this legislation would limit future EPA regulation of nuisance dust to areas where it is not already regulated by State or local government, where it causes substantial adverse effects, and where the benefits of the EPA stepping in would outweigh the costs.

Nuisance dust is particulate matter that is generated primarily from natural sources, dirt roads, earth moving, or other common farm activities. Nuisance dust is pieces of plants plowed up during tilling, soil disturbed by the movement of livestock or bits of rock kicked up by a truck driving down a dirt road. The definition specifically precludes combustion emissions, coal combustion residues and radioactive particulate matter from mining operations.

H.R. 1633 does not eliminate EPA's authority to step in if local or State regulatory efforts fall short of what is needed to adequately protect the public. The bill would allow EPA to step in and regulate "nuisance dust" in areas where States and localities do not do so, if it substantially hurts the public health, and if benefits of applying these standards outweigh the cost.

□ 0920

So in summary, if it isn't regulated, it would harm public health, and the benefit of regulation would outweigh the cost of regulation. The EPA could, and presumably would, fill that void.

While EPA Administrator Jackson has announced that she does not plan on changing the standard, EPA has been actively considering a revised, more costly and stringent standard as part of the review process. The same review process increased the stringency of that standard in 1996 and most recently in 2006. Prior to the administrator's announcement, EPA's staff had recommended further changes to the standard.

Despite Administrator Jackson's statement, there is nothing currently on the books preventing the EPA from adopting a stricter regulation. Further, as we all know, the environmental lobby could force a more stringent standard regardless of what the EPA announces, finalizes, or proposes through legal action.

This legislation provides ironclad certainty to farmers, ranchers, small

business owners that farm dust would stay off the EPA's to-do list for at least another year. For that very reason, farming, agricultural and rural small business organizations of all shapes and sizes have put their steadfast support behind this legislation. To them, certainty means the ability to grow their business by creating jobs in their communities, feeding every American, and providing for their families through the sale of the fruits of their labors.

The agricultural community and, more largely, rural America is critical to economic growth and job creation. The agricultural sector alone supports 1.8 million American jobs and represents 5 percent of our Nation's total exports. The Obama administration has acknowledged the importance of economic health for rural America. In fact, the President's White House Rural Council has claimed that rural America is "central to the economic health and prosperity of our Nation."

Unfortunately, it is often rural communities, particularly those in the western United States, that suffer from the highest rates of unemployment and are least equipped to bear the burden of additional costs stemming from Washington.

So once again, Madam Speaker, I rise in support of this rule and the underlying legislation. The relevant committee of jurisdiction has worked to provide us with a bipartisan bill which, at its core, quite simply offers regulatory certainty in the short term and commonsense regularity relief in the long.

This bill is not a cure-all, but is a step in the right direction. While a small step, it is a commonsense approach to fixing what's wrong in Washington, D.C. It's a step that many in Congress on both sides of the aisle seem ready and willing to take.

As I mentioned, the Farm Dust Regulation Prevention Act passed out of subcommittee and full committee with bipartisan support. The bill has over 100 bipartisan cosponsors. Companion legislation in the Senate also enjoys that same bipartisan support.

Let's ensure rural businesses and American farmers that at least for 1 more year they can cross dust off the list of the potential bureaucratic burdens passed down from Washington.

I encourage my colleagues to vote "yes" on the rule and "yes" on the underlying bill, and I reserve the balance of my time.

Mr. POLIS. Madam Speaker, I thank my colleague for yielding me the customary 30 minutes, and I yield myself such time as I may consume.

I rise today in opposition to the rule and the underlying bill.

Today, there are very serious challenges facing our country, facing rural America, suburban America, and urban America. In the next 3 weeks, Congress

has to address the payroll tax cut issue, or there will be an enormous tax increase, over \$1,000 per family, to the American middle class. This Congress has to pass a budget or the government will shut down. This Congress has to address a number of other expiring tax provisions—all in the next 3 weeks.

This is real work to do, real work that needs to be done for the American middle class, the American people, for farmers, for businessmen and -women, and for workers.

And yet today, this body is not taking on real work. Instead, we're addressing an illusory problem, a fake problem rather than a real one. My colleague from Florida mentioned the specter of someone somehow regulating the dust kicked up by a truck on a dirt road. I don't think there's a single Member of this body that wants to regulate the dust that's kicked up by a truck on a dirt road. The EPA certainly doesn't. The farmers don't want us to. Members of Congress don't want us to.

So what are we exactly talking about? Instead of addressing the serious problems that are facing the Nation, we're talking about a bill that satisfies talking points, has a few unintended consequences, which I'll get into in my remarks, and ignores the real problems of today.

This bill before us claims to block the EPA from implementing a rule that doesn't even exist, hasn't even been thought up, and is opposed by the head of the EPA. That's right. We've got millions of unemployed Americans, a massive tax increase looming, and yet here we have a bill to stop the EPA from doing something it's not doing.

EPA Administrator Lisa Jackson just told Congress specifically that they have no intention of doing a rule in this area because the existing rules passed during the Reagan administration are adequate.

So instead of worrying about a non-existent farm dust rule, maybe we should pass a regulatory ban on blowing smoke, because that's exactly what Congress is doing with this bill here today.

Not only does this bill seek to address a non-existent problem, Madam Speaker, but it also has a number of unintended consequences. The new loopholes it creates in the mining and other sectors will have severe public health and environmental impacts. Now, there will be a number of amendments that have been allowed under this rule that will go into a discussion and tailoring of this bill to hopefully roll back some of these unintended consequences, but what this bill does, rather than solve a problem, is create a slew of new problems which we would need to address.

This bill is chock full of exemptions for major industries. It allows for more arsenic and lead pollution from indus-

trial sources, with dire consequences for health and well-being. It disables the ambient air quality standards within the Air Quality Act. This bill won't help farmers at all because it won't fend off any onerous regulation because none of the regulations that are being contemplated are even being thought of by anybody in the EPA.

Interestingly, what this bill will do is it allows the release of more pollution from industrial sources like open-pit mining, coal-processing facilities, cement kilns and smelters. This has nothing to do with the family farms that you're going to hear people talk about debating this bill.

That's why this bill's main supporters are not farmers, but they're the mining industry. In fact, this bill has gained vocal support from the National Mining Association; and one of the biggest groups representing farmers, the National Farmers Union, has said this bill isn't necessary. In fact, in October, National Farmers Union president Roger Jackson said, "The National Farmers Union is pleased to see EPA Administrator Jackson provide final clarification for Members of Congress and the agriculture community that the agency does not have plans to regulate farm dust."

He went on, "Lately, there has been considerable anxiety within the farming community that EPA is going to regulate dust on farms. We hope this action finally puts to rest the misinformation regarding dust regulation and eases the minds of farmers and ranchers across the country."

Yet, instead of letting sleeping dogs lie and quelling the ridiculous rumors that somebody plans to regulate dust kicked up from cars on dirt roads, here we have Members of this body reinvigorating and giving credibility to these false rumors, scaring the hardworking farmers of America into thinking somehow government is about to regulate something that no one is purporting to regulate.

Furthermore, during committee consideration of this bill, an amendment by Congressman BUTTERFIELD would have explicitly limited this bill to agriculture, which is what the proponents of this bill purport it to be about. And yet the majority voted down that amendment, sending a clear message that this bill is not about farmers.

Let us see this bill for what it really is—another effort to attack the EPA and prevent the EPA from implementing the Clean Air Act under its commonsense rules to protect our public health.

It's time to get serious with the business of the House, to take on the real tasks that we have of expanding the payroll tax cut, passing a budget, and stop making up problems and making up solutions that cause more problems than they purport to solve. We've already got enough problems that this

Congress and this country need to work on. Let's get to work.

I reserve the balance of my time.

Mr. WEBSTER. I continue to reserve the balance of my time.

Mr. POLIS. Madam Speaker, it is my honor to yield 3 minutes to the gentlewoman from Wisconsin (Ms. BALDWIN).

Ms. BALDWIN. I thank the gentleman for yielding time.

Madam Speaker, the bill before us today is entitled the Farm Dust Regulation Prevention Act of 2011.

I want to make something very clear. If we were here today voting on a bill that actually stopped farm dust from being regulated by the EPA, I would support it. Agriculture is hugely important to my home State of Wisconsin, and the thought of regulating farm dust on a Federal level is simply ridiculous. However, there is no attempt by the EPA to regulate farm dust. Administrator Lisa Jackson said that the EPA has no intention of regulating farm dust.

□ 0930

The Republican Senate sponsor of this bill, former Secretary of Agriculture MIKE JOHANNIS, states that the EPA has provided "unequivocal assurance that it won't attempt to regulate farm dust."

This legislation is not about farm dust. Instead, this bill creates a new category of pollution called "nuisance dust" and exempts it from the Clean Air Act entirely. To be clear, "nuisance dust" is a made-up term that has no basis in established science.

Under this legislation, particulate pollution from open-pit mines, mine processing plants, sand mines, lead smelters, and cement kilns would be exempt from the Clean Air Act. These facilities emit coarse and fine particulates—arsenic, lead, mercury, and other toxic substances.

Now, I don't know about you, Madam Speaker, but this doesn't sound like "farm dust" to me.

I agree with my colleague Congressman JOHN DINGELL, who said, "This is a solution in search of a problem." During the Energy and Commerce Committee markup, the majority showed us that this bill isn't about farm dust at all; it's about hacking another hole in the Clean Air Act and about stoking the fears of rural Americans and farmers for cheap political points.

Americans are so sick of these political games. They want jobs, not fear mongering and baseless accusations. We shouldn't be wasting our time and theirs dealing with myths. We have real problems that need real solutions.

We should be extending the payroll tax relief for hardworking American families. We should be passing a transportation bill that puts Americans back to work rebuilding our crumbling roads and bridges. We should be extending unemployment insurance to millions of Americans who are still out,

pounding the pavement day in and day out, trying to find work.

Republicans need to stop stoking the fears of farmers and rural Americans and get back to fixing the real crisis facing our country—the jobs crisis.

Mr. WEBSTER. I continue to reserve the balance of my time.

Mr. POLIS. Madam Speaker, if we defeat the previous question, I will offer an amendment to the rule to require that we vote on an unemployment benefit extension and that we vote on a payroll tax holiday extension for next year before we leave for the holidays.

I would like to yield 2 minutes to the gentleman from Georgia (Mr. LEWIS).

Mr. LEWIS of Georgia. I want to thank my friend and colleague for yielding.

Madam Speaker, I rise today to urge my colleagues to extend unemployment benefits now.

It is amazing that we have time to debate this farm dust bill. We are polluting our air, but we don't have time to create jobs or to help people who have lost their jobs through no fault of their own. It is our moral obligation to give just a little bit of hope, a little bit of justice to help people survive these cold, difficult, hard times.

During this holiday season, I ask each and every one of you to take a deep, hard look within and ask yourselves: Is this how I wish to treat my mother? my father? my sister? my brother? my son? my daughter or my neighbor?

The unemployed lost their jobs through no fault of their own. They don't want handouts. They want jobs. This small amount of money is just enough to squeeze by while they continue to look for jobs. Help them. Please help them keep roofs over their heads, shoes on their feet, food on their tables, and heat in their homes.

Madam Speaker, this is the least we can do. It is the right thing to do. It is the fair thing to do. Fairness cannot wait. Give them just a little bit of hope in the name of those elected to serve them. Let's come together. Let's put politics aside and just get it done. Vote "no" on this rule, and extend unemployment insurance here and now.

Mr. WEBSTER. Madam Speaker, I yield myself such time as I may consume.

That's a good reason as to why we should pass this bill. The real cure for unemployment is employment. If we can remove the uncertainty from the marketplace for farmers and for those in other places in this country through limited regulation—good regulation but not by overburdening the businesses and the job creators of this country—then we will have the opportunity to solve that problem, to solve it by hiring people.

I am hoping that this bill will pass. In knowing that it probably will pass in the House, I hope the Senate takes

it up and the President signs it, and I hope we end up with less regulation in an area where many, many jobs could be created and where certainty could be provided if we would only pass this bill.

I reserve the balance of my time.

Mr. POLIS. I don't see how this bill would create any jobs, because it's purporting to undo regulations that don't exist and that aren't going to exist. So, obviously, if somebody at the EPA were to get the idea to start regulating farm dust, we would probably act to undo those regulations, which might help create jobs. Yet nobody is doing that, so this bill does absolutely nothing.

I would like to yield 3 minutes to the gentleman from Washington (Mr. McDERMOTT).

Mr. McDERMOTT. There is a lot of mourning among the comedians of this country that Herman Cain has left the field, but I think the Republican caucus is now stepping in to give the comedians things to laugh at.

This bill is about dust. This is dust to throw in the American people's eyes so they won't see what's going on here. We're going home a day early. Why aren't we staying here tomorrow? Because they haven't got anything to do or they can't figure out how to do it. I don't know which it is.

In fact, we have never put out a jobs bill from this House now in 11 months of the Republican majority, who said jobs are the issue. Boy, we've got to get jobs. They haven't produced a single job in 11 months off this floor. They're letting the unemployment extension expire. Beginning in January, 5 million Americans are not going to get benefits from the unemployment insurance because the Republicans have to throw dust in the people's eyes so that they won't see. But they know. They're not stupid.

The American people can see through this game. They know we're going home because you can't get your act together. You run this House and you can't put a bill out here to extend unemployment benefits. Now, I understand that the unemployment bill is an issue, but you can't extend the payroll.

Madam Speaker, what's wrong with the Republicans that they can't get their act together to somehow extend the reduction in the payroll tax?

That's going to take a thousand bucks out of every middle class person's pocket in the next year—but what are we talking about today? Dust. Ah, dust. I can just see it on Jon Stewart—or maybe it will be Sean Hannity. I don't know which it will be.

The fact is that this Congress has been a do-nothing Congress on the issues that affect the American people. The middle class is getting clobbered, and you're talking about dust.

It reminds me of this business we went through, this manufactured stuff,

about raising the debt limit. It was such an awful thing, so we created this committee that was going to cut \$1.2 trillion. That was magician talk. You don't want to talk about raising the debt limit. You want to talk about this committee that did nothing because the six members on the Republican side who came to that committee said from the very start that they would not raise taxes, that they would not look at revenue.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. POLIS. I yield the gentleman an additional 30 seconds.

□ 0940

Mr. McDERMOTT. In my view, if you're serious, you sit down and you talk about everything. The last 3 weeks of that committee, they never even met. That was dust in people's eyes.

Get them to talk about a commission. We had all this talk about a commission. Are they going to do this, are they going to do that, what's going to happen? In fact, everybody around here knew it was a lot of baloney from the start, and that's what this is today, more baloney.

You know, Yogi Berra, who is one of my favorite philosophers, said, this is *deja vu* all over again. We did this last Christmas, we didn't extend the benefits, and we're doing it again this year.

Mr. WEBSTER. Madam Speaker, I yield myself such time as I may consume.

Yes, Yogi Berra, it ain't over till it's over. We've got time.

We have a plan. House Republicans have a plan. It's down here on this card. We have a plan, a jobs plan. Twenty-five of those issues have already passed this House and they went to the Senate. And where are they? I don't know. They're there. They're ready to be acted on.

Let me just give one. The union labor in this country rallied around that bill a couple of days ago and said we want to build the pipeline. It's tens of thousands of jobs. Many of the Democrats opposed that, and yes, it's thousands and thousands of jobs. Is it a job creator? Absolutely.

Do we have a plan? We have a plan, and that's just one of the 25 that's waiting in the Senate for action. We need to have action there. We have a plan. We have job plans, this is it, and we're ready to move this country forward, get our economy rolling again, creating jobs, and making this economy better for everyone in America.

I reserve the balance of my time.

Mr. POLIS. Madam Speaker, we have no remaining speakers on our side. I would like to inquire if the gentleman has any remaining speakers.

Mr. WEBSTER. I am prepared to close.

Mr. POLIS. I yield myself such time as I may consume, Madam Speaker.

We get it and the American people get it. Just because you repeat something enough times doesn't make it true.

What businesses need in this country is long-term certainty and predictability, a fair playing field with clear rules for all. And yet here we are with a bill like this creating more uncertainty by introducing ambiguously drafted bills and new ambiguously drafted standards that skew the rules in favor of some and against others, making it tougher and tougher for small business, entrepreneurs, and innovators who don't have teams of lobbyists in Washington, D.C., monitoring every bit of legislation to get by and succeed.

The American people understand it wasn't the Environmental Protection Agency that caused this recession, that caused this economic mess we're in, and the economic recovery won't come through creating loopholes in public health laws.

If we are serious about helping farmers, there's plenty that we could be doing. But increasing industrial pollution for mining and coal processing isn't something that farmers in my district and across Colorado have asked me to do.

Farmers are concerned about many real-life challenges. Farmers are concerned that their kids can't get financing to go carry on the family business because the startup and liability costs are too high. Farmers are concerned about the estate tax.

Farmers are concerned about getting sued by Monsanto because their crops were contaminated by Roundup Ready pollen. Farmers are concerned about rapid swings in commodity prices because of instability in the market. Political brinksmanship and gridlock create market instability, and bills that create corporate handouts, loopholes, and more uncertainty like this one aren't helping farmers, they're hurting farmers, and they aren't helping the rest of the country either.

In addition to ignoring the needs of farmers, this bill ignores our national debt. In fact, it ignores our own House protocols to pay for things. Oddly enough, not regulating this non-existent regulation isn't cheap. Because of the bureaucratic changes that would ensue from this bill, the non-partisan CBO has scored this bill as costing the Federal Government \$10 million. So this bill violates the Republican rule for discretionary authorizations.

In fact, while the majority has pledged to adhere to spending limits on all indirect spending bills by including offsetting language, this bill includes no offsetting language, which is particularly grating because this bill doesn't actually do anything besides create more Federal bureaucrats.

Madam Speaker, with only one committee hearing and a quick vote, this

bill shouldn't be before us on the floor today. We have real work to do. We need a good-faith effort to get to the bottom of the real issues that affect this country and caused the recession, and help the middle class. This bill is not aimed at doing anything for farmers. It's not even aimed at a real problem.

I urge my colleagues to follow the House CutGo guidelines, to table this bill and focus on the real problems we should be working on. We all must stop pretending the answer to this country's problems is giving handouts and loopholes to those with the most lobbyists here in Washington, D.C.

As I mentioned earlier, Madam Speaker, if we defeat the previous question, I will offer an amendment to the rule.

I ask unanimous consent to insert the text of the amendment in the RECORD along with extraneous material immediately prior to the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. POLIS. Madam Speaker, I urge my colleagues to vote "no" and defeat the previous question so that we can do the right thing for working families and the millions of people looking for a job and vote on an unemployment extension and a payroll tax holiday and extension before we leave for next year, 3 more weeks.

I urge a "no" vote on the rule, and I yield back the balance of my time.

Mr. WEBSTER. Madam Speaker, I yield myself the balance of my time.

This bill provides for ample open debate, allowing for the colleagues here on this floor and across the aisle, both on our side and theirs, to offer amendments to this bill.

The underlying bill isn't particularly controversial. As a matter of fact, it's rather simple. This bill has no effect on direct spending. It does not appropriate any money or have any new appropriation in it at all. This bill creates no new programs. It has nothing to do with CutGo or pay-as-you-go, either way. It doesn't do either.

In the end, I can't imagine 186 different groups being so stirred up in this country to write and to call and to ask for this legislation, groups like the National Corn Growers Association and the Sheep Growers Association and the Association of Cooperatives and the Farm Bureaus across this country and the American Soybean Association and many, many more getting stirred up about nothing?

No, that argument is heifer dust. It is. This argument is real, it's true, and it's right, and it's absolutely just like what's happening in EPA in many other areas.

The underlying bill, as I said, is quite simple. It provides much-needed cer-

tainty in the short term for agricultural, ranching, and rural businesses by hitting pause on the EPA's runaway regulatory machine for just one measure for just 1 year.

H.R. 1633 simply says that now is not the time to thrust yet another burdensome, costly and, in EPA's own judgment, unnecessary regulation on rural job creators. In the long term, it offers regulatory relief to rural America by acknowledging that States and local communities are better suited to manage dust in their own communities and thus grant them the flexibility to do so.

It's particularly offensive because it's like the old cookie-cutter approach that Washington uses, the same program that's good for Ocoee, Florida, is good for Butte, Montana, and inner-city New York, and it's wrong. We ought to get rid of the cookie-cutter approach and go back to local communities and State governments and let them solve their problems, as opposed to one-size-fits-all Federal Government.

Given the state of the economy, given the EPA administrator's own comments about the lack of need to further regulate farm dust, given the dearth of scientific evidence that says that this is a danger, there is some sort of danger from farm dust, this legislation represents a commonsense effort to create an environment for job creation that all Members should support. It gives farmers, ranchers, and other rural small business owners the certainty, at least when it comes to dust, that costly regulations would not shackle their ability to focus on growing their business, providing for their families, and creating much needed jobs in rural America.

I ask my colleagues to join me in voting in favor of the rule and passage of the underlying bill.

The material previously referred to by Mr. POLIS is as follows:

AN AMENDMENT TO H. RES. 487 OFFERED BY MR. POLIS

At the end of the resolution, add the following new sections:

SEC. 2. Not later than December 16, 2011, the House of Representatives shall vote on passage of a bill to extend the payroll tax holiday beyond 2011, the title of which is as follows: 'Payroll Tax Holiday Extension Act of 2011.'

SEC. 3. Not later than December 16, 2011, the House of Representatives shall vote on passage of a bill to provide for the continuation of unemployment benefits, the title of which is as follows: 'Emergency Unemployment Compensation Extension Act of 2011.'

(The information contained herein was provided by the Republican Minority on multiple occasions throughout the 110th and 111th Congresses.)

THE VOTE ON THE PREVIOUS QUESTION: WHAT IT REALLY MEANS

This vote, the vote on whether to order the previous question on a special rule, is not merely a procedural vote. A vote against ordering the previous question is a vote

against the Republican majority agenda and a vote to allow the opposition, at least for the moment, to offer an alternative plan. It is a vote about what the House should be debating.

Mr. Clarence Cannon's Precedents of the House of Representatives (VI, 308-311), describes the vote on the previous question on the rule as "a motion to direct or control the consideration of the subject before the House being made by the Member in charge." To defeat the previous question is to give the opposition a chance to decide the subject before the House. Cannon cites the Speaker's ruling of January 13, 1920, to the effect that "the refusal of the House to sustain the demand for the previous question passes the control of the resolution to the opposition" in order to offer an amendment. On March 15, 1909, a member of the majority party offered a rule resolution. The House defeated the previous question and a member of the opposition rose to a parliamentary inquiry, asking who was entitled to recognition. Speaker Joseph G. Cannon (R-Illinois) said: "The previous question having been refused, the gentleman from New York, Mr. Fitzgerald, who had asked the gentleman to yield to him for an amendment, is entitled to the first recognition."

Because the vote today may look bad for the Republican majority they will say "the vote on the previous question is simply a vote on whether to proceed to an immediate vote on adopting the resolution . . . [and] has no substantive legislative or policy implications whatsoever." But that is not what they have always said. Listen to the Republican Leadership Manual on the Legislative Process in the United States House of Representatives, (6th edition, page 135). Here's how the Republicans describe the previous question vote in their own manual: "Although it is generally not possible to amend the rule because the majority Member controlling the time will not yield for the purpose of offering an amendment, the same result may be achieved by voting down the previous question on the rule . . . When the motion for the previous question is defeated, control of the time passes to the Member who led the opposition to ordering the previous question. That Member, because he then controls the time, may offer an amendment to the rule, or yield for the purpose of amendment."

In Deschler's Procedure in the U.S. House of Representatives, the subchapter titled "Amending Special Rules" states: "a refusal to order the previous question on such a rule [a special rule reported from the Committee on Rules] opens the resolution to amendment and further debate." (Chapter 21, section 21.2) Section 21.3 continues: "Upon rejection of the motion for the previous question on a resolution reported from the Committee on Rules, control shifts to the Member leading the opposition to the previous question, who may offer a proper amendment or motion and who controls the time for debate thereon."

Clearly, the vote on the previous question on a rule does have substantive policy implications. It is one of the only available tools for those who oppose the Republican majority's agenda and allows those with alternative views the opportunity to offer an alternative plan.

Mr. WEBSTER. Madam Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. POLIS. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

#### RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 9 o'clock and 50 minutes a.m.), the House stood in recess subject to the call of the Chair.

□ 1030

#### AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mrs. MILLER of Michigan) at 10 o'clock and 30 minutes a.m.

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on questions previously postponed.

Votes will be taken in the following order: ordering the previous question on H. Res. 487, by the yeas and nays; adoption of H. Res. 487, if ordered; motion to suspend the rules on H.R. 1254, de novo; approval of the Journal, de novo.

The first electronic vote will be conducted as a 15-minute vote. The remainder of the votes in this series will be conducted as 5-minute votes.

#### PROVIDING FOR CONSIDERATION OF H.R. 1633, FARM DUST REGULATION PREVENTION ACT OF 2011.

The SPEAKER pro tempore. The unfinished business is the vote on ordering the previous question on the resolution (H. Res. 487) providing for consideration of the bill (H.R. 1633) to establish a temporary prohibition against revising any national ambient air quality standard applicable to coarse particulate matter, to limit Federal regulation of nuisance dust in areas in which such dust is regulated under State, tribal, or local law, and for other purposes, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The vote was taken by electronic device, and there were—yeas 241, nays 173, not voting 19, as follows:

[Roll No. 902]

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE  
The SPEAKER pro tempore (Mr. WOMACK) (during the vote). There are 2 minutes remaining in this vote.

## □ 1106

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## SYNTHETIC DRUG CONTROL ACT OF 2011

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill (H.R. 1254) to amend the Controlled Substances Act to place synthetic drugs in Schedule I, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania (Mr. PITTS) that the House suspend the rules and pass the bill, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

## RECORDED VOTE

Mr. WHITFIELD. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 317, noes 98, not voting 18, as follows:

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining.

□ 1113

Messrs. NEAL, TIERNEY, POE of Texas, and AL GREEN of Texas changed their vote from “aye” to “no.”

Ms. RICHARDSON changed her vote from “no” to “aye.”

So (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against:

Mr. HULTGREN. Mr. Speaker, on rollcall No. 904, had I been present, I would have voted “no.”

## THE JOURNAL

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the unfinished business is the question on agreeing to the Speaker's approval of the Journal, which the Chair will put de novo.

The question is on the Speaker's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

## RECORDED VOTE

Mr. WOODALL. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 312, noes 94, answered “present” 1, not voting 26, as follows:

#### ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining.

□ 1119

So the Journal was approved.

The result of the vote was announced as above recorded.

#### FARM DUST REGULATION PREVENTION ACT OF 2011

Mr. UPTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on the legislation and to insert extraneous material on H.R. 1633.

The SPEAKER pro tempore (Mr. PAULSEN). Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 487 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the consideration of the bill, H.R. 1633.

□ 1119

#### IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 1633) to establish a temporary prohibition against revising any national ambient air quality standard applicable to coarse particulate matter, to limit Federal regulation of nuisance dust in areas in which such dust is regulated under State, tribal, or local law, and for other purposes, with Mr. WOMACK in the chair.

The Clerk read the title of the bill.

The CHAIR. Pursuant to the rule, the bill is considered read the first time.

The gentleman from Michigan (Mr. UPTON) and the gentleman from California (Mr. WAXMAN) each will control 30 minutes.

The Chair recognizes the gentleman from Michigan.

Mr. UPTON. Mr. Chairman, I yield myself 2 minutes.

No question, from the largest manufacturer to the smallest farm or ranch, not enough businesses are thriving in this economy. The recovery has been slow and weak, job growth has been anemic, and the continuous rollout of expensive new regulations has only made it harder to get the economy back on track. That's why the House continues to approve bipartisan legislation addressing costly EPA rules, and that is why I support this legislation, the Farm Dust Regulation Prevention Act.

This bill achieves two important goals: regulatory certainty in the short

term and common sense for rural America in the long term. The bill retains the current coarse particulate matter standard for 1 year—a position that Administrator Lisa Jackson from EPA has embraced with her plans to propose maintaining the standard—and it offers regulatory relief to rural America by recognizing that States and local communities are better equipped to monitor and control farm dust. EPA would no longer be in the business of regulating rural dust except in cases where it is not already regulated and the benefits of EPA regulation outweigh the costs.

Opponents of this bill insist that it's not necessary and that rural America has nothing to worry about, but the voices of rural America tell quite a different story. Listen to the American Farm Bureau Federation and all of its State affiliates. Listen to the Cattle-men's Beef Association and over 185 other organizations who collectively represent a significant portion of the rural economy, including Michigan and across the country. These organizations believe that this bill is necessary, and so do I.

The bill makes clear that the lead role in regulating nuisance dust should rest with State, local, and tribal governments, not the EPA.

This is a smart step for a lot of reasons. For one thing, State, local, and tribal governments already address rural dust issues. For another, dust issues differ greatly from location to location and thus are not well suited to a one-size-fits-all Federal approach. Further, these levels of governments do a much better job than the Federal EPA when it comes to weighing both the costs and the benefits of various options and choosing a path that is cost-effective and achieves the greatest benefits.

Finally, under this bill, in the absence of State, local, and tribal regulation, EPA may step in and regulate nuisance dust if the case for net benefits can be made for it. This bill is a commonsense bill that removes a regulatory threat to economic growth and prosperity across rural America. I urge all my colleagues to support it.

I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

Over the past year, Republicans have brought to the floor one bill after another to weaken the Clean Air Act and eliminate EPA authority to protect public health from dangerous air pollution. The House has passed bills to nullify EPA's rules on air pollution from incinerators, power plants, cement kilns, and industrial boilers. But the bill before us today breaks new ground. It would block EPA from taking an action that EPA has no plan to take.

This bill is called the "Farm Dust Regulation Prevention Act of 2011." Well, that's a misleading title. EPA

currently does not regulate farm dust and they have no plans to regulate farm dust. EPA Administrator Jackson told Congress that she will propose no change to the current air quality standard for coarse particles, which have been in place since the Reagan administration.

This bill belongs in the False Advertising Hall of Fame. It is not really about farms at all. Its real effect is to exempt industrial mining operations and other large industries from regulation under the Clean Air Act. And it threatens to overturn the particulate pollution standards that protect families in both rural and urban communities.

Section three of the bill exempts so-called "nuisance dust" from any regulation under the Clean Air Act. It then defines nuisance dust incredibly broadly. The definition covers both coarse particulates and deadly fine particulates. It covers particulates from earth moving—which means industrial mining operations—and from activities typically conducted in rural areas, which include cement plants, smelters, coal processing plants, and other industrial activities that are common in rural areas.

During the committee markups of this bill, the Republicans amended the definition of so-called "nuisance dust" three times. This shows how poorly drafted and broadly worded the definition really is. But they voted down an amendment to clarify that the bill only applies to agricultural dust and another amendment to clarify that the bill does not apply to mining activities. They even voted down an amendment to preserve EPA's authority to regulate emissions of arsenic from copper mines and smelters.

One supporter of this bill is Kennecott Copper, which operates one of the largest open pit copper mines in the world. The company's mining activities are the single largest source of particulate pollution in Utah and a big reason why the 1 million residents of Salt Lake County breathe unhealthy air. This bill would exempt all particulate matter pollution from the Kennecott mine and all other mines from the entire Clean Air Act. Let's be honest: The reason industrial mining operations are pushing this bill has nothing to do with protecting family farms.

The bill would also make unenforceable the national air quality standards for both fine and coarse particulate pollution. Particulate pollution causes aggravated asthma attacks, heart attacks, respiratory diseases, strokes, and premature death. Reductions in particulate pollution under the Clean Air Act account for some of the largest public health benefits produced by the act. Gutting these standards would be radical and devastating.

The American people support the Clean Air Act. People want clean air.

And over the past 40 years, the Clean Air Act has brought us dramatic air quality improvements. But House Republicans are intent on undoing these achievements. In bill after bill, for one industry after another, the House has voted to punch holes in the Clean Air Act. It has voted for more weather-altering carbon pollution, more toxic mercury pollution, more arsenic and lead pollution, more particulate matter pollution, more sulfur dioxide pollution, and more nitrogen oxide pollution. In fact, the House has voted 170 times to undermine our Nation's environmental laws—over 60 of those votes were to dismantle the Clean Air Act.

I urge my colleagues to protect clean air and the health of all Americans and oppose H.R. 1633.

I reserve the balance of my time.

Mr. WHITFIELD. Mr. Chairman, I yield myself such time as I may consume.

American farmers, ranchers, and other rural businesses, like many other sectors of our economy, have faced an onslaught of EPA regulations. Now, we all support the environment, but our economy is struggling today, and every regulation adds additional cost.

The Congressional Research Service recently reported that agriculture has been facing new Clean Air Act greenhouse gas standards; engine emission standards; national ambient air quality standards for ozone and particulates; Clean Water Act permitting and other requirements; Superfund reporting requirements; and regulations for disclosure, permitting, and other regulatory requirements relating to the use of pesticides. And until recently, the dairy industry faced ambiguity about whether milk and milk containers would be subject to the EPA oil spill prevention regulations.

We have 2.2 million farms in America employing 1.8 million people and providing 5 percent of this Nation's exports. We need to do everything possible to make it easy for them to do business and still protect the economy.

□ 1130

Today we're going to consider H.R. 1633, the Farm Dust Regulation Prevention Act of 2011. At a time when rural economies are struggling, this bill provides certainty that farmers, ranchers, and other rural businesses will not be burdened with costly and unnecessary new dust regulations from Washington, D.C.

As one might expect, a reasonable and commonsense measure like H.R. 1633 has garnered 120 bipartisan cosponsors. I would like to particularly thank and commend the efforts of Representative KRISTI NOEM, as well as Representative LEONARD BOSWELL, Representative ROBERT HURT, and Representative LARRY KISSELL for their tireless efforts on behalf of rural Americans and this bill.

Our bill makes clear that the lead role in regulating so-called nuisance dust rests with State, local, and tribal governments. And the bill defines nuisance dust to include particulate matter generated primarily from natural sources, unpaved roads, earth moving, and other activities typically conducted in rural areas.

In some ways, it's ludicrous we're sitting here debating about the EPA regulating dust. And I might say that we have 197 organizations supporting this legislation.

Now, why do we need the bill? Well, EPA has been considering more costly, stringent PM<sub>10</sub> standards. It is true that the EPA Administrator, Lisa Jackson, recently announced that she would not propose new regulations, that she would retain the current PM<sub>10</sub> standards. But the problem with that is, when they finalize a standard, it's uncertain whether EPA will finalize a standard that imposes greater costs to rural businesses. And we all know that many of the regulations and EPA environmental protections today are decided by the court system. So even though Lisa Jackson says she's not going to do anything, lawsuits can be filed requiring her to do certain things. So this legislation simply provides certainty.

I might also say, because the science does not support the regulation of coarse rural dust, EPA itself proposed, in 2006, to exempt this dust from their national ambient air quality standards. And the integrated science assessment for particulate matter at EPA said, for long-term effects of coarse particles, there is next to no evidence in support of long-term health effects.

I would urge all the Members to support this legislation, and I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, I am pleased to yield 5 minutes to our senior member on the committee and former chairman of our committee, the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, this is a magnificent solution to a nonexistent problem. But it's made a lot of money for a lot of lobbyists, and a lot of industrial polluters are going to enjoy this, hiding behind the supposed benefit that it's going to give to the farmers.

In a nutshell, this legislation is not going to help the farmers; it's going to help the people who farm the farmers. And the end result is that, when this nonsensical bill gets over to the courts, the courts are going to look at it and say, Just what, in the name of common sense, is the House trying to do with this legislation?

Nowhere in the Clean Air Act is a word about nuisance dust, but it's very prominently put here in the legislation. And lo and behold, it also has something to do, supposedly, with some kind of action that the EPA is

supposed to take. But diligent looking at the legislation doesn't reveal what that might be.

The question here, then, is: We have a solution in search of a problem. We've got a job crisis in our Nation, crippling debt, excessive deficit, and the gaping inequality between the poor and the well-to-do is putting democracy at risk. And when this country needs us to focus on serious problems like deficit and national debt, we are here busily scratching around to try and fit a solution on a problem that doesn't exist.

The Clean Air Act Amendments of 1990 were the last major changes to the original Clean Air Act of 1970; and, unlike what we are piddling around with today, those legislations were needed, and they have served us well. The Congress held lengthy hearings and did a tremendous amount of work to understand what it was. Eighteen months or so of consideration of the legislation led finally to its enactment, and it has cleaned up the air for our people.

While the amendments of 1990 were truly bipartisan, only four of the 120 sponsors of this legislation are Democrats. Ten amendments were considered in the committee, but only one Democratic amendment was adopted. The final adoption of the legislation occurred strictly along partisan lines. It should be clear to anyone that this is not compromise legislation.

Supporters insist the legislation is necessary due to uncertainty regarding EPA action. There is no uncertainty here. The Republican author of a similar Senate bill, a former Secretary of Agriculture, takes a different position. In one of his weekly columns, the Senate sponsor stated, "I asked only for clarity from EPA, and this week Administrator Jackson finally provided it." It's obvious to our friends in the Senate and from the EPA Administrator, herself, that EPA will not implement stricter regulations.

Even newspapers in the sponsor's home State have questioned the logic of this legislation. The Sioux Falls Argus Leader wrote that the bill is fighting "against a made-up problem" and that it's time for the sponsor "to let the phantom issue of dust regulation settle."

The Yankton Daily Press and The Dakotan gave a "thumbs down" signal on the bill, in which they say it is unnecessary. The two local papers wish that those who had sponsored this legislation would stop trying to stir the fear of farmers and ranchers and, instead, spend time fighting real problems rather than those which are imaginary.

This bill does not help the farmers and ranchers. It helps the people who farm the farmers and a fine collection of well-to-do lobbyists down on K Street who are profiting mightily on selling a nonsensical piece of legisla-

tion which wastes the time of Congress and does nothing for the farmers or the ranchers or the economy or the jobs.

So I hope that the House will reject these half-baked bills that are poorly written, contain no solutions, deal with no problems, help no one, and that the two parties can sit down and find real, important, reasoned compromises to real problems.

I urge my colleagues to vote "no" on the bill.

Mr. WHITFIELD. Mr. Chairman, I yield 3 minutes to the gentlelady from South Dakota (Mrs. NOEM), who is a strong advocate for rural America and the creation of jobs in rural America.

Mrs. NOEM. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of H.R. 1633 because I coauthored this bill with my friend and colleague from Virginia (Mr. HURT), and I did it to bring certainty, regulatory certainty to farmers and ranchers across this country. Farmers and ranchers have been working on this issue for a long time. We look forward to passing it off the House floor today.

It's not a partisan issue. I introduced this with my colleagues Mr. BOSWELL and Mr. KISSELL, and 121 of my colleagues from both sides of the aisle are cosponsors.

The Clean Air Act has a worthy goal, but it's not a perfect law, and it does have unintended consequences. My bill would improve the current statute. It also makes permanent what the administrator has said, which is that she did not intend to regulate farm dust.

As South Dakota Farm Bureau President Scott VanderWal said, "If we don't deal with this issue today, it's going to be right back here 5 years from now."

□ 1140

I would like to reiterate why this bill is necessary. First, farm dust is already regulated. It is not a myth. It's very real to all of my constituents. We heard testimony from farmers in the hearing in committee that they're currently being regulated as a result of the EPA's standards. Regulation of farm dust is a problem today and will only continue to be a problem into the future if we do not pass this bill.

If my colleagues will take the time to read the bill, they'll notice that this bill doesn't eliminate any regulations. It simply leaves the regulation of rural dust to the States and to the local communities who best understand how to manage what is happening in their own backyard.

Too often, bureaucrats in Washington, D.C. who have never stepped foot on a farm or lived in rural America try to impose a one-size-fits-all approach to regulation.

Let's be realistic. Dust in rural America is not the same as dust in urban areas. It's common sense that

dust from a dirt road is much different than soot from a car; and it's common sense that they should be treated differently, which is exactly what this bill does.

I would ask my colleagues on both sides of the aisle to consider this piece of legislation very carefully. Even if you're not from a rural area, this is still an important piece of legislation to all of us who rely on farmers to feed our families.

You don't have to take my word for it. I have a letter here that I would like to submit for the RECORD of over 190 different organizations supporting this bill and its passage. Many of these organizations are local businesses and agriculture groups within all of our districts. They represent thousands and thousands of people across the country.

Let's not forget that we all reap the benefits of the success of our ag producers through safe, nutritious, and affordable food. Let's not burden our communities with overbearing regulations. Let's pass this commonsense legislation and provide farmers, ranchers, and local businesses with the certainty that they need in an already volatile industry.

I urge all of my colleagues to join me in support of rural America and vote "yes" on H.R. 1633.

DEC. 5, 2011.

Hon. JOHN BOEHNER,  
*Speaker, House of Representatives, U.S. Capitol, Washington, DC.*

Hon. NANCY PELOSI,  
*Minority Leader, House of Representatives, U.S. Capitol, Washington, DC.*

DEAR SPEAKER BOEHNER AND MINORITY LEADER PELOSI: The undersigned organizations would like to express our strong support for the Farm Dust Regulation Prevention Act of 2011, H.R. 1633. H.R. 1633 would bring some much needed certainty to agriculture and other rural businesses by exempting rural "nuisance dust" from EPA regulation if states and localities regulate it on their own. Our organizations request your support in keeping jobs in rural America by passing H.R. 1633.

As you are aware, farming and other resource-based industries are dusty professions. From tilling fields, to driving on dirt roads, to extracting resources, rural Americans deal with dust every day. Working in the soil is where they derive their livelihoods, and where the world derives much of its food and other essential resources. If EPA were to revise the dust standard now or in the future, states would be put in a position of having to impose regulatory restraints on rural operations, increasing the cost of production when that cost is already at historically high levels. And, for what purpose? Scientific studies have never shown rural dust to be a health concern at ambient levels.

While the undersigned organizations welcome EPA's Oct. 14 announcement that the agency plans to propose to retain the current coarse particulate matter (PM<sub>10</sub>) National Ambient Air Quality Standard (NAAQS), the announcement does not provide the certainty that rural America needs. First, it is common for the agency to finalize a rule that is different from the proposed rule. In fact, in 1996 EPA proposed to remove the PM<sub>10</sub> 24-hour standard altogether, only to

bring it back in the final rule. And in 2006, EPA proposed to exempt agriculture dust, but that exemption also disappeared in the final rule. Second, under the Clean Air Act, EPA must review this standard every five years. That means we could be facing the same challenges again in just five short years.

Thankfully, this Congress has the opportunity to ease this potential burden on rural America. H.R. 1633 would exempt rural "nuisance dust" from regulation under the Clean Air Act if states and localities regulate it on their own. In the event a state or locality does not regulate rural dust, the administrator could regulate it only if validated scientific analysis shows there is a significant health effect from such dust in a particular area and that the costs to the local economy associated with dust regulation would not outweigh any benefits.

H.R. 1633 is common sense legislation that the undersigned strongly support. We urge the Senate to pass this bill to help protect rural American jobs.

Mr. WAXMAN. Mr. Chairman, I am pleased to yield 5 minutes to the leading Democrat on the Energy Committee, the ranking member, the gentleman from Illinois (Mr. RUSH).

Mr. RUSH. I want to thank the ranking member for his outstanding leadership and for yielding time to me.

Mr. Chairman, I oppose this ill-conceived, nonsensical, and in all ways awful bill, H.R. 1633, which could have a devastating effect on the EPA's ability to enforce the Clean Air Act on the basis of both procedural and substantive grounds.

Mr. Chairman, the CBO, the Congressional Budget Office, scored this bill and determined that it would cost \$10 million in discretionary spending over a 5-year period for the EPA to cover the cost of carrying out changes to existing emission control standards, as well as other activities to study the need and feasibility of modifying the EPA's national monitoring network for particulate matter, as this bill requires.

Since this \$10 million is not appropriated anywhere in this bill, this bill would directly violate the discretionary CutGo policy that this majority, that my friends on the other side, voted for that they put in place at the beginning of this Congress.

If we pass this bill, it will be the height of hypocrisy for this atrocious bill to get through this House.

Additionally, Mr. Chairman, on the issue of substance, I oppose this bill because it would dramatically weaken the Clean Air Act by eliminating the EPA's ability to regulate particulate matter from a broad range of sources, as well as jeopardize existing State and Federal regulations that apply to fine and coarse particulate matter.

Although the title of this bill suggests that it only covers dust from farms, this bill creates a whole new broad, new nonscientific category of pollution called "nuisance dust," which it would exempt from the Clean Air Act completely. Nuisance dust would be exempted from the Clean Air Act totally without any basis and

science, no scientific evidence whatsoever; and in doing so, this bill would do harm to the public's health.

The bill would exempt from the Clean Air Act any particulate matter pollution that is emitted from sources such as open-pit mines, mining processing plants, sand and gravel mines, smelters, coal mines, coal-processing plants, cement kilns, and waste and recovery facilities. These very facilities emit fine particulates, coarse particulates, arsenic, lead, mercury, cadmium, zinc, chromium, and other heavy metals—all of which would fall under this bill's broad exemption from the Clean Air Act.

Mr. Chairman, as the American Lung Association noted, under the provisions of this bill, our country's most vulnerable populations—poor people, people who depend on the EPA to protect them from the harmful effects of coarse particulates will be most affected.

Children, teens, senior citizens, low-income people, people with chronic lung disease such as asthma, chronic bronchitis, and emphysema will be especially at risk of being sickened by coarse particulates if this bill were to become law.

Additionally, people with other chronic diseases, such as diabetes, cardiovascular disease, high blood pressure, coronary artery disease, and congestive heart failure, they will all be placed at greater risk if this bill becomes law.

Mr. Chairman, as I've noted before, this bill is a solution in search of a problem, and it does more harm than good. This bill should fail. I oppose this bill.

Mr. WHITFIELD. Mr. Chairman, I might say that during the debate on this bill in committee, a lot was made of mining activities in rural America, and I would just point out that there are 17 Federal laws that mining operations must abide by. So we didn't feel like we needed to provide additional protection in that area.

At this time I would like to yield 3 minutes to the gentleman from Virginia (Mr. HURT), one of the prime sponsors of this legislation and a protector of rural America.

Mr. HURT. I thank the gentleman for yielding.

I'd first like to thank Chairmen UPTON and WHITFIELD for this effort and Representative NOEM for her leadership and hard work on this legislation.

Mr. Chairman, I rise today in strong support of the Farm Dust Regulation Prevention Act. This is a bipartisan bill that I am proud to sponsor, along with Representatives NOEM, BOSWELL, and KISSELL, in order to provide greater economic certainty to our rural communities in central Virginia and south side Virginia and across this country.

Since January, this House has been laser focused on advancing policies that will remove the Federal Government as a barrier to job creation and steer us on a course toward economic recovery giving our job creators the opportunity to hire and the confidence to expand. It is with this in mind that we introduced this legislation.

In Virginia's Fifth District, my district, we have a proud heritage in agriculture, manufacturing, Main Street businesses that create jobs and have created jobs for thousands of Virginians. As I travel across Virginia's rural Fifth District, I am constantly reminded by my constituents of how government regulations threaten their businesses and their very way of life. This is why the EPA's national standard for fugitive dust is so troubling to the people that I represent. It is yet another example of the vast expansion of the Federal Government, and it is yet another example of the uncertainty that Washington continues to impose upon our job creators and our rural communities.

□ 1150

The effects of Federal Government overreach are both very real and very tangible in the Fifth District and across this country.

This past year, I spoke with a small business owner in Southside, Virginia, who was warned by a regulator about the amount of dust coming from his property. He was told to take active measures to decrease the dust coming from the dirt road leading into his sawmill.

This is the kind of unnecessary regulation that prevents businesses and farmers from focusing on the needs of their customers. Where I'm from, dust is not a nuisance. Rather, it is a necessary byproduct of the hard work the farmers and businesses in my rural district perform every day, and these farmers and businesses should not suffer losses in production because of overbearing Federal regulations. These are the people who are struggling to survive, to grow, and to create jobs during this stalled economic recovery. These are the people who cannot afford more costly and burdensome regulations handed down by Washington.

While I applaud the EPA's apparent statement that it does not intend to propose a more stringent standard for coarse particulate matter at this time, I remain concerned about the uncertainty of future rulemaking. This bill addresses that uncertainty by providing clarity and stability for our job creators by replacing the current Federal standard for naturally occurring dust in rural America. With unemployment rates nearing 20 percent in some parts of my district, we simply can't afford to perpetuate unnecessary regulations and unnecessary uncertainty for the farmers and businesses in our rural communities.

I strongly urge my colleagues to support this legislation so that we may assure our farmers and businesses that naturally occurring dust will not be subject to regulations by an ever-expanding Federal Government.

Mr. WAXMAN. Mr. Chairman, I am pleased to yield 5 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. I thank the gentleman for yielding.

We are now debating on a very real piece of legislation that solves an imaginary problem. The Farm Dust Regulation Prevention Act purports to address the fictitious threat that the Environmental Protection Agency is out to destroy the family farm and countless jobs by regulating the dust emitted by tractors and other farming equipment.

Never mind that EPA Administrator Lisa Jackson has committed to leaving the 1987 standard for large soot particles unchanged; and never mind that EPA Assistant Administrator Gina McCarthy essentially told the Energy and Commerce Committee that EPA was about as likely to regulate fairy dust as it was to regulate farm dust.

While hiding behind its stated purpose of addressing the made-up threat of utter ruin to the family farm, this bill inflicts very real harm. That is because it also blocks EPA from setting standards for the dirty soot that gets spewed out of massive mines and smelters and refineries and some chemical plants. It becomes, in fact, the congressional version of Never Never Land—where the Republicans' answer to the question "when can we remove the poisons from the air that we breathe?" is "never."

In the play "Peter Pan," Tinker Bell drinks poison that is intended to kill Peter. She begins to die, but Peter Pan implores those in the audience to just clap their hands if they really do believe in fairies, and then maybe, just maybe, Tinker Bell won't die. All small children in the audience then clap so hard their hands sting, and Tinker Bell rises magically back to life.

With this bill, the Republicans are engaging in the very same sort of fantasy. If we just believe EPA has launched a war on jobs, then it must be so, and we must stop it. If we just believe that EPA officials are lying about their secret, nonexistent plans to destroy the livelihood of every farmer in America, then it must be so, and we must stop it. If we just believe that eviscerating every environmental law on the books will not lead to the real deaths of thousands of Americans each and every year, then it must be so.

The Republican lost boys and girls are telling America that the only way to revive the jobs fairy is to kill EPA. To pretend that the deaths, the cancers and other illnesses that the Republican plan will cause are imaginary, or a

mere nuisance, really is the stuff of fairy tales.

Let's get back to reality and solve real problems in this country. Vote "no" on this very dangerous bill.

Mr. WHITFIELD. The gentleman from Massachusetts may view this as being about Peter Pan and Tinker Bell and fairy dust, but we have 197 organizations representing rural America that consider it a real problem.

At this time, I would like to yield 1½ minutes to the gentleman from West Virginia, a member of the Energy and Commerce Committee, Mr. MCKINLEY.

Mr. MCKINLEY. I rise today in support of H.R. 1633, the Farm Dust bill.

Earlier this year, the House passed H.R. 2273, the bipartisan coal ash legislation. Unfortunately, opponents of the Farm Dust bill believe that nuisance dust in this bill might include fly ash. Therefore, an amendment was offered and adopted to clarify that the definition of "nuisance dust" in the Farm Dust bill does not include coal ash or other coal combustion residuals. The amendment makes it perfectly clear that nuisance dust is not composed of any residuals from coal combustion. Unfortunately, opponents of the Farm Dust bill are still, apparently, unaware of the changes that have been made to the bill to address their concerns.

Don't oppose the Farm Dust bill because you don't like fly ash. Let's relieve one more threat to our agricultural community with the passage of this bill. We should be striving to create more jobs, not putting up more barriers with misinformation.

I urge my colleagues to support this legislation.

Mr. WAXMAN. Mr. Chairman, I am pleased to yield 2 minutes to an important member of our committee, the gentleman from Texas (Mr. GREEN).

Mr. GENE GREEN of Texas. I rise in opposition to H.R. 1633, the Farm Dust Regulation Prevention Act of 2011.

I just heard it referred to as "Tinker Bell," but I think this is more like Alice in Wonderland legislation. It seeks to solve a problem that's not there while dancing around a lot of our real problems that we have to deal with in our country and particularly in this Congress.

This bill would prohibit the EPA from proposing, finalizing, implementing, or enforcing any regulation revising the National Ambient Air Quality Standards applicable to coarse particulate matter for 1 year from the date of enactment.

EPA Administrator Lisa Jackson committed in an October 14, 2011, letter that the EPA plans to propose keeping the PM<sub>10</sub> National Ambient Air Quality Standards as they are, with no change. These standards have been in place since 1987.

When Gina McCarthy, the Assistant Administrator for Air and Radiation at the EPA, testified before our Energy

and Power Subcommittee of the full committee, she also confirmed that this bill is not necessary since the administrator plans to propose retaining the current standards that have been in place since 1987.

For this reason, I did not support H.R. 1633 when it came up for a vote in our Energy and Commerce Committee, and I encourage my colleagues to oppose it today. I've had very public disagreements with the EPA on other regulations they are revising, but this bill is a solution in search of a problem, and it is not a good use of our congressional time. Taking up a bill that's not necessary hurts our efforts to work with the EPA and to revise some of the standards the EPA is setting that are real problems. That's why, Mr. Chairman, I urge a "no" vote on this bill.

UNITED STATES  
ENVIRONMENTAL PROTECTION AGENCY,  
Washington, DC, Oct. 14, 2011.  
Hon. DEBBIE STABENOW,  
U.S. Senate,  
Washington, DC.

DEAR SENATOR STABENOW: Thank you for your inquiry on the status of EPA's Review of the National Ambient Air Quality Standards (NAAQS) for particulate matter. Particulate matter includes fine particles (known as PM<sub>2.5</sub>) and coarse particles (known as PM<sub>10</sub>). PM<sub>2.5</sub> can come from fossil-fuel combustion, including power plants and motor vehicles, and wildfires and PM<sub>10</sub> can come from construction and demolition activities, industrial operations, wildfires, and dust from unpaved roads. It is well established that particulate matter emissions are linked to premature death and numerous adverse health impacts.

We have been making steady progress in reducing emissions of particulate matter—both fine and coarse—in this country for more than two decades, improving the public health of Americans while the economy has continued to grow.

It is important that a standard for particulate matter be protective of the health of the public. Based on my consideration of the scientific record, analysis provided by EPA scientists, and advice from the Clean Air Science Advisory Council, I am prepared to propose the retention—with no revision—of the current PM<sub>10</sub> standard and form when it is sent to OMB for interagency review.

This rulemaking package will also consider the latest scientific evidence and assessments for PM<sub>2.5</sub>. Again, thank you for the inquiry. It is EPA's responsibility to protect the health of all Americans—rural and urban—from known pollutants, including particulate matter. Please feel free to contact me if you have any questions, or your staff can contact Arvin Ganesan, Associate Administrator for the Office of Congressional and Intergovernmental Relations at (202) 564-4741.

Sincerely,

LISA P. JACKSON.

Mr. WHITFIELD. I yield 2 minutes to the gentleman from Kansas (Mr. POMPEO), a member of the Energy and Commerce Committee.

Mr. POMPEO. I thank the chairman for yielding.

This is a great day for rural America. H.R. 1633 is going to do what we've been trying to do for a long time, dur-

ing my entire 11 months in the United States Congress, which is to provide just a little bit of certainty for those folks who are out there trying to create jobs, trying to create food for America, trying to do the things that we've done in the rural parts of our country for so long.

The truth is the other side continues to say we are shooting the fairy dust and talking about Tinker Bell. I can assure you that I'm not amused. I can assure you that the 500 folks with whom I met just 2 weeks ago now at the Kansas Farm Bureau meeting were not amused either.

□ 1200

We understand that the very real risk of Lisa Jackson and the Environmental Protection Agency beginning to clamp down on farm dust still exists. We worked in our committee diligently. There were some valid concerns raised by the folks on the other side, and we endeavored, Mr. Chairman, at every moment to try and meet those concerns. We offered amendments. I offered an amendment in the nature of a full substitute which tried to address some of the concerns that the opposition expressed.

The truth is they just want to leave our farmers and our ranchers and our agricultural community at the whim of the EPA. That's not the place to put good, hardworking Americans who go out there every day trying to do the right thing. The whims of the EPA we have seen all too often present a real risk, a real risk of job destruction, a real risk of higher costs for every consumer in America.

This is a wonderful piece of legislation. It will, for the first time, get the EPA to move their hands away from the throats of our farmers and agricultural communities, and I would urge every one of my colleagues to support it.

Mr. WAXMAN. Mr. Chairman, the standard that's in place has been in place since 1987 when Reagan was President. It has not been changed. Suddenly there is a made-up fear that it's going to be changed and, therefore, we have the legislation that's before us.

We hear a lot about certainty. If this bill goes through, the certainty will be that there will be no regulation of many industries because EPA will no longer have jurisdiction. The other certainty is that a lot of people are going to get very sick from some dangerous pollutants.

At this time I wish to yield 2 minutes to the gentlelady from Illinois (Ms. SCHAKOWSKY).

Ms. SCHAKOWSKY. I thank the gentleman for yielding.

This bill is dangerous and its title is disingenuous. H.R. 1633 is about much more than farm dust. Our colleague Mr. SHIMKUS acknowledged that much

in the Energy and Commerce Committee markup of this bill last week when he said, "It is called farm dust, but I am here for my open-pit mines in southern Illinois."

The bill allows major industrial polluters to emit unlimited amounts of particulate matter in violation of the Clean Air Act. Mines, cement plants, and coal processing plants could legally emit unlimited amounts of dangerous chemicals into the air.

Let's be clear. The chemicals we are talking about are incredibly dangerous. Arsenic overexposure leads to skin, bladder, liver, and lung cancer. Lead exposure can damage the central nervous system, kidney, and blood cells. Cadmium exposure leads to severe respiratory damage. Zinc poisoning leads to kidney damage. Mercury pollution results in cognitive deficiencies, especially in children. Those pollutants, emitted from a range of nonfarm sources, could fall under the vague definition of "nuisance dust."

It seems to me that this is a piece of legislation that is being disguised as something as innocuous as farm dust, something that, as has been pointed out, has been regulated for a very long time. This is an effort to get around the legislation with a phony name, to get around the effectiveness of the Environmental Protection Agency. And we owe it to our constituents and our country to promote legislation that will stimulate the economy, which our environmental bills do, and protect and promote human health and the environment.

Our colleagues across the aisle have failed in that regard, and I urge a "no" vote.

Mr. WHITFIELD. At this time I would like to yield 2½ minutes to the gentleman from Nebraska (Mr. TERRY), a member of the Energy and Commerce Committee.

Mr. TERRY. Mr. Chairman, I am amused, humored by the opposition, all hailing from our greatest cities in the United States, urban areas.

I would like to read a note that I received from a rancher in Nebraska and our Nebraska cattlemen representing those who are affected:

The bill is needed to provide regulatory certainty to rural areas. We applaud the recent statement from Administrator Jackson that EPA does not intend to propose revisions to the current dust standard. The reality is, however, that regulations often change from the proposal stage of a rule-making to the final. For example, in 1996, EPA proposed to remove the PM<sub>10</sub> 24-hour standard altogether, only to bring it back in the final rule. And in 2006, EPA proposed to exempt agriculture dust, but that exemption also disappeared in the final rule. Second, under the Clean Air Act, EPA must review this standard every 5 years. That means we could face the same chal-

lenges again in just 5 short years. Also, citizen lawsuits could be brought that could result in a court deciding farm dust should be regulated. H.R. 1633 is the only way to provide regulatory certainty to farmers, ranchers, and rural residents.

Nuisance dust occurs naturally in rural areas. The type of "nuisance dust" that this bill would exempt from Federal regulation occurs naturally in rural areas, especially in arid and windy areas of the Plains and western States. This dust does not stay in the air but falls out quickly. Rural fugitive dust travels only a short distance from emission point. It settles out of the air quickly because of its size, making dust a localized issue. In fact, according to a study done by Hoffnagle, rural dust will fall out of the air within a thousand meters of its source.

This is not fairy dust or fables or tales to our folks in rural America; this is real and they want certainty.

Mr. WAXMAN. Mr. Chairman, I reserve the balance of my time.

Mr. WHITFIELD. I yield 1½ minutes to the gentleman from Arizona (Mr. GOSAR).

Mr. GOSAR. Mr. Chairman, I rise today in support of the Farm Dust Regulation Prevention Act brought today by my friend and colleague, Congresswoman KRISTI NOEM.

This good piece of legislation is a commonsense solution to a bureaucratic problem that is causing concern among many Arizonans. It's almost unfathomable to think that this legislation is necessary to protect Arizona against Federal bureaucrats who want to regulate dust, but here we are. That's exactly what the EPA is doing with its overreaching policies, holding individuals and businesses accountable for naturally occurring dust particles.

I stand here today to raise my voice against the unreasonable Federal regulations which would allow simple haboobs, dust clouds, and wind storms to pose an economic threat to the economic livelihood of farmers in and around my district.

It is important to also note that this bill covers dust which has been found to have no adverse human health effects.

Also notable among this bill's many supporters are the Arizona Farm Bureau Federation, the Arizona Cattle Feeders' Association, the Arizona Cattle Growers' Association, the Arizona Cotton Growers Association, and the National Cattlemen's Association.

Again, I support this legislation and encourage you to pass this good bill today.

Mr. WAXMAN. I continue to reserve the balance of my time.

Mr. WHITFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. BURTON).

Mr. BURTON of Indiana. I thank the gentleman for yielding.

With the economy the way it is, with unemployment very high, we don't need more government regulations. More regulations strangle the private sector and create more economic problems, and especially right now we don't need more regulations.

The Obama administration continues to circumvent Congress to go around us by passing more regulations, and the economy can't stand it. We need to stop more regulations. Even the threat, even the threat of more regulations must be stopped.

I mean, farm dust? Farm dust? Give me a break. We can't give these bureaucrats more authority. We don't need to give this administration or the bureaucracy more control over the lives of Americans.

Mr. WAXMAN. Mr. Chairman, I continue to reserve the balance of my time.

Mr. WHITFIELD. I yield 2 minutes to the gentleman from Illinois (Mr. MANZULLO).

Mr. MANZULLO. Mr. Chairman, I often hear complaints from farmers back home about the numerous regulatory burdens placed on them by the government. In fact, this whole past summer we worked with the farmers who have been in a real brouhaha with the EPA concerning the runoff from their stockyards, and even small ones at that.

□ 1210

These are life-threatening types of regulations to continuing their farming. And now we come up with another one, this one on dust.

EPA is in the process of reviewing its dust standards. In 2009, EPA said farm dust "likely is not safe" and could cut the allowable dust levels in half. Because of the furor this has created, the EPA said last October they would not regulate farm dust. First they said they would regulate it; now they said they won't regulate it. So to codify this understanding or these contradictory statements by the EPA, I'm sure that all of my colleagues will have no problem in voting for this bill.

H.R. 1633 will prevent the EPA from imposing new Federal regulations on naturally-occurring dust in rural America. It will allow States and localities to regulate farm dust as they see fit based on sound science. Farmers in Illinois already struggle to comply with current standards. If Washington imposes another one-size-fits-all solution to farm dust, this could mean even more unemployment in rural areas throughout Illinois and the Nation.

I urge my colleagues to support H.R. 1633.

Mr. WAXMAN. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. RUSH).

Mr. RUSH. I want to thank the ranking member for yielding.

Mr. Chairman, I want to share with the Members of this body the administration's position on this particular

bill that is under discussion right now. This is a Statement of Administration Policy:

"The administration strongly opposes H.R. 1633. As drafted, this bill would create serious problems for implementing Clean Air Act public health protections that have been in place for years while adding uncertainty for businesses and States. The bill, therefore, goes far beyond its stated intent of prohibiting the EPA from tightening national standards for coarse particles, which the administration has repeatedly explained that it has no intention of doing."

It goes on to say: "This ambiguously written bill would create high levels of regulatory uncertainty regarding emission control requirements that have been in place for years. Specifically, the bill's exclusion from the entire CAA of a new class of air pollutants called 'nuisance dust,' an imprecise and scientifically undefined term, could be used to roll back existing public health protection limiting pollution from mining operations, industrial activities, and possibly other sources."

"The bill also raises serious issues about whether the EPA could continue to implement the existing health-based fine and coarse particle programs, which play a vital, ongoing role in preventing adverse health effects of air pollution, including premature deaths, childhood asthma attacks, and other respiratory problems."

The CHAIR. The time of the gentleman has expired.

Mr. WAXMAN. I yield the gentleman an additional 30 seconds.

Mr. RUSH. I thank the gentleman for yielding.

"This administration remains committed to commonsense approaches to improving air quality across the country and preserving the competitiveness of every economic sector. Because H.R. 1633 is not only unnecessary, but also could have significant adverse public health consequences, the administration strongly opposes this bill."

"If H.R. 1633 were presented to the President, his senior advisers would recommend that he veto this bill."

Why are we wasting our time on this nuisance which is nonsense?

Mr. WHITFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. FARENTHOLD).

Mr. FARENTHOLD. Thank you very much.

I rise today in disgust with the dust. The regulations the Environmental Protection Agency are proposing to regulate, coarse particulate matter, what you and I know as dust, is ridiculous. It's indicative of what is wrong in Washington, D.C. with the regulatory framework that has gone wild. This just defies common sense. You cannot farm without kicking up dust.

I was raised on the farms and ranches in south Texas. As we drive to tend the

cattle herds, till the fields, or check out what's going on, there's no way to do it without dust. This opens the door to massive regulations. First we start with the farmer. Where's the EPA going to be next, checking under my bed for dust bunnies, putting on a white glove, running their fingers across the top of my doors, or making sure my car is adequately washed?

The EPA's regulation on this is the height of government overreach, the height of a waste of time, the height of a waste of money, and a perfect example of what is wrong with Washington.

We've got to stop this type of crazy government regulation so we can get people back to work, we can get jobs on track, and we can keep our farmers feeding our country and the world.

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

The unemployment rate in this country is close to 9 percent, and we're not doing anything about that problem. The deficit is a real threat to our economy, and the Republicans nearly made us default on our debts because they wouldn't go along with a real deficit reduction bill. We are looking at sequestrations of our national budget for the military, and our Secretary of Defense says that could be a threat to the Nation. And that sequestration will take place because the Republicans wouldn't allow the so-called supercommittee to do its job.

I want to read from an editorial in the Sioux Falls ArgusLeader:

"There are important issues at the Federal level right now that will have direct impact on our State—the dwindling funding for the Lewis and Clark water project and the fight to maintain our State's Medicare reimbursements through the Frontier States Provision . . . These are real issues . . . So it's disappointing to see [this] fight against a made-up problem like the potential for farm dust regulations by the Environmental Protection Agency."

When the EPA announced it would not pursue anything along these lines and they had no intention to do it, the Senate sponsor of this same bill declared victory and he pulled back on his companion bill for the other body. The Republicans ought to declare victory and allow us to deal with the real problems in this country, not this made-up threat that they want to help protect us from. I urge Members to vote against this bill."

I reserve the balance of my time.

Mr. WHITFIELD. Mr. Chairman, I have been told that we have no further speakers; so if the gentleman from California would like to close, then I would follow him.

Mr. WAXMAN. I yield back the balance of my time.

Mr. WHITFIELD. Mr. Chairman, we certainly do appreciate this discussion on this important bill. I can tell you that rural America does consider this to be a real problem. The gentleman from California mentioned, correctly

so, that we're operating under 1987 particulate matter standards. In 1997 and in 2006, the EPA went back to review that standard. They made a determination at that time that they would not take further action, but they were sued. Litigation ensued, and every 5 years the EPA is required by the Clean Air Act to look at this.

□ 1220

We know there are going to be further lawsuits. And so that's why we think it's absolutely mandatory that Congress assert itself and set out the policy that we do not want EPA regulating the dust on farms and ranches in America.

I might also add that in the letter we received from the board of supervisors of the county of Imperial in Arizona, they said the original rule that EPA had covered farms of 40 acres or more, which is 97 percent of all farmland in the Valley. EPA is now insisting that that be changed to all farms of 10 acres or more. And for what purpose? It seems clear that there's absolutely no justification for imposing requirements that would have a negative impact on the economy and the employment in Imperial County when the rules and controls would not change the ability of the county to meet the standards on the few high particulate matter days that are caused by exceptional events.

So, in closing, I would simply say we view this as a real problem. Congress needs to assert itself and set a definitive policy on this issue. I would urge all Members to support this legislation.

I yield back the balance of my time.

Mr. HENSARLING. Mr. Chair, I am proud to support yet another jobs bill put forth by House Republicans to empower small business owners and eliminate burdensome Washington regulations that prevent job creation and hinder economic growth. This bill prevents the EPA from issuing new dust regulations. Additionally, it gives states the flexibility to address any rural dust issues rather than the federal government.

During this debate we have heard a lot about the need to protect our air quality and the need to ensure clean air for future generations. As the grandson of a farmer, I know the value and importance agriculture producers place on protecting the soil and water they use to grow quality food to feed the country. I would argue there are no greater stewards of the land than farmers, and that additional rules on these hard-working Americans to regulate rural dust are not only unnecessary, they can be detrimental.

In this time of record unemployment, Washington should be on the side of job creators and family farmers, not on their backs. We should support smart regulations that instill confidence in job creators, not abusive red tape that only leads to closed farms and longer unemployment lines.

You don't have to take my word for it though. Just listen to some of my constituents:

Mr. Cummins of Canton writes, "Their proposed regulations on milk spills or dust . . .

would create undue hardships and be economically unfeasible to attain."

Mr. Johnson of Mineola writes, "I feel like the government is passing a law, regulation, unfunded mandate at the drop of a hat these days. [...] farmers controlling dust, dairy farmers documenting and controlling milk spills, telling me what kind of light bulb to buy [...] what kind of health care I must have, it is just never ending these days."

The Farm Dust Regulation Prevention Act is the 35th jobs bill produced by the House Republican Plan for America's Job Creators to restore the freedom and confidence our private sector needs to grow again.

After today, with this bill, there will be 27 House-passed bipartisan jobs bills stacked like cordwood on the doorstep of the Democrat-controlled Senate.

As America weathers through the Obama Economy and the worst jobs climate since the Great Depression, I urge my colleagues to support our nation's farmers and ranchers and pass this jobs bill.

Mr. PENCE. Mr. Chair, I rise as a cosponsor and strong supporter of the Farm Dust Regulation Prevention Act (H.R. 1633). I want to express my appreciation to the gentlelady from South Dakota, Congresswoman NOEM, for her strong leadership on this issue. As a family farmer and sponsor of this legislation, Congresswoman NOEM is keenly aware of the devastating effects Environmental Protection Agency regulations can have on our Nation's farmers.

For those who are unfamiliar with farm dust, it is quite simply the everyday dirt and dust present in rural America on fields and country roads. It occurs naturally from dry weather or wind blowing across wide open spaces. Or it can be caused by the act of farming—tilling-up the land or harvesting crops. If you come from rural areas like my home district in Eastern Indiana, you know that farm dust is a part of daily life, and if you make a living on a farm, you probably have never even given farm dust a second thought. But, the EPA, despite the fact that rural farm dust has not been shown to pose a significant health concern, has done nothing to clarify the difference between rural farm dust and harmful pollutants that are common in urban areas. This legislation differentiates farm dust from these harmful air pollutants and gives family farms the certainty of knowing the federal government will not regulate their windblown soil.

Mr. Chair, the EPA needs to leave farmers alone and let them get about the business of farming. The Farm Dust Regulation Prevention Act will go a long way in securing the long-term stability of family farms and rural businesses. It would limit the EPA's regulation of this naturally occurring dust by giving state and local governments the ability to address the issue, and it would delay any new National Ambient Air Quality Standards issued by the EPA for one year.

In this difficult economy, family farms must be protected from burdensome, costly federal redtape. The EPA has no business regulating the dirt kicked-up on the farms and back roads of rural Indiana, and I urge my colleagues to support this commonsense legislation.

Mr. DEFAZIO. Mr. Chair, today, my Republican colleagues missed an opportunity to pass

targeted, nonpartisan legislation to protect farmers and small businesses from unnecessary federal regulation.

There is widespread and bipartisan agreement that "farm dust," dust produced during activities on farms and ranches, should not be regulated by the Environmental Protection Agency (EPA) under the Clean Air Act. The EPA doesn't want to regulate it. And Members of Congress do not want the EPA to regulate it, myself included.

But instead of writing legislation to codify a simple ban on regulating farm dust—legislation that would have won my support and the support of most of my Democratic colleagues—the Majority wrote a bill creating major loopholes in the Clean Air Act that would have significant consequences for public health and the environment.

H.R. 1633 imposes a blanket, one-year moratorium on any regulation updating the national ambient air quality standards applicable to all coarse particulate matter, which includes: fly ash, diesel soot, asbestos, arsenic, lead, mercury, and heavy metals.

None of these harmful toxins are defined as farm dust. Yet, this far-reaching bill would prohibit EPA from protecting American families from these harmful toxins for at least a year.

H.R. 1633 would also exempt major industrial activities, including open-pit mining and aluminum smelters, from EPA's review. Again, arsenic, beryllium, cadmium, nickel, and mercury—all particulates emitted from mines and industrial activities—would be exempt from federal oversight, even though they have nothing to do with "farm dust."

The Environmental Protection Agency (EPA) does not regulate farm dust. The EPA has no plans to start regulating farm dust. And, if the EPA ever proposed regulations for farm dust, I would vociferously oppose them and sponsor legislation to prevent their implementation.

But that's not the bill before the House today. The bill before the House today is a distraction from the most pressing issue facing our country and economy: jobs, jobs, and jobs.

Mr. Chair, I support a ban on regulating farm dust. That's common sense. But I do not support creating Clean Air Act loopholes for big industry under the guise of helping small farmers and businesses. I am voting no on H.R. 1633.

Mr. VAN HOLLEN. Mr. Chair, farm dust is not regulated by the EPA, and EPA Administrator Jackson has clearly stated that the EPA has no plans to regulate farm dust in the future—which makes the Farm Dust Regulation Prevention Act a solution in search of a problem.

Unfortunately, today's legislation is more than just a mere waste of time. Under the guise of protecting farmers from non-existent regulation, H.R. 1633 would define and then exempt a completely new category of particle pollution from the entire Clean Air Act, except under very narrow circumstances. This new exempt category of particle pollution would include both coarse and fine particles from sources that have nothing to do with farming—including particulate matter from mining and other industrial operations like smelters, cement kilns and coal-processing facilities. Whether this consequence is intended or sim-

ply the result of sloppy drafting, this legislation should be roundly rejected.

Mr. Chair, with barely a week left on this year's congressional calendar, we simply don't have the time to waste on imaginary problems. The challenges our constituents face are real, and the hour is late. We need to focus on growing the economy, reducing our debt and getting people back to work before we adjourn for the year.

Mr. BOSWELL. Mr. Chair, I rise in support of H.R. 1633, the Farm Dust Regulation Prevention Act.

As a farmer, and an original cosponsor of this legislation, I appreciate the opportunity to discuss this bill and speak in support of its common sense approach to rural dust regulations.

I have traveled the rural parts of my district and I have farmed my own fields. I know that when I'm harvesting my crops in the combine that I'm going to stir up some dust. Whether I am planting, tiling, or transferring crop to the grain bin, I cannot control the fact that there will be dust.

A one size fits all approach to regulating particulate matter, does not take into consideration that there are many sources of dust.

This legislation allows the flexibility for our states and municipalities to manage dust in rural areas, so that local residents and workers can determine which types may be harmful, and what is simply the result of hard-working Americans of doing their jobs.

Our farmers, ranchers, and rural business leaders are facing the same economic uncertainties as the rest of the country and they cannot afford additional, costly regulations on dust.

Particularly, those producers who are in areas where natural disasters have created new challenges for tilling soil that has been harmed by drought, fire and flood. For these individuals, many of the challenges remain unknown. Additional regulations will only increase their burdens and limit their ability to return to their job and contribute to the economy of rural America.

I know that Administrator Jackson has stated that the agency plans to maintain current standards. I thank her for that. I appreciate her intention to work with Congress and our farmers and ranchers.

However, her statement alone does not protect the farm operations across our nation and it does not prevent this body from legislating on behalf of our producers.

This legislation provides the protections needed for rural Americans to continue to do their day to day work without the threat of new regulation interfering with their mission to grow safe, plentiful, and affordable food for our nation.

We all have a vested interest to ensure that farmers and ranchers can provide for their families and all Americans.

I encourage my colleagues to support his legislation.

Mr. LUCAS. Mr. Chair, I rise in support of the Farm Dust Regulation Prevention Act.

This bipartisan legislation is necessary to ensure that farmers and ranchers will not be subjected to excessive regulation from the Environmental Protection Agency.

The EPA currently has the ability to tighten regulatory standards for dust under the Clean Air Act.

Should the EPA do so, farmers, ranchers, and rural economies could be devastated. On dry days, production could come to a standstill as producers focus on controlling dust rather than producing food.

After months of receiving questions and concerns from farmers, ranchers, and their Representatives in Congress, the Administrator of the EPA finally stated that her agency does not intend to change the current standards.

However, as long as EPA Administrator Jackson retains unchecked power to implement stricter standards, farmers and ranchers could be subject to oppressive regulations at any time.

A legislative fix is the only way to give farmers and ranchers the certainty they need to invest in the future without worrying about the influence of overzealous activists on EPA's regulations.

I urge my colleagues to support this bill.

Ms. ESHOO. Mr. Chair, H.R. 1633, the Farm Dust Regulation Prevention Act is another step by the Majority to roll back clean air and water laws, and this bill dishes out both injury and insult.

The injury: Republicans convinced farmers that the EPA was going to regulate farm dust (or nuisance dust), a made-up term, not based on scientific or medical evidence. The EPA has no plans to regulate farm dust. In fact, in October of this year, EPA Administrator Lisa Jackson confirmed that she does not plan to change current law regarding coarse particle emissions, so this bill is completely unnecessary.

The insult: What this bill does do is exempt particle emissions from a wide array of sources including mining operations, cement plants, gravel pits and coal processing plants. These sources emit arsenic, lead, and mercury among other harmful pollutants and these pollutants can cause very serious health problems, including decreased lung function, asthma attacks, respiratory diseases, and worse.

The Energy and Commerce Committee recently received a letter from a team of physicians and researchers at Johns Hopkins School of Public Health. The experts wrote that this legislation, "does not account for current or future knowledge of health risks posed by rural particulate matter exposure, and rather enacts a permanent exemption of rural particulate matter from Clean Air Act regulation. This approach is not supported by the scientific evidence or good professional judgment, and is not scientifically defensible."

This bill ignores science, creates harm, and insults farmers.

I urge my colleagues to oppose this bill.

Ms. MCCOLLUM. Mr. Chair, I rise to strongly oppose H.R. 1633, the Farm Dust Regulation Prevention Act. Regrettably, the House Republican majority is choosing to waste precious floor time debating this political statement instead of allowing a vote on President Obama's American Jobs Act.

Contrary to the claims of my Republican colleagues, H.R. 1633 has nothing to do with job creation or economic growth. This legislation addresses a nonexistent issue since the Environmental Protection Agency (EPA) stated repeatedly it has no intention of regulating "farm dust."

However, it cannot be said that H.R. 1633 would have no effect. This legislation creates new loopholes that allow open-pit mines, gravel mines, smelters and coal-processing facilities to escape public-health protections under the Clean Air Act. Enactment of this legislation would result in more pollution leading to more premature deaths, asthma attacks, respiratory disease and heart attacks. House Republicans say they are standing up for family farmers when in fact they are aiding corporate polluters.

While the Minnesota family farmers I have heard from have serious challenges, they assure me that farm dust is far down on their list of priorities. Their real concerns relate to rising costs for seed, fertilizer, land, rent and machinery. They worry about protecting their land for the next generation in the face of federal cuts to conservation programs. They struggle with consolidation in the agricultural sector and the ability of the biggest farms to expand at the expense of smaller ones. Political debates in Washington about farm dust are not a factor in their lives.

H.R. 1633 is just another veiled Republican assault on our nation's landmark clean air laws. I urge my colleagues to reject this bill and return our attention to the real problems that are impacting job growth in our economy.

The CHAIR. All time for general debate has expired.

Pursuant to the rule, the amendment in the nature of a substitute recommended by the Committee on Energy and Commerce, printed in the bill, shall be considered as an original bill for the purpose of amendment under the 5-minute rule and shall be considered read.

The text of the committee amendment in the nature of a substitute is as follows:

H.R. 1633

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### **SECTION 1. SHORT TITLE.**

*This Act may be cited as the "Farm Dust Regulation Prevention Act of 2011".*

#### **SEC. 2. TEMPORARY PROHIBITION AGAINST RE- VISING ANY NATIONAL AMBIENT AIR QUALITY STANDARD APPLICABLE TO COARSE PARTICULATE MATTER.**

*Before the date that is one year after the date of the enactment of this Act, the Administrator of the Environmental Protection Agency may not propose, finalize, implement, or enforce any regulation revising the national primary ambient air quality standard or the national secondary ambient air quality standard applicable to particulate matter with an aerodynamic diameter greater than 2.5 micrometers under section 109 of the Clean Air Act (42 U.S.C. 7409).*

#### **SEC. 3. NUISANCE DUST.**

*Part A of title I of the Clean Air Act (42 U.S.C. 7401 et seq.) is amended by adding at the end the following:*

#### **"SEC. 132. REGULATION OF NUISANCE DUST PRIMARILY BY STATE, TRIBAL, AND LOCAL GOVERNMENTS.**

*"(a) IN GENERAL.—Except as provided in subsection (b), this Act does not apply to, and references in this Act to particulate matter are deemed to exclude, nuisance dust.*

*"(b) EXCEPTION.—Subsection (a) does not apply with respect to any geographic area in which nuisance dust is not regulated under*

*State, tribal, or local law insofar as the Administrator finds that—*

*"(1) nuisance dust (or any subcategory of nuisance dust) causes substantial adverse public health and welfare effects at ambient concentrations; and*

*"(2) the benefits of applying standards and other requirements of this Act to nuisance dust (or such subcategory of nuisance dust) outweigh the costs (including local and regional economic and employment impacts) of applying such standards and other requirements to nuisance dust (or such subcategory).*

*"(c) DEFINITION.—In this section—*

*"(1) the term 'nuisance dust' means particulate matter that—*

*"(A) is generated primarily from natural sources, unpaved roads, agricultural activities, earth moving, or other activities typically conducted in rural areas;*

*"(B) consists primarily of soil, other natural or biological materials, or some combination thereof;*

*"(C) is not emitted directly into the ambient air from combustion, such as exhaust from combustion engines and emissions from stationary combustion processes; and*

*"(D) is not comprised of residuals from the combustion of coal; and*

*"(2) the term 'nuisance dust' does not include radioactive particulate matter produced from uranium mining or processing."*

The CHAIR. No amendment to the committee amendment in the nature of a substitute shall be in order except those printed in House Report 112-317. Each such amendment may be offered only in the order printed in the report, by a Member designated in the report, shall be considered read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question.

AMENDMENT NO. 1 OFFERED BY MR. RUSH

The CHAIR. It is now in order to consider amendment No. 1 printed in House Report 112-317.

Mr. RUSH. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

In section 2, strike "applicable to particulate matter with an aerodynamic diameter greater than 2.5 micrometers" and insert "for PM<sub>10</sub>".

At the end of section 2, add the following: "Nothing in this Act precludes the Administrator from proposing, finalizing, implementing, or enforcing the national primary ambient air quality standard or the national secondary ambient air quality standard for PM<sub>2.5</sub>".

Strike section 3.

The CHAIR. Pursuant to House Resolution 487, the gentleman from Illinois (Mr. RUSH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Illinois.

Mr. RUSH. Mr. Chairman, if the premise of this bill is to simply provide regulatory certainty to rural farmers and reiterate what Administrator Jackson has already publicly stated—

that EPA would not alter the Bush-era standards for coarse particulate matter—then the Rush amendment would satisfy that objective.

During the subcommittee hearing on H.R. 1633, we heard testimony from the bill's sponsor that the intent of this legislation was to address the regulatory uncertainty over "farm dust." However, during that same hearing, we heard testimony from the Assistant Administrator of the Office of Air and Radiation, Gina McCarthy, where she expressed a serious concern over the ambiguous language in the bill and the overly broad impact it could have on existing Clean Air Act programs.

Mr. Chairman, the Rush amendment would remove the ambiguity and provide clarity to the bill's intent so that we can keep in place standards to protect our Nation's most vulnerable populations. At the end of section 2, my amendment would add the following: "Nothing in this Act precludes the Administrator from proposing, finalizing, implementing, or enforcing the national primary ambient air quality standard or the national secondary air quality standard for PM<sub>2.5</sub>." Additionally, because there is such widespread suspicion that the real intent of this bill is to roll back existing Clean Air Act protections, my amendment would strike section 3 altogether, which contains the most overly ambiguous and excessively broad provisions of the bill. In section 3, the bill's exclusion for particulate matter from combustion would not exclude particulate pollution from sources such as open-pit mines, mining processing plants, sand and gravel mines, smelters, coal mines, coal-processing plants, cement kilns, and waste and recovery facilities.

Mrs. McCarthy raised serious concerns about the effect of this bill on existing health-based standards due to the fact that the term "nuisance dust" is not a scientifically-defined term, and it would be very difficult to incorporate into a scientifically-based program. As Mrs. McCarthy noted, "Coarse particles have been linked to a variety of adverse health effects, including hospitals visits related to cardiovascular and respiratory disease, and premature death. While the body of scientific evidence is much more limited for coarse PM than for fine particles, the agency's review of the studies indicate that short-term exposures to coarse particles remain a concern."

Mr. Chairman, the Rush amendment would provide regulatory certainty to rural farmers while also protecting our Nation's most vulnerable population, including our children, our senior citizens, people with low incomes, and people with chronic lung disease such as asthma, chronic bronchitis, and emphysema.

I urge all my colleagues to support my amendment.

With that, I yield back the balance of my time.

Mr. WHITFIELD. Mr. Chairman, I claim time in opposition.

The CHAIR. The gentleman from Kentucky is recognized for 5 minutes.

Mr. WHITFIELD. While I have a great deal of respect and admiration for the gentleman from Illinois, I am going to oppose this amendment.

I would say, first of all, that this legislation does not change in any way the current EPA standard relating to particulate matter on coarse materials. His amendment would strike the provision in the bill addressing nuisance dust, keeping only that which prohibits a change to the existing PM<sub>10</sub> standard for 1 year, which we agree with. But because it strikes section 3, which is the main part and the substantive part of this bill because it would eliminate our nuisance dust definition, I would respectfully oppose the amendment and urge all Members to vote "no" on the amendment.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Illinois (Mr. RUSH).

The question was taken; and the Chair announced that the noes appeared to have it.

Mr. RUSH. Mr. Chairman, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Illinois will be postponed.

#### AMENDMENT NO. 2 OFFERED BY MRS. CHRISTENSEN

The CHAIR. It is now in order to consider amendment No. 2 printed in House Report 112-317.

Mrs. CHRISTENSEN. I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

In section 132(b) of the Clean Air Act, as proposed to be added by section 3 of the bill, after "is not regulated under State, tribal, or local law" insert "at a level requisite to protect public health (as determined by the Administrator)."

The CHAIR. Pursuant to House Resolution 487, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from the Virgin Islands.

□ 1230

Mrs. CHRISTENSEN. Mr. Chairman, I yield myself such time as I may consume.

This bill stands as an effort to dramatically weaken the Clean Air Act and delay implementation of vital public health protections against toxic particles.

The adverse health effects of particulate matter are serious and have been well documented. Thousands of studies published over the last 9 years make a

much stronger case for the regulation of fine particles and indicate that the current standards must be revisited in order to ensure the public health is protected.

The major health effects of fine particulate matter include reduced lung function, cough, wheezing, missed school days due to respiratory symptoms, increased use of asthma medication, strokes, emergency room visits, hospital admissions, lung cancer, and premature death—at levels well below the current national air quality standards.

This bill, H.R. 1633, eliminates EPA's authority to control so-called "nuisance dust" except in a very narrow set of circumstances.

First, the Administrator must find that nuisance dust causes substantial adverse public health and welfare effects.

Second, even if the Administrator determines that nuisance dust causes substantial harm, she must also find that the benefits of regulating nuisance dust outweigh the cost, including impacts on employment. This approach upends the way EPA has been setting health-based air pollution standards for 40 years.

The Clean Air Act requires EPA to set each air quality standard based purely on science and medical evidence showing the health effects of exposure to the pollutant. The standard basically identifies the level of pollution that is safe to breathe. The Clean Air Act also requires EPA to set the standard with an adequate margin of safety to account for uncertainty and protect sensitive subpopulations, such as children with asthma. Essentially, this bill would require EPA to determine the level of air pollution that is safe to breathe based on the costs of control, not the medical evidence.

Third, under this bill, the Administrator only has this limited authority in areas where State, local or tribal governments are not regulating nuisance dust. But the bill provides no minimum standard of protection, no Federal floor. That means that even the most minimal State or local requirement is sufficient to bar EPA action on anything that falls under the definition of nuisance dust.

It is absurd, Mr. Chairman, to claim that any State or local dust regulation, no matter how minimal, would be sufficient to protect the public health. We tried to address air pollution only on the State and local level throughout the 1960s. It did not work. Companies blocked cleaner air protections by threatening to leave for other States with weaker standards.

This widely acknowledged failure produced overwhelming support for the cooperative federalism approach embodied in the Clean Air Act since 1970. Under this approach, the Federal Government sets minimum uniform standards to protect health, and States and

localities then decide how to achieve those standards.

Since 1970, every American has had the same basic right to clean and healthy air. My amendment simply preserves those rights. It ensures that the residents of every State and locality are afforded a baseline level of protection against particle pollution. My amendment says that if the State, local, or tribal laws are not sufficient to protect public health from exposure to dangerous particle pollution, then EPA has the authority under the Clean Air Act to step in and take action to reduce that pollution.

This bill tries to turn back the clock to a time when State and local air pollution laws weren't strong enough to protect public health. Those who are ignorant of history are doomed to repeat it. Let's learn our history and recognize that both States and the Federal Government play valuable roles in ensuring that Americans breathe clean and healthy air.

I urge my colleagues to support my amendment, and I reserve the balance of my time.

Mr. HURT. Mr. Chairman, I claim time in opposition.

The CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. HURT. I thank the Chairman.

This amendment would allow the EPA to override the State and local regulations and thereby gut the purpose of this bill.

Let's remember what the commonsense purpose of this bill is. There's nothing radical at all about this bill. In fact, in section 3 this bill protects public health. It protects public health by relying on the State and local regulators who are best equipped to make judgments about naturally occurring dust. And it does nothing at all to affect the particulate matter 2.5 standard. I think that's important to note inasmuch as it seems that the opposition seems to want to forget that.

Let's remember the ultimate purpose of this bill, and that is to protect the farmer and the rural businesses from overreaching Federal regulation that causes uncertainty and it causes job loss.

However, the EPA and the opposition talked about the myth. They say that it's more likely that the EPA would regulate fairy dust. They say that this is a solution in search of a problem. But our farmers know better; our rural business owners know better. They know better because they have looked at the proposed regulations and the proposals from the EPA staff that was dated back in April in which they proposed looking at and revising the PM<sub>10</sub> standard. They also have seen the letter that was sent to my office in May of this year in which Ms. McCarthy, the assistant administrator, makes it clear that agricultural dust and dust coming off of roads is absolutely within

the larger view of these standards. That's what our farmers know.

But most of all, they know their experience. They know what they have endured over the years—over the decades—of what comes out of Washington and how it affects their everyday life. If you look at their track record, you can only see why there is uncertainty and why they believe this is a very, very real threat.

I am proud to be able to travel across my rural district in south side Virginia and central Virginia and talk to farmers. In August, I sat down with a group of farmers in Nelson and Albemarle Counties. One of the farmers that was there is a peach farmer, a fruit grower. He said to me, Mr. HURT, on my farm, where my family has been for generations growing peaches for our customers, I'm regulated by the Department of Labor, the Department of Agriculture, the FDA, the IRS, the Department of Transportation, the Corps of Engineers, the EPA—and the list goes on when you add the State and local regulators. He said, I'm regulated by all those different agencies, most of them Federal agencies; and all I'm trying to do is grow a peach. How hard can it be?

And I think when you look at the commonsense purpose of this bill, you will see that this amendment would gut it. It is for that reason that I would urge my colleagues to vote against this amendment.

Mr. Chairman, I yield back the balance of my time.

The CHAIR. The gentlewoman from the Virgin Islands has 30 seconds remaining.

Mrs. CHRISTENSEN. I would just like to add that my amendment does not really take away any authority from the State, local, and tribal governments; it just ensures that they set standards that are based on the protection of the public health.

With that, I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN).

The question was taken; and the Chair announced that the noes appeared to have it.

Mrs. CHRISTENSEN. Mr. Chairman, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from the Virgin Islands will be postponed.

AMENDMENT NO. 3 OFFERED BY MR. CRAWFORD

The CHAIR. It is now in order to consider amendment No. 3 printed in House Report 112-317.

Mr. CRAWFORD. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

In section 132(b) of the Clean Air Act, as proposed to be added by section 3 of the bill, after "insofar as the Administrator" insert ", in consultation with the Secretary of Agriculture,".

The CHAIR. Pursuant to House Resolution 487, the gentleman from Arkansas (Mr. CRAWFORD) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Arkansas.

Mr. CRAWFORD. Mr. Chairman, my amendment is very straightforward, and I believe it will help provide the proper amount of interagency communication with the EPA when they go to write air quality standards for particulate matter.

The legislation being considered today excludes nuisance dust from the EPA regulatory net, but the bill provides an exemption if the EPA determines that the economic benefits of regulating dust outweigh the cost. My amendment would simply direct the EPA to consult with the Department of Agriculture in making this determination.

As a member of the Ag Committee, I've heard testimony from both the Secretary of Agriculture and the EPA Administrator on how their respective agencies propose and write regulations. A problem that became apparent to me is that the two agencies don't even seem to communicate. Neither agency could give me a sufficient explanation of the protocol for interagency communication between the EPA and the USDA. Their responses were bureaucratic and vague.

I find this troubling because if you ask the farmers and ranchers in my Arkansas district about the greatest threat to their operations, they always respond with three letters: EPA. I don't think their response would be the same if both agencies worked together more often.

□ 1240

Perhaps the best example of the right hand not knowing what the left hand is doing occurred this past summer when the President was in his home State of Illinois for a town hall event. One farmer asked the President why the EPA was targeting new regulations at farmers after a difficult growing season through the Midwest and Midsouth this year. The President pointed to Ag Secretary Vilsack for backup and asked the farmer to explain the specific regulations.

The farmer cited rules that would be crippling to the ag community, including regulating farm dust. President Obama defiantly dismissed the question by saying, "Don't always believe what you hear." He later told the crowd: If you ever have a question as to whether it's going to make it harder for you to farm, contact USDA.

It seems to me that the President didn't understand that it's the EPA, not the Department of Agriculture,

that was the source of this man's frustration. If the President doesn't realize that the EPA is coming down hard on our Nation's farmers and ranchers, then why would the agency, itself, find it necessary to consider agriculture in proposing regulations? Clearly, it does not.

My amendment would ensure that the EPA and the Department of Agriculture work together if the EPA seeks to further regulate the agriculture industry in the future. The Department of Agriculture understands the economic well-being of our Nation's farmers and ranchers better than any other agency and should have a degree of input whenever the EPA writes rules that directly impact farmers and ranchers.

This amendment would be a small but important step in that direction.

With that, Mr. Chairman, I yield back the balance of my time.

Mr. WAXMAN. Mr. Chairman, I ask unanimous consent that I be able to control the time that would be allotted to those in opposition.

The SPEAKER pro tempore. Without objection, the gentleman from California is recognized for 5 minutes.

There was no objection.

Mr. WAXMAN. Mr. Chairman, the Crawford amendment simply requires EPA to consult with the Secretary of Agriculture before making any determination about the health threat posed by pollution in an area, as well as the costs and benefits of taking action.

I don't know that the Department of Agriculture has much to contribute in terms of the health threats; but the bill is so objectionable already, it's hard to argue that this amendment makes it discernibly worse. It's a drop in a very large bucket.

For that reason, I will not oppose this amendment. We're willing to accept it, but I still am in opposition to the bill.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Arkansas (Mr. CRAWFORD).

The amendment was agreed to.

AMENDMENT NO. 4 OFFERED BY MR. MARKEY

The CHAIR. It is now in order to consider amendment No. 4 printed in House Report 112-317.

Mr. MARKEY. Mr. Chair, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

In section 132(c) of the Clean Air Act, as proposed to be added by section 3 of the bill, strike "and" at the end of paragraph (1), strike the period at the end of paragraph (2) and insert "and", and add at the end the following paragraph:

"(3) the term 'nuisance dust' does not include particulate matter containing arsenic or other heavy metals that are hazardous to human health."

The CHAIR. Pursuant to House Resolution 487, the gentleman from Massa-

chusetts (Mr. MARKEY) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Massachusetts.

Mr. MARKEY. I yield myself 2 minutes.

In this legislation, the Republican majority exempts all so-called nuisance dust from the protective air quality standards for coarse particle or soot pollution under the Clean Air Act.

Republicans have defined "nuisance dust" to include particulate matter that is generated from "earth moving or other activities that are typically conducted in rural areas." This legislation's broad definition means a bill which is supposed to be all about tractors and farms is actually about barring EPA from regulating the toxic soot that comes out of mines, smelters, chemical plants. And that's because all of these materials come from earth moving, natural materials, or activities that take place in rural areas.

Now, I don't know about the majority, but when most people hear the word "nuisance" they think of things like honking horns, telemarketers, and buzzing flies. They don't think of poison. By preventing EPA from regulating the toxic soot spewing out of mining operations, smelters, chemical facilities, and construction sites, Republicans have apparently decided that poisonous chemicals such as arsenic, lead, and mercury are mere nuisances.

This false advertising is not a total surprise. We have heard from Republican witnesses in the past who, in defense of the most polluting industries, have unwillingly offered up the absurd. In fact, in the last Congress, at a hearing I chaired, the Republican witness said he would be happy to sprinkle arsenic-laced coal ash on his cereal.

It turns out that the Republican witness is not alone in his suggestion to use arsenic as a dietary supplement. Arsenic, which is a major component of mining activities, was famously used to poison and kill a number of prominent people throughout history, including Napoleon, King George III, and the Emperor of China.

I reserve the balance of my time.

Mr. TERRY. Mr. Chairman, I claim the time in opposition.

The CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. I thank the chairman and appreciate the gentleman from Boston's arguments here suggesting that this bill somehow exempts arsenic and all these poisons. The reality is it does not. It's an unnecessary amendment. It, one, is to make a point that I think is inflated.

The reality is emissions of arsenic above the standard would still be in violation of EPA rules. The reality also exists then, if you're going to move the goalpost to a zero particulate, then we've got a different issue here.

Now, the dust that we're talking about from agricultural activities—

plowing, harvesting, driving on roads—in our own definition says that consists primarily of soil and other natural and biological materials. So, if you're going to adopt a new standard totally different than current standards at the EPA on such issues as arsenic, the reality in rural America is that it is a natural part of our soil, and when dust would kick up and blow, it will be at a particulate level below what the standards are.

We're just trying to say, look, the reality is the EPA even says that at the extremely minor level of particulates that would be inherent in topsoil that could be kicked up by wind or farming activities is not a health risk. In fact, one of the authors of the EPA's most recent integrated science assessment for particulate matter issued in 2010 testified before our committee and stated, "For long-term effects of coarse particulates, there is next to no evidence in support of long-term health effects."

In rural America, in Nebraska, we can show you real-life examples. In rural America, they have the highest health standards and longevity of life and health.

So with that, I will let the gentleman close on his amendment and yield back the balance of my time.

Mr. MARKEY. Mr. Chairman, I yield myself the balance of my time.

In the 19th century, mercury, another common mining waste, was used as a cure-all for toothaches and other ailments. It turns out that the mercury is also highly toxic. It causes severe impacts on the brain and, throughout history, has been identified as the poison behind many other notable illnesses and deaths in the history of our planet.

By defining nuisance dust this way, the Republicans are, essentially, providing the mining industry with the holiday gift of pollution. Instead of gold and frankincense and myrrh, the Republicans are bearing gifts of arsenic and lead and mercury for every family in our country.

My amendment simply states that so-called nuisance dust doesn't include poisonous arsenic or other heavy metals that are hazardous to human health, because cancer is not a nuisance. The development of a child's brain is not a nuisance. Yet the Republicans would treat these conditions as a nuisance rather than as medical catastrophes for the families of America.

So let's be clear what this bill is all about. This is another attempt by the Republicans to protect Big Coal by creating another loophole to avoid the Clean Air Act so that families don't have to worry that their children are inhaling these dangerous materials, the arsenic, the lead, the mercury that they are petrified are going to have a negative long-term impact on their children's development.

□ 1250

That's what this is all about, bottom line. And the coal industry is saying "no." The Republicans are using the guise of some farm dust cloud of confusion to mask what they're really trying to do, which is to allow the coal industry to continue to send this lead, this mercury, this arsenic up into the air and into the lungs of children across our country, especially those that are so young that we know it has an impact on their development, especially of their brain.

So I urge an "aye" vote on this amendment, and I don't think there can be a more important amendment that we're going to vote upon in this Congress.

I yield back the balance of my time. The CHAIR. The question is on the amendment offered by the gentleman from Massachusetts (Mr. MARKEY).

The question was taken; and the Chair announced that the noes appeared to have it.

Mr. MARKEY. Mr. Chairman, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Massachusetts will be postponed.

AMENDMENT NO. 5 OFFERED BY MR. WAXMAN

The CHAIR. It is now in order to consider amendment No. 5 printed in House Report 112-317.

Mr. WAXMAN. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

In section 132(c) of the Clean Air Act, as proposed to be added by section 3 of the bill, strike "and" at the end of paragraph (1), strike the period at the end of paragraph (2) and insert "; and", and add at the end the following paragraph:

"(3) the term 'nuisance dust' does not include any particulate matter produced from mining activities.

The CHAIR. Pursuant to House Resolution 487, the gentleman from California (Mr. WAXMAN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

The supporters of this bill said they're simply trying to exempt harmless dirt from farms and ranches from regulation under the Clean Air Act. That simply is not the case. This bill is nothing more than a bait-and-switch. The title says it's about farm dust, but in reality, it would exempt air pollution from a number of industrial sources from the entire Clean Air Act, including mines.

The bill defines "nuisance dust" to include particulate matter, that consists primarily of natural materials generated from sources that include "earth moving." So when you look at

that definition, it would allow mines to be exempted from the requirements of the Clean Air Act. This is an egregious overreach that would allow mines to release particulate matter into the air without any controls.

The Kennecott, Utah, Copper Mine serves as a perfect example of why this is such a problem. Kennecott Copper operates one of the largest open-pit copper mines in the world, in Utah. The mine is even visible from space.

Every day, they mine about 150,000 tons of copper ore and 330,000 tons of waste rock from the Bingham Canyon mine. Kennecott's operations are the single largest source of particulate pollution in Utah.

The mine is having a significant impact on air quality, even with the pollution control requirements in place. There is simply no reason, therefore, to say well, we're going to address farm dust by exempting this mine from regulation under the Clean Air Act. And that is what this bill would do. It would exempt all particle pollution from the mine's activities from the entire Clean Air Act.

That mine is now subject to the requirements of the Clean Air Act. They're doing what they need to do to control pollution from that mine. If we adopt this bill, it would allow them to refrain from doing anything other than just simply spewing the pollution.

These mining operations, Kennecott and others, can have a significant impact. They emit large quantities of both fine and coarse particulate matter. Yet under this bill, they would be exempt from regulation.

So my amendment simply clarifies that this bill does not apply to particle pollution from any mining activities.

The science shows that coarse and fine particle pollution, regardless of the source, can trigger asthma attacks, heart attacks, stroke, and premature death. That's why I oppose exempting favored sources of this pollution from the Clean Air Act, and that's why I oppose the bill.

But at a minimum if we adopt this amendment, we would ensure that the bill is true to its name—the Farm Dust Regulation Prevention Act. Large industrial open-pit mines and gravel mining operations shouldn't get a free pass to pollute under the clever pretense of being involved with farms.

I would urge my colleagues to support this amendment removing mine operations from coverage under this bill and making sure the bill only covers farming operations.

I reserve the balance of my time.

Mrs. McMORRIS RODGERS. Mr. Chairman, I claim time in opposition.

The CHAIR. The gentlewoman from Washington is recognized for 5 minutes.

Mrs. McMORRIS RODGERS. I yield myself such time as I may consume.

Just to let me clarify, the purpose of this legislation, H.R. 1633, is to exempt

rural dust from costly and unnecessary Federal regulation. It doesn't do anything to exempt any kind of facility, source, or mine from environmental regulation. The northeastern part of Washington State, which I represent, is one of the toughest places in the world to mine. This bill isn't going to change that. Mining and agricultural dust is comprehensively regulated by State agencies and many, many Federal statutes currently in place, including the Surface Mining and Control Reclamation Act, Federal Mine Safety and Health Act, Resource Conservation and Recovery Act, Clean Water Act, Federal Land Policy and Management Act, the National Environmental Policy Act, and many others. This includes regulation by the Department of Interior of dust from wind erosion and vehicle traffic associated with mines. State and local authorities will still have full authority to impose nuisance dust controls, and rural America needs certainty that they won't be second-guessed by the EPA.

I urge a "no" on this amendment.

Bottom line, if you stop and think about it, there's a story here, a story of two paths forward. One path has the potential to bring economic growth, jobs, and energy independence to this country; the second path has brought and will continue to bring economic stagnation to our Nation.

The irony is that the administration seems to continue to advocate for the second path. And of course I'm talking about the path of EPA overregulation that continues to put a stranglehold on businesses and economic growth in this country.

The next phase of the EPA's path is America's farmland. Whether you're working in the field herding cattle or driving down a dirt road, the EPA wants to regulate the dust you pick up.

The Farm Dust Regulation Protection Act of 2011 will ensure that this path is stopped by prohibiting the implementation of a stricter PMT standard for 1 year and exempting nuisance dust, like farm dust, from any future PMT regulation.

I applaud my colleagues, Representatives NOEM and HURT, for introducing this important legislation. I urge my colleagues to support it.

I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, farm dust is not the same thing as pollution from a mine. My amendment would exclude pollution from a mine from this legislation so that it stays under EPA regulation under the Clean Air Act, as it is today. There is no reason to give mining operations, whether they're in rural or in urban areas, a pass so that they need not even meet requirements to protect the public from unsafe pollutants that could cause adverse health impacts.

I urge the adoption of the amendment, and I yield back the balance of my time.

Mrs. McMORRIS RODGERS. I would like to yield the balance of my time to the chairman of the subcommittee.

Mr. WHITFIELD. Mr. Chairman, this is a little off topic. We have a young man who served the Energy and Commerce Committee and me personally for many years and did an outstanding job. His name is Jeff Mortier. Tomorrow is his last day as an employee of the House of Representatives. I just want to take this opportunity to thank him for the great job that he did and to wish him the very best in his new endeavor.

The CHAIR. The question is on the amendment offered by the gentleman from California (Mr. WAXMAN).

The question was taken; and the Chair announced that the ayes appeared to have it.

Mr. WHITFIELD. Mr. Chairman, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from California will be postponed.

□ 1300

#### AMENDMENT NO. 6 OFFERED BY MR. FLAKE

The CHAIR. It is now in order to consider amendment No. 6 printed in House Report 112-317.

Mr. FLAKE. I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

At the end of the bill, add the following:

#### SEC. 4. SENSE OF CONGRESS.

It is the sense of the Congress that the Administrator of the Environmental Protection Agency should implement an approach to excluding so-called "exceptional events", or events that are not reasonably controllable or preventable, from determinations of whether an area is in compliance with any national ambient air quality standard (NAAQS) applicable to coarse particulate matter that—

(1) maximizes transparency and predictability for States, tribes, and local governments; and

(2) minimizes the regulatory and cost burdens States, tribes, and local governments bear in excluding such events.

The CHAIR. Pursuant to House Resolution 487, the gentleman from Arizona (Mr. FLAKE) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Arizona.

Mr. FLAKE. Mr. Chairman, I yield myself such time as I may consume.

While the Clean Air Act obviously serves a useful purpose, all too often States and localities are tied up in knots in just trying to comply with the provisions of it in which the rules that were promulgated in response to the law, or amendments to the law, just weren't well thought out.

In this regard, in 2005 Congress amended the Clean Air Act so States and localities could get off the regu-

latory hook for so-called "exceptional events"—dust events—events that they cannot control but that impact air quality. In 2007, the EPA adopted the Exceptional Event Rule, implementing Congress' amendment to the Clean Air Act; but this rule has proven flawed, costly, and inconsistently implemented.

Let me give you an idea of what we're talking about here. Here is a picture. It's an actual photograph of one of the events that happened just this year in the Phoenix metropolitan area which was caused by a monsoon.

The monsoon comes along. When it rolls along flat ground, it tends to pick up every loose bit of dust or dirt that's there, and it causes an event like this. Obviously, this is not something that the State or local government can control; yet we're forced to go then to the EPA and beg for an exception to the Clean Air Act, which has proven to be extremely costly when we have to do it over and over again.

I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, I ask unanimous consent to speak on this amendment.

The CHAIR. Without objection, the gentleman from California is recognized for 5 minutes.

There was no objection.

Mr. WAXMAN. I wanted to say to the gentleman from Arizona that I think his amendment makes a great deal of sense. It complies with what, I think, the EPA ought to do under these exceptional circumstances, and we are prepared to accept his amendment.

I yield back the balance of my time.

Mr. FLAKE. I thank the gentleman from California.

Mr. Chairman, just to give you an idea of how prevalent the problem is, I'll just summarize a little more. In Arizona, the Maricopa Association of Governments, or MAG, has said that there have been about 100 events that have exceeded the PM<sub>10</sub> standard this year. All but one was from an exceptional event—dust storms that occurred naturally.

What happens then is States and localities, as I said, have to go to the EPA and beg for an exception to the rule. In some cases, just for an example, if you take all of the events in 2011, the Maricopa Association of Governments is estimating it will cost over \$1 million to just argue and put together the paperwork to go to the EPA and say, This was a big monsoon that caused this. It was an exceptional event. In the end, the EPA may rule in our favor, but it is the cost of actually going through it.

This is not just in Maricopa County. It's not just in Arizona. In the San Joaquin Valley, I believe it has noted that the paperwork for just one high-wind exceptional event takes more than 400 staff hours to prepare in order to go to the EPA. It takes 400 staff hours for

one exceptional event like this to go and say, This shouldn't count against our air quality or count against us in terms of new regulations and costs that will be imposed on us.

I am a cosponsor of the underlying bill to which this amendment will be attached, and I support it. This is an important amendment. It is not just an academic question, and I'm glad that all sides recognize this. So I thank the gentleman from California for accepting the amendment.

I now wish to yield time to the sponsor of the bill, the gentlewoman from South Dakota (Mrs. NOEM). I thank her for her dogged work in bringing this forward.

Mrs. NOEM. I rise in support of the amendment that the gentleman from Arizona has brought to the floor.

Mr. Chairman, this amendment would add a sense of Congress to this piece of legislation that the EPA should approach and exclude exceptional events and have a provision such as this. It would give us a consistent and a transparent manner for dealing with these events. Certainly, rural America and other parts of America need the certainty that the regulation is not triggered by natural events that are out of our control.

Mr. FLAKE. I thank the gentlelady.

In conclusion, Mr. Chairman, the EPA does recognize there is a problem here, and they are working to correct it. It's just taking a long time. The rule was promulgated in 2007. We've had 3 or 4 years since that time, and every year it costs States and local governments millions of dollars just to seek exceptions with these exceptional events. The language in this amendment simply encourages the EPA to move more quickly, and Congress stands ready to help them to fashion a new rule that will truly account for these exceptional events.

With that, I urge support for the amendment, and I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Arizona (Mr. FLAKE).

The amendment was agreed to.

#### AMENDMENT NO. 7 OFFERED BY MR. SCHOCK

The CHAIR. It is now in order to consider amendment No. 7 printed in House Report 112-317.

Mr. SCHOCK. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

At the end of the bill, add the following:

#### SEC. 4. IMPACTS OF EPA REGULATORY ACTIVITY ON EMPLOYMENT AND ECONOMIC ACTIVITY IN THE AGRICULTURE COMMUNITY.

(a) ANALYSIS OF IMPACTS OF ACTIONS ON EMPLOYMENT AND ECONOMIC ACTIVITY IN THE AGRICULTURE COMMUNITY.—

(1) ANALYSIS.—Before taking a covered action, the Administrator shall analyze the impact, disaggregated by State, of the covered action on—

(A) employment levels in the agriculture industry; and

(B) agricultural economic activity, including estimated job losses and decreased economic activity related to agriculture.

(2) ECONOMIC MODELS.—

(A) IN GENERAL.—In carrying out paragraph (1), the Administrator shall utilize the best available economic models.

(B) ANNUAL GAO REPORT.—Not later than December 31 of each year, the Comptroller General of the United States shall submit to Congress a report on the economic models used by the Administrator to carry out this subsection.

(3) AVAILABILITY OF INFORMATION.—With respect to any covered action, the Administrator shall—

(A) post the analysis under paragraph (1) as a link on the main page of the public Internet Web site of the Environmental Protection Agency;

(B) request the Secretary of Agriculture to post the analysis under paragraph (1) as a link on the main page of the public Internet Web site of the Department of Agriculture; and

(C) request that the Governor of any State experiencing more than a de minimis negative impact post such analysis in the Capitol of such State.

(b) PUBLIC HEARINGS.—

(1) IN GENERAL.—If the Administrator concludes under subsection (a)(1) that a covered action will have more than a de minimis negative impact on agricultural employment levels or agricultural economic activity in a State, the Administrator shall hold a public hearing in each such State at least 30 days prior to the effective date of the covered action.

(2) TIME, LOCATION, AND SELECTION.—A public hearing required under paragraph (1) shall be held at a convenient time and location for impacted residents. In selecting a location for such a public hearing, the Administrator shall give priority to locations in the State that will experience the greatest number of job losses.

(c) NOTIFICATION.—If the Administrator concludes under subsection (a)(1) that a covered action will have more than a de minimis negative impact on agricultural employment levels or agricultural economic activity in any State, the Administrator shall give notice of such impact to the State's Congressional delegation, Governor, and Legislature at least 45 days before the effective date of the covered action.

(d) DEFINITIONS.—In this section, the following definitions apply:

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of the Environmental Protection Agency.

(2) COVERED ACTION.—The term "covered action" means any of the following actions taken by the Administrator under the Clean Air Act (42 U.S.C. 7401 et seq.) relating to agriculture and the national primary ambient air quality standard or the national secondary ambient air quality standard for particulate matter:

(A) Issuing a regulation, policy statement, guidance, response to a petition, or other requirement.

(B) Implementing a new or substantially altered program.

(3) MORE THAN A DE MINIMIS NEGATIVE IMPACT.—The term "more than a de minimis negative impact" means the following:

(A) With respect to employment levels, a loss of more than 100 jobs related to the agriculture industry. Any offsetting job gains that result from the hypothetical creation of

new jobs through new technologies or government employment may not be used in the job loss calculation.

(B) With respect to economic activity, a decrease in agricultural economic activity of more than \$1,000,000 over any calendar year. Any offsetting economic activity that results from the hypothetical creation of new economic activity through new technologies or government employment may not be used in the economic activity calculation.

The CHAIR. Pursuant to House Resolution 487, the gentleman from Illinois (Mr. SCHOCK) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Illinois.

Mr. SCHOCK. Mr. Chairman, I yield myself such time as I may consume.

I rise today to offer an amendment with my good friend and colleague, Mrs. SHELLEY MOORE CAPITO of West Virginia.

Our amendment is simple. It requires the EPA to consider the impact of new agriculture jobs and the economy before issuing new rules and regulations. A similar amendment to the Clean Water Cooperative Federalism Act passed this House in July, and it enjoyed broad bipartisan support.

My amendment today says if jobs and the economic well-being of farmers would be negatively impacted, the EPA will be required to hold public hearings in the impacted State. It would also require the EPA to notify the State's Governor, legislature, and congressional delegation. It would also require that the EPA post its analysis of the negative job impact on its Web site, request the Secretary of Agriculture to do the same, and request the Governor of that State to post similar analysis on the State capital's Web site.

I don't believe this is too much to ask. We are simply asking the EPA to calculate the number of jobs lost and the economic impact on the agricultural community with a new rule that would do such. If its calculation turns out to be detrimental, we want the EPA to let our Nation's farmers know before it implements additional red tape and new regulations.

We expect the bureaucrats in the EPA here in Washington, D.C. to go out into the real world and understand the impact of the rules that they are implementing, that they are suggesting, and that have a real effect on farmers who are trying to run their operations across America and are helping to feed the world's population.

This past weekend, the Illinois Farm Bureau, in my home State, had its annual meeting. It conducted a survey of the thousands of farmers who participated in that convention, and it asked them an open-ended question:

What posed the biggest threat to their future profitability as family farmers? Was it input costs? lower commodity prices? land prices? commodity price swings?

No. Their answer, overwhelmingly, was government regulation.

Dale Hadden, who is a farmer from Jacksonville, Illinois, recently told me: "The thought of the EPA continuing to place more regulations on my farming operation is unfounded. My family prides itself on being environmental stewards and making our farm better for the next generation. We do it better here than in any other place in the world."

Jamie Schaffer, another farmer from my district, in Princeville, Illinois, told me:

"The EPA over-regulation has the potential to shut us down. We wouldn't be able to farm with modern equipment. Livestock walks across the field and creates dust when it's dry out. We need to take regulators out to our farms and personally show them there's no way around dust or dirt. It's just a natural part of the environment."

Let's let Dale, Jamie, and other farmers in our country continue to do what they do best. Let the EPA bureaucrats understand first, before they implement a new rule, what kind of effect, if any, it will have negatively on jobs and the economy throughout our country.

I urge a "yes" vote, and I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, I rise in opposition to the amendment.

The CHAIR. The gentleman from California is recognized for 5 minutes.

Mr. WAXMAN. I have several concerns about this amendment, which seems to ignore the reality of how agencies communicate, along with the well-established process for how EPA proposes and finalizes a rule.

First of all, this amendment requires the EPA to conduct additional economic analyses for a broad range of agency actions that could affect agriculture, including guidance documents and policy statements.

□ 1310

Requiring an expensive and time-consuming detailed economic analysis for every policy statement makes no sense.

Secondly, this amendment singles out one favored sector for special treatment. Why should we have an entirely different rulemaking process in place for agriculture? If the Republicans are concerned about the rulemaking process, then they should work with us on a bipartisan basis to improve the way rules are adopted for all sectors, not just one.

This amendment also isn't necessary. EPA already has to evaluate the costs and benefits of each rule to satisfy requirements and numerous statutes. When issuing a rule, EPA has to comply with the Administrative Procedure Act, the Paperwork Reduction Act, the Regulatory Flexibility Act, the Small Business Regulatory Enforcement Fairness Act, the Unfunded Mandates

Reform Act, specific environmental statutes, Executive orders on regulatory planning and review requirements of the Office of Management and Budget, and others.

A few minutes ago, we accepted an amendment from the gentleman from Arizona (Mr. FLAKE) that called on EPA not to have a burdensome process when they grant a state flexibility in handling an exceptional event that caused a violation, and he argued we didn't need a burdensome process to get to that result.

This additional burdensome process imposed by this amendment is also unnecessary. According to the GAO, the requirements already in place are quote, "clearly voluminous and require a wide range of procedural, consultative, and analytical action on the part of the agencies."

This amendment appears to ignore this well-established process and, instead, would add another burdensome layer to the already lengthy review. It serves no purpose. It bogs down the agency. It creates more bureaucracy. It costs more money. It does not accomplish anything. And insofar as it accomplishes anything, it just stalls the agency from acting in only one area—agriculture.

I urge my colleagues to oppose this amendment as well as oppose the underlying bill.

I reserve the balance of my time.

Mr. SCHOCK. May I inquire as to how much time remains?

The CHAIR. The gentleman from Illinois has 1½ minutes remaining.

Mr. SCHOCK. Thank you, Mr. Chairman.

I would respond to my friend from California with a couple points.

First of all, we did have the opportunity to apply a similar rule to the entire bureaucracy. We passed that yesterday. It's called the REINS Act.

But with regard to specifically pointing out agency by agency, a similar amendment passed earlier this year to the clean water bill, the Clean Water Act, that had bipartisan support, and I would certainly hope that this amendment would as well.

To the concern about expense, I can't imagine what's more expensive than putting Americans out of work. I can't think of what's more expensive than asking American farmers to come up with more cash and more expenses because of bureaucrats' new rules in Washington, D.C.

Finally, this does not prohibit the agency from doing anything. It just requires the agency to know what they're doing, the impact on jobs, and that to be known by the farmers, the State, the congressional delegation, and certainly the bureaucrats at the EPA.

With that, I yield 1 minute to my friend from Colorado (Mr. GARDNER).

Mr. GARDNER. I thank the gentleman from Illinois for this amendment.

It's ironic that the opposition to this amendment characterizes the amendment as a burden. However, the burden being placed, I would suggest, if it's a burden at all, is on the EPA, the EPA who actually has to take a look at whether or not this is impacting jobs before the regulation is promulgated.

How about that? We actually do something around this place that takes a burden off the private sector and makes government do their job to make sure they're not hurting jobs in private industry.

You know, this is an amendment that makes absolute common sense, to look before you leap, to make sure that you understand the impacts of a regulation before you issue it, and that's why I support this amendment.

The CHAIR. The time of the gentleman from Illinois has expired.

Mr. WAXMAN. Mr. Chairman, how much time do I have?

The CHAIR. The gentleman from California has 2 minutes remaining.

Mr. WAXMAN. Mr. Chairman, the EPA goes through an incredible analysis now, the costs and the benefits and all the other considerations. It's appropriate. To add another review of regulations at EPA is to require paralysis by analysis, and perhaps that's the objective of the amendment.

The gentleman from Illinois (Mr. SCHOCK) has said he can't imagine anything more expensive than what this regulation might do to farmers. Well, I'll tell you something that's more expensive: Tax breaks for zillionaires, billionaires, and millionaires is a lot more expensive than requiring EPA to do even more.

Let's not burden the agency with reviews only for one sector that add nothing to the analysis that they already achieved before they adopt any regulation. And these regulations that are already in effect now are not costing jobs.

This whole bill is supposed to prevent regulations that had not even been adopted. And we're not losing jobs because of that. We're losing jobs because our economy is not functioning, because we don't have a willingness by the Republicans to stimulate this economy, get people back to work and get jobs for those who need them.

I oppose this amendment, and I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Illinois (Mr. SCHOCK).

The amendment was agreed to.

AMENDMENT NO. 8 OFFERED BY MR. AL GREEN  
OF TEXAS

The CHAIR. It is now in order to consider amendment No. 8 printed in House Report 112-317.

Mr. AL GREEN of Texas. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

At the end of the bill, add the following section:

**SEC. 4. REPORT ON EFFECT ON JOBS.**

Not later than 180 days after the date of enactment of this Act, the Administrator of the Environmental Protection Agency shall transmit to Congress a report estimating the increase or decrease in the number of jobs in the United States that will occur as a result of the enactment of this Act (including the amendment to the Clean Air Act (42 U.S.C. 7401 et seq.) made by section 3 of this Act).

The CHAIR. Pursuant to House Resolution 487, the gentleman from Texas (Mr. AL GREEN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Texas.

Mr. AL GREEN of Texas. Mr. Chairman, I yield myself such time as I may consume.

There has been much debate as to whether this bill will create or save jobs. There is much speculation based on whether this bill will create or save jobs. When you have few facts, you, generally speaking, can have much speculation. This amendment addresses speculation.

There is some sense in this country that our approval rating is low in Congress because of much speculation. Speculation can breed distrust. Speculation can lead to fact-free debate, a term my good friend, EMANUEL CLEAVER, Representative from Missouri, uses—fact-free debate.

This amendment can help us eliminate fact-free debate. This amendment contains less than 100 words, and it addresses the elimination of fact-free debate. It reads:

Not later than 180 days after the date of enactment of this act, the Administrator of the Environmental Protection Agency shall transmit to Congress a report estimating the increase or decrease in the number of jobs in the United States that will occur as a result of the enactment of this act.

This amendment eliminates fact-free debates and speculation. So if you really want to eliminate fact-free debates and speculation, then you should support this amendment.

If you believe that this bill really does create or save jobs, then you should support this amendment.

If you believe that Carlisle is right, that no lie can live forever, and this will eliminate the possibility of things being done with malice aforethought, you should support this amendment.

If you believe that William Cullen Bryant is right, that truth, when crushed to Earth, can rise again, you should support this amendment, because this amendment will help us to reveal what the truth is.

If you believe that fact-free debates ought to be eliminated, you ought to support this amendment.

I reserve the balance of my time.

Mr. GARDNER. I rise in opposition to the amendment.

The CHAIR. The gentleman from Colorado is recognized for 5 minutes.

Mr. GARDNER. Mr. Chairman, I yield myself such time as I may consume.

The question I have on that—I understand the confusion about jobs in the EPA. I think there is a great deal of confusion when it comes to whether or not the EPA is considering jobs in their analysis.

The administration has issued an Executive order. We have actually, through the Energy and Commerce Committee, held a number of hearings on the Executive order that says, hey, you need to take a look at the impact on jobs when a regulation is promulgated.

We have had testimony from various officials at the EPA talking about whether or not they look at jobs.

□ 1320

There seems to be a great deal of confusion at the EPA about whether they actually care about jobs. But the problem is we ought to take a look at those jobs before the regulation is issued. That's exactly what the amendment did that we just passed by Mr. SCHOCK. Addressing jobs, clearly, is not the expertise of the EPA. In fact, just ask assistant administrator Mathy Stanislaus, who came before our committee and testified that, indeed, when they issued a regulation, they didn't take a look at the jobs impact, even though about 30 seconds before in his statement he said that they did take a look at the impact on jobs.

To the extent the EPA does comment on the jobs impact of its regulatory agenda, it has been widely criticized for understanding the potential for job losses, or for even making farfetched claims that the regulations create jobs. At one time we had a hearing with Gina McCarthy, assistant administrator of the EPA, who testified for every \$1 million in regulations, it creates 1.5 jobs; 1.5 jobs for every \$1 million in cost of a regulation. That's their idea of a job-creating idea or activity.

State, local, and tribal governments will be able to enforce their own dust regulations in a way that makes sense for local conditions, including on jobs and the economy.

We don't need to spend money on a study to know that avoiding overregulation will benefit the economy. Avoiding overregulation will benefit the economy. Regulations—1.5 jobs for every \$1 million. That's the kind of math that my constituents, many constituents across this country, simply don't understand.

I reserve the balance of my time.

Mr. AL GREEN of Texas. Mr. Chairman, how much time do I have?

The CHAIR. The gentleman has 2½ minutes remaining.

Mr. AL GREEN of Texas. Thank you.

It is an opinion, well stated, and I appreciate the opinion that has been well

stated. However, the best way to ascertain whether jobs are being created or eliminated is to utilize empirical evidence, empirical evidence developed after the fact as opposed to before the actual implementation of the bill.

If you believe, and I believe your heart's in the right place, if you believe that this is an opportunity for us to dispel any myths, to dispel any speculation, then let's have a study done after the bill has passed and after there has been some time for implementation.

I'm willing to extend the time. I'm willing to have GAO do the study. My heart's in the right place. I want us to have proof positive that this bill does or does not eliminate jobs. I want to eliminate the speculation.

I believe I have enough time left to engage my friend in a colloquy.

How much time do I have, Mr. Chairman?

The CHAIR. The gentleman has 1½ minutes remaining.

Mr. AL GREEN of Texas. I yield to my friend from Colorado.

Mr. GARDNER. Thank you very much for the time and consideration. Again, we did adopt an amendment that actually takes a look at the regulation before it's offered.

Mr. AL GREEN of Texas. Reclaiming my time for just a moment, you say before. You see, empirical evidence under the scientific method is best acquired after you have the actual evidence. So what you would do is utilize speculation to come to a conclusion and then call that a fact. This would eliminate speculation.

I yield to the gentleman.

Mr. GARDNER. I think I know that if I stub my toe, it's going to hurt before I do it. We ought to be able to check out whether or not it's going to cost jobs before we do it.

Mr. AL GREEN of Texas. Reclaiming my time, the question is whether you will actually have the opportunity to hurt your toe, as you put it. There is no need to avoid things that don't exist. Let us get the actual raw empirical evidence and use that to draw our conclusions as to whether this bill creates or saves jobs.

I yield to the gentleman.

Mr. GARDNER. I thank the gentleman.

The empirical evidence that I go on comes from the groups in Colorado that know this issue the best—the farmers and ranchers that I represent. Here's just a listing of a few of the organizations that support this bill as it stands.

Mr. AL GREEN of Texas. Reclaiming my time, because supporting something is not empirical evidence as to whether or not it will do a certain thing. I respect all who are supporting it.

By the way, I don't disrespect you. I believe your heart is in the right place.

What I'm trying to get you to see is if you utilize the scientific method, you will get your empirical evidence after you have given this an opportunity to be enacted.

I yield back the balance of my time.

Mr. GARDNER. Mr. Chairman, I yield myself the balance of my time.

Again, I would just like to continue with a list of overwhelming support from those in my district that believe this will, indeed, cost jobs. We've adopted an amendment that says hey, let's take a look at it before it goes into effect. The Colorado agriculture organizations, including the Colorado Association of Wheat Growers, the Colorado Cattlemen's Association, the Colorado Corn Growers, the Colorado Lamb Council, the Colorado Livestock Association, the Colorado Pork Producers Council, the Colorado Potato Administrative Committee, the Colorado Sheep and Wool Authority, the Colorado Wool Growers Authority, and the Colorado Farm Bureau, these are organizations that will work each and every day under this regulation. And perhaps the EPA says hey, you know what, we're not going to do this right now, but they are very concerned.

Mr. AL GREEN of Texas. Will the gentleman yield?

Mr. GARDNER. I yield to the gentleman from Texas.

Mr. AL GREEN of Texas. With all due respect, the world is larger than Colorado, and there are other States and other organizations.

Mr. GARDNER. Reclaiming my time, I understand there are some big concerns from Boston, there are concerns in Houston, and there are some concerns in Los Angeles; but, I can tell you in rural Colorado, in rural America, there are grave concerns that there are many people in this body that think their concerns over farm dust are nothing more than concerns over pixie dust.

I would just close with this argument.

Mr. AL GREEN of Texas. Will the gentleman yield?

Mr. GARDNER. I yield to the gentleman.

Mr. AL GREEN of Texas. In my city we have a rock-crushing company. It yields dust, particulate matter. That is something that is a concern to rural people as well.

Mr. GARDNER. Reclaiming my time, the gentleman will recognize that State, local, and tribal governments will be able to enforce their own dust regulations according to local conditions. So I understand where you're coming from. I would just oppose this amendment. I believe that we need to get on to the underlying bill and adopt the underlying bill so that we can move forward, creating jobs, making sure that we're not killing jobs, and do what's right for this country when it comes to our economy.

I yield back the balance of my time.  
The CHAIR. The question is on the amendment offered by the gentleman from Texas (Mr. AL GREEN).

The question was taken; and the Chair announced that the noes appeared to have it.

Mr. AL GREEN of Texas. I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Texas will be postponed.

#### ANNOUNCEMENT BY THE CHAIR

The CHAIR. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments printed in House Report 112-317 on which further proceedings were postponed, in the following order:

Amendment No. 1 by Mr. RUSH of Illinois.

Amendment No. 2 by Mrs. CHRISTENSEN of the Virgin Islands.

Amendment No. 4 by Mr. MARKEY of Massachusetts.

Amendment No. 5 by Mr. WAXMAN of California.

Amendment No. 8 by Mr. AL GREEN of Texas.

The Chair will reduce to 2 minutes the minimum time for any electronic vote after the first vote in this series.

#### AMENDMENT NO. 1 OFFERED BY MR. RUSH

The CHAIR. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Illinois (Mr. RUSH) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

#### RECORDED VOTE

The CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 255, not voting 28, as follows:

[Roll No. 906]

#### □ 1351

Messrs. SCHWEIKERT, ALTMIRE, GRIFFIN of Arkansas and SULLIVAN changed their vote from “aye” to “no.”

Mr. GRIJALVA and Ms. SPEIER changed their vote from “no” to “aye.”

So the amendment was rejected.

The result of the vote was announced as above recorded.

Stated for:

Mr. BECERRA. Mr. Chair, earlier today I was unavoidably detained and missed rollcall vote 906. If present, I would have voted “aye” on rollcall vote 906.

Stated against:

Mr. DOLD. Mr. Chair, on rollcall No. 906 I was unavoidably detained. Had I been present, I would have voted “no.”

#### AMENDMENT NO. 2 OFFERED BY MRS. CHRISTENSEN

The CHAIR. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from the Virgin Islands (Mrs. CHRISTENSEN) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

#### RECORDED VOTE

The CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The CHAIR. This will be a 2-minute vote.

The vote was taken by electronic device, and there were—ayes 159, noes 250, not voting 24, as follows:

[Roll No. 907]

## ANNOUNCEMENT BY THE CHAIR

The CHAIR (during the vote). There is 1 minute remaining.

□ 1402

So the amendment was rejected.

The result of the vote was announced as above recorded.

Stated for:

Ms. JACKSON LEE of Texas. Mr. Chair, on rollcall No. 909 which is on the Waxman Amendment to the bill H.R. 1633, I was detained with official matters pertaining to my office and failed to make the vote. Had I been present, I would have voted “aye.”

## AMENDMENT NO. 8 OFFERED BY MR. AL GREEN OF TEXAS

The CHAIR. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Texas (Mr. AL GREEN) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

## RECORDED VOTE

The CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The CHAIR. This is a 2-minute vote.

The vote was taken by electronic device, and there were—ayes 170, noes 247, not voting 16, as follows:

[Roll No. 910]

## ANNOUNCEMENT BY THE CHAIR

The CHAIR. (during the vote). There is 1 minute remaining.

□ 1405

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIR. The question is on the committee amendment in the nature of a substitute, as amended.

The amendment was agreed to.

The CHAIR. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. WOODALL) having assumed the chair, Mr. WOMACK, Chair of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill

(H.R. 1633) to establish a temporary prohibition against revising any national ambient air quality standard applicable to coarse particulate matter, to limit Federal regulation of nuisance dust in areas in which such dust is regulated under State, tribal, or local law, and for other purposes, and, pursuant to House Resolution 487, reported the bill back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the amendment reported from the Committee of the Whole?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

## MOTION TO RECOMMIT

Ms. DEGETTE. Mr. Speaker, I have a motion to recommit at the desk.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Ms. DEGETTE. Yes, sir, most definitely I am.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Ms. DeGette moves to recommit the bill H.R. 1633 to the Committee on Energy and Commerce with instructions to report the same back to the House forthwith, with the following amendment:

At the end of the bill, add the following section:

**SEC. 4. PROTECTING THE PUBLIC FROM TOXIC DUST THAT CAUSES CANCER AND BRAIN DAMAGE.**

Nothing in this Act or the amendment made by this Act shall prohibit the Administrator of the Environmental Protection Agency from proposing, finalizing, implementing, or enforcing any regulation promulgated under the Clean Air Act (42 U.S.C. 7401 et seq.) relating to emissions in particulate form of cadmium, lead, or asbestos, including vermiculite asbestos released from mining activities and asbestos released from demolition and renovation activities.

The SPEAKER pro tempore. The gentleman from Colorado is recognized for 5 minutes.

Ms. DEGETTE. Thank you, Mr. Speaker.

Really? Really, Mr. Speaker?

With 1 week left in the legislative session, we've spent an entire day debating about a bill that does not address an existing problem; and with the continuing resolution expiring 1 week from tomorrow, we're not working on an appropriations bill to keep our government operating? We're not here today voting on an extenders bill that would extend the payroll tax cut for

middle Americans just as the economy begins to recover?

Really?

We're not voting on extending unemployment benefits to help struggling families stay afloat while they continue to look for work?

Really, Mr. Speaker?

And once again, we're not doing one thing today to put Americans back to work?

Unfortunately, as ridiculous as today's effort has been, the consequences of the bill are no laughing matter. The truth is the EPA does not currently regulate farm dust. This bill would prevent a regulation that doesn't actually exist from overseeing something undefined.

□ 1410

Also, EPA Administrator Lisa Jackson has said unequivocally that she does not intend to regulate farm dust in the future.

But to add insult to injury, the consequences of this proposed solution could be devastating. The bill that came out of the Energy and Commerce Committee could be interpreted broadly to limit existing and future Clean Air Act public health protections for different pollutants.

This final amendment that I offer today offers us the chance to protect our children and our grandchildren from asbestos, lead, cadmium, and other toxic air pollutants. I want to be clear: this is the final amendment to the bill; and even though I'd like to, it will not kill the bill or send it back to committee. If adopted, it would then be voted on at final passage, as amended.

Now, Mr. Speaker, if we are going to adopt this bill, we should make sure that we don't inadvertently roll back EPA rules relating to toxic dust containing cadmium, lead, and asbestos. This should be something all of us can agree on. Currently, the bill exempts particulate matter from regulation under the Clean Air Act if it is natural material, commonly produced in rural areas, and is not produced by combustion.

Asbestos is a natural material. Activities involving asbestos are considered typical in rural areas, and asbestos emissions from mining and demolition do not involve combustion. Unfortunately, asbestos is also a known carcinogen.

What would happen if we exempted asbestos from the Clean Air Act?

We already know. To see the realities of asbestos, a natural material, we could simply ask the rural families of Libby, Montana.

In 2009 the Environmental Protection Agency declared a public health emergency in Libby after decades of asbestos exposure from local mines. Even though the vermiculite asbestos mine closed in 1990, the EPA believes that current conditions continue to present

significant ongoing threats to public health. There remain significantly higher rates of asbestos-related disease in Libby compared with the national average.

Too bad the managers of the mine told their workers that the dust they inhaled daily was just "nuisance dust" and would have no permanent effects.

H.R. 1633 would also exempt lead and cadmium particulate emissions from the Clean Air Act. Because lead and cadmium are natural materials, activities involving lead and cadmium, such as cement kilns and smelters, are typical in rural areas; and activities at cement kilns and smelters produce lead and cadmium without combustion.

Sounds safe; right?

Unfortunately, cadmium is a known human carcinogen. Exposure to cadmium may cause lung, kidney, prostate, and bladder cancer.

Lead is a potent neurotoxin. Infants and young children are especially sensitive to even low levels of lead, which may contribute to behavioral problems like learning deficits and lower IQs.

Is that what this distinguished body really wants to do, actively take steps to cause behavioral problems, learning deficiencies and lower IQs in our Nation's rural children?

Mr. Speaker, this entire session of Congress has felt to many of us like a trip into Alice's Wonderland. While our Nation struggles with a devastating economy, we do nothing about jobs or about getting Americans back to work. Instead, we repeatedly fall down the rabbit hole of extreme legislation. Now, with this so-called Farm Dust Regulation Prevention Act, it seems that we're even having tea with the Cheshire Cat.

To paraphrase our friend, the Cheshire Cat: We're all mad here. I'm mad. You're mad. You must be mad or you wouldn't have come here.

Sadly, for the American people, H.R. 1633 simply underscores the madness of this body right now. It's a mad solution to an imaginary problem.

Vote "no."

Mr. WHITFIELD. Mr. Speaker, I claim time in opposition to the motion.

The SPEAKER pro tempore. The gentleman from Kentucky is recognized for 5 minutes.

Mr. WHITFIELD. American farmers, ranchers and other rural businesses, like many other sectors of this economy, have faced an onslaught of EPA regulations—regulations that are costly and that make it more difficult to create jobs in America at a time when America needs jobs.

The Congressional Research Service recently reported that agriculture alone has been facing new Clean Air Act greenhouse gas standards; engine emission standards; National Ambient Air Quality Standards for ozone and particulates; Clean Water Act permit-

ting and other requirements; Superfund reporting requirements; and regulations for disclosure, permitting and other regulatory requirements related to the use of pesticides.

There are 2.2 million farms in America. There are 1.8 million people employed by those farms. Those farms provide 5 percent of the exports from America, and they provide \$154 billion to our economy.

This legislation that we have on the floor today has the support of 120 Democrats and Republicans, and we have over 197 organizations representing rural America that support this legislation. The bill is very simple. It does not change any of the existing EPA regulations. It just says that the EPA cannot change its PM<sub>10</sub> standard for coarse material earlier than 1 year after the enactment of this legislation, and it defines and exempts nuisance dust.

So why do we need this bill? People are saying that Lisa Jackson has said she is not going to regulate PM<sub>10</sub>.

That is true. She has said that. Yet we know that many of the environmental decisions in America today are made by people and groups and entities that file lawsuits against the EPA. Every time that has happened recently, the EPA has run and entered into a consent decree, and then it has paid the legal fees for the entity that has brought the lawsuit, which is exactly what we are afraid is going to happen in this instance. In this way, we can pass this legislation and make certain that local governments, State governments, and tribal governments will decide this issue of nuisance dust.

Now, some people have said, Oh, my God, this dust is so dangerous to one's health, and it includes all sorts of substances.

I might remind everyone that one of the authors of the EPA's most recent Integrated Science Assessment for Particulate Matter testified before our committee. He said, as to the long-term effects of coarse particles, there is not one shred of evidence in support of long-term health effects.

This is a commonsense piece of legislation. It protects jobs in America, and it protects our exports. So I would urge everyone to vote against the motion to recommit.

I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit. The question was taken; and the Speaker pro tempore announced that the yeas appeared to have it.

RECORDED VOTE

Ms. DEGETTE. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to clause 9 of rule XX, the Chair

will reduce to 5 minutes the minimum time for any electronic vote on the question of passage.

The vote was taken by electronic device, and there were—ayes 166, noes 252, not voting 15, as follows:

[Roll No. 911]

Ms. HAYWORTH changed her vote from “aye” to “no.”

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

#### RECORDED VOTE

Ms. DEGETTE. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 268, noes 150, not voting 15, as follows:

[Roll No. 912]

Ms. JACKSON LEE of Texas and Mr. HOYER changed their vote from “aye” to no.”

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 470. An act to further allocate and expand the availability of hydroelectric power generated at Hoover Dam, and for other purposes.

## REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3538

Mr. MICA. Mr. Speaker, I ask unanimous consent that the gentleman from Tennessee (Mr. COOPER) be removed as a cosponsor from H.R. 3538.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

## PRAY FOR VICTIMS OF VIRGINIA TECH SHOOTING

(Mr. GRIFFITH of Virginia asked and was given permission to address the House for 1 minute.)

Mr. GRIFFITH of Virginia. I ask everyone here and across the Nation to pray for those individuals at Virginia Tech in Blacksburg, Virginia, who are currently dealing with the shootings that took place there today and the two people who, regrettably, have passed away.

## LEGISLATIVE PROGRAM

(Mr. HOYER asked and was given permission to address the House for 1 minute.)

Mr. HOYER. Mr. Speaker, before yielding to the majority leader to inquire about the schedule for the week to come, let me say I join with the gentleman from Virginia, and I know certainly Mr. CANTOR, who also represents Virginia, but the entire country as well. We don't know the facts yet. We don't know exactly what's happened. But the information I have is that two people may well have lost their lives at this point in time. We certainly want to send our deepest sympathies to Virginia Tech and to the families that are affected by this incident and hope sincerely that there is no further loss of life.

On that issue, let me yield to the majority leader, who I know will want to say something as well.

Mr. CANTOR. Mr. Speaker, I thank the gentleman from Maryland, the Democratic whip, for yielding.

I too want to join the gentleman in expressing our sorrow and extending our thoughts and prayers to those in the Hokie Nation in Blacksburg who, unfortunately, have endured more pain today, reminiscent of the pain that so many have felt in that fine university in the past. Hopefully, things can look up. I know that there are reports that law enforcement was involved. We also want to extend our thanks to law enforcement in that community as well as everywhere else in this country—certainly in this Capitol—for what individuals of the Capitol Police and other police forces across the country do for us every single day.

Again, we express our sorrow to those who are mourning the loss of life and extend our thoughts to President Steger at Virginia Tech and to that community.

I do thank the gentleman from Maryland for yielding.

Mr. Speaker, on Monday, the House will meet at noon for morning hour and 2 p.m. for legislative business. Votes will be postponed until 6:30 p.m.

At this point, the House is scheduled to be in session for the remainder of the week, with a weekend session possible. Per our usual weekly schedule, I would expect morning hour on most days to begin at 10 a.m. and legislative business to start by noon. However, because this will likely be our last week in session prior to the end of the year, the daily convening times may fluctuate to accommodate our year-end business.

I can assure Members, however, that we do not expect votes on Tuesday, December 13, prior to 1 p.m. That is as far as Tuesday, December 13 is concerned.

Mr. Speaker, our legislative business next week will include a number of suspensions, a complete list of which will be announced by the close of business tomorrow. In addition, we expect to consider a conference report on the remaining appropriations bills for FY12 as well as a conference report for the National Defense Authorization Act. I want to thank both Chairman HAL ROGERS and Chairman BUCK MCKEON for their incredibly hard work throughout the year.

Finally, we anticipate a vote on a year-end package of expiring laws that will include extensions of the payroll tax holiday, unemployment benefits, and the physician reimbursement issue.

If the gentleman will continue to yield, Mr. Speaker, I want to take a minute to highlight a bipartisan event that took place here in the Capitol this week.

□ 1450

Yesterday the Democratic whip and I hosted the first-ever Facebook Hackathon, allowing private sector programmers and software developers to get together with us to work on ways to utilize social media in making Congress more accessible to the public. I'm happy to report that over 200 developers from all over the country participated in this bipartisan event and shared their ideas.

I thank the gentleman for joining me and for his help in facilitating this noteworthy cause, and I look forward to working with him to continue to make Congress a more transparent and accessible institution for the people who have sent us here.

Mr. HOYER. I thank the gentleman for his comments and his leadership on the Hackathon event that occurred yesterday.

He and I both had the opportunity to address a large number of—over 250, I think—individuals who were there who will, in fact, bring their expertise, their technical knowledge to bear on what the gentleman referenced as making our institution more accessible and transparent to our citizens. We all believe, I think, that doing that will make the products that we produce better and make citizens better able to

make judgments on the work that we do.

So I want to thank the gentleman and his staff for their leadership on this effort. We were glad to join in that.

Mr. Speaker, I understand that the unemployment insurance, the payroll tax issue, which will continue to give the middle class tax cuts to those who need it most, the unemployment, which will keep millions of people from losing their unemployment, as well as the physician adjustment are scheduled next week. It's my understanding that that bill has not been filed yet.

Can the gentleman tell me when he believes that bill will be filed?

Mr. CANTOR. Mr. Speaker, I would respond to the gentleman by saying that we are still in discussion about that bill and in drafting; and we do intend to abide by our necessary 3-day notice period so that all sides and all Members, as well as the public, can enjoy their right to know what will be in that legislation. But the gentleman is correct, we do expect that bill on the floor next week.

Mr. HOYER. I thank the gentleman for that comment.

I have had discussions with the gentleman, and with Mr. MCCARTHY in particular—and also briefly with the Speaker—that we are certainly prepared to participate in discussions leading towards a successful passage of those three pieces of legislation, particularly the unemployment insurance and the payroll tax extension, which we believe are critical before we end this year. So we're pleased to see that legislation moving forward. But I will tell my friend that I would be pleased to participate in discussions with him so that we can assure that that bill will in fact pass and, hopefully, pass in a bipartisan fashion.

I want to tell the gentleman that I'm a little bit concerned, and I want to ask him whether this principle will be followed. I think I used this quote last week, but it bears repeating. Speaker BOEHNER said:

We will end the practice of packaging unpopular bills with must-pass legislation to circumvent the will of the American people. Instead, we will advance major legislation one issue at a time.

That was in the Republican Pledge as well, and the Speaker has reiterated that at the beginning of this session.

Now, I am concerned because Republican Study Committee Chairman JIM JORDAN of Ohio is quoted in *The Washington Post* as saying the following:

"The fact the President doesn't like it"—the "it" referring to the Keystone pipeline provision, which we understand is under discussion. I'm glad to hear those discussions have not concluded. But he again quoted, "The fact that the President doesn't like it makes me like it even more . . . said of

the GOP leadership proposal as he left Thursday morning's closed-door meeting."

I will say to my friend that we are at the end of the session. We are hopeful, as I have said—and as we have demonstrated on the two CRs and the debt extension and on the minibuss appropriation bill that we passed—that we are prepared to respond in a bipartisan fashion to assist in passing must-pass legislation and would hope very much that we don't put controversial items in that. The President has clearly announced that he will veto a bill that has the Keystone pipeline.

I will say, as my friend clearly knows, there is bipartisan concern—as a matter of fact, the Governor of Nebraska, a Republican, and the Republican legislature, which although nominally nonpartisan, as the gentleman knows, is two-thirds Republican, one-third Democrat, have all voted to delay this project because of their concern about the aquifer and the impact that the Keystone pipeline, as currently platted, will have in reference to the aquifer, so that there is a bipartisan concern.

As the gentleman knows, as a result of Nebraska's passing legislation which said they wanted to do a study on the aquifer and alternative siting of the Keystone pipeline course, that that study would take them 5 to 6 to 7 months, as a result, the President indicated they would give time to the Nebraska Governor and the Nebraska Legislature—again, Republican organs—to look at that, has given them additional time and said he won't act until the beginning of 2013.

I ask the gentleman, does he believe that provision—I understand what Mr. JORDAN says. It may be a nice political gesture, but I would hope that that would not be the kind of provision that would be included in the legislation, whether it's individual bills or a comprehensive bill, including those three items that hopefully we can pass in a bipartisan fashion.

I yield to my friend.

Mr. CANTOR. Mr. Speaker, I thank the gentleman.

I understand the point he is trying to make.

Mr. HOYER. If I may, I thought I did make the point.

Mr. CANTOR. Well, you may have made the point.

Maybe, Mr. Speaker, what I'm trying to say is that I disagree with the gentleman, that if the provisions dealing with the Keystone pipeline are in the measure that makes it to the floor that we shouldn't join together and do what was done in the past, and that is demonstrate a strong bipartisan vote in support of that project. Because, as the gentleman knows, organized labor in this country is very supportive of that bill, of that provision. It means immediate jobs. The President continues to

say he is for creating jobs, doing all we can to get America back to work. This is a provision that allows for that.

We also have seen, Mr. Speaker, in response to the gentleman's concerns about Nebraska and the issues raised by its Governor as well as its State legislature, I believe and am told that there have been many discussions in which an alternative route has been determined, and there is agreement on that to allow for the proceeding of the construction of the pipeline.

Again, knowing that there is strong bipartisan support for the project, knowing that labor is in support of it, knowing that it puts people back to work immediately, it would seem to me that this is a consistent provision to go along with making sure that we deal with the unemployment situation in this country through an extension of the UI provisions—with, hopefully, some reforms—as well as the extension of the payroll tax holiday.

As the gentleman knows, our side is concerned. We don't want taxes to go up on anybody, especially in an economy like this. But again, I hope the gentleman can consider joining us in terms of helping promote an environment for job creation.

Mr. HOYER. I thank the gentleman for his comment.

I will say this, though, it seems inconsistent, when the President of the United States yesterday said he would veto such a provision, that we would include it in legislation that is must pass.

By the way, the unemployment insurance, economists tell us, will provide for 100 times as many jobs; so, therefore, we're for that. Some 500,000 jobs may be affected by extending the unemployment insurance.

In addition to that, I tell my friend, the President has offered a jobs bill. I know that you're concerned about jobs. The pipeline bill, in and of itself, is about 5,000 to 6,000 jobs over the lifetime of the pipeline. The jobs bill, economists tell us, is 1 million jobs, or 200 times as many jobs. Notwithstanding that, very frankly, that has been languishing since September and not brought to this floor.

So it seems to me that, if we are really interested—and I think you are—in extending unemployment insurance and providing for a continued tax cut for middle-income Americans and for providing for the payment of doctors who are serving Medicare patients, that we not include in that bill an item that apparently is popular on your side just because the President doesn't like it, according to Mr. JORDAN.

□ 1500

I think that's not the way we ought to be operating. The last 7 days of the session, or 5 days, 6 days, 7, assuming we went through Sunday, we shouldn't be doing that, I suggest respectfully to

The article provides firsthand accounts of the targeted elimination of religious prisoners, prisoners of conscience, and political opponents of the

regime. Minorities, including Falun Gong, Uyghurs, House Christians, and Tibetans have been executed, followed by organ transplant surgeries—some being performed while the victims are still alive, numbering in the tens of thousands.

Furthermore, foreign companies are already making investments to benefit off of the thriving organ transplant market. Pharmaceutical companies like Roche and Isoteknika Pharma have been involved in clinical drug testing of transplant patients. A British firm, TFP Ryder Healthcare, is proposing a medical facility that would include an organ transplant center.

Before they follow suit, U.S. companies must understand the unethical climate that exists in China. And our State Department and the U.N. must treat these actions as an abuse of China's international agreements and human rights of their own people.

[From WeeklyStandard.com, Dec. 5, 2011]

#### THE XINJIANG PROCEDURE

(By Ethan Gutmann)

To figure out what is taking place today in a closed society such as northwest China, sometimes you have to go back a decade, sometimes more.

One clue might be found on a hilltop near southern Guangzhou, on a partly cloudy autumn day in 1991. A small medical team and a young doctor starting a practice in internal medicine had driven up from Sun Yat-sen Medical University in a van modified for surgery. Pulling in on bulldozed earth, they found a small fleet of similar vehicles—clean, white, with smoked glass windows and prominent red crosses on the side. The police had ordered the medical team to stay inside for their safety. Indeed, the view from the side window of lines of ditches—some filled in, others freshly dug—suggested that the hilltop had served as a killing ground for years.

Thirty-six scheduled executions would translate into 72 kidneys and corneas divided among the regional hospitals. Every van contained surgeons who could work fast: 15–30 minutes to extract. Drive back to the hospital. Transplant within six hours. Nothing fancy or experimental; execution would probably ruin the heart.

With the acceleration of Chinese medical expertise over the last decade, organs once considered scraps no longer went to waste. It wasn't public knowledge exactly, but Chinese medical schools taught that many otherwise wicked criminals volunteered their organs as a final penance.

Right after the first shots the van door was thrust open and two men with white surgical coats thrown over their uniforms carried a body in, the head and feet still twitching slightly. The young doctor noted that the wound was on the right side of the chest as he had expected. When body #3 was laid down, he went to work.

Male, 40-ish, Han Chinese. While the other retail organs in the van were slated for the profitable foreigner market, the doctor had seen the paperwork indicating this kidney was tissue-matched for transplant into a 50-year-old Chinese man. Without the transplant, that man would die. With it, the same man would rise miraculously from his hospital bed and go on to have a normal life for 25 years or so. By 2016, given all the anti-tis-

sue-rejection drug advances in China, they could theoretically replace the liver, lungs, or heart—maybe buy that man another 10 to 15 years.

Body #3 had no special characteristics save an angry purple line on the neck. The doctor recognized the forensics. Sometimes the police would twist a wire around a prisoner's throat to prevent him from speaking up in court. The doctor thought it through methodically. Maybe the police didn't want this prisoner to talk because he had been a deranged killer, a thug, or mentally unstable. After all, the Chinese penal system was a daily sausage grinder, executing hardcore criminals on a massive scale. Yes, the young doctor knew the harvesting was wrong. Whatever crime had been committed, it would be nice if the prisoner's body were allowed to rest forever. Yet was his surgical task that different from an obstetrician's? Harvesting was rebirth, harvesting was life, as revolutionary an advance as antibiotics or steroids. Or maybe, he thought, they didn't want this man to talk because he was a political prisoner.

Nineteen years later, in a secure European location, the doctor laid out the puzzle. He asked that I keep his identity a secret. Chinese medical authorities admit that the lion's share of transplant organs originate with executions, but no mainland Chinese doctors, even in exile, will normally speak of performing such surgery. To do so would remind international medical authorities of an issue they would rather avoid—not China's soaring execution rate or the exploitation of criminal organs, but rather the systematic elimination of China's religious and political prisoners. Yet even if this doctor feared consequences to his family and his career, he did not fear embarrassing China, for he was born into an indigenous minority group, the Uyghurs.

Every Uyghur witness I approached over the course of two years—police, medical, and security personnel scattered across two continents—related compartmentalized fragments of information to me, often through halting translation. They acknowledged the risk to their careers, their families, and, in several cases, their lives. Their testimony reveals not just a procedure evolving to meet the lucrative medical demand for living organs, but the genesis of a wider atrocity.

Behind closed doors, the Uyghurs call their vast region in China's northwest corner (bordering on India, Pakistan, Afghanistan, Tajikistan, Kyrgyzstan, Kazakhstan, and Mongolia) East Turkestan. The Uyghurs are ethnically Turkic, not East Asian. They are Muslims with a smattering of Christians, and their language is more readily understood in Tashkent than in Beijing. By contrast, Beijing's name for the so-called Autonomous Region, Xinjiang, literally translates as "new frontier." When Mao invaded in 1949, Han Chinese constituted only 7 percent of the regional population. Following the flood of Communist party administrators, soldiers, shopkeepers, and construction corps, Han Chinese now constitute the majority. The party calculates that Xinjiang will be its top oil and natural gas production center by the end of this century.

To protect this investment, Beijing traditionally depicted all Uyghur nationalists—violent rebels and non-violent activists alike—as CIA proxies. Shortly after 9/11, that conspiracy theory was tossed down the memory hole. Suddenly China was, and always has been, at war with al Qaeda-led Uyghur terrorists. No matter how transparently opportunistic the switch, the American intel-

ligence community saw an opening for Chinese cooperation in the war on terror, and signaled their acquiescence by allowing Chinese state security personnel into Guantanamo to interrogate Uyghur detainees.

While it is difficult to know the strength of the claims of the detainees' actual connections to al Qaeda, the basic facts are these: During the 1990s, when the Chinese drove the Uyghur rebel training camps from neighboring countries such as Kazakhstan and Pakistan, some Uyghurs fled to Afghanistan where a portion became Taliban soldiers. And yet, if the Chinese government claims that the Uyghurs constitute their own Islamic fundamentalist problem, the fact is that I've never met a Uyghur woman who won't shake hands or a man who won't have a drink with me. Nor does my Jewish-sounding name appear to make anyone flinch. In one of those *vino veritas* sessions, I asked a local Uyghur leader if he was able to get any sort of assistance from groups such as the Islamic Human Rights Commission (where, as I found during a brief visit to their London offices, veiled women flinch from an extended male hand, drinks are forbidden, and my Jewish surname is a very big deal indeed). "Useless!" he snorted, returning to the vodka bottle.

So if Washington's goal is to promote a reformed China, then taking Beijing's word for who is a terrorist is to play into the party's hands.

Xinjiang has long served as the party's illicit laboratory: from the atmospheric nuclear testing in Lop Nur in the mid-sixties (resulting in a significant rise in cancers in Urumqi, Xinjiang's capital) to the more recent creation in the Tarim Desert of what could well be the world's largest labor camp, estimated to hold 50,000 Uyghurs, hardcore criminals, and practitioners of Falun Gong. And when it comes to the first organ harvesting of political prisoners, Xinjiang was ground zero.

In 1989, not long after Nijat Abdureyimu turned 20, he graduated from Xinjiang Police School and was assigned to a special police force, Regiment No. 1 of the Urumqi Public Security Bureau. As one of the first Uyghurs in a Chinese unit that specialized in "social security"—essentially squelching threats to the party—Nijat was employed as the good cop in Uyghur interrogations, particularly the high-profile cases. I first met Nijat—thin, depressed, and watchful—in a crowded refugee camp on the outskirts of Rome.

Nijat explained to me that he was well aware that his Chinese colleagues kept him under constant surveillance. But Nijat presented the image they liked: the little brother with the guileless smile. By 1994 he had penetrated all of the government's secret bastions: the detention center, its interrogation rooms, and the killing grounds. Along the way, he had witnessed his fair share of torture, executions, even a rape. So his curiosity was in the nature of professional interest when he questioned one of the Chinese cops who came back from an execution shaking his head. According to his colleague, it had been a normal procedure—the unwanted bodies kicked into a trench, the useful corpses hoisted into the harvesting vans, but then he heard something coming from a van, like a man screaming.

"Like someone was still alive?" Nijat remembers asking. "What kind of screams?"

"Like from hell."

Nijat shrugged. The regiment had more than enough sloppiness to go around.

A few months later, three death row prisoners were being transported from detention

to execution. Nijat had become friendly with one in particular, a very young man. As Nijat walked alongside, the young man turned to Nijat with eyes like saucers: "Why did you inject me?"

Nijat hadn't injected him; the medical director had. But the director and some legal officials were watching the exchange, so Nijat lied smoothly: "It's so you won't feel much pain when they shoot you."

The young man smiled faintly, and Nijat, sensing that he would never quite forget that look, waited until the execution was over to ask the medical director: "Why did you inject him?"

"Nijat, if you can transfer to some other section, then go as soon as possible."

"What do you mean? Doctor, exactly what kind of medicine did you inject him with?" "Nijat, do you have any beliefs?"

"Yes. Do you?"

"It was an anticoagulant, Nijat. And maybe we are all going to hell."

I first met Enver Tohti—a soft-spoken, husky, Buddha of a man—through the informal Uighur network of London. I confess that my first impression was that he was just another emigre living in public housing. But Enver had a secret.

His story began on a Tuesday in June 1995, when he was a general surgeon in an Urumqi hospital. Enver recalled an unusual conversation with his immediate superior, the chief surgeon: "Enver, we are going to do something exciting. Have you ever done an operation in the field?"

"Not really. What do you want me to do?"

"Get a mobile team together and request an ambulance. Have everyone out front at nine tomorrow."

On a cloudless Wednesday morning, Enver led two assistants and an anaesthesiologist into an ambulance and followed the chief surgeon's car out of Urumqi going west. The ambulance had a picnic atmosphere until they realized they were entering the Western Mountain police district, which specialized in executing political dissidents. On a dirt road by a steep hill the chief surgeon pulled off, and came back to talk to Enver: "When you hear a gunshot, drive around the hill."

"Can you tell us why we are here?"

"Enver, if you don't want to know, don't ask."

"I want to know."

"No. You don't want to know."

The chief surgeon gave him a quick, hard look as he returned to the car. Enver saw that beyond the hill there appeared to be some sort of armed police facility. People were milling about—civilians. Enver half-sarcastically suggested to the team that perhaps they were family members waiting to collect the body and pay for the bullet, and the team responded with increasingly sick jokes to break the tension. Then they heard a gunshot, possibly a volley, and drove around to the execution field.

Focusing on not making any sudden moves as he followed the chief surgeon's car, Enver never really did get a good look. He briefly registered that there were 10, maybe 20 bodies lying at the base of the hill, but the armed police saw the ambulance and waved him over.

"This one. It's this one."

Sprawled on the blood-soaked ground was a man, around 30, dressed in navy blue overalls. All convicts were shaved, but this one had long hair.

"That's him. We'll operate on him."

"Why are we operating?" Enver protested, feeling for the artery in the man's neck. "Come on. This man is dead."

Enver stiffened and corrected himself. "No. He's not dead."

"Operate then. Remove the liver and the kidneys. Now! Quick! Be quick!"

Following the chief surgeon's directive, the team loaded the body into the ambulance. Enver felt himself going numb: Just cut the clothes off. Just strap the limbs to the table. Just open the body. He kept making attempts to follow normal procedure—sterilize, minimal exposure, sketch the cut. Enver glanced questioningly at the chief surgeon. "No anaesthesia," said the chief surgeon. "No life support."

The anaesthesiologist just stood there, arms folded—like some sort of ignorant peasant, Enver thought. Enver barked at him. "Why don't you do something?"

"What exactly should I do, Enver? He's already unconscious. If you cut, he's not going to respond."

But there was a response. As Enver's scalpel went in, the man's chest heaved spasmodically and then curled back again. Enver, a little frantic now, turned to the chief surgeon. "How far in should I cut?"

"You cut as wide and deep as possible. We are working against time."

Enver worked fast, not bothering with clamps, cutting with his right hand, moving muscle and soft tissue aside with his left, slowing down only to make sure he excised the kidneys and liver cleanly. Even as Enver stitched the man back up—not internally, there was no point to that anymore, just so the body might look presentable—he sensed the man was still alive. I am a killer, Enver screamed inwardly. He did not dare to look at the face again, just as he imagined a killer would avoid looking at his victim.

The team drove back to Urumqi in silence.

On Thursday, the chief surgeon confronted Enver: "So. Yesterday. Did anything happen? Yesterday was a usual, normal day. Yes?"

Enver said yes, and it took years for him to understand that live organs had lower rejection rates in the new host, or that the bullet to the chest had—other than that first sickening lurch—acted like some sort of magical anaesthesia. He had done what he could; he had stitched the body back neatly for the family. And 15 years would elapse before Enver revealed what had happened that Wednesday.

As for Nijat, it wasn't until 1996 that he put it together.

It happened just about midnight, well after the cell block lights were turned off. Nijat found himself hanging out in the detention compound's administrative office with the medical director. Following a pause in the conversation, the director, in an odd voice, asked Nijat if he thought the place was haunted.

"Maybe it feels a little weird at night," Nijat answered. "Why do you think that?"

"Because too many people have been killed here. And for all the wrong reasons."

Nijat finally understood. The anticoagulant. The expensive "execution meals" for the regiment following a trip to the killing ground. The plainclothes agents in the cells who persuaded the prisoners to sign statements donating their organs to the state. And now the medical director was confirming it all: Those statements were real. They just didn't take account of the fact that the prisoners would still be alive when they were cut up.

"Nijat, we really are going to hell."

Nijat nodded, pulled on his beer, and didn't bother to smile.

On February 2, 1997, Bahtiyar Shemshidin began wondering whether he was a police-

man in name only. Two years before, the Chinese Public Security Bureau of the Western city of Ghulja recruited Bahtiyar for the drug enforcement division. It was a natural fit because Bahtiyar was tall, good-looking, and exuded effortless Uighur authority. Bahtiyar would ultimately make his way to Canada and freedom, but he had no trouble recalling his initial idealism; back then, Bahtiyar did not see himself as a Chinese collaborator but as an emergency responder.

For several years, heroin addiction had been creeping through the neighborhoods of Ghulja, striking down young Uighurs like a medieval plague. Yet inside the force, Bahtiyar quickly grasped that the Chinese heroin cartel was quietly protected, if not encouraged, by the authorities. Even his recruitment was a bait-and-switch. Instead of sending him after drug dealers, his Chinese superiors ordered him to investigate the Meshrep—a traditional Muslim get-together promoting clean living, sports, and Uighur music and dance. If the Meshrep had flowered like a traditional herbal remedy against the opiate invader, the Chinese authorities read it as a disguised attack on the Chinese state.

In early January 1997, on the eve of Ramadan, the entire Ghulja police force—Uighurs and Chinese alike—were suddenly ordered to surrender their guns "for inspection." Now, almost a month later, the weapons were being released. But Bahtiyar's gun was held back. Bahtiyar went to the Chinese bureaucrat who controlled supplies and asked after it. "Your gun has a problem," Bahtiyar was told.

"When will you fix the problem?"

The bureaucrat shrugged, glanced at his list, and looked up at Bahtiyar with an unblinking stare that said: It is time for you to go. By the end of the day, Bahtiyar got it: Every Chinese officer had a gun. Every Uighur officer's gun had a problem.

Three days later, Bahtiyar understood why. On February 5, approximately 1,000 Uighurs gathered in the center of Ghulja. The day before, the Chinese authorities arrested (and, it was claimed, severely abused) six women, all Muslim teachers, all participants in the Meshrep. The young men came without their winter coats to show they were unarmed, but, planned or unplanned, the Chinese police fired on the demonstrators.

Casualty counts of what is known as the Ghulja incident remain shaky. Bahtiyar recalls internal police estimates of 400 dead, but he didn't see it; all Uighur policemen had been sent to the local jail "to interrogate prisoners" and were locked in the compound throughout the crisis. However, Bahtiyar did see Uighurs herded into the compound and thrown naked onto the snow—some bleeding, others with internal injuries. Ghulja's main Uighur clinic was effectively shut down when a squad of Chinese special police arrested 10 of the doctors and destroyed the clinic's ambulance. As the arrests mounted by late April, the jail became hopelessly overcrowded, and Uighur political prisoners were selected for daily executions. On April 24, Bahtiyar's colleagues witnessed the killing of eight political prisoners; what struck them was the presence of doctors in "special vans for harvesting organs."

In Europe I spoke with a nurse who worked in a major Ghulja hospital following the incident. Nervously requesting that I provide no personal details, she told me that the hospitals were forbidden to treat Uighur protesters. A doctor who bandaged an arm received a 15-year sentence, while another got 20 years, and hospital staff were told, "If you

treat someone, you will get the same result." The separation between the Uighur and Chinese medical personnel deepened: Chinese doctors would stockpile prescriptions rather than allow Uighur medical staff a key to the pharmacy, while Uighur patients were receiving 50 percent of their usual doses. If a Uighur couple had a second child, even if the birth was legally sanctioned, Chinese maternity doctors, she observed, administered an injection (described as an antibiotic) to the infant. The nurse could not recall a single instance of the same injection given to a Chinese baby. Within three days the infant would turn blue and die. Chinese staffers offered a rote explanation to Uighur mothers: Your baby was too weak, your baby could not handle the drug.

Shortly after the Ghulja incident, a young Uighur protester's body returned home from a military hospital. Perhaps the fact that the abdomen was stitched up was just evidence of an autopsy, but it sparked another round of riots. After that, the corpses were wrapped, buried at gunpoint, and Chinese soldiers patrolled the cemeteries (one is not far from the current Urumqi airport). By June, the nurse was pulled into a new case: A young Uighur protester had been arrested and beaten severely. His family paid for his release, only to discover that their son had kidney damage. The family was told to visit a Chinese military hospital in Urumqi where the hospital staff laid it out: One kidney, 30,000 RMB (roughly \$4,700). The kidney will be healthy, they were assured, because the transplant was to come from a 21-year-old Uighur male—the same profile as their son. The nurse learned that the "donor" was, in fact, a protester.

In the early autumn of 1997, fresh out of a blood-work tour in rural Xinjiang, a young Uighur doctor—let's call him Murat—was pursuing a promising medical career in a large Urumqi hospital. Two years later he was planning his escape to Europe, where I met him some years after.

One day Murat's instructor quietly informed him that five Chinese government officials—big guys, party members—had checked into the hospital with organ problems. Now he had a job for Murat: "Go to the Urumqi prison. The political wing, not the criminal side. Take blood samples. Small ones. Just to map out the different blood types. That's all you have to do."

"What about tissue matching?"

"Don't worry about any of that, Murat. We'll handle that later. Just map out the blood types."

Clutching the authorization, and accompanied by an assistant from the hospital, Murat, slight and bookish, found himself facing approximately 15 prisoners, mostly tough-guy Uighurs in their late twenties. As the first prisoner sat down and saw the needle, the pleading began.

"You are a Uighur like me. Why are you going to hurt me?"

"I'm not going to hurt you. I'm just taking blood."

At the word "blood," everything collapsed. The men howled and stampeded, the guards screaming and shoving them back into line. The prisoner shrieked that he was innocent. The Chinese guards grabbed his neck and squeezed it hard.

"It's just for your health," Murat said evenly, suddenly aware the hospital functionary was probably watching to make sure that Murat wasn't too sympathetic. "It's just for your health," Murat said again and again as he drew blood.

When Murat returned to the hospital, he asked the instructor, "Were all those prisoners sentenced to death?"

"That's right, Murat, that's right. Yes. Just don't ask any more questions. They are bad people—enemies of the country."

But Murat kept asking questions, and over time, he learned the drill. Once they found a matching blood type, they would move to tissue matching. Then the political prisoner would get a bullet to the right side of the chest. Murat's instructor would visit the execution site to match up blood samples. The officials would get their organs, rise from their beds, and check out.

Six months later, around the first anniversary of Ghulja, five new officials checked in. The instructor told Murat to go back to the political wing for fresh blood. This time, Murat was told that harvesting political prisoners was normal. A growing export. High volume. The military hospitals are leading the way.

By early 1999, Murat stopped hearing about harvesting political prisoners. Perhaps it was over, he thought.

Yet the Xinjiang procedure spread. By the end of 1999, the Uighur crackdown would be eclipsed by Chinese security's largest-scale action since Mao: the elimination of Falun Gong. By my estimate up to three million Falun Gong practitioners would pass through the Chinese corrections system. Approximately 65,000 would be harvested, hearts still beating, before the 2008 Olympics. An unspecified, significantly smaller, number of House Christians and Tibetans likely met the same fate.

By Holocaust standards these are piddling numbers, so let's be clear: China is not the land of the final solution. But it is the land of the expedient solution. Some will point to recent statements from the Chinese medical establishment admitting the obvious—China's medical environment is not fully ethical—and see progress. Foreign investors suspect that eventually the Chinese might someday—or perhaps have already—abandon organ harvesting in favor of the much more lucrative pharmaceutical and clinical testing industries. The problem with these soothing narratives is that reports, some as recent as one year ago, suggest that the Chinese have not abandoned the Xinjiang procedure.

In July 2009, Urumqi exploded in bloody street riots between Uighurs and Han Chinese. The authorities massed troops in the regional capital, kicked out the Western journalists, shut down the Internet, and, over the next six months, quietly, mostly at night, rounded up Uighur males by the thousands. According to information leaked by Uighurs held in captivity, some prisoners were given physical examinations aimed solely at assessing the health of their retail organs. The signals may be faint, but they are consistent, and the conclusion is inescapable: China, a state rapidly approaching superpower status, has not just committed human rights abuses—that's old news—but has, for over a decade, perverted the most trusted area of human expertise into performing what is, in the legal parlance of human rights, targeted elimination of a specific group.

Yet Nijat sits in refugee limbo in Neuchâtel, Switzerland, waiting for a country to offer him asylum. He confessed to me. He confessed to others. But in a world eager not to offend China, no state wants his confession. Enver made his way to an obscure seminar hosted by the House of Commons on Chinese human rights. When the MPs opened

the floor to questions, Enver found himself standing up and speaking, for the first time, of killing a man. I took notes, but no British MP or their staffers could be bothered to take Enver's number.

The implications are clear enough. Nothing but self-determination for the Uighurs can suffice. The Uighurs, numbering 13 million, are few, but they are also desperate. They may fight. War may come. On that day, as diplomats across the globe call for dialogue with Beijing, may every nation look to its origins and its conscience. For my part, if my Jewish-sounding name tells me anything, it is this: The dead may never be fully avenged, but no people can accept being fatally exploited forever.

□ 1510

#### YUCCA MOUNTAIN

The SPEAKER pro tempore. Under the Speaker's announced policy of January 5, 2011, the gentleman from Illinois (Mr. SHIMKUS) is recognized for 60 minutes as the designee of the majority leader.

Mr. SHIMKUS. Mr. Speaker, it's great to get a chance to come back down to the floor to visit with my colleagues and talk about an issue that I've been raising seven or eight weeks in a row. I'll have a little more extended time to go over what has transpired over the past 6 to 7 months, and that's that this country really needs to address this high-level nuclear waste problem in this country.

I'm glad to be joined with some of my colleagues who I'll yield to in a couple of minutes.

But just to start in a synopsis, based upon the parts of the country that we visited, for us to move past the logjam that's in the other body, we have to find 60 Senators who will vote to move forward what we know is Federal law. The Nuclear Waste Policy Act of 1982 recognized and determined that Yucca Mountain would be the national repository for high-level nuclear waste.

I think a lot of folks would say, well, so if it's a law, why aren't we there? Well, the reason we're not there now is because the majority leader of the Senate has blocked it, along with the President of the United States.

This time is being spent to help educate the American public, Mr. Speaker, on where is the high level nuclear waste, what communities, what States are affected, and what Senators should be held somewhat accountable for the positions they take as far as high-level nuclear waste?

On the chart to my far left, throughout this last half a year, we need 60 votes. We've got at least 27 Senators who we know already support this based upon votes or public statements. We have eight that really have not had a chance to address this by a vote or haven't made a public statement on it yet. And we have seven "nays" or seven "no" votes.

With that, just because I appreciate my colleagues taking time out, I would

like to first yield to my colleague from the State of Illinois, no disrespect to my colleague from the State of Georgia, to go into a discussion about one of the areas that we addressed, one of the first sites we talked about. I figured I'd better come forward and talk about my own State. If I'm going to talk about other States, I better talk about my own State, the State of Illinois.

In the State of Illinois, 50 percent of our electricity is generated by nuclear power. We're one of the biggest nuclear power States in the country. We picked a facility that's actually closed, which is Zion Power Plant.

With that, I'd yield to my colleague, Mr. DOLD, to kind of talk about Zion, the State of Illinois, and its location.

Mr. DOLD. I want to thank the gentleman for yielding and certainly for taking this issue up, which I think is so very, very critical not only for just the State of Illinois but for facilities all across the country as we look at how we can best store the used material from the nuclear facilities—the spent fuel rods, more specifically.

If you'll notice here in Zion, which is just north of the district but certainly affects the district just north of Chicago and the 10th district which I represent, it's right on the shores of Lake Michigan. The Great Lakes, 95 percent of all fresh surface water in the United States is from the Great Lakes.

When we look at the amount of drinking water that the State of Illinois uses, it's an enormous percentage. It's coming from the Great Lakes. Yet, in our infinite wisdom we've decided that we want to store the fuel rods just a sheer several hundred feet from the shores of Lake Michigan, 5 feet above the water table.

If we take a look at Yucca Mountain, the reason why Yucca Mountain was chosen was Yucca Mountain is uniquely suited as the premier place. If we were to store any place spent fuel rods, this would be the ideal location. A thousand feet below the ground. A thousand feet above the water table. A very dry, arid environment. And correct me if I'm wrong: Where are the nearest inhabitants of Yucca Mountain? Is it 100 miles?

Mr. SHIMKUS. The city of Las Vegas, which is the major metropolitan area, is a hundred miles from Yucca Mountain.

What people have a hard time understanding about the nuclear test area, this is where the nuclear test site was. The Federal Government owns numerous parcels of land around Yucca Mountain. The communities right outside the reservation—and I think the whole test site area is like the size of New Hampshire—but the communities, what's interesting about this debate, the communities right outside the gate are fully supportive of Yucca Mountain being the repository for high-level nu-

clear waste. And why do I know that? Because I visited them. I've been in their communities. I went to the community center. They welcomed me, and we talked about how this was important for the country and their local communities.

Mr. DOLD. This is absolutely critical for the country. When we look at just the State of Illinois, the State of Illinois has got 13 commercial reactors at seven sites across the State of Illinois. Our neighbors to the north have three commercial reactors operating on two different sites, both of those on Lake Michigan.

So when we look at the 8.5 million people that rely on the drinking water, much less the recreation, the fishing, all of the different forms of commerce that happen on our Great Lakes, this is something that I think is critical.

The Senators from both the State of Illinois and the State of Wisconsin have all been in favor of trying to utilize this facility out at Yucca Mountain, and it just makes sense.

Why would we want to store, Mr. Speaker, over a thousand metric tons of nuclear waste hundreds of feet away from the greatest source of fresh surface water in our Nation? It is indeed the jewel of our ecosystem. This is something that we need to protect, something that we need to have a long-term vision for.

Yet what we don't need to do is have scattered sites all across our country of nuclear waste that has a greater potential for disasters to happen. They're being stored right now in casks that are about 5 feet above the ground water, above the water table, and what we'd like to do is take it a thousand feet above the water table, a thousand feet below ground.

This is something that makes absolutely perfect sense, and I welcome the gentleman's colloquy in terms of talking about not only this site, and I thank you for bringing it up week after week, trying to make sure that we try and get through to our colleagues on the other side of the building to make sure they can move this commonsense piece of legislation forward.

How much have we spent already at Yucca Mountain? I think it's in the \$14 billion range.

Mr. SHIMKUS. My colleague is correct. We've already spent about \$14.5 billion dollars in the research, the development, the exploration, the testing. A lot of money, time, effort, and some of our greatest minds have been involved.

I don't really think you have to be one of the greatest minds. The point I always say is, common sense says in the desert underneath a mountain. Isn't that where you would want high-level nuclear waste versus right off the shore of Lake Michigan?

Mr. DOLD. It seems certainly like common sense to me, and I certainly

applaud the gentleman's efforts and thank you for giving me the time. I just want to make sure that this isn't just important for the folks in the State in Illinois and the folks in Wisconsin, and the people in Michigan that are surrounding the Great Lakes, and specifically Lake Michigan; it's all the Great Lakes. And it's not just in Illinois. There are nuclear power facilities all across the country.

We need to have a safe, secure way to be able to store these spent fuel rods, and I think Yucca Mountain has been proven to be the place to do it. And I think we should move forward on it.

Mr. SHIMKUS. Can you tell me the disposition of what's going on with the Zion Power Plant? What's going on there right now?

Mr. DOLD. The Zion Power Plant has actually been decommissioned at this point in time. So right now they are putting it in mothballs, they are taking the spent fuel rods, they're in casks, they are being transported to a location that's on the site. It's just literally a few hundred feet away from the beaches there, and probably about 20 to 30 miles north of the city of Chicago.

This is not the place that we want to be storing spent fuel rods.

Zion was a great source of electricity for the people around the area and has been decommissioned over the last 2 years. So it is now sitting idle, and they're trying to go through the process of dismantling it.

□ 1520

Mr. SHIMKUS. Yes. I think I briefly tried to show this article from The Salt Lake Tribune, dated December 8, which talks about some of the reactor parts that are going to go out to Utah.

What the article ends up saying is:

The site will not, however, take the Illinois plant's used fuel rods. The United States currently has no site to dispose of spent fuel from commercial reactors, a form of high-level nuclear waste.

So if we don't have a location, where is that high-level nuclear waste, the spent fuel, going to remain?

Mr. DOLD. It's going to remain, seriously, right in the middle of a high-population area and hundreds of feet away from the jewel of our ecosystem—in the Great Lakes, in Lake Michigan. It's the wrong place for it to be. Common sense would say to move it out to a place, to a location, just like Yucca Mountain; \$14 billion of research and dollars have gone into the site. Let's put it 1,000 feet below the ground, 1,000 feet above the water table, in an arid environment. It's absolutely perfect for it. It's something that we should move forward on. It's in the best interest and safety of the American public to do something along these lines.

Mr. SHIMKUS. I'm told that Zion is, what, 40 miles from downtown Chicago.

Mr. DOLD. It's 40 miles from downtown Chicago. So, obviously, in the greater Chicago area, you probably have about 6.5 to 7 million people. It's certainly not what we want to have in terms of this nuclear waste disposal.

Mr. SHIMKUS. The reason this is important is, unfortunately, due to Fukushima Daiichi in Japan, which is a great tragedy. A lot of people think about the containment issue, which has always been the fear. Part of the Fukushima Daiichi problem was the spent fuel in the pools, which might be a bigger environmental disaster based upon things that cannot be planned. That's why we continue to push this.

I appreciate my colleague for coming down.

Mr. DOLD. I thank the gentleman for allowing me to have some time with you today and, again, for talking about this very important issue.

Mr. SHIMKUS. Now I'm going to turn to my colleague from Georgia, who also serves with me on the Energy and Commerce Committee. We have jurisdiction over this. My subcommittee is the Environment and the Economy. I deal with a lot of these waste disposal issues, nuclear waste being one of those.

My colleague from Georgia has followed this issue as long as I have. The last time I came to the floor, I mentioned a couple facilities in Georgia, but the one that I have highlighted is the Savannah River. As I finish, I'll get this picture up to my colleague.

But the point we're trying to make today is that here you have Yucca Mountain, which is a mountain in a desert. Then you have nuclear waste all over this country. Look at this one. It's right next to the Savannah River. At Yucca Mountain, we have no nuclear waste on site. At the Savannah River, there are 6,300 canisters of waste on site. The waste would be stored, as my colleague BOB DOLD said, 1,000 feet underground; whereas, at the Savannah River, it's stored right below the ground. At Yucca Mountain, it's 1,000 feet above the water table. At the Savannah River, it would be zero to 160 feet above the water table. The waste at Yucca Mountain is 100 miles from the Colorado River. Well, you can see that it's adjacent to the Savannah River.

So I appreciate the gentleman from Georgia, Congressman GINGREY, for joining me; and I yield to him to enter into the colloquy.

Mr. GINGREY of Georgia. Mr. Speaker, I am glad to join my colleague from Illinois, the chairman of the Environment and the Economy Subcommittee on the Committee of Energy and Commerce, on this very important subject.

Our colleagues from Illinois specifically pointed out the existing situation in their State in regard to these nuclear reactor sites in Illinois and what they do with spent nuclear fuel.

The poster that the gentleman has presented in regard to my great State and my neighboring State of South Carolina as to what we're faced with is equally as telling. I think it might be instructive, Mr. Speaker, if I go back and take a walk down memory lane just a little bit in regard to my background.

When I was growing up in North Augusta, South Carolina, this central Savannah River area, which includes the southern part, if you will, or the western part of South Carolina and the eastern part of Georgia, is separated by the Savannah River. There was a facility built on the South Carolina side in a town called Ellington, South Carolina, back in 1950. I hate to tell my age, but I was 7 or 8 at the time. Mr. Speaker, my parents owned a little motel on the river, and they very insightfully named the mom-and-pop, 25-unit motel the Riviera Motel.

During the construction of this nuclear plant, there were 50,000 construction workers involved in constructing that facility for 3 years. Every evening when the Sun went down, I can't tell you how happy my parents were to turn on that "no vacancy" sign at the Riviera Motel, because all of these workers stayed with us. We didn't get rich; they were only paying \$8 a night. It's just to point out the importance of jobs in the nuclear industry and the capability of expanding our employment sector in this particular lane of energy.

In this country right now, today, I'm told that we produce about 20 percent of our electricity from nuclear power. In the State of Georgia, it's 24 percent. It's not much higher. We have two sites and four reactors. We're in the process of adding two more right on the Savannah River, as the gentleman from Illinois points out, at Plant Vogtle; and, hopefully, we'll get that done.

The problem, which the gentleman is bringing before all of our colleagues—and hopefully to a lot of other folks who are viewing or listening—is: Why is it for the last 30 years we have had no new nuclear sites? We've literally had a moratorium. You have about 103 across the country—those in Illinois, those in Georgia—and what are they doing with this spent nuclear fuel? It is either shallow, underground in pool tanks, not very much above the water table or—even worse—it's aboveground in these concrete and steel containers. Talk about the risk of a terrorist attack in a radiation release.

So the gentleman was so generous to ask me to join him in this colloquy about the issue. I'm looking forward to continuing, as I yield back to him, to discuss the real problem here of what to do with that spent fuel.

Mr. SHIMKUS. Again, I appreciate your joining me today.

I want to quote from a Chicago Tribune editorial of March 19. I'll just read three short paragraphs:

"Here's why that is potentially a bigger problem than a meltdown: In the Japanese reactors, as in many U.S. reactors, the spent fuel is housed in large water-filled pools in the reactor building but outside the concrete-and-steel fortress that surrounds the reactor core.

"If the core melts down, any radiation released is likely to be partly bottled up by the containment vessel.

"Not so for the spent fuel pools, which often contain far more radioactive material than in the reactor. If the water that keeps those rods cool drains or boils away, the used fuel can catch fire. Result: A dangerous plume of extremely high radioactivity spewed into the air.

"Obvious question: Why do nuclear plants store spent fuel that way?

"Obvious answer in the U.S.: Yucca Mountain isn't open. In the 1980s, the Federal Government launched plans to ship nuclear waste to a storage lair carved into the mountain in Nevada and let it slowly and harmlessly decay."

So there are benefits to nuclear power. If you're a climate change person and if you don't want carbon dioxide and if you still want a lot of electricity for us to use in all of our new technology, you'll have to have a generator. Yet, in this case, it's the used fuel. It is properly stored, but it would be better stored in a single repository underneath a mountain in the desert for all of those reasons.

□ 1530

You're talking about four reactors right now in Georgia; two more coming online, that's six; Illinois has 11. There are over 104 across this whole country and, of course, we spent our time talking about the used nuclear fuel from the industry.

But when I started this debate about what do we do with high-level nuclear waste, I started with a DOE facility that goes back to World War II and the development of the nuclear bomb and the Fat Man bomb, which was built at Hanford, Washington. And all that waste, going all the way back to World War II, is in Hanford. And there are 53 million gallons of nuclear waste on site, buried right off the surface of the ground in tanks that are 750,000 to a million gallons each. Only about 40 of them—there is over 100. Only about 40 of them are double-lined. That means the rest are not. Some are leaking.

Mr. GINGREY of Georgia. Will the gentleman yield?

Mr. SHIMKUS. I yield to the gentleman.

Mr. GINGREY of Georgia. And the question of who is responsible in Hanford or Barnwell, South Carolina, or New Ellington to guard and protect, a tremendous burden on the States. But even if the Department of Homeland Security—maybe they do some oversight and protection of these sites. But

103 different sites across the country, how much simpler, how much safer, how much cheaper if they had one site to protect, that being 100 miles from Las Vegas at Yucca Mountain?

Mr. SHIMKUS. Continuing to speak on this issue of just looking at it, to kind of get away from just the nuclear generating profit sector, to address our responsibility as stewards of a program that was developed to stop World War II and then eventually remedy these environments that had an environmental impact.

Yucca Mountain, the waste storage plan for Hanford—and I've just toured it this year. The plan to gather up, deliquify, reprocess, put it in these canisters is designed to go to one location. Do you know what that location is? That location is Yucca Mountain.

So our failure to move forward, or our failure—actually, the other Chamber's failure, the leader of the Senate's failure, the President of the United States' failure, just tells Washington State what? Guess what. You've got this high-level nuclear waste that's leaking, that's close to the Columbia River, and just deal with it. Just deal with it.

I find that unacceptable after, as my colleague from Illinois said, \$14.5 billion we've spent to prepare this site at Yucca Mountain only to have it stopped for political purposes.

Mr. GINGREY of Georgia. Well, if the gentleman will yield to me again, and I appreciate the opportunity to discuss this, because what year did we commission a group to study—and there were a number of potential sites for permanent storage from all these 103 facilities—one unified central site?

I'm relatively sure—the gentleman could correct me if I am wrong, but it was at least a 5-year process before it was settled in 1987 and Congress at that time designated Yucca Mountain as the sole site for permanent high-level nuclear waste repository after years of contentious applications.

So this is set in law, is it not?

Mr. SHIMKUS. The Nuclear Waste Policy Act of 1982 established Yucca Mountain as the national repository for high-level nuclear waste. And, again, for the educational purposes, Mr. Speaker, that is spent fuel. Sometimes it's spent nuclear waste from our Department of Defense, now controlled by the Department of Energy sites like Hanford.

Our argument is: Let's consolidate this waste safely, securely at one location so that, as my colleague from Georgia says, we can more safely, I think, effectively, I think, efficiently, I think, cost effectively manage, protect, and eventually try to remediate some of the damage that's been done over decades because of this high-level nuclear waste being located all over the country.

I yield to the gentleman.

Mr. GINGREY of Georgia. I have had the opportunity, as a Member of Congress, and particularly as a member of the Energy and Commerce Committee, Mr. Speaker, to travel to France and Scandinavia recently to look at their nuclear facility but, in particular, their ability to reprocess in France and their ability to store in Scandinavia.

We have described a little bit about the physiognomy, if you will, of the Yucca Mountain area, the nuclear test site, that arid desert of northern Nevada; and they have, in Scandinavia, developed a laboratory. I think they call it The Clad. But it is literally 1,400 meters below ground in bedrock, and you could drive 18-wheel trucks down to something like 2 miles deep in the ground where their spent nuclear fuel is stored. And that's the model, and that's really what we are looking at and planning for at Yucca Mountain. Nothing, really, nothing could be safer in regard to storage.

The other thing is, while we were in France, we looked at a facility where they take that spent fuel, Mr. Speaker, and they reprocess it. So at some point in the future, we decide and we have the technology to do that, that source of spent nuclear fuel that's stored in Yucca Mountain could be used to recycle and to get more energy out of this spent nuclear fuel.

It's beyond me how a President, by Executive order, can stop the will of Congress. And maybe we ought to talk about that in regard to things like the Keystone energy pipeline and expand this discussion a little further.

Mr. SHIMKUS. Again, I thank my friend from Georgia for helping out on the Special Order and just addressing the issue of recycling. What do we do? Because those of us who follow the nuclear fuel cycle, most people want it closed. And how do you get it closed? You get it closed by getting as much energy out of the fuel rods as you can. You do that by reprocessing. But it would make sense that if there was someone who is going to attempt to do that, that the nuclear fuel would be close by.

There's probably some discussions about if we were going to have a reprocessing facility sometime in this country like France, where would you locate it? Where would it be situated? I mean, I am just a layman in this debate, but I think you would want it close by where the nuclear material is, the material that you want to use to reprocess, to create fuel.

I can't speak for the entire body. I do know that the House spoke on Yucca Mountain and bringing a finality to this—297 Members voted to ensure that we had the final dollars to do the final scientific study to move this process forward. And in that debate, it just showed that the will of the House was supportive and this is bipartisan. I mean, we don't have 297—or whatever

the number is—Members who are just Republicans. We have 242. That means we brought a lot of our colleagues from the other side on this debate. Some of those really believe that the future is reprocessing and that we ought to be exploring that, and it's much better to have them located where you can recover that material.

□ 1540

If my colleague from Georgia wouldn't mind, we are joined by another colleague from Illinois. People wonder why we take up this cause. It's because we're a big nuclear State. It's about 50 percent of our electricity generation. I do a lot of coal. Coal is very important to me, but we are a nuclear power State which means we have a lot of sites, a lot of reactors, and we have a lot of nuclear waste.

So I yield to my colleague and thank him for coming down.

Mr. KINZINGER of Illinois. I thank my colleague from Illinois. I just want to say thank you for your leadership on this issue, among many other things. This is an issue that is very important. It is important not just for the country. It is important for my State, and it's important for my district. The 11th District of Illinois is kind of north central Illinois. It's a beautiful place. Come spend money there sometime.

But we have three nuclear power plants there. In fact, at each nuclear power plant of course there is stored nuclear waste on site. And then we also have an area that was intended to be early on, the original site of what was going to be nuclear reprocessing in this country, and now it is really just a pool with stored nuclear waste in it.

So in one district—I think there's 131 locations across the country where we are storing this nuclear waste, and in my district alone we have four of those. So this is an issue that is very important not just to the people of Illinois, the people of the 11th District, but mainly to the people of this country.

I mean, Yucca Mountain, the fund was created for this sole purpose of finding a place, a safe place, a safe alternative to store nuclear waste.

Now, going back to the very beginning part of the debate as to why do we need nuclear power, I think we have addressed that. I think most Americans are on board with the understanding that it is good, clean power. It provides a lot of great jobs. I have toured some of the plants in my district, and I can tell you they are good, high-paying American jobs. They take us on that road to energy independence. So understanding then that we need nuclear power and understanding that nuclear power plays an important role, we have to talk about the unfortunate side of it, which is the storage.

Yucca Mountain has been, or was being, created until it was zeroed out

for the purpose of storing all of this waste; and it just makes sense. You know, regardless of whether we build the nuclear reactors or reprocess them, we have to store this somewhere. Now here's the question, though. If Yucca Mountain is technologically unable to store this fuel, then I would think the NRC, the Nuclear Regulatory Commission, needs to come out and tell us it's technologically insufficient and show us why.

But they're not doing that because the truth is technologically it's almost perfect, as far as something like this would go. But the chairman of the NRC has turned this into not necessarily what's the right thing to do for the industry, what's the right thing to do for the country, but what's the political thing to do, and turned the commission into a political commission.

When you talk about this and when you talk about the safety of our country, I think for something very basic like this, and I think it is very evident, I think we should take politics out of that. And I would think all of my colleagues joining me today would agree this doesn't need to be a political issue. We need to have the NRC free of the political manipulations; and only President Obama, frankly, can determine the fate of the chairman. I hope he takes that into account. I hope he takes into account what's the right thing to do for this country in the long run.

So we have great jobs here. We have a need for nuclear power. Let's just complete the puzzle, and let's put this stuff at Yucca Mountain.

Mr. SHIMKUS. If my colleague would continue to discuss this for a few minutes, you mentioned a fund in your kind of opening statement. For the benefit of the Speaker, could you explain where this fund comes from and who is paying into it and what is it designed to do and what's going on with it right now.

Mr. KINZINGER of Illinois. Look, if you pay for any kind of nuclear power, ratepayers pay for this fund.

Mr. SHIMKUS. So you have constituents who have been paying into this fund?

Mr. KINZINGER of Illinois. Sure. And paying for a long time. Let me add, for every year we delay opening—Yucca Mountain is not going away; it doesn't disappear off the face of the Earth—for every year we delay, it's costing us half a billion dollars more than what it's ultimately going to cost.

So my constituents, your constituents, anybody who uses any aspect of nuclear power, which is almost everybody, has been paying for this. This isn't some giant expenditure we're going to have to make out of the general fund when we don't have any money. This is already being funded. It's already being paid for. It only

makes sense. I think the colleagues that are joining me here today will say the same thing: this just makes sense.

Mr. SHIMKUS. And part of this debate about the nuclear waste and where it's stored and the nuclear waste fund has been litigated in Federal court, and the courts have said it is the responsibility of the national government to take this waste as part of the law, complying with the law. Obviously, we have no place to take it. So we end up having the utility store the high-level nuclear waste on site; and some of them, some have not asked us yet, some of them we are actually paying to hold the waste that we're supposed to be holding.

Mr. KINZINGER of Illinois. If my colleague wouldn't mind, and you mentioned it just a few minutes ago, this idea passed this body with a large majority. That to me seems like this is the will of the American people. It's not just some agenda or some crazy pie-in-the-sky idea. This is the will of the American people, and it's the responsibility of us to ensure that we're being safe. I mean, it just seems very basic to me, and so I'm having a hard time figuring out how and why politics has come into play on this. I think this is a debate we solved decades ago. But nonetheless, out in Washington, D.C., nothing surprises me in the 10 months I've been out here.

Mr. GINGREY of Georgia. If the subcommittee chair from Illinois would yield to me, if the gentleman from the 11th of Illinois lets the gentleman from the 11th of Georgia be somewhat instructive in regard to the politics, because that pure and simple is what it is. Of course comments were made in regard to the chairman of the Nuclear Regulatory Commission.

But the fact is that it is the Secretary of Energy, it's the Secretary of Energy. This Secretary of Energy, a Nobel Laureate in nuclear physics who was essentially told by this administration to tell the Nuclear Regulatory Commission that he was requesting that the license application for Yucca Mountain be withdrawn from the NRC, taken out of their hands, the licensing process stopped with prejudice.

Now, I'm not a lawyer, but if there are any lawyers in the body, they understand when you withdraw something with prejudice, that means you can't bring it back up. So this \$14 billion that has been taken out of the ratepayers from the 50 States, or at least where these 103 reactors exist, they are paying for this. And yet this political pressure on a gentleman who's got to be much, much smarter than any of us, a Nobel Laureate in nuclear physics; if I were him, as soon as that word came down to me and I got the memo from the White House, I would immediately resign over righteous indignation.

Mr. KINZINGER of Illinois. If I can just say quickly on that point, Aby

Mohseni, acting director for licensing and inspections at the NRC, made this remark: "Some senior managers contributed to the manipulation of the budget process and information to apparently make sure that the Yucca Mountain project would be left unfunded even if the license application was still before the NRC. We were unprepared for the political pressures and manipulations of our scientific and licensing processes that would come with the appointment of Chairman Jaczko in 2009."

Mr. GINGREY of Georgia. But, fortunately, if I might interject, the board of the NRC rejected that, rejected what he recommended.

Mr. SHIMKUS. Reclaiming my time, I would kind of close this circle, Mr. Speaker, reminding folks that the chairman of the NRC, Mr. Jaczko, used to work for now-majority leader in the Senate, HARRY REID. And it's the majority leader in the Senate that is blocking the funding for the final scientific analysis, and it is the chairman of the NRC who used to work for the majority leader who is complicit in this plan to shut down an investment of this country of \$14.5 billion to comply with Federal law that we passed in 1982.

Now, in 1982 I was serving my country as an Army lieutenant in West Germany before the Wall came down. That's a long time ago. This has been the policy of this country for decades. And to have one man, one majority leader of the Senate, put a halt to that, that's why we're down here, because he has raised this to a political debate, not a scientific debate.

□ 1550

And because it's a political debate, what I'm attempting to do over a series of weeks is go around the country and just identify where is high-level nuclear waste stored, and would it be better for that waste to be stored underneath a mountain in a desert, the most investigated piece of property on the history of this Earth. There is no piece of property that has been more studied than Yucca Mountain anywhere on the face of this Earth.

So I know this is hard for some folks to see. We're doing a tally as we go around the country to look at, where are the votes? And we have 27 people, bipartisan, who have said this is where it should go from Washington State; of course, Illinois and Wisconsin, Georgia, South Carolina, Arizona, Idaho, Utah, Wyoming, Maine, Vermont, Florida, Alabama, Mississippi, and Louisiana. We have new Senators who have not had an opportunity to publicly either make a statement on it or cast a vote. They're in the middle. We have 27 "yes," 8 unknown. We're going to give them the benefit of the doubt. MERKLEY. FEINSTEIN was a "no" but

Fukushima Daiichi and the two nuclear power plants that are on the Pacific Ocean in California and the high-level nuclear waste that's stored in ponds have her in a quandary based upon the representation of that State.

TESTER of Montana, unknown; LEE of Utah; BROWN of Massachusetts; AYOTTE of New Hampshire; SHAHEEN of New Hampshire; WICKER of Mississippi.

Bona fide "noes": REID of Nevada, HELLER of Nevada, CANTWELL of Washington, BOXER of California, BAUCUS of Montana, KERRY of Massachusetts, and SANDERS of Vermont.

So it's a chance to use the bully pulpit and my position as chairman of the subcommittee to help educate not only the floor, my colleagues, the Speaker, those who are following us, that there's got to be a better way to store high-level nuclear waste than in pools next to Lake Michigan, next to the Savannah River, next to the Pacific Ocean. Surely, there's a better place. And we know there is.

Thirty years of study and research—Federal law says Yucca Mountain in the desert underneath a mountain is probably as good a place as you're going to find, at least in the United States.

Mr. KINZINGER of Illinois. If the gentleman would grant me just a moment. When you said there's a mountain in the desert, or there's I think 131 locations as it exists today, I can tell you I have four of those locations in the 11th District in Illinois. I believe nuclear power is safe, effective, cheap, efficient. But right now there's four nuclear storage waste facilities in the district. That's by the Midewin Tallgrass Prairie. That's by populated areas and towns.

There are a lot of big issues going on in Washington, and this probably isn't at the top of people's priorities, but I would encourage anybody that's watching us right now who sees their senator's name on that board you had up earlier and says, Hey, my senator is a "yea," call and say, Thank you. Encourage that senator if they're unsure. If they have the three yellow question marks, probably call that senator and say, Hey, I really would like to get you onboard with safe nuclear storage. And if they're a "nay," please call them twice. Because we react to what we hear. And if the American people want safe storage—and I know they do—then this is the right alternative.

Mr. SHIMKUS. I appreciate, again, my colleague for coming down for this hour of discussion on really what should be the national policy on high-level nuclear waste in this country.

I didn't get a chance to go through all the areas but I'm going to end with Yucca Mountain versus the San Onofre Nuclear Generation Station between L.A. and San Diego. This is one of the ones I'm talking about. How much nuclear waste is in the desert underneath

the mountain? None. How much is on the Pacific Ocean right on the coastline? There's the photo. That's 2,300 waste rods on site. The waste would be stored a thousand feet underground at Yucca. The waste is stored above the ground in pools right on the shoreline of the Pacific Ocean. The waste would be a thousand feet above the water table here. Of course, as you can see from the photo, the waste is right next to the Pacific Ocean. The waste at Yucca Mountain would be a hundred miles from the Colorado River. Again, you can see the waves breaking almost right up to the nuclear generating station between LA and San Diego.

I've gone to Massachusetts. I should have talked about Florida today. I've talked about Illinois. DOE locations like Washington State. There's a lot of nuclear waste defined differently all over this country. Let's do the correct public policy and get it at a single repository in the desert underneath a mountain.

With that, Mr. Speaker, I appreciate your diligence, and I yield back the balance of my time.

#### CONGRESSIONAL PROGRESSIVE CAUCUS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 5, 2011, the gentleman from Minnesota (Mr. ELLISON) is recognized for 60 minutes as the designee of the minority leader.

Mr. ELLISON. My name is KEITH ELLISON. I am the cochair of the Progressive Caucus and a Member of Congress from the great State of Minnesota. I'm here claiming time to speak on behalf of the Congressional Progressive Caucus.

The Congressional Progressive Caucus, Mr. Speaker, is 77 members in the United States Congress who believe that when we say the Pledge of Allegiance and we say liberty and justice for all, that means all—all means blacks, whites, Latinos, Asians, straight, gays, the senior citizens and the youngest among us, people with disabilities and people who are able-bodied. It means the great mass of American people included in "in liberty and justice for all."

The Progressive Caucus believes in economic justice. We believe in civil rights and human rights for all people. We believe that public employees are valuable to our society, and we honor and respect the services that they give to us. We believe that America, with our awesome military power, should use that power to promote peace in the world. We are the ones who called for the U.S. to not go into Iraq. When we went in there, we were the ones to push to get us out. We are the ones who are raising the issues around Afghanistan. And we'll continue to argue the case for diplomacy and for development and

to make friends with the world, to be a good member of the international community in the United Nations and under international bodies.

We're not the ones who believe that the world is a scary, dangerous place and we've got to jack up the military as much as we can. We're not the ones who think that the rich don't have enough money and the poor have too much. We're not the people who believe in dividing Americans based on culture and color and gender and urban versus rural. We believe in unifying Americans and having equal rights for all people.

Yes, we are liberal, and we are proud of it. We're the Progressive Caucus.

Today, Mr. Speaker, I'm here to deliver the Progressive message. The Progressive message is what we're talking about today. The topic I'm going to address, Mr. Speaker, is going to be jobs in this American economy.

Today, Mr. Speaker, we want to speak as bipartisan as we can, but there's no question that the arguments that we have in Congress have a partisan tone. Therefore, for us to sit up here and say we're all just getting along here in Congress and we don't have a different point of view would be not exactly being straight with the American people.

□ 1600

So we're going to say that the debates that we have been having in the House of Representatives have to do with those of us who believe that we as Americans need to live in harmony with the planet, need to try to cut down our carbon footprint, need to try to diminish pollution. And those others of us—mostly on the Republican side of the aisle—who make the case that, for the sake of industry, we have to sacrifice our health, our lungs, our good clean environment, they're making that case.

We're trying to ask Americans to look carefully at the different programs that are being offered on this House floor and to make a decision: Do you believe that we have a responsibility to the poor? The Progressive Caucus does.

Do you believe that public employees and government brings quality and improves the quality of life for Americans? Not all the time. Government needs to be refined like everybody. But the Republicans and conservatives in this House who make the case that government is the problem, we wholeheartedly reject that point of view. That is wrong. We believe in a mixed economy, where the private sector and the public sector exist to benefit the American people in general.

So we're here to talk about these things tonight, and we're here to lay it on the table so that Americans of all backgrounds, all colors, all cultures, all faiths can make decisions about

what kind of America they want. Because there are clearly two different visions of what America is about being offered on this House floor every day for the last year and for the next year, and I think Americans should be able to say, I think this is the kind of America I want. And others who think that rich people don't have enough money and poor people have too much, they can support the Republican program.

Mr. Speaker, I want to talk a little bit about jobs tonight; and, therefore, I just want to make the case that, again, I don't think it's a good idea to always draw the partisan divide, but I think it is important to be honest. And my Republican colleagues just have not—even though they're the majority—have not introduced a single bill for jobs this whole time they've been in the majority.

They will say, Oh, yes, we've brought jobs. We had jobs bills. We had jobs bills. Didn't you see us cutting the EPA?

That's not a jobs bill.

Didn't you see us trying to let cement companies be able to emit more pollution in the air?

That's not a jobs bill.

Didn't you see us trying to let coal companies, electric coal companies be able to put more emissions in the air?

That's not a job bill. That's just saying industry can do what it wants to our lungs.

But a jobs bill to help rebuild America's infrastructure? Haven't seen that from our friends on the Republican side of the aisle. A jobs bill that would help refurbish public buildings like schools, haven't seen that. They don't want to do that.

A jobs bill that would say, Look, you know what? We need to train Americans to be able to do the jobs of the 21st century and to promote solar, wind, biomass, the waves, all these kind of ways that we can live in harmony with the Earth and power the Earth at the same time. They haven't had any jobs doing that. To make our grids smarter, our electrical grids smarter, they don't want to put money in that. They think that is a waste of money.

The fact is Republicans have not come up with a jobs agenda. I call it the Republican no jobs agenda.

And, you know, it's clear that the government has an important role in terms of jobs. You hear some of my Republican colleagues say the government doesn't create jobs. This is absurd.

Ask any small retailer out there who's trying to make a go of it in their local community. They may have a nail shop or they may have a hair shop or they may sell retail clothing or they may have just a small little business that they opened up. If they don't have any police protection—that's the gov-

ernment—then that's going to cut the number of customers that come to them. That is going to hurt their business. Government helping business to thrive.

Ask a trucker, somebody who may own their own rig or maybe somebody who owns a trucking company. If we don't have public roads, highways and things like that—that's the government—where would their business model be?

The Internet. Think about Google. Think about all of the wondrous economic activity associated with the Internet. Well, the Internet was started by the government—yes, it was.

I'm telling you that, whether it's the National Institutes of Health coming up with lifesaving innovation and funding important basic research or whether it is the Food and Drug Administration giving Americans confidence that when they buy that product it's not going to kill them, the government helps business thrive. It helps the market operate properly so that we don't have caveat emptor, so that the buyer doesn't have to beware. The buyer knows that somebody somewhere is looking to make sure that the food is edible and the water is drinkable.

Now, my friends on the Republican side of the aisle that say government doesn't do anything to help the economy are wrong.

I was so proud to hear the President discredit the false economic theory of trickle down. What is trickle down? Mr. Speaker, trickle down is the theory that, look, if we give as much money as we possibly can to the richest Americans and we take it from the poorest Americans and the middle class, then maybe the rich people, through investments and stuff, will put money into the economy and maybe it will trickle down and other people will be able to get something out of it. Well, the President said it's an okay theory except for it doesn't work.

The President's right: Trickle down is a failure, and trickle down doesn't work. I'm so glad that the President really helped explain this to the American people. Because trickle down, at the end of the day, it doesn't trickle down. It just stays up there. And that's why we see so much wealth concentrated in the hands of so few, because Republicans think the only way to make the economy work is to cut all of our health and environmental regulations and to give tax breaks to people who already have more money than they know what to do with.

Some of my Republican friends like to say, well, you've never met a payroll. I met a payroll. I was a small business owner for many years. I was a lawyer and ran a law firm, had to pay my staff. And it wasn't taxes and stuff that I worried about. You know what I worried about? Mr. Speaker, I worried about customers. Could I get some cli-

ents coming through the door asking me to write a will, to incorporate their business? Could I get some clients to say, Would you represent me in this accident? Or, I got in a little trouble. Would you represent me in that?

Clients is what I needed. And if my customers didn't have any money, they wouldn't be able to hire me. But if the customers aren't working and the economy is poor and there's no money circulating amongst working folk, my business suffered. And if people were doing well, my business would thrive. You ask any business person: What would you rather have, a tax cut or a lot of customers? They're going to say, Customers. I want customers.

And so this claim that the Republicans make, that we don't need to make sure that the average working American is doing well, we just make sure that the money gets up to the top and it will trickle down, is not true. And I'm so glad that the President made that point today.

We've got to destroy myths around this economy because, again, there are people who tell self-serving narratives. They tell stories and narratives that help them make more money.

I'm sure that the Koch brothers, who have given a lot of donations around and who own this big refinery and make a lot of money, would really like it if we all believed that giving them a huge tax cut and getting rid of environmental regulations was good for the economy. Of course we don't believe it because it isn't true. But we know that if we keep on arguing, that masses of American people will say, You know what? I think it's okay to have unemployment insurance for people who are out of work. You know, I think it's okay to, in an economy like this, to extend the payroll tax cut.

Rich people get tax cuts. Republicans like it when rich people get tax cuts. They don't like it when working middle people get tax cuts. They would rather have just the rich people get them.

But the fact is people are waking up all over America. They're saying, Hey, you know, when I voted last time or I didn't vote last time, I was upset because of the job situation. And my friends on the Republican side of the aisle didn't get to the business of jobs. They got in here going after the EPA and going after tax cuts for the wealthiest Americans. And because of that, you know, things haven't been good.

Now, I will give President Obama some credit. Because of the good work that he has done, we have seen private job growth continue for about 24 months.

□ 1610

The problem is we have cut the government so badly, and at the wrong time, that State and local governments

have had to shed public employees left, right, and center. We are literally seeing gains in private sector employment being offset by cuts in public sector employment, and it's unfortunate that that's the situation that we have.

So today, I'm here with the progressive message. Today we're here to illustrate what's at stake in America today. And this week, thousands of Americans all across the country came here to Washington to raise their voices. They call themselves the 99 percent. And I have to say, it's starting to feel like the people's House around here.

I had a number of folks in my office who came on a 24-hour bus ride, Mr. Speaker, from my district in Minneapolis, to come tell me that, look, you know, we've got to rebuild America and put people back to work. Infrastructure crumbling, people can work to rebuild it.

They said, hey, look, you know this income inequality is not working. And as you give more and more tax cuts and loopholes to the richest, it just ends up hurting us.

I had to tell them that two-thirds of all American corporations don't pay any taxes at all. Two-thirds of all American corporations don't pay any taxes at all. And I brought in this chart, Mr. Speaker. I pulled this chart out because they were—it was hard for them to believe.

I told them, I said, you know, the companies on this chart that I'm about to show you, you know, show me however much money you have in your pocket, you paid at least as much taxes as these companies, because if you paid nothing, then you paid the same as them. If you got one penny, you paid more than them.

Bank of America paid no taxes. Now, let me tell the story about Bank of America, Mr. Speaker. Bank of America made bad business deals. When you make a bad deal in business, you're supposed to pay for that. You know, things go wrong, people go out of business.

Bank of America, they went and bought Merrill Lynch after this guy, this CEO named Stan O'Neal, ran the company into the ground. They still gave him a golden parachute of, like, several hundred million dollars. And I often joke and say I'd have been happy to run the company into the ground for just a million dollars. But he did it, they paid him millions to run Merrill Lynch into the ground. And Bank of America bought that company.

And then Countrywide, which is the leading predatory lender, subprime lender, bought them, Bank of America did. Got all these bad mortgages that weren't performing because they were never properly underwritten because people made money by just selling the mortgage and then selling the paper. And it was like a hot potato. Once you

sold the mortgage, you got the fees out of it, send it to somebody else to be securitized into a mortgage-backed security. So a lot of those happened.

And Bank of America bought those two companies, and then it started causing them losses. And then they said, America, America, we're going down. Help us, please. And then they called us all together in September and October 2008 and said, we need a bailout, please.

We came up with a bill called TARP and Bank of America got bailed out. Now, the problem is, after Bank of America got bailed out and got back up on its feet somewhat, they paid all their executives big giant bonuses, they laid off 30,000 people.

What? Yeah. That's how they repay the American people helping them out.

Citigroup, another one, paid no taxes. They got saved. They were absolutely going down. They probably are, I don't know, Citigroup is a company with a lot of problems. Paid no taxes.

ExxonMobil. Now these people are making money hand over fist. They are making money. They are very, very, very, profitable. Why? Because you're happy to pay \$3 gas. If you can go pay \$3 you'd be, like, hooray; this is the store I'm going to go to. And you know you see it going up to four. And over the last few years, it's fluctuated between three and four.

Well, do you think that ExxonMobil is not making money on that? They are absolutely making money hand over fist because of that, and yet they pay no taxes.

So, look, the fact is—oh, GE. Don't let me forget about my friends at GE. I think they're the biggest corporation in the world. No taxes. GE pays no taxes.

I'm like, look, you know, GE, we, the government, because we've cut taxes for the wealthiest people, and two-thirds of all corporations don't pay any taxes, we don't have that much money. We're in a position where we may have to cut Head Start, home heating oil program for senior citizens. Do y'all think you could do a little bit better?

And they say, nope, can't do nothing for you. This is amazing. You mean to tell me you've got more—the executives of these companies got more houses than they could ever, ever visit; they've got more lakes that they live on than they could ever water ski on. They've got more \$1,500 Armani suits than they could ever wear. They've got more monogrammed shirts that are tailored than they could ever put on. They've got more expensive shoes. They travel all over the world. They fly around in jets. And they won't pay nothing, and we've got to then talk about cutting home heating oil, the LIHEAP program, cut the food stamp program.

I mean, how do you sleep at night? It's amazing to me. Shocking. Shocking.

And I'm sure all of them look at each other and they say well, you know, we earned it. You can't tell me that you earned that.

This is—and I'm going to tell you, you know, Mr. Speaker, some people want to say, well, they work hard. No, no. This is not true. What they do is they take all that money that they make, and they come down here and they get us to go argue for loopholes for them, and they—\$50 million is spent lobbying Congress; \$130 million spent giving donations to campaigns.

As of 2008, 94 percent of all candidates with the most money win the election.

And about 261 Members of Congress—and there's only 535 of us—are millionaires. The average worth here is about \$700,000. And let me tell you, I'm not one of those rich guys. I actually live on the money my constituents pay me because I'm working for them 24/7. And yet, you know, I go to the grocery store. I know how much bread costs.

And so what I'm saying is, to whom much is given, much is expected. And if America, Nation that I love so much, has a military which protects us all, has a police department that protects us in our local communities, has a fire department that makes sure that Bank of America branches don't burn to the ground, America, if one of their executives or employees gets sick, the EMT truck, the emergency medical truck is going to come help them and bring them back to life if they can. The roads and the bridges that people drive to work on to all these companies, publicly paid for.

And yet they turn around and say, yeah, you've done all that for us, America; but we've got nothing for you. Zero taxes.

It's wrong. And there should be an Occupy movement to say so.

Now, this is a chart, Mr. Speaker, that I do like to pull out now and again. And I want to say that I actually have no beef with Donald Trump or Paris Hilton. I'm sure they're both nice people.

But, you know, do you really think they need a tax break, Mr. Speaker? I think they're getting along just fine.

I think that some of my neighbors who are firefighters and cops and teachers, or who work at the local bank branch, or who work at the local grocery store stocking up groceries, I think they could use a little help. But I do believe that if Donald and Paris don't get a tax break, they'll manage just fine.

These are the millionaires and billionaires of our society. When we cut taxes for the richest people, you're putting more money in the hands of these folks. I don't think that's wise public policy.

So my point, Mr. Speaker, is just this: you know, you want to talk tax breaks. We're actually talking about

extending the payroll tax deduction so that \$1,500 bucks, you know, could stay in the hands of people who are really struggling.

We asked—in the U.S. Senate there was a bill that said, you know, millionaires, on your first million, we're not asking you for no more taxes on your first million. But on your second million, can we have 3 percent? You know. What do you think?

They're, like, nope, nothing doing.

I said, even if it's going to help working class people, you know? Will you help then?

Nope. No. Can't do it. Cannot possibly do it. It might sap their incentive to work. If we were to help the working class people of America, it might sap their incentive to work, so we can't help them.

□ 1620

Tax breaks for billionaires or tax breaks for teachers, police, firefighters, job training, small business, investment, better schools, clean energy, health care, infrastructure investment, college affordability.

Now, my question is, Mr. Speaker, what are America's priorities? I've got a feeling that they're with these folks down here. I think America would rather help these folk than these folks. Just a wild guess.

So that's all we're asking for. This payroll tax deduction, you know, \$1,000, \$1,500 in the pockets of people who really need it. We asked billionaires and millionaires to pony up just a little more. They wouldn't even notice it, wouldn't have to cancel any of your country club memberships. But they said no.

There is a loss of civic virtue among some of our most privileged Americans, but I'm proud to tell you about a group of guys and women called the Patriotic Millionaires. They came to a forum that the Progressive Caucus organized last week, Mr. Speaker, and the Patriotic Millionaires said, You know what, you've invested in research which we used to make our products that made us rich. You invested in roads and bridges and education that we used to help make us rich. And we love America more than we love all that money, and we're here to pay taxes.

And then some smarty-pants Republican said, Well, if you want to pay extra and you're rich, you can. I'm sure the Treasury will accept your checks. And then one of the Patriotic Americans said something really wise. He said, You know, America is not a charity. America is all of our responsibility, and that's what taxes are.

I'm here today, Mr. Speaker, to argue that taxes are the dues we pay to live in a civilized society. Taxes are not a punishment. When they talk about tax relief, really, from what, from good schools and clean water? When they

say "tax burden," I mean, let me tell you.

If you want to live in a society where there's no taxes and therefore no public services, you could move to Somalia. That's what it is. No government. I don't see any of our friends who love—I call them the free market fundamentalists—I don't see them running to Somalia, moving to Mogadishu.

So, Mr. Speaker, I just want to say quite frankly that on this Thursday night in this great country, in my view the greatest country in the history of the world, Americans have a question before themselves. Are we going to choose community, choose each other, or is it going to be a selfish pursuit where everybody is only on their own? I view America as people who would look out for each other, even the least-to-be.

Americans don't think that helping seniors who are on Social Security is a bad thing to do. Americans don't think that helping the poor and the sick is somehow a bad thing to do.

In fact, one of the things that illustrated this national debate we're having, Mr. Speaker, is something that happened in the United States Senate today, the other body.

Today, I can't blame my friends in the House, my Republican friends in the House. They didn't do this one. But today, Republicans in the Senate voted to block President Obama's appointment of Richard Cordray to head the Consumer Financial Protection Bureau.

Now, look, the Consumer Financial Protection Bureau came about because of the massive failure of decency on Wall Street that resulted in all of the foreclosures and America having to bail out the likes of Bear Stearns, and Bank of America and a whole bunch of others. And they said, look, you know, a mortgage document can be very complicated, and we just want to have a bureau that will try to make these things simpler so people know what they're signing up for; a bureau that will say you've got to say what the interest rates are going to be, you've got to say what the terms are going to be so that we can have transparency.

Actually, the real free marketeers around here would never be against more information and better and more effective information going to the consumer. I mean, Adam Smith, the one who wrote—oh, my goodness, I can't believe I can't remember the name of that great book—but the one in which he describes the invisible hand and how markets move and people operate and their individual interest yields the economy. He said in that book that consumer information is key to a good market operating. So I don't know why people wouldn't want a good market to operate.

But anyway, Republicans in the Senate—can't blame the House members

this time—like to claim that the new Consumer Financial Protection Agency would be reformed before it gets a new director. They say they won't even allow it to exist. They won't allow it to have a director until they change it. Well, we had a vote and it came into being. So now they're trying to wreck it before it even gets up and running.

The truth is that these folks who are against consumer protection and the lobbyists that support them are trying to water down our new consumer watchdog's power so they can't hold Wall Street and predatory lenders accountable. And that's too bad. They don't want anybody to be the new cop on the beat protecting all Americans against these predatory lenders.

I've always said, look, if you're offering a good financial product that helps people and is fair, why would you be afraid of a little transparency? Only if your business model is based on bilking and cheating customers would you want to fight against a Consumer Financial Protection Bureau.

Without an enforcer and without real powers to crack down on predatory loans, we will keep on seeing mortgages that are designed to fail from the very beginning, tricking people with the fine print, cheating consumers to make a quick buck.

So, Mr. Speaker, I see that Republicans are ready to take the time. I'm happy to yield it. I'm going to yield back the balance of my time in just a moment.

But I just want to say that America was a good idea. America is a good idea. But it's an idea that you have to fight for; and the idea of liberty and justice for all living in a fair, prosperous economy is something that Americans all over this country have to stand up for and assert because if we leave it to the big guys, to the 1 percent, to the people with all the money and all the dough, they're going to snatch this great American Dream away from us.

With that, I yield back the balance of our time.

#### THE SPECTER OF GLOBAL GOVERNANCE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 5, 2011, the gentleman from California (Mr. ROHRBACHER) is recognized for 30 minutes.

Mr. ROHRBACHER. Thank you, Mr. Speaker.

Before I go into my prepared remarks, I would like to point out that I personally have opposed all of the bailouts and the hundreds of billions of dollars that the Obama administration has channeled to different financial wheeler-dealers and cronies, like Goldman Sachs and the others that have received so much money as directed to them from this administration, just to put it on the record.

Many of these so-called corporations that my colleague just pointed out, if we take a look, when we say if we're going to increase taxes on them, these corporations' biggest stockholders happen to be pension funds. What we're really talking about by trying to say we're going to just tax these big corporations, what we're really doing is taxing the pension funds and are taxing the entities that provide the money for the pension funds for the rest of the citizens of this country. But that is another issue that I will discuss some other day.

Today, Mr. Speaker, as a strong advocate of human progress through advancing mankind's understanding of science and engineering, I rise to discuss the blatant abuse and misuse of science. A few nights ago, I watched a video of President Eisenhower's 1961 farewell address. Unfortunately, his much-heralded warnings about the military industrial complex, which were right on target, I might add, that warning has unfortunately obscured another warning in that farewell address that is just as significant.

□ 1630

Eisenhower pointed to the danger "of domination of the Nation's scholars by Federal employment, project allocations, and the power of money is ever present—and is gravely to be regarded. Yet, in holding scientific research and discovery in respect, as we should, we must also be alert to the equal and opposite danger that public policy could itself become the captive of a scientific-technological elite."

In my lifetime, there has been no greater example of this threat, which Eisenhower warned us about, than the insidious coalition of research science and political largesse—a coalition that has conducted an unrelenting crusade to convince the American people that their health and their safety and—yes—their very survival on this planet is at risk due to manmade global warming. The purpose of this greatest-of-all propaganda campaigns is to enlist public support for, if not just the acquiescence to, a dramatic mandated change in our society and a mandated change to our way of life. This campaign has such momentum and power that it is now a tangible threat to our freedom and to our prosperity as a people.

Ironically, as the crusade against manmade global warming grows in power, more evidence surfaces every day that the scientific theory on which the alarmists have based their crusade is totally bogus. The general public and decisionmakers for decades have been inundated with phony science, altered numbers, and outright fraud. This is the ultimate power grab in the name of saving the world; and like all fanatics, disagreement is not allowed in such endeavors.

Prominent scientists who have been skeptical of the claims of manmade global warming have themselves been cut from research grants and have been obstructed when trying to publish peer-reviewed dissenting opinions. How the mainstream media or publications like the *National Journal*, for example, have ignored the systematic oppression that I speak about is beyond me.

If you've heard the words "case closed," it doesn't take a genius to figure out that the purpose of such a proclamation is to limit and repress debate. Well, the case isn't closed, so let's start with some facts about manmade global warming and the theory of manmade global warming.

First and foremost, the Earth has experienced cooling and warming climate cycles for millions of years, which a significant number of prominent scientists believe is tied to solar activity—just like similar temperature trends have been identified on Mars and other bodies in the solar system—and that is the Sun.

So how about those icecaps on Mars that seem to expand and recede, mirroring our own polar icecaps? Doesn't that point to the Sun rather than to human activity? After all, there are very few, if any, human beings around on Mars, and certainly millions of years ago, when we had other cycles in the world, there weren't very many human beings, if any, around. So where do the climate cycles come from? What causes climate cycles?

Right off the bat, let's acknowledge that manmade global warming advocates, who I suggest are alarmists, do not believe the Sun has no impact on climate cycles. They just believe that the Sun has a minimal impact as compared to the increasing level of CO<sub>2</sub> in the atmosphere. Basically, they believe that the Sun does have some impact but nothing compared to the increase in CO<sub>2</sub> in the atmosphere. Today, they believe this increase in CO<sub>2</sub> in the atmosphere has become very frightening because mankind is using fossil fuels, which they believe is causing this dramatic increase in CO<sub>2</sub>.

Similarly, skeptics like me believe the solar activity of the Sun is the major factor in creating the Earth's climate cycles, including the one that we're currently in. We also believe that manmade CO<sub>2</sub> buildup may have a minor impact. The debate isn't all Sun or all manmade CO<sub>2</sub>. It's over which of these factors is a major determinant or even the significant determinant.

At this point, one other fact needs to be understood. Many intelligent people believe that CO<sub>2</sub>—carbon dioxide—represents 10, 20, even 30 percent of the atmosphere. If anyone is reading this or is listening to this, answer this question:

What do you think the percentage is after all we've heard, time and time again, of how CO<sub>2</sub> is changing the climate of our planet?

As I say, most people think it's 10, 20, even 30 percent of the atmosphere. In reality, CO<sub>2</sub> is less—less—than one half of one-tenth of 1 percent of the atmosphere, and humankind's contribution to that one half of one-tenth of 1 percent is a small fraction of that. So to say that what we're talking about is minuscule, no, that's not smart enough. What it really is is microscopic.

Frankly, I believe that CO<sub>2</sub> is so irrelevant that it should not be the focus of air standards and regulations. After all, it is not harmful to human beings unless, of course, you stick it into your automobile in the garage and shut the door for hours and hours at a time. The CO<sub>2</sub> that's in the atmosphere is not harmful. Other gases, like NO<sub>x</sub>, which are damaging to human health, should be a much higher priority than CO<sub>2</sub>. NO<sub>x</sub> is harmful to people's health. It's global pollution, not global warming, that we should be concerned about.

Not making this distinction has cost us billions, maybe more. The temperature of this planet isn't manmade, and we can't do anything about it. Our energy challenges and the air quality that we have are man-influenced, if not manmade. We can do something about these maladies.

But the alarmists are not interested in solving those problems. They are part of a coalition that wants to change our way of life, which requires us to acquiesce—or, better yet, to frighten us into submission. Make no mistake: The manmade global warming theory is being pushed by people who believe in global government. They have been looking for an excuse for an incredible freedom-busting centralization of power for a long time, and they've found it in the specter of manmade global warming.

For the past 30 years, the alarmists have been spouting "Chicken Little" climate science. This campaign was turbocharged in the 1990s when the Clinton administration made it part of its agenda, thanks to Vice President Al Gore. One of the first actions that the administration took was to fire the top scientist at the Department of Education, Dr. William Happer, a professional who, at the time, dared to be open-minded about the global warming theory. Al Gore decided Dr. Happer just didn't fit in, and out he went. From there, the pattern became all too clear. In order to receive even one iota of Federal research funds, a scientist had to toe the line on manmade global warming.

There is a biblical quote: "The truth shall set you free." Well, this is a battle for the truth, and we are up against a political machine that has been yelling, "Case closed," and restricting Federal research grants only to those who agree with them.

That we have politicians who believe in centralizing power and are willing to

use their own power certainly should surprise no one, but that a scientific-technological elite, the very group that President Eisenhower warned us against 50 years ago, has allied itself with such a political power play is totally contrary to what science and scientists are supposed to be all about.

Because of the retaliation of those alarmists in charge of bestowing the Federal research grants, opposition to this power grab has taken time to coalesce; but the opposition to the man-made global warming theory is now evident and won't be ignored.

There have been major conferences here in Washington and at other locations around the Nation, with hundreds of prominent members of the scientific community. Individuals, many of whom are renowned scientists, Ph.D.'s and heads of major university science departments, including a few Nobel Prize winners, have all stepped up and spoken out.

□ 1640

Even with little news coverage, this group, who are accurately referred to as skeptics, are gaining ever more recognition and ever more influence. They face a daunting challenge, however, and they, as I say, have to fight for any attention, even though they have just as good credentials as those people who are advocating on the other side. For a list of some of these credentialed and very well-respected skeptics, one can visit my Web site. I'm Congressman DANA ROHRBACHER from California.

So what is this apocalyptic manmade global warming theory that the globalists and radical environmentalists would have us believe? It is that our planet is dramatically heating up because we human beings, especially Americans, put large amounts of CO<sub>2</sub> into the atmosphere as a result of using oil, gas, and coal as fuel.

The CO<sub>2</sub> has an impact in that it entraps a certain amount of heat in the atmosphere, thus dangerously warming the planet. We have been warned about huge changes in our environment, including a 10-degree jump in the overall temperature, and thus a serious rise in the level of the oceans of the world.

Vice President Gore, in his movie, "An Inconvenient Truth," showed what seemed to be a video of melting and breaking icecaps. Inconveniently, somebody squealed, the video was actually a special effect. It was Styrofoam made to look like melting and breaking icecaps. But that's no problem. People still listen to Al Gore.

Over and over again, the alarmists have said that the Earth is dramatically heating up. Look closely at the data that they're talking about. Look closely at the date that was picked by these people as a baseline for comparing temperatures. It is 1850. And what is 1850? It's the end of a 500-year decline in the Earth's temperature.

The Little Ice Age was ending in the 1850s. Skeptics say that a 1- or 2-degree increase in the planet's temperature is irrelevant if the basis of comparison is a 500-year low in the Earth's temperature. To skeptics, currently we are just in another natural climate cycle. That's what we as skeptics believe. This is another natural climate cycle, and it's been going on, as was the 500-year decline in the Earth's temperatures. If it's going up a little bit now, that is a natural climate cycle.

To alarmists, however, the sky is falling. A couple of degrees warmer and the sky is heating, or it's falling, that is, or heating, and all of this is caused by mankind pumping CO<sub>2</sub> into the air.

This theory of manmade CO<sub>2</sub> causing global warming emerged when scientists mistakenly believed that the data they were studying from ice cores indicated that a warming of our planet was happening after a major increase in CO<sub>2</sub>.

However, later, it was found that the ice cores were misread. Nicholas Caillon pointed out in *Science* magazine in 2003 that the CO<sub>2</sub> increase lagged Antarctic deglaciation warming by 800 to 200 years, give or take 200 years. So the heating came first, and then the CO<sub>2</sub> increased, not the other way around.

Yes, when Earth heats up, there is more CO<sub>2</sub>. But we've been told the opposite over and over again, and we were told it was the CO<sub>2</sub> that was making the Earth heat up, and they were telling us that the Earth will keep heating up until it reaches a tipping point, and then there will be a huge jump in the temperature. The temperature will shoot up once it reaches this tipping point. And we could expect, this is what we were told over and over again by the scientists predicting over and over again that we could expect this warming to go on and on until we quit using CO<sub>2</sub> and quit using these CO<sub>2</sub>-emitting fossil fuels as a major source of our energy.

The future they described was hot and bleak, but their frightening illusion began to disintegrate when, about 9 years ago, even as more CO<sub>2</sub> was being pumped into the air and has continued to be pumped into the air, the Earth quit warming and, in fact, it may be now in a cooling cycle. That's right. The NOAA National Climate Data Center shows that ground surface temperatures have flattened, and there hasn't been any net warming since 1998, and the RSS microwave sounding units—that's MSU—operating on NOAA satellites show a net cooling since 1998.

It's totally the opposite of every prediction of the United Nations Intergovernmental Panel on Climate Change, that's the IPCC, and their faulty computer models, as well as the army of global warming scientists who have been warning us about higher and high-

er temperatures of what we could expect.

Well, miraculously, the frantic claims and predictions of manmade global warming have now been replaced with an all-new encompassing warning. So if it gets colder, or it gets warmer, the alarmists will have their way because that's being caused by too much CO<sub>2</sub>.

Well, what is being caused? Well, whatever it is, it's being caused by it. And so they changed the words from global warming to climate change and have replaced, as I say, global warming with their climate change.

Well, I guess they think that we would just forget about the predictions and their predictions over and over again being 100 percent wrong. Even the much-touted melting of the icecaps has now reversed itself in the last few years. According to the most recent data from the National Snow and Ice Data Center in Boulder, Colorado, not all the icecaps are melting now. There's melting, and there is also re-freezing going on.

So the polar icecaps aren't going away and, yes, the polar bears are not becoming extinct. They were put on the extinct list even though they weren't extinct. In fact, there are some number of polar bear families that are growing dramatically in the last few years, even as we were warned that polar bears were becoming extinct.

Warming has ended, but the power grab continues. What we are now finding out is exactly how ruthless and, yes, deceitful that power grab has been. One example of blackballing is of prominent scientists like Dr. William Gray, Emeritus Professor of Atmospheric Science at Colorado State University and the head of the Tropical Meteorology Project at CSU's Department of Atmospheric Science. Gray had the courage and honesty to point out that there have not, in recent years, been more or stronger hurricanes and other such storms than in the past. No more research grants for him, no attention in the media, either.

Zealots can usually find high-sounding excuses for their transgressions against other professionals like Dr. Gray. Professional figures in white coats with authoritative tones of voices and lots of credentials repeatedly dismiss criticism by claiming that their so-called scientific findings had been peer reviewed, verified by other scientists. It sounds so much beyond reproach. They gave each other prizes as they selectively handed out research grants.

To those who disagreed, like Dr. Gray, no matter how prominent, they were treated like nonentities, like they didn't exist, or were personally disparaged with labels like "denier." Well, you know, Holocaust denier, that's what you do. Now, how much uglier does it get? How much against the

standard of professional science can you be than to try to paint someone like that because he disagrees with you?

□ 1650

Well, these unprofessional tactics won't work forever, and it's becoming ever clearer that the man-made global warming steamroller is beginning to fall apart. We now know that the scientists clamoring for subservient acceptance to their theory of man-made global warming were themselves making a sham out of the scientific methodology. We now know what they were doing. I'm speaking, of course, of Climategate, the publication of over 1,000 emails and 3,000 other unofficially obtained documents from one of the world's foremost global warming research institutes, the Climate Research Unit of East Anglia University in the United Kingdom. And we have all heard of those quotes. Here's a few of them:

"We can't account for the lack of warming at the moment, and it's a travesty that we can't."

How about another quote: "I've just completed Mike's nature trick . . . to hide the decline."

Here's another quote: "We'll keep them"—meaning the skeptics of their science. "We'll keep them out somehow—even if we have to redefine what peer-review literature is."

How about this for another quote: "If they ever hear there is a Freedom of Information Act now in the U.K., I think I'll delete the file rather than send it to anyone."

Deleting files? Trying to prevent peer review? What kind of scientists were these? Well, arrogant and politically motivated scientists, that's who.

The unauthorized release of those internal memos exposed the shenanigans of the man-made global warming alarmists and the crime being committed against science and the public. Even though handpicked panels of their peers held the kangaroo court—yeah, their own peers judged them, that's right—and that kangaroo court loudly proclaimed there had no wrongdoing by these people, well, public confidence was justifiably shaken in the global warming science advocates.

Now, just as that scandal was about to be forgotten, we have an even larger database being exposed showing even more clearly how this elite operates, and it ain't pretty.

Here are some of the quotes from the newly released database: Unfortunately, there is no way to fix the IPCC, and there never was. The reason is that its information over 20 years ago was to support political and energy policy goals, not to search for scientific truth.

Here's another quote: If you disagree with their interpretation of climate change, you were left out of the IPCC process. They ignore or fight against any evidence which does not support

their policy-driven mission, even to the point of pressuring scientific journals not to publish papers which might hurt the IPCC's effort.

Here's another one regarding the IPCC: I also think the science is being manipulated to put a political spin on it.

Here's another one: It's very likely that the mean temperature has shown much larger past variability than caught by previous reconstructions. We cannot, from these reconstructions, conclude that the previous 50-year period has been unique in the context of the last 500 to 1,000 years.

What's that mean? That means the current cycle we're in has nothing to do with the burning of fossil fuel by human beings.

I would like to insert an article from James Taylor of Forbes magazine who said Climategate 2: "These scientists view global warming as a political 'cause' rather than a balanced scientific inquiry."

#### CLIMATEGATE 2.0: NEW E-MAILS ROCK THE GLOBAL WARMING DEBATE

(By James Taylor)

A new batch of 5,000 emails among scientists central to the assertion that humans are causing a global warming crisis were anonymously released to the public yesterday, igniting a new firestorm of controversy nearly two years to the day after similar emails ignited the Climategate scandal.

Three themes are emerging from the newly released emails: (1) prominent scientists central to the global warming debate are taking measures to conceal rather than disseminate underlying data and discussions; (2) these scientists view global warming as a political "cause" rather than a balanced scientific inquiry and (3) many of these scientists frankly admit to each other that much of the science is weak and dependent on deliberate manipulation of facts and data.

Regarding scientific transparency, a defining characteristic of science is the open sharing of scientific data, theories and procedures so that independent parties, and especially skeptics of a particular theory or hypothesis, can replicate and validate asserted experiments or observations. Emails between Climategate scientists, however, show a concerted effort to hide rather than disseminate underlying evidence and procedures.

"I've been told that IPCC is above national FOI [Freedom of Information] Acts. One way to cover yourself and all those working in AR5 would be to delete all emails at the end of the process," writes Phil Jones, a scientist working with the United Nations Intergovernmental Panel on Climate Change (IPCC), in a newly released email.

"Any work we have done in the past is done on the back of the research grants we get—and has to be well hidden," Jones writes in another newly released email. "I've discussed this with the main funder (U.S. Dept of Energy) in the past and they are happy about not releasing the original station data."

The original Climategate emails contained similar evidence of destroying information and data that the public would naturally assume would be available according to freedom of information principles. "Mike, can you delete any emails you may have had with Keith [Briffa] re AR4 [UN Intergovern-

mental Panel on Climate Change 4th Assessment]?" Jones wrote to Penn State University scientist Michael Mann in an email released in Climategate 1.0. "Keith will do likewise. . . . We will be getting Caspar [Ammann] to do likewise. I see that CA [the Climate Audit Web site] claim they discovered the 1945 problem in the Nature paper!!"

The new emails also reveal the scientists' attempts to politicize the debate and advance predetermined outcomes.

"The trick may be to decide on the main message and use that to guide what's included and what is left out" of IPCC reports, writes Jonathan Overpeck, coordinating lead author for the IPCC's most recent climate assessment.

"I gave up on [Georgia Institute of Technology climate professor] Judith Curry a while ago. I don't know what she thinks she's doing, but its not helping the cause," wrote Mann in another newly released email.

"I have been talking w/ folks in the states about finding an investigative journalist to investigate and expose" skeptical scientist Steve McIntyre, Mann writes in another newly released email.

These new emails add weight to Climategate 1.0 emails revealing efforts to politicize the scientific debate. For example, Tom Wigley, a scientist at the University Corporation for Atmospheric Research, authored a Climategate 1.0 email asserting that his fellow Climategate scientists "must get rid of" the editor for a peer-reviewed science journal because he published some papers contradicting assertions of a global warming crisis.

More than revealing misconduct and improper motives, the newly released emails additionally reveal frank admissions of the scientific shortcomings of global warming assertions.

"Observations do not show rising temperatures throughout the tropical troposphere unless you accept one single study and approach and discount a wealth of others. This is just downright dangerous. We need to communicate the uncertainty and be honest. Phil, hopefully we can find time to discuss these further if necessary," writes Peter Thorne of the UK Met Office.

"I also think the science is being manipulated to put a political spin on it which for all our sakes might not be too clever in the long run," Thorne adds.

"Mike, The Figure you sent is very deceptive . . . there have been a number of dishonest presentations of model results by individual authors and by IPCC," Wigley acknowledges.

More damaging emails will likely be uncovered during the next few days as observers pour through the 5,000 emails. What is already clear, however, is the need for more objective research and ethical conduct by the scientists at the heart of the IPCC and the global warming discussion.

Perhaps the most perplexing aspect of all of this, amid all of the consternation about their malpractices to which we have now been exposed: The global warming elite just keeps a straight face. They keep up their PowerPoint presentations, distorted graphs and all, and continue projections of man-made global doom and gloom. They try to ignore the uproar and change the subject, but these recent revelations seriously call into question the basic science of man-made global warming fanatics.

In the meantime, a report was recently issued by world-respected scientists at CERN in Switzerland. The CERN study demonstrated it is cosmic rays from the sun that determine global cloud cover, and the clouds have dramatically more to do with temperature than the minuscule amounts of CO<sub>2</sub> in the atmosphere.

The Cloud Project at a highly respected CERN laboratory published a paper in the journal *Nature* this past August based on this research which shows that the sun's activity is influencing cloud formation and may account for most of the recorded temperature changes in the last century.

I would like to submit an editorial about this project from *The Wall Street Journal* by Anne Jolis for the RECORD.

#### THE OTHER CLIMATE THEORY

Al Gore won't hear it, but heavenly bodies might be driving long-term weather trends.

(By Anne Jolis)

In April 1990, Al Gore published an open letter in the *New York Times* "To Skeptics on Global Warming" in which he compared them to medieval flat-Earthers. He soon became vice president and his conviction that climate change was dominated by man-made emissions went mainstream. Western governments embarked on a new era of anti-emission regulation and poured billions into research that might justify it. As far as the average Western politician was concerned, the debate was over.

But a few physicists weren't worrying about Al Gore in the 1990s. They were theorizing about another possible factor in climate change: charged subatomic particles from outer space, or "cosmic rays," whose atmospheric levels appear to rise and fall with the weakness or strength of solar winds that deflect them from the earth. These shifts might significantly impact the type and quantity of clouds covering the earth, providing a clue to one of the least-understood but most important questions about climate. Heavenly bodies might be driving long-term weather trends.

The theory has now moved from the corners of climate skepticism to the center of the physical-science universe: the European Organization for Nuclear Research, also known as CERN. At the Franco-Swiss home of the world's most powerful particle accelerator, scientists have been shooting simulated cosmic rays into a cloud chamber to isolate and measure their contribution to cloud formation. CERN's researchers reported last month that in the conditions they've observed so far, these rays appear to be enhancing the formation rates of pre-cloud seeds by up to a factor of 10. Current climate models do not consider any impact of cosmic rays on clouds.

Scientists have been speculating on the relationship among cosmic rays, solar activity and clouds since at least the 1970s. But the notion didn't get a workout until 1995, when Danish physicist Henrik Svensmark came across a 1991 paper by Eigil Friis-Christensen and Knud Lassen, who had charted a close relationship between solar variations and changes in the earth's surface temperature since 1860.

"I had this idea that the real link could be between cloud cover and cosmic rays, and I wanted to try to figure out if it was a good idea or a bad idea," Mr. Svensmark told me

from Copenhagen, where he leads sun-climate research at the Danish National Space Institute.

He wasn't the first scientist to have the idea, but he was the first to try to demonstrate it. He got in touch with Mr. Friis-Christensen, and they used satellite data to show a close correlation among solar activity, cloud cover and cosmic-ray levels since 1979.

They announced their findings, and the possible climatic implications, at a 1996 space conference in Birmingham, England. Then, as Mr. Svensmark recalls, "everything went completely crazy. . . . It turned out it was very, very sensitive to say these things already at that time." He returned to Copenhagen to find his local daily leading with a quote from the then-chair of the U.N. Intergovernmental Panel on Climate Change (IPCC): "I find the move from this pair scientifically extremely naive and irresponsible."

Mr. Svensmark had been, at the very least, politically naive. "Before 1995 I was doing things related to quantum fluctuations. Nobody was interested, it was just me sitting in my office. It was really an eye-opener, that baptism into climate science." He says his work was "very much ignored" by the climate-science establishment—but not by CERN physicist Jasper Kirkby, who is leading today's ongoing cloud-chamber experiment.

On the phone from Geneva, Mr. Kirkby says that Mr. Svensmark's hypothesis "started me thinking: There's good evidence that pre-industrial climate has frequently varied on 100-year timescales, and what's been found is that often these variations correlate with changes in solar activity, solar wind. You see correlations in the atmosphere between cosmic rays and clouds—that's what Svensmark reported. But these correlations don't prove cause and effect, and it's very difficult to isolate what's due to cosmic rays and what's due to other things."

In 1997 he decided that "the best way to settle it would be to use the CERN particle beam as an artificial source of cosmic rays and reconstruct an artificial atmosphere in the lab." He predicted to reporters at the time that, based on Mr. Svensmark's paper, the theory would "probably be able to account for somewhere between a half and the whole" of 20th-century warming. He gathered a team of scientists, including Mr. Svensmark, and proposed the groundbreaking experiment to his bosses at CERN.

Then he waited. It took six years for CERN to greenlight and fund the experiment. Mr. Kirkby cites financial pressures for the delay and says that "it wasn't political."

Mr. Svensmark declines entirely to guess why CERN took so long, noting only that "more generally in the climate community that is so sensitive, sometimes science goes into the background."

By 2002, a handful of other scientists had started to explore the correlation, and Mr. Svensmark decided that "if I was going to be proved wrong, it would be nice if I did it myself." He decided to go ahead in Denmark and construct his own cloud chamber. "In 2006 we had our first results: We had demonstrated the mechanism" of cosmic rays enhancing cloud formation. The IPCC's 2007 report all but dismissed the theory.

Mr. Kirkby's CERN experiment was finally approved in 2006 and has been under way since 2009. So far, it has not proved Mr. Svensmark wrong. "The result simply leaves open the possibility that cosmic rays could

influence the climate," stresses Mr. Kirkby, quick to tamp down any interpretation that would make for a good headline.

This seems wise: In July, CERN Director General Rolf-Dieter Heuer told *Die Welt* that he was asking his researchers to make the forthcoming cloud-chamber results "clear, however, not to interpret them. This would go immediately into the highly political arena of the climate-change debate."

But while the cosmic-ray theory has been ridiculed from the start by those who subscribe to the anthropogenic-warming theory, both Mr. Kirkby and Mr. Svensmark hold that human activity is contributing to climate change. All they question is its importance relative to other, natural factors.

Through several more years of "careful, quantitative measurement" at CERN, Mr. Kirkby predicts he and his team will "definitively answer the question of whether or not cosmic rays have a climatically significant effect on clouds." His old ally Mr. Svensmark feels he's already answered that question, and he guesses that CERN's initial results "could have been achieved eight to 10 years ago, if the project had been approved and financed."

The biggest milestone in last month's publication may be not the content but the source, which will be a lot harder to ignore than Mr. Svensmark and his small Danish institute.

Any regrets, now that CERN's particle accelerator is spinning without him? "No. It's been both a blessing and the opposite," says Mr. Svensmark. "I had this field more or less to myself for years—that would never have happened in other areas of science, such as particle physics. But this has been something that most climate scientists would not be associated with. I remember another researcher saying to me years ago that the only thing he could say about cosmic rays and climate was that it was a really bad career move."

On that point, Mr. Kirkby—whose organization is controlled by not one but 20 governments—really does not want to discuss politics at all: "I'm an experimental particle physicist, okay? That somehow nature may have decided to connect the high-energy physics of the cosmos with the earth's atmosphere—that's what nature may have done, not what I've done."

Last month's findings don't herald the end of a debate, but the resumption of one. That is, if the politicians purporting to legislate based on science will allow it.

In this piece, she says: charged subatomic particles from outer space, or cosmic rays, might significantly impact the type and quality of clouds covering the Earth, providing a clue to one of the least understood but most important questions about climate. Heavenly bodies might be driving long-term weather trends.

And while scientists have discovered the sun's relationship to cloud cover, even more recently there's been a study directly undermining the theory that CO<sub>2</sub> levels are a major determinant of the Earth's temperature.

A recent editorial from *Investor's Business Daily* on the topic of this new study about temperature sensitivity to carbon dioxide undermines the case-closed arguments of the scientific elite.

From the editorial: The left's proposed solutions to the world's ills are

based on the idea that carbon dioxide is a climate-heating poison that must be scrubbed from the global economy at all costs. Yet another study shows this to be foolishness.

And I submit that for the RECORD at this point as well.

[From the Investor's Business Daily  
Editorial, Nov. 25, 2011]

GLOBAL WARMING MODELS CALLED INTO  
QUESTION BY NEW STUDY

Climate: The left's proposed solutions for the world's ills are based on the idea that carbon dioxide is a climate-heating poison that must be scrubbed from the global economy at all cost. Yet another study shows this is foolish.

The study in the journal *Science* found that global temperatures appear to be far less sensitive to the amount of CO<sub>2</sub> in the atmosphere than originally estimated.

This sounds prosaic, but it's a bombshell—another in a long line of revelations showing the scientific fraud at the heart of the anti-global warming movement.

The study's findings are simple and devastating. "This implies that the effect of CO<sub>2</sub> on climate is less than previously thought," said Oregon State University's Andreas Schmittner, the study's main author.

Even with a doubling of CO<sub>2</sub> from levels that existed before the Industrial Revolution, the study found a likely increase in Earth's temperature only from about 3.1 degrees Fahrenheit to 4.7 degrees Fahrenheit.

That compares with the U.N. Intergovernmental Panel on Climate Change's 2007 report, which predicted an increase of 3.6 degrees to 8.6 degrees.

Coupled with the fact the average global temperature hasn't increased at all over the past decade—even though under all of the global warming models now in use, this is impossible—warmist ideology is crumbling. There is no climate armageddon on the horizon.

But don't expect global warm-mongers to admit this. As we've discovered from a new trove of emails sent by leading European climate-change scientists, there has been a vast, global green conspiracy to silence scientific opposition to the idea—even to the point of falsifying data and ruining others' careers.

Subscribe to the IBD Editorials Podcast—The left's entire prescription for solving the world's ills—ranging from population control to strict regulation of businesses to shrinking CO<sub>2</sub> output are premised on the notion that carbon-dioxide is a poison.

Happily, the left's pernicious, economy-destroying and false global warming ideology is collapsing under a growing body of evidence that the CO<sub>2</sub> scare is a fraud.

Who says we have nothing to be thankful for?

And despite the weaknesses of the linkage between CO<sub>2</sub> and temperature, the alarmists continue with their tactics. We just heard a report published in *Nature Climate Change* in the last few days that CO<sub>2</sub> emissions in 2010 went up by 5.9 percent, which scientists claimed was the highest total annual growth ever recorded—except they didn't record any CO<sub>2</sub> emissions. They estimated that based on energy use. They didn't take into account new technologies that make gas and oil and coal cleaner and greener. The scientists didn't care about how cleanly coal and

oil might be being burned; they just estimated—or guesstimated—CO<sub>2</sub> emissions based on the total amount of coal and oil used. And the media, like their lapdogs, faithfully reported that this sounds like a calamity when you have so much more CO<sub>2</sub> coming in, even though they never measured any CO<sub>2</sub> emissions. None of it was actually recorded.

The truth is CO<sub>2</sub> is not a pollutant. Anybody perpetuating that myth that CO<sub>2</sub> is dangerous, a dangerous pollutant, is contributing to the health-destructive impact of real pollution by diverting resources and attention away from these very real challenges. We have wasted \$25 billion or more on this foolishness. That is money that could have been used to develop new energy technologies, for example, that could have moved us off of our dependence on foreign oil.

Some examples of these technologies are the small modular nuclear reactors which could offer us safety and no pollution, no leftover waste, but we didn't have the money for that. How about space-based solar power, which could collect solar energy from the sun out in outer space and transmit it to the Earth?

Developing these new technologies will take hundreds of millions of dollars for these new reactors, billions of dollars for a space-based solar. Instead, we've squandered our billions of dollars and our limited science money and technology dollars on trying to prove that man-made global warming is something that we have to worry about and spread the fear.

We have not pursued these or other technologies which could have fundamentally benefited everyone on the Earth because we have been wasting our time and our resources. We have been trying to figure out how to bury carbon in the ground and other such things.

Well, Mr. Speaker, I'm here to explain that this is utter nonsense and to warn of the danger that lurks behind this high-sounding cause.

Don't miss the significance, by the way, of the Durban conference in South Africa that is gathering now to determine how best to control our lives.

□ 1700

As happened in Kyoto and Copenhagen in the past, they now are meeting in Durban to try to find ways of issuing mandates to the people of the world in the name of stopping global warming.

Mr. Speaker, I would suggest to the people of the United States they pay close attention to this. Eisenhower isn't here to protect us anymore. The fact is our freedom is at stake. The globalists would like to control the people of the United States. It's up to us to defend our freedom. The patriots will win if we stand together.

I yield back the balance of my time.

YEAR IN REVIEW: FIRST SESSION  
OF 112TH CONGRESS

The SPEAKER pro tempore (Mr. KINZINGER of Illinois). Under the Speaker's announced policy of January 5, 2011, the gentleman from Florida (Mr. WEST) is recognized for 30 minutes.

Mr. WEST. Thank you, Mr. Speaker.

I think it's very important that, as we draw to the close of this first session of the 112th Congress, we come back and we do what I believe is a yearly review or an assessment.

Mr. Speaker, today, the 8th of December, was the target adjournment day that the leadership of the new majority of the United States House of Representatives hoped would mark the end of the first session of the 112th Congress. Yet today we are short of completing some of the most important work that we must accomplish.

As we enter the final days of 2011 and approach the end of this first session of the 112th Congress, I must take the time to offer an apology to the citizens of the 22nd Congressional District of Florida and to all my fellow citizens across this great Nation. It is not because we have not changed the conversation here in Washington, D.C., but because I would have hoped our exertions would have been as a collective body a bit greater. Failure to pass a balanced budget amendment was a great disappointment and an example of a lack of exertion.

When I was elected to the House of Representatives in November 2010, I was one of over 80 new Members that you, the American people, sent to the House of Representatives, entrusting each one of us to come to Capitol Hill and work diligently—and differently than our predecessors—on the critical issues our country was facing during these challenging times. Record high unemployment; a quickly growing debt; out-of-control spending that leads to budget deficits year after year; a spiraling foreclosure rate around the country, and specifically back in our district in south Florida; businesses shutting their doors, due in part to increasing uncertainty provided by the government from crushing regulations issued by Federal agencies in Washington, D.C., and the list goes on.

Friends, neighbors, colleagues, and our fellow citizens all believed our Nation was on the wrong track, and we were concerned for our future. Many of them felt our country's best days were in the past and that our future looked bleak. Each of them wanted our Federal Government to take a different course of action.

Mr. Speaker, I spent the majority of my adult life—22 years—serving in the United States Army, never having been elected to public office. I have dedicated my career to serving our great

Nation. But unlike many of those whom I serve with here in Congress, I am not a career politician. I have led soldiers in combat on foreign battlefields, and was ready to go to our Nation's Capitol and lead from the front on this new battlefield. I understood that where my political experience would fall short, my military training would enable me to serve my constituents well in the Halls of Congress, because in the military we were taught a simple principle, Mr. Speaker, and I think you know it well: We work until the mission is complete. And on election night of 2010, I knew that I was embarking, along with my new colleagues, on one of the most challenging missions that I would ever face.

The leadership of the new majority in the House of Representatives created a calendar for the first session of this Congress, and as a newly elected Member of this body, I provided my assessment, stating that I believed the schedule did not provide the necessary days on Capitol Hill to address the pressing issues our Nation faced. Now, 1 year later, unfortunately, it seems I was correct. On the eve of the holiday season, the United States Congress is dealing with some of its most important issues, all while pressed against the desire to be home and with our families and loved ones.

Mr. Speaker, I, along with you, spent many holidays away from my family and friends while serving our country in the Armed Forces. Every time I was away from home during the holiday season, as well as I'm sure you did, I proudly put on my uniform and did my duty on behalf of the American people. And while I may not wear the uniform of the United States Army any longer, I am proud to put on my new uniform of a suit and tie and spend this holiday away from home, once again putting our country first so that we may finish the job our constituents entrusted us to do.

Now, I don't want people to think that I am not happy about certain things, because I am truly pleased that the regular order has been established here and returned to the House floor. The American people are able to see vibrant debate on the pressing issues and legislation is developed by Members and cleared through committee. We are slowly seeing a move away from megabills. Yet these so-called omnibus bills do a disservice to the American people because, rather than allowing elected representatives to vote "aye" or "nay" on certain provisions, these bills create a bill that includes hundreds of provisions for passage.

During the first session in the month of April, I was able to bring to the House floor H.R. 1246. This bill cut \$35.7 million of wasteful spending in the form of printing and reproduction at the Department of Defense. What was so important about this legislation is

that the vote was 393-0, meaning that we were able to get unanimous support from both Republicans and Democrats.

The American people expect their elected to work together to deal with the issues of our Nation. However, Mr. Speaker, we have witnessed over 900 days without the United States Senate passing a budget. That's 900 days. When the House of Representatives did our job and passed a budget on the 15th of April 2011, Democrats continued to use it as a political weapon since it finally addresses the exorbitant mandatory spending that is bankrupting our country and leaving critical programs like Social Security and Medicare on an unsustainable path.

Americans continue to struggle with 9 percent-plus unemployment for over a year. In south Florida, it is even higher. But instead of debating the 20-plus bills passed by the House, many bipartisan, that address the anemic jobs situation in which we are stuck, these bills languish on Senate Majority Leader HARRY REID's desk while President Obama continues to try to convince the American people that this is a "do-nothing" Congress. It is indeed a "do-nothing" Senate.

One of the most important and constitutionally mandated functions of the Congress is to fund the Federal Government each year before the beginning of the fiscal year on October 1. This year, of the 12 funding bills, the House completed six of those bills and the United States Senate only completed one. Congress did not finish conferring any appropriations bills to be signed by the President by the October 1 deadline. This means that once again we had to pass continuing resolutions to prevent a shutdown of the Federal Government.

I wrote the chairman of the House Committee on Appropriations suggesting that appropriations bills should be considered on a priority-based tiered system. I presented several questions, such as what he believed should be considered priority bills and whether or not certain appropriations bills should cover a 2-year period in order to provide more certainty in the marketplace.

Mr. Speaker, in the military something that continues to fail means that it is broken. And when something is broken, it must be fixed. Our fellow citizens understand that the path we are on is broken and they also understand it is time to fix it. Therefore, we must focus on structural reforms to our legislative and appropriations processes.

Over the course of my first year in office, I have been asked numerous times why we refuse to compromise and why can't we just get something done. Mr. Speaker, I find it very funny that no one talked about compromise in regard to a \$2 trillion health care law or a \$1 trillion stimulus package or

cap-and-trade or Card Check. But my answer is simple: The House of Representatives has tried to work with the Senate and President Obama; yet they refuse to listen to the will of the people. Tabling the cut, cap, and balance piece of legislation during the debt debate is a prime example. Instead, they wish to remain on the same path that has proved to be a failure year after year. They refuse to believe that we need major structural reforms. They did not heed the message of the American people of November of 2010.

□ 1710

And while Washington, D.C. has a budget deficit, the leadership deficit is even more disconcerting. Mr. Speaker, leaders take responsibility; and rarely do they take credit, a simple lesson that was taught to me as a young captain in the United States Army. A strong American leader would not take the misfortunes facing the American people and leverage it for political gain. And the facts speak for themselves.

Since January of 2009, more than 2 million Americans are unemployed, close to 26 million are underemployed. National unemployment has been at or above 9 percent for 28 straight months, at or above 8 percent for 34 straight months. And it is double that in the black community.

Average gas prices have gone from \$1.83 to over \$3.45. The Federal debt has gone from \$10.6 trillion to over \$15 trillion, with 3 straight years of trillion-dollar-plus deficits. And the debt per person, Mr. Speaker, has gone from \$34,000 to \$48,000.

Food stamp recipients are up by 41 percent. Americans in poverty up 16 percent, with an increase of 6.4 million Americans. The Misery Index is up 65 percent, and nearly 48.5 percent of Americans are on some form of government aid.

Home values are down 11 percent, and health insurance premiums are up 23 percent, from \$3,354 to over \$4,000. United States global competitiveness is down from first to fifth in the world.

We currently borrow 42 cents on every dollar, a dollar which soon, thanks to the insidious monetary policies emanating from the Federal Reserve, may not any longer be the default currency of the world.

Yet with these abysmal statistics, all we hear from the big megaphone of the White House is that we need to tax people—particularly certain people—more. We hear about extending a payroll tax holiday, which is nothing but a Band-Aid approach that only provides a very short-term impetus. What no one is telling the American people, especially our seniors, is that the constant use of payroll tax breaks continues to erode the funding of Social Security, which for the first time this year was running at a deficit.

When combined with the unemployment situation, we are speeding up the demise of Social Security in America. At some point, there must be structural tax and unemployment reform; and we must incentivize our job creators.

America is suffering, Mr. Speaker, from crony capitalism in which the government is picking the winners and the losers in the free market, using our hard-earned taxpayer dollars. We have an Obama administration which believes it is the preeminent venture capitalist in our Nation. Episodes such as Solyndra and MF Global should cause us all grave concern.

You see, American exceptionalism is not constrained by class or caste. There are income levels in our country; but sound economic, tax, and regulatory policies enable our citizens to transit those levels because America is about equal opportunity and not equal achievement, where liberal progressives believe that they are the arbiters of fairness.

There is no leadership emanating from the White House. Instead, we have policy by election-cycle sound bites where the purpose is just to get re-elected.

Too many politicians are now focused on manipulative and deceitful rhetoric and not developing visionary, pro-growth economic policies for America. The obvious goal, it seems to me, Mr. Speaker, is to create more victims in America, an America of dependency, not individual independence.

Therefore, our Nation is truly at a crossroads. There is an ever-widening ideological chasm of what we are going to become as a Nation: Shall America continue as a constitutional Republic led by men and women of courage, conviction, and character? Or shall America become a bureaucratic nanny state, ruled by manipulative deceivers seeking their own political gain?

Is America truly that shining city that sits upon a hill, Mr. Speaker, or will that light be forever extinguished? The choice lies before the American people. I hope that they will choose wisely because our children and our grandchildren are watching, as well as our enemies abroad.

But, Mr. Speaker, for America I say this: fear not, for the Guardians of America's Honor shall ensure that the greatest days for this constitutional Republic lie ahead.

Mr. Speaker, I yield back the balance of my time.

#### LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DAVIS of Illinois (at the request of Ms. PELOSI) for today.

Mr. JACKSON of Illinois (at the request of Ms. PELOSI) for today on account of district/constituent matters.

Mr. PASTOR of Arizona (at the request of Ms. PELOSI) for December 12 and until 4 p.m. December 13 on account of official business in the district.

#### SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1958. An act to extend the National Flood Insurance Program until May 31, 2012; to the Committee on Financial Services.

#### SENATE ENROLLED BILLS SIGNED

The Speaker announced his signature to enrolled bills of the Senate of the following titles:

S. 535. An act to authorize the Secretary of the Interior to lease certain lands within Fort Pulaski National Monument, and for other purposes.

S. 683. An act to provide to the conveyance of certain parcels of land to the town of Mantua, Utah.

#### ADJOURNMENT

Mr. WEST. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 15 minutes p.m.), under its previous order, the House adjourned until tomorrow, Friday, December 9, 2011, at 11 a.m.

#### EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XIV, executive communications were taken from the Speaker's table and referred as follows:

4206. A letter from the Acting Administrator, Department of Agriculture, transmitting the Department's final rule — Walnuts Grown in California; Increased Assessment Rate [Doc. No.: AMS-FV-11-0062; FV11-984-1 FR] received November 17, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4207. A letter from the Acting Administrator, Department of Agriculture, transmitting the Department's final rule — Onions Grown in Certain Designated Counties in Idaho, and Malheur County, OR; Modification of Handling Regulations [Doc. No.: AMS-FV-11-0025; FV11-958-1 FR] received November 17, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4208. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Abamectin (avermectin); Pesticide Tolerances [EPA-HQ-OPP-2010-0619; FRL-8890-2] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4209. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Amides, C5-C9, N-[3-(dimethylamino)propyl] and amides, C6-C12, N-[3-(dimethylamino)propyl]; Exemption from the Requirement of a Tolerance [EPA-HQ-OPP-2011-0093; FRL-8890-8] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4210. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Flutriafol; Pesticide Tolerances [EPA-HQ-OPP-2010-0876; FRL-9325-6] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4211. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Methacrylic acid-methyl methacrylate-polyethylene glycol monomethyl ether methacrylate graft copolymer; Tolerance Exemption [EPA-HQ-OPP-2011-0583; FRL-8891-4] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4212. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Methacrylic Polymer; Tolerance Exemption [EPA-HQ-OPP-2011-0333; FRL-8891-1] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4213. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Trifloxystrobin; Pesticide Tolerances [EPA-HQ-OPP-2011-0456; FRL-8890-1] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

4214. A letter from the Deputy to the Chairman for External Affairs, Federal Deposit Insurance Corporation, transmitting the Corporation's final rule — Transfer and Redesignation of Certain Regulations Involving State Savings Association Pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (RIN: 3064-AD82) received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

4215. A letter from the Secretary, Securities and Exchange Commission, transmitting the Commission's final rule — Rescission of Outdated Rules and Forms, and Amendments to Correct References [Release Nos.: 33-9273, 39-65686, 34-2480, IA-3310 and IC-29855] received November 15, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

4216. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Indiana; Miscellaneous Metal and Plastic Parts Surface Coating Rules [EPA-R05-OAR-2010-1001; FRL-9478-4] received October 11, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4217. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Maryland; Adoption of Control Techniques Guidelines for Drum and Pail Coatings [EPA-R03-OAR-2011-0610; FRL-9479-4] received October 11, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4218. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Maryland; Adoption of Control Techniques Guidelines for Plastic Parts and Business Machines Coatings [EPA-R03-OAR-2011-0600; FRL-9479-6] received October 11, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4219. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Transportation Conformity Rule: MOVES Regional Grace Period Extension [EPA-HQ-OAR-2011-0393; FRL-9478-1] (RIN: 2060-AR03) received October 11, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4220. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — OMB Approvals Under the Paperwork Reduction Act; Technical Amendment; Community Right-to-Know Toxic Chemical Release Reporting [FRL 94884] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4221. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Revisions to the California State Implementation Plan, San Joaquin Valley Unified Air Pollution Control District [EPA-R09-OAR-2011-0312; FRL-9485-4] received November 4, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

4222. Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 3

To regulate Commerce with foreign Nations, and among the several States, and within the Indian Tribes.

By Mr. FINCHER:

H.R. 3606.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8.

By Mr. SMITH of Washington:

H.R. 3607.

Congress has the power to enact this legislation pursuant to the following:

Article I Section 8 Clause 3—"To regulate Commerce with foreign Nations, and among the several States, and within the Indian Tribes."

By Mrs. BLACKBURN:

H.R. 3608.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1 of the Constitution of the United States and Article I, Section 8, Clause 18 of the Constitution of the United States.

By Mr. LANKFORD:

H.R. 3609.

Congress has the power to enact this legislation pursuant to the following:

Article 1, Section 9

No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time.

By Mrs. FOX:

H.R. 3610.

Congress has the power to enact this legislation pursuant to the following:

Article I, section 8 of the Constitution of the United States

By Mr. HECK:

H.R. 3611.

Congress has the power to enact this legislation pursuant to the following:

Article I, section 8 of the Constitution of the United States

By Mr. GIBSON:

H.R. 3612.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 18

The Congress shall have Power \* \* \* To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by the Constitution in the Government of the United States, or in any Department or Officer thereof.

By Mr. JOHNSON of Georgia:

H.R. 3613.

Congress has the power to enact this legislation pursuant to the following:

Clause 3 of section 8 of article I of the Constitution, which sets forth the constitutional authority of Congress to regulate interstate commerce.

By Ms. ROYBAL-ALLARD:

H.R. 3614.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 18

By Mr. PEARCE:

H.R. 3615.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1 of the United States Constitution

By Mr. BERG:

H.R. 3616.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 4.

By Ms. CLARKE of New York:

H.R. 3617.

Congress has the power to enact this legislation pursuant to the following:

This bill, the See Something, Say Something Act, is enacted pursuant to the power granted to Congress under Article I of the United States Constitution and its subse-

quent amendments, and further clarified and interpreted by the Supreme Court of the United States.

By Mr. CONYERS:

H.R. 3618.

Congress has the power to enact this legislation pursuant to the following:

Pursuant to Section 5 of the Fourteenth Amendment to the United States Constitution, Congress shall have the power to enact appropriate laws protecting the civil rights of all Americans.

By Mr. ELLISON:

H.R. 3619.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8 of the U.S. Constitution

By Mr. ENGEL:

H.R. 3620.

Congress has the power to enact this legislation pursuant to the following:

The bill is enacted pursuant to the power granted to Congress under the following provisions of the United States Constitution:

Article I, Section 1;

Article I, Section 8, Clause 1;

Article I, Section 8, Clause 3; and

Article I, Section 8, Clause 18.

By Mr. ISRAEL:

H.R. 3621.

Congress has the power to enact this legislation pursuant to the following:

Article 1, Section 8, Clause 1 of the Constitution of the United States.

By Mr. ISRAEL:

H.R. 3622.

Congress has the power to enact this legislation pursuant to the following:

Article 1, Section 8, Clause 1 of the Constitution of the United States. Article 1, Section 8, Clause 18 of the Constitution of the United States.

By Mr. LATTA:

H.R. 3623.

Congress has the power to enact this legislation pursuant to the following:

This bill is enacted pursuant to Article I, Section 8, Clauses 13 and 14 of the United States Constitution.

By Mr. MICHAUD:

H.R. 3624.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8 of the United States Constitution.

By Mr. PALLONE:

H.R. 3625.

Congress has the power to enact this legislation pursuant to the following:

Clause 18 of Section 8 of Article I of the United States Constitution.

By Ms. PINGREE of Maine:

H.R. 3626.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1—The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defense and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States.

By Mr. ROE of Tennessee:

H.R. 3627.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1

Article I, Section 8, Clause 18

By Mr. SCALISE:

H.R. 3628.

Congress has the power to enact this legislation pursuant to the following:

Article I, section 8, clause 1

By Mr. SERRANO:

H.R. 3629.

Congress has the power to enact this legislation pursuant to the following:

Clause 3 of section 8 of article I of the Constitution.

The Congress shall have Power \* \* \* To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes.

In addition, Congress has the power to enact this legislation pursuant to the following:

Clause 18 of section 8 of article I of the Constitution.

The Congress shall have Power \* \* \* To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by the Constitution in the Government of the United States, or in any Department or Officer thereof.

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3538: Mr. COOPER.

## EXTENSIONS OF REMARKS

## RECOGNIZING THE 10TH ANNIVERSARY OF THE BRANDYWINE HEALTH FOUNDATION OF COATESVILLE

## HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 8, 2011

Mr. GERLACH. Mr. Speaker, I rise today to congratulate The Brandywine Health Foundation of Coatesville, Chester County, Pennsylvania, on the occasion of its 10th anniversary.

Over the last ten years, the Brandywine Health Foundation has made over \$10 million in grants and scholarships to improve health and encourage youth development in the greater Coatesville area. Its efforts have resulted in bringing ChesPenn Health Services, the only Federally Qualified Health Center in Chester County, to Coatesville. This helps to provide over 8,000 patient visits to low income County residents. Additionally, the Foundation has assisted in the development of a new Dental Center, Chester County Community Dental, and has partnered with the Chester County Department of Mental Health and Mental Retardation, as well as the Coatesville Area School District, to bring behavioral health services to child guidance research centers.

The Brandywine Health Foundation is also responsible for the construction of the four-story Brandywine Center, which opened in April 2008 and houses the non-profit organizations such as ChesPenn Health Services, Chester County Community Dental, Child Guidance Resource Centers, and Human Services, Inc., as well as offering 24 units of affordable senior housing.

Mr. Speaker, in light of its years of exemplary service to the community and outstanding accomplishments, I ask that my colleagues join me today in recognizing The Brandywine Health Foundation in celebration of its 10 year anniversary.

HONORING THE CAREER OF  
MAYOR RICHARD FREY

## HON. BRIAN HIGGINS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 8, 2011

Mr. HIGGINS. Mr. Speaker, I rise today to honor the career and accomplishments of a distinguished public servant and friend, the Mayor of the City of Dunkirk, New York, the Honorable Richard Frey.

With a long career in the private sector—and distinguished wartime service in Korea, including earning the Purple Heart—before running for Mayor, Dick Frey has unquestionably been a hands-on Mayor for the residents of Dunkirk.

Dick's key focus as Mayor was community revitalization and economic development, and he delivered for his constituents. On each example of progress you see in Dunkirk today—from waterfront development to the Dunkirk Boardwalk Market, from the SUNY Fredonia Incubator to the redevelopment of the vacant Crocker-Sprague building—you see Dick Frey's fingerprints. Through Dick's efforts, underutilized recreational parks and other brownfields throughout the city were turned into clean and development-ready sites.

Never shy about fighting for his city, I first met Dick Frey in 2005, shortly after I took office representing Dunkirk and Chautauqua County as a Member of Congress, and I'll confess to being a little concerned. After all, Dunkirk and Chautauqua had not been represented in Congress by a Democrat in nearly a generation. But after our first meeting, two things were clear: number one, Dick Frey was a man of his word who passionately cares about the constituents he served; number two, Dick Frey cares about people, and not politics.

Dick once said in an interview with the Dunkirk Observer newspaper, "As far as politics go, you can expect to leave politics at the door when dealing with [people's] concerns." That statement embodies my experience with him completely. Though we come from different political sides of the aisle, politics was never an issue between us. We both represented the same people—the hard-working folks in the city of Dunkirk—and we each had a responsibility to deliver for them.

Now as his wife Pat and their large extended family will welcome Dick back to them after loaning him, his time and attention to the city and its residents for the past ten years, we wish them good luck as Dick leaves active civic life for a much deserved respite.

Mr. Speaker, I thank you for allowing me a few moments to commemorate the service of one of the most honorable public servants that I have had the good fortune to know. I am thankful all the more, however, to call Dick Frey my friend, and to wish him Godspeed in all of his future endeavors.

RECOGNIZING CITY OF SAN LUIS  
OBISPO POLICE CHIEF DEBORAH  
E. LINDEN

## HON. LOIS CAPPS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 8, 2011

Mrs. CAPPS. Mr. Speaker, it is with the greatest respect that I rise today to recognize Deborah Linden on the event of her retirement as Police Chief for the City of San Luis Obispo.

Chief Linden is a native Californian, raised in Sunnyvale. She moved to Santa Barbara in 1979 to attend U.C. Santa Barbara, graduating

in 1984 with a Bachelor of Arts degree in sociology. She began her law enforcement career with the Santa Barbara County Sheriff's Department as a Deputy Sheriff at the age of 22.

During her 18 year tenure at the Sheriff's Department, Chief Linden served in a variety of assignments including Patrol Deputy, Narcotics Detective, Major Crimes Detective, Patrol Sergeant, Major Crimes Sergeant, Lieutenant, and Commander.

She was hired by the City of San Luis Obispo as Chief of Police on January 1, 2003.

Chief Linden holds a Master of Arts degree in Leadership from St. Mary's College in Moraga and she is a P.O.S.T. Command College graduate. In 2004, she was honored with a three-year gubernatorial appointment to the California Commission on Peace Officer Standards and Training and she was reappointed to subsequent terms in 2007 and 2010. Chief Linden serves on the Board of the California Police Chiefs Association and is a lifetime member of the California Narcotic Officers Association. Chief Linden is also dedicated to future members of law enforcement, as she has been a criminal justice instructor for Santa Barbara City College, an academy instructor for Allan Hancock Law Enforcement Academy, and an instructor of Public Policy for St. Mary's College Graduate Leadership Program.

Chief Linden also takes an active role in our local community in addition to her commitments as Police Chief. She is involved with many community and non-profit groups, including serving on the boards of the Anti-Defamation League, Transitions Mental Health Association, and the Monday Rotary Club in San Luis Obispo. She is the law enforcement representative on the San Luis Obispo County Homeless Services Oversight Council.

Mr. Speaker, I ask that my colleagues join me in honoring Deborah Linden, for her leadership, dedication, and outstanding service to our community and the San Luis Obispo Police Department.

## IN HONOR OF SCOTT KENNEDY

## HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 8, 2011

Mr. FARR. Mr. Speaker, I rise today to honor the life of a good friend and great leader who passed away unexpectedly on November 19, 2011. His energy, intelligence, and dedication served the City of Santa Cruz since 1976, when he co-founded the Resource Center for Nonviolence. In 1991, Scott began his political career, serving on the Santa Cruz City Council from 1991 to 1998 and again from 2001–2003. He also served as the mayor of Santa Cruz in 1994 and 2004. Throughout his life, Scott demonstrated a strong commitment

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

to his community and he will be dearly missed. I am proud to honor my friend and his service to the City of Santa Cruz and to the rest of the world.

Scott was born in Nebraska on December 9, 1948, and grew up in San Jose, California. He began his advocacy for international peace while attending the University of California at Santa Cruz when as a freshman he first traveled to the Israel-Palestine region. Middle Eastern issues were at the forefront of Scott's advocacy and he led some 25 delegations to the Middle East with increasing success over three decades of involvement. Since the mid-1970s Scott attempted to amplify the voices of Israelis and Palestinians who are committed to participating in a nonviolent struggle for lasting peace. Scott's tenacity and passion provided the foundation from which the Resource Center for Nonviolence has continued to prosper to this day. His later heavy involvement with the Washington, D.C.-based group Interfaith Peace Builders only adds to his great strides toward world peace. His lifetime of humanitarian service was honored in 2010 when he received the Pfeffer Peace Prize.

The Loma Prieta earthquake in 1989 was a jumping off point for Scott's local political career. Several affordable housing activists, afraid the disaster would result in a lack of affordable housing, recruited Scott to be their voice and run for city council. During his time in elected office, he worked to construct low-income housing, build a community soccer field, pass a resolution against the first Iraq war and permanently preserve several greenbelt properties on the city's perimeter. His intelligence and passion challenged and taught those who served alongside him to do their very best for Santa Cruz.

Throughout all of these great achievements, Scott had the stalwart support of his loving family. He is survived by his wife and soulmate, Kristin (Kris), his two sons, Peter and Benjamin and his daughter Megan, who served in this Chamber as a Congressional House Page. His entire family actively supported his work by door-to-door canvassing and later travelling to Israel and Palestine. Scott described his family, and his wife Kris in particular, as his bedrock. The support she gave him made possible his lifelong humanitarian and political success.

Mr. Speaker, on behalf of the House of Representatives, I would like to extend our Nation's deepest condolences to Scott Kennedy's family for their loss. I would like to honor his great struggle for peace and his service to the City of Santa Cruz. He was a treasured Mayor, father, and husband and he will be greatly missed.

#### RECOGNIZING THE COLONIAL HIGH SCHOOL CHAMBER CHOIR

#### HON. DANIEL WEBSTER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. WEBSTER. Mr. Speaker, it is my pleasure to recognize the Colonial High School Chamber Choir during their visit to Washington, DC. Founded in 1959, Colonial High

School is located in Orlando and is committed to educating its students in a learning environment based on excellence in academic performance, enabling students to become productive and responsible citizens.

The Chamber Choir is made up of 26 audition-selected students from the 150-student Colonial High School Chorus. Their talent is most recently marked by an invitation to perform at the White House on Friday, December 9, 2011. The parents and educators of these students should be very proud of the dedication and discipline required to get to this level.

On behalf of the citizens of Florida's 8th Congressional District, I am pleased to recognize the Colonial High School Chamber Choir and congratulate the students for their hard work and accomplishment.

#### A TRIBUTE TO REV. BYRON LEAVANCE BENTON

#### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. TOWNS. Mr. Speaker, I rise today to honor the Rev. Byron LeaVance Benton for his pastoral and community service that has benefited the youth and religious community of Brooklyn.

Rev. Benton, a native of Greensboro, North Carolina, is a graduate of North Carolina Agricultural and Technical State University where he majored in Business Education with a concentration in Administrative Systems. He earned his Master's of Divinity degree from Princeton Theological Seminary, focusing his studies on homiletics and pastoral care. He is currently pursuing a Doctorate of Arts in Marriage and Family Therapy at Eastern University in Philadelphia, Pennsylvania.

At A&T, he sat on the board of several programs that reached out to troubled youth in the Greensboro area, and he served as the percussion section leader and chaplain of the A&T University Band: The Marching Machine.

While at Princeton, Rev. Benton served as a chaplain for both the Trenton Psychiatric Hospital in Trenton, New Jersey and the Association of Black Seminarians at Princeton Theological Seminary. He was awarded the Aaron E. Gast Award in Urban Ministry, the Jagow Award in Homiletics and Speech, and the Ray Lindquist Award in Pastoral Care.

Rev. Benton started a community drumline in Brooklyn, New York through the Berean Community and Family Life Center. The drumline's vision is to encourage positive, holistic health in youth by providing physical activity that combats obesity, prevents disease, and encourages an overall healthy lifestyle, while simultaneously creating self-discipline and encouraging community service. Their performances include: museums, numerous church and youth ministry events, and as accompaniment for the Jamal Jackson Dance Company. They were also featured in the 2011 Black History Calendar by Aetna Healthcare. They placed second in both the 2011 Hot 97 Battle in the Apple and Battle of the Drumlines.

Rev. Benton currently serves as the Associated Pastor of the Berean Baptist Church in

Brooklyn, New York under the mentorship of the Senior Pastor, Rev. Dr. Arlee Griffin, Jr. He also sits on the board of directors for the Berean Community and Family Life Center.

Rev. Benton has traveled extensively throughout the world, partnering with the National Baptist Convention in Liberia, Africa.

Mr. Speaker, I would like to recognize Rev. Byron Benton for his exceptional dedication to the youth of Brooklyn and his years of pastoral service.

#### IN RECOGNITION OF RICHARD J. LEONARDINI

#### HON. JOHN GARAMENDI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. GARAMENDI. Mr. Speaker, I rise today in honor of Captain Richard J. Leonardini, who is retiring after more than 31 years of law enforcement service, with 22 years of that service to the City of Fairfield. As his colleagues, friends and family gather together to celebrate the next chapter of his life, I ask all of my colleagues to join me in saluting this outstanding public servant and defender of peace and safety.

Richard started his law enforcement career as a Deputy Sheriff, serving three years for the El Dorado County Sheriff's office and over five years with the San Joaquin County Sheriff's office. On March 6, 1989, he was hired as a Police Officer with the Fairfield Police Department. As an officer, Richard worked in various capacities that included Patrol, Investigations, Street Crime Apprehension (SCAT) and Field Training. He joined the Crisis Negotiations Team in 1991, the Special Activity Felony Enforcement (SAFE) Team in 1992 and was promoted to Police Sergeant on July 30, 1999.

As a Police Sergeant, Richard served in Patrol and then Personnel and Training before being promoted to Police Lieutenant on December 14, 2001 and serving as the Commander of the Special Operations Division. He was a thoughtful and capable manager which led him to receiving the Manager of the Year award in 2002. On March 19, 2004 he was promoted to Police Captain and served in Administration, Support Services, and Field Operations.

Richard has been a valued employee and his commitment to the community was evidenced on a daily basis. He was a loyal representative of the law enforcement community and admired for his hard work, dedication, and positive work ethic.

Mr. Speaker, I am truly honored to pay tribute to this dedicated public servant. I ask all of my colleagues to join with me in wishing Richard J. Leonardini continued success and happiness in all of his future endeavors.

HONORING THE NATIVE AMERICAN  
CODE TALKERS**HON. JARED POLIS**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. POLIS. Mr. Speaker, I rise today to honor the Native American Code Talkers for their selfless contributions to America's defense during World Wars I and II. During these times of worldwide turmoil, hundreds of American Indians joined the United States' Armed Forces with the goal of protecting freedom and human rights around the world.

The Code Talkers, as these brave soldiers became known, used their ancient tribal languages to develop a military communications code that no enemy was ever able to crack. American Indians served bravely in both World Wars, though the most well-known code group, the Navajo Code Talkers, was not formed by the Marine Corps until the 1940s.

The Navajo Code Talkers came up with a code that enabled them to send and receive messages that were unintelligible to eavesdroppers. The Navajo language had no alphabet, and only an extraordinarily few individuals outside of the Navajo community were fluent in it, making it the ideal foundation for updating the U.S. military's slow-to-decipher and easily broken codes. Over 400 Navajo Code talkers served bravely in World War II, and their code was considered so secretive that they were prohibited from writing it down. It was not until the declassification of the code in 1968 that Americans were truly able to appreciate the contributions of the Code Talkers.

Mr. Speaker, it is fitting that as we remember the brave Americans whose lives were lost at Pearl Harbor 70 years ago this week, we also honor all of America's veterans who have committed their time and risked their lives to protect our nation. It is with great honor and respect that I offer my appreciation to the Code Talkers for exemplifying the spirit and commitment of public service and duty to country. Indeed, both their code and their commitment to America remain unbreakable, and to this day we remain in awe of their achievements.

IN RECOGNITION OF THE 20TH AN-  
NIVERSARY OF THE CAPITOL  
CORRIDOR**HON. DORIS O. MATSUI**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. MATSUI. Mr. Speaker, I rise today in recognition of the 20th anniversary of the Capitol Corridor train service, which connects the Sacramento Region to the San Francisco Bay Area. It is a great pleasure to recognize the corridor's stellar track record of providing cost-effective, public transportation that stimulates economic development, reduces emissions, and promotes partnerships among passengers, private investors, and the communities. As the Capitol Corridors' supporters and partners gather to celebrate this milestone, I

ask all my colleagues to join me in honoring the essential role that the Capitol Corridor plays in Northern California.

Since its inception on December 12, 1991, with a mere six trains between Sacramento and San Jose, the Capitol Corridor has significantly grown and invested in infrastructure, increasing the number of weekday trains to thirty-two, weekend trains to twenty-two and expanding its corridor to span seven counties with a total population of 6.7 million. In addition to investing in railcars and tracks, it has established signaling systems and sixteen stations that directly connect its passengers to the Bay Area Rapid Transit (BART) system, Santa Clara Valley Transportation Authority buses, and Sacramento Regional Transit light rails.

Over the past twenty years, the Capital Corridor has experienced a 600 percent increase in ridership, up to 1.7 million passengers in the 2010–2011 fiscal year. In all, it has carried nearly 19 million people to travel 1.3 billion miles. With this popular intercity train service, the downtown Sacramento Valley Station is now the seventh busiest Amtrak station in the country.

The Capitol Corridor has been managed by the Capitol Corridor Joint Powers Authority (CCJPA) since 1998. Previously, the Capitol Corridor was a partnership between Amtrak and Caltrans. The CCJPA consists of a partnership of six transit agencies from the counties serviced by the Capitol Corridor. Operating funds for the CCJPA are provided by Caltrans. Administrative costs are kept down because of the strong partnership between Amtrak, BART, Caltrain, Caltrans, CCJPA and Union Pacific Railroad. In the past twenty years, the Capitol Corridor has stayed major accident-free and also improved lives by reducing air pollutants and greenhouse gas emissions.

Mr. Speaker, I am honored to pay tribute to the Capital Corridor, and its record of giving Northern Californians more transportation options, on their 20th anniversary. I ask my colleagues to join me in honoring the Capitol Corridor's outstanding work in providing the community with much needed services.

ANNOUNCING RECIPIENTS OF THE  
INAUGURAL CONGRESSIONAL  
VETERAN COMMENDATION FOR  
THE THIRD DISTRICT OF TEXAS**HON. SAM JOHNSON**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. SAM JOHNSON of Texas. Mr. Speaker, it is a privilege to announce before my colleagues in the United States House of Representatives the names of eleven distinguished military veterans and community servants who call the Third District of Texas home. For their selfless service and dedication to their neighbors and nation, the following individuals have been selected as recipients of the inaugural Congressional Veteran Commendation:

Thomas C. Garner joined the United States Army on March 5, 1943, eager to serve his

nation during World War II. Originally assigned to the revered 78th Infantry Division, Garner soon applied and was selected for Army Air Corps pilot training. He served nearly a year abroad with the Air Corps, running an oxygen generating plant on Guam in support of the B-29 bombers that raided Japan.

Six months after the war's end, Garner decided to make military service his career and reentered what was now the United States Air Force. Garner's troop carrier organization serviced all the embassies in Central and South America and the Caribbean and, from 1948–1949, participated in the Berlin Air Lift. Over the course of his career, Garner also deployed to Japan, Wake Island, Bermuda, Bangkok, and Thailand.

Garner retired in 1970 after 27 years of active duty service. He then became a civil servant, kicking off a second, 20-year career with the Social Security Administration. During those years, Garner also served with the Texas State Guard, receiving numerous awards and citations and achieving the rank of Colonel.

An active community servant with the Plano VFW and Air Force Sergeant's Association, Garner continues to put others first.

For these reasons, it is my pleasure to name Thomas Garner a recipient of the inaugural Congressional Veteran Commendation for the Third District of Texas.

## PERSONAL EXPLANATION

**HON. LYNN C. WOOLSEY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. WOOLSEY. Mr. Speaker, on December 7, 2011, I was unavoidably detained and was unable to record my vote for Rollcall No. 898. Had I been present I would have voted:

Rollcall No. 898: "Yes"—Jackson Lee of Texas Part B Amendment No. 6.

## A TRIBUTE TO NIKITA DAVIS

**HON. EDOLPHUS TOWNS**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Ms. Nikita Davis for her passion for teaching and serving as a mentor to the youth in her community.

Ms. Davis was influenced at a young age by her peers and teachers to serve as a role model for young adults in New York City. When she attended Mary Louis Academy for girls in Jamaica Estates, New York, her mathematics teacher made such a great impression on her that it has transcended into her current work. At the time Ms. Davis gained an affinity for working with adolescents and other students, tutoring and teaching them alongside her teachers.

When Ms. Davis enrolled in Mount St. Mary College and began studying mathematics and secondary education, she continued her work with teens in the community. Upon completion

of her undergraduate studies, Ms. Davis was offered a teaching position in the Mathematics Department of the NYC Department of Education. She has served in this capacity for the past eight years and truly loves the difference she can make among the youth.

Ms. Davis reminds herself of how her grassroots involvement with her peers at a young age propelled her to this current post. To this day Ms. Davis still works with students after school for personal tutoring, and is a member of the United Federation of Teachers Delegate Assembly where she serves as a union delegate for her colleagues.

A quote that offers a unique perspective into the drive Ms. Davis has for her profession is by Sasha Azevedo. "When you love people and have the desire to make a profound, positive impact upon the world, then you will have accomplished the meaning to live." For Ms. Davis this is the essence of her mission as an educator.

Ms. Davis lives in Brooklyn, NY, and is married to her wonderful husband Derrick and has two daughters, Anaiya and Laila.

Mr. Speaker, I urge my colleagues to join me in recognizing the profound accomplishments of Ms. Nikita Davis to continue the fight of educating our youth.

#### THE REOPENING AMERICAN CAPITAL MARKETS TO EMERGING GROWTH COMPANIES ACT OF 2011

##### HON. STEPHEN LEE FINCHER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 8, 2011

Mr. FINCHER. Mr. Speaker, unemployed Americans are crying out for more jobs and urging Congress to review rules and regulations that stifle innovation, economic growth, and job creation. I am introducing the Reopening American Capital Markets to Emerging Growth Companies Act of 2011 for one reason: to increase job creation on Main Street. Burdensome costs are discouraging companies from going public, which deprives firms of the capital needed to expand their businesses and hire more American workers.

During the last fifteen years, fewer and fewer start-up companies have pursued Initial Public Offerings (IPOs) to access the capital needed to expand their businesses, develop innovative products, and hire new employees. The number of IPOs in the United States is slipping behind the rest of the world in terms of growing our markets. Other markets are growing or holding steady, while the United States continues to decline. This is especially true in the Asian markets, which have seen an explosion of new public companies in recent years.

Since 2010, the Asian markets have had nearly 700 new IPOs compared to less than 300 in the United States during the same time-frame. Unfortunately, federal regulatory burdens are a major contributing factor in the steep drop of IPOs in the United States.

This decline is of concern because going public provides opportunities for companies to raise badly needed capital in order to expand, reinvest, and create jobs. From 2008–2010,

21 percent of the United States GDP was generated by venture capital-backed start-up companies. In addition, an August 2011 survey of CEOs conducted by the IPO Task Force found that over 90 percent of job growth occurs after a company goes public.

Unfortunately, a series of "one-size-fits-all" laws and regulations have changed the nature of the United States' capital markets and had a disproportionate cost on smaller American public companies. Washington's regulatory oversteps have harmed American workers by eliminating jobs that are created when a start-up company decides to go public. Instead, to avoid costly regulatory requirements, many companies decide to merge with others, which usually results in job cuts.

To help solve this problem, my bill would create a new category of issuers, called "Emerging Growth Companies" that have less than \$1 billion in annual revenues when they register with the SEC and less than \$700 million in public float after the IPO. These companies will have as many as five years to transition to full compliance with a variety of federal regulations that are expensive and burdensome to new companies. This "on-ramp" status will allow small and midsize companies the opportunity to save on expensive compliance costs and create cash needed to successfully grow their businesses and create new American jobs.

I am proud to have Mr. CARNEY from Delaware and 26 additional co-sponsors from both sides of the aisle join me in introducing this bill today. With unemployment holding steady just under 9 percent, this bill would help bring investments back to the United States and help our best job creators put Americans back to work.

#### IN RECOGNITION OF DR. MARVIN ANDREW McMICKLE

##### HON. MARCIA L. FUDGE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 8, 2011

Ms. FUDGE. Mr. Speaker, on behalf of the citizens of the Eleventh Congressional District of Ohio, I rise today to recognize a religious leader, constituent, and friend in my District. At the beginning of January 2012, Reverend Dr. Marvin Andrew McMickle will assume his new full-time role of President at Colgate Rochester Crozer Divinity School. For the past 24 years, Dr. McMickle has been the Pastor of Antioch Baptist Church, leading his flock and many others to join him in the fight for social, racial, and economic justice. Dr. McMickle's travels to Israel, Greece, Austria, Senegal and the West Indies are testaments of this effort to uphold his teachings of justice. His leadership in Northeast Ohio is unmatched. He served on numerous boards and led organizations, including President of the Cleveland NAACP between 1989 and 1992.

Dr. McMickle's many accomplishments can be attributed to his educational credentials. Over the years, Dr. McMickle has obtained several post-secondary degrees, two of which are Doctorates from Princeton Theological Seminary and Case Western Reserve Univer-

sity. He used his many years of education to perpetuate the transfer of biblical knowledge and insight to instruct a Homiletics course at Ashland Theological Seminary in Ohio. In addition to academic leadership, Dr. McMickle has written numerous books, articles and sermons to serve as tools and guidelines for others to develop their ministries.

Congratulations to Colgate Rochester Crozer Divinity School for selecting such an exceptional man, husband, father and leader as their new President. Dr. McMickle will be deeply missed in my district, but I know his work at Colgate will continue to change the world.

#### IN HONOR OF THE LEMAY FIRE DISTRICT

##### HON. RUSS CARNAHAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 8, 2011

Mr. CARNAHAN. Mr. Speaker, I rise today to recognize the Lemay Fire District, which will be celebrating its 100th Anniversary in 2012.

The history of Lemay Fire District can be traced back as early as 1902. Due to unrestricted building, no fire protection, and bad roads, some insurance companies refused to write insurance in the Lemay area. So, after several disastrous fires, the Luxemburg Improvement Association organized a volunteer fire department in 1902. The Longwood Volunteer Fire Department Fire Association was organized two years later to provide protection to the south side of Lemay.

There still remained an area between the two that had no fire protection, so a group of citizens organized the Bismark Heights Volunteer Fire Department. The department added equipment through the years but had experienced difficulty keeping track and caring for the equipment. So in July 1911, the Bismark Heights Volunteer Department incorporated so it could have recourse to law to protect the equipment. This incorporation would eventually lead to the Lemay Fire Protection District.

In 1917 the Bismark Heights Volunteer Department changed its name to Dewey Heights Volunteer Fire Department, the change being recorded in 1922. A fire house was built in the summer of 1919 at the corner of Orient and Erskine Avenue.

On December 6, 1920 the Longwood and Luxemburg Volunteer Fire departments were invited to consolidate with Dewey Heights as one organization. By 1921, both departments turned their equipment and assets over to Dewey Heights.

In 1933, a tag system was introduced to pay for the protection which consisted of 1500 people. Later that year, full time firefighters were added, giving 24 hour service.

In May 1942, the voters in the Lemay area approved a tax-supported fire district. The Dewey Heights Fire Department was officially named the Lemay Fire Protection District. The district operated out of the fire station located at Erskine and Orient Avenue until 1992.

In 1979, the fire district added another service to help the community; it hired paramedics and established an ambulance service. The

fire district not only responded to fires, but began treating and transporting sick and injured people to the hospital.

In 1991, land was purchased, and a new firehouse was built at 1201 Telegraph Road in central Lemay. The firehouse opened in 1992 and is still being used today.

The great flood of 1993 impacted the Lemay area and the Lemay Fire District responded to help its citizens once again. The north part of Lemay has been flooded causing propane tanks to become loose and creating an exposing hazard. With the help of many fire agencies, the disaster was prevented and lives were saved.

The Lemay Fire Protection District continues to serve the citizens of Lemay with twenty four firefighters. While many things have changed over the last 100 years, the one constant that has remained the same has been the unwavering commitment to the community.

#### HONORING ERIC MASSARI

### HON. CHRISTOPHER S. MURPHY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. MURPHY of Connecticut. Mr. Speaker, I rise today to honor the dedication and service of Mr. Ericolino "Eric" Massari of Waterbury, Connecticut, one of our nation's distinguished heroes.

Mr. Massari served in the 5307th Composite Unit (Provisional), also known as "Merrill's Marauders," a group that operated in Southeast Asia during World War II. This elite and all-volunteer unit successfully conducted numerous daring missions behind Japanese lines.

Throughout their service, these volunteers suffered from a multitude of illnesses and diseases, extreme malnutrition and countless encounters in which they were both outgunned and outnumbered. By the end of the war, the Marauders had advanced approximately 750 miles through one of the harshest jungles in the world. Of the 2,750 men to cross enemy lines, only two were left alive who had not been hospitalized. Mr. Massari was one of these two men, and explains that he "had the good lord on [his] shoulders at all times."

The Marauders have received widespread and deserved recognition for their heroic acts. There have been books, movies, and comic books depicting their brave encounters.

Waterbury is lucky to have such a hero living in Town Plot. Each soldier has been awarded the Bronze Star, and the unit has been awarded a Distinguished Unit Citation. However, one of the most meaningful recognitions for Mr. Massari came in the form of a postcard that he received last month. It was a thank you card from a group of Chinese students, who had recently learned about the Marauders in school. They wanted to express their appreciation for being rescued from the Japanese by Massari's unit some 67 years ago.

Mr. Speaker, Ericolino Massari represents the kind of courage, honor, and character that all of us should admire. As a distinguished veteran and a former employee at the Waterbury Tool Company, Mr. Massari has spent

his life serving our country and the great state of Connecticut. I ask my colleagues and the entire country to join me in honoring the service of Ericolino Massari, and all of our veterans.

#### A TRIBUTE TO LAVERNE NIMMONS

### HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. TOWNS. Mr. Speaker, I rise today in recognition of Laverne Nimmons for her service towards educating the youth of Brooklyn and her high expectations for her community.

Dr. Nimmons was born in South Carolina and migrated to Brownsville, Brooklyn in 1960 where her mother would instill in her a lifelong passion for teaching. Dr. Nimmons' mother was a teacher at PS 137K and eagerly and ambitiously pushed her daughter towards studying public education. Dr. Nimmons attended Queens College after the passing of her mother and would receive her Bachelors and Masters degree in Education. She continued her educational pursuits, receiving her Professional Degree in Administration and Supervision from St. John's University, and a Ph.D. in Educational Leadership from Fordham University.

In 2003, Dr. Nimmons began an eight year career as Principal of Granville T. Woods Public School 335, which serves the predominantly African American, Crown Heights and Bedford Stuyvesant Brooklyn neighborhoods. In this time Dr. Nimmons increased the passing rates in both mathematics and English courses by 67% and 61% respectively. With the guide of Dr. Nimmons P.S. 335 made the transformation, showing most gains of any other 4th grade students in New York State in mathematics and English. This earned the school the distinction of a National Blue Ribbon Award.

Prior to becoming Principal at Granville T. Woods School, Dr. Nimmons was the director of curriculum and instruction for Community School District Sixteen. In this capacity she directed elementary and middle school Principals and teachers in professional development activities in all curriculum areas. The district that was once one of the lowest performing in the city, now boasts better gains than many other New York City school districts in similar socioeconomic communities.

Dr. Nimmons has been awarded many prestigious awards for her dedicated service: the Terrell Bell Award for Excellence in Leadership, Educator of the Year Award in 2009 and 2011 from Education Update Magazine, and the 2010 Outstanding Educator of the Year from the Association of Black Educators in New York. Dr. Nimmons is currently a member of the Cahn Fellows Program for Distinguished Public School Principals at Teachers College, Columbia University.

Dr. Nimmons' leadership, compassion and knowledge make her an example to all in our community. Mr. Speaker, I urge my colleagues to join me in recognizing the vast achievements of Dr. Laverne Nimmons.

THE 20TH ANNIVERSARY OF INDEPENDENCE FOR THE REPUBLIC OF AZERBAIJAN

### HON. KATHLEEN C. HOCHUL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. HOCHUL. Mr. Speaker, even though we are approaching the conclusion of the wars in Iraq and Afghanistan, we still live in a dangerous world. But if we look back over the past two decades we can see that considerable progress has been made.

In 1991 the Soviet Union disintegrated, according to our late, great Senator Daniel Patrick Moynihan, a victim of ethnic tensions among the various and diverse republics that made up the USSR. Two decades later, much change has taken place in the former Soviet Union. Independent democracies have begun to emerge where once there were just brutal dictatorships. The Cold War is now over and we no longer have the same types of demands on our defense infrastructure prevalent of that era.

There is one former Soviet Republic that I would like to single out today and congratulate on the 20th anniversary of its independence, the Republic of Azerbaijan. Azerbaijan has been a good friend of the United States, co-operating with us on the war on terror and the program to prevent former Soviet nuclear weapons from falling into the wrong hands. Azerbaijan has also provided important logistical support to our forces in Afghanistan and sent over 150 soldiers to assist us in our efforts in that country.

As a secular Shiite Muslim country, Azerbaijan has been a role model. Before Azerbaijan was incorporated into the Soviet Union in 1918, after the Russian Revolution, the country enjoyed a brief period of independence, and was the very first Muslim country to grant women the right to vote in 1918, two years before the United States did so with the ratification of the 19th Amendment.

Azerbaijan has also enjoyed strong relations with Israel and the over 12,000 Azeri Jews are treated as full members of that society. Unlike most Muslim countries, Azerbaijan has full diplomatic relations with Israel and has hosted Israeli President Shimon Peres on a state visit in 2009. Israel is also Azerbaijan's 5th largest trading partner, and Azerbaijan provides over one-sixth of Israel's oil supply. As a result of these strong relations, when almost 600 Israeli citizens were stranded in Georgia at the beginning of the Russian invasion of that country and the Tbilisi Airport closed, Azerbaijan sent buses to the Georgian border to help evacuate the Israelis.

Mr. Speaker, today I would like to concur with President Obama's statement on October 20, 2011 that "This 20th anniversary of independence, and Azerbaijan's achievements during this time, demonstrate the extraordinary promise and determination of the Azeri people. The United States is committed to developing greater opportunities to work with the Government and people of Azerbaijan."

TRIBUTE TO BEN MCKINNON,  
"GODFATHER OF BIRMINGHAM  
RADIO"

**HON. JO BONNER**

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. BONNER. Mr. Speaker, I rise to pay tribute to one of Alabama's radio pioneers, Mr. Ben McKinnon, who recently passed away at the age of 89. An influential force in broadcasting throughout the Southeast, Ben was perhaps best known as the "Godfather" of Birmingham radio.

Born in Maxton, North Carolina, Ben graduated from the University of North Carolina with an AB in Journalism. As the nation became involved in the Second World War, Ben answered his country's call to duty by serving as a line officer in the U.S. Navy. Seeing action in both the Atlantic and Pacific theatres, Ben led one of the major assault waves on Yellow Beach in Okinawa.

Upon returning home from the war, Ben traded his service pistol for a typewriter as editor of three weekly newspapers in his home county. But it wasn't long before his gaze turned toward the growing broadcast industry. He soon joined the staff of legendary Charlotte radio station WBT as local sales manager. Three years later he was hired as general manager of television station WGVL in Greenville, SC. His skills as a manager quickly brought him down to Alabama where he took the reins of Birmingham radio station WSGN. From that point on, he would call Alabama's largest city his home.

As vice president and general manager and later president of WSGN, Ben transformed the radio station into a dominant player in Birmingham and north Alabama broadcasting. Under his leadership, WSGN—known as "The Big 610"—thundered across the airwaves with the Magic City's first full-time "top 40" format. For those who listened to radio in the 50s and 60s, rock 'n roll was king. Under Ben's direction, WSGN proudly wore the crown in Birmingham radio and earned a spot as one of the nation's top rock 'n roll stations.

Upon his retirement after 28 years with WSGN, Ben remained a strong voice in the state's communications industry. As executive director of the Alabama Broadcasters Association, he was a frequent visitor to Washington, DC to advocate on behalf of our local radio and television stations. He led the ABA for 18 years before retiring a second time.

Mr. Speaker, Ben's awards and accomplishments are, frankly, too extensive to list here. He was active in numerous major Birmingham area community service organizations for decades, ranging from board member of the Jefferson County March of Dimes and the Birmingham Chapter of the American Red Cross, to president of the Jefferson County Chapter of the American Cancer Society—to name but a few.

His remarkable career and many contributions to society are further highlighted by an impressive array of recognitions including the Thad Holt Distinguished Broadcaster Award from the University of Alabama School of Communications, the Silver Plate Award from

the South Carolina Association of Broadcasters, the Broadcaster of the Year Award from the Alabama Broadcasters Association, and the National Association of Broadcasters State Executive of the Year Award.

On behalf of the people of Alabama, I wish to offer condolences to Ben's daughters, Sharon Bruns, Ellen McKinnon and Lisa McKinnon; and grandchildren and many friends. You are each in our thoughts and prayers. Ben was well loved and will be sorely missed.

IN RECOGNITION OF THE CAREER  
AND ACHIEVEMENTS OF THE  
HONORABLE NETTIE  
MAYERSOHN

**HON. GARY L. ACKERMAN**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. ACKERMAN. Mr. Speaker, I rise today in recognition of the exceptional achievements and outstanding career of New York State Assemblywoman Nettie Mayersohn. Nettie was the political midwife to a generation of young politicians in New York. She spent decades working tirelessly for the people of Queens, and I know I speak for many when I say that her recent retirement from the Assembly has truly marked the end of an era. Nettie is being honored this week for her innumerable accomplishments over many years by the Stevenson Regular Democratic Club at its annual dinner, and I would like to join in recognizing the profound impact that my very dear and long-time friend, Nettie Mayersohn, has had on our community.

Nettie Mayersohn's steadfast dedication to Queens County began long before she was elected to the Assembly. For over 20 years, she served as a community activist, making a name for herself as an unrelenting advocate for children and families in Queens. She was a member of Community Board 8 for ten years, at one time serving as the Chairperson of its Youth Committee; she served as the Chairperson of the Pomonok Community Center; and she continues to serve as a Democratic District Leader, a role she has filled for some three decades. Nettie also served as the Executive Secretary of the New York State Crime Victims Board. In 1977, Nettie was New York State's delegate to the International Women's Conference and the recipient of the Builders of Brotherhood Award from the National Conference of Christians and Jews. She received a B.A. from Queens College in 1978, and was elected four years later to represent the 27th District in the New York State Assembly.

As an Assemblywoman, Nettie led the charge to improve healthcare for New Yorkers and defend the rights of victims of violent crime. Nettie's proudest and best-known achievement was the 1996 passage of her Baby AIDS bill, which requires doctors in New York State to tell a mother if her newborn child is HIV-positive. While the fight to enact this bill was, at times, a lonely battle, Nettie's tenacity and fortitude resulted in a landmark law that has saved an untold number of lives and led to an increase in the number of pregnant

women who receive prenatal care. Among Nettie's numerous other legislative accomplishments are her HIV Rape Law, which requires a court to comply with a rape victim's request to test the accused for HIV; her Partner Notification Law, which requires the names of those testing positive for HIV to be reported to the Department of Health for the purpose of contact tracing and partner notification; her Victim Impact Law, which allows the victims of a crime to describe, in court, the effect the crime has had on their lives; and her Food Service Law, which implemented crucial health safety measures for food service workers.

Nettie Mayersohn's unwavering commitment to AIDS policy inspired the Beyond AIDS Foundation to create the Nettie Award—an annual honor that recognizes outstanding efforts to promote HIV prevention and control in the United States and across the world. Nettie herself was given a special Nettie Award from Beyond AIDS in 2002, in recognition of her leadership on HIV/AIDS issues. That year, she also received the Public Service Award from the National Alliance for the Mentally Ill.

After 28 years of tireless service, Nettie retired from the Assembly at the beginning of April 2011 so she can spend time more with her wonderful family. While I lament Nettie's retirement from an impressive career as a public servant, she will remain my lifelong friend. We are all beyond grateful for everything she has done to help New Yorkers. I wish her all the best in her retirement—she will be sorely missed in public life.

Mr. Speaker, Nettie Mayersohn is a one-of-a-kind leader and I ask my colleagues to join me in recognizing her accomplishments and thanking Nettie for a lifetime of dedication to her community.

HONORING THE 10TH ANNIVERSARY OF THE EAST ALDINE  
MANAGEMENT DISTRICT

**HON. GENE GREEN**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. GENE GREEN of Texas. Mr. Speaker, I rise today to recognize the tenth anniversary of the East Aldine Management District for their commitment to improving the safety and development in East Aldine.

The District was created in June of 2001 with the purpose to improve the physical, social, and economic well-being of the community. Their goal is to attract public and private investments and promote the area as a leading place to not only invest but also to work and live. Since then the District has gained the power to finance public safety and transportation projects as well as assist with environmental and economic development.

District funding has improved the community's street conditions by adding pedestrian crosswalks, signage to the streets and landscaping, making the area more attractive to families and businesses. In the year 2010 alone, the District funded over \$240,000 in community projects.

The District's economic development program provides across-the-board marketing and

public relations activities for the District to support business retention and encourage new business within the District as well as expansion of small businesses. The development program is successful due to the advanced media outreach which includes traditional methods such as print and mailings but also utilizes the District's alliance with community partners.

Over the past ten years this community has witnessed significant advancements but the next ten years will bring even more economic growth to the area. The District is located just four miles away from Houston Intercontinental Airport and the Port of Houston is a mere twelve miles away, making the District a great expansion location for manufacturing, warehousing, and distribution companies.

I congratulate the President and CEO David Hawes, Board Chairman Gerald Overturf, the entire East Aldine District staff, and the many other volunteers that have dedicated their time to improving their community.

**HONORING RALPH STANFORD  
GRIFFIN**

**HON. GEORGE MILLER**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. GEORGE MILLER of California. Mr. Speaker, I rise today to remember and pay tribute to the tremendous contributions made to our community by my friend and constituent, Ralph Stanford Griffin, who passed away on December 1, 2011.

Ralph Griffin, a native of San Antonio, Texas, worked and raised his family in the San Francisco Bay Area, retiring as an educator and administrator from the Oakland Unified School District. Ralph was a lifelong champion of equal education for all, services for the developmentally disabled, and support for African American families in our community.

His passion and determined advocacy was in no small part the catalyst for establishing the Black Families Association of Contra Costa County (BFA) in 1973. As Founding Members, Mr. Griffin and his wife of 50 years, Norma, together with a small group of their peers saw the need for African Americans in their community to have an outlet to discuss current events and provide support to one another. In an era where racism and biases still prevented equal access to housing and education, the BFA was a place where neighbors could come together to guide and help one another through these challenges. It was and remains an organization that promotes cultural heritage, pride, and dignity within the community, and provides scholarships for deserving high school students.

Ralph Griffin further extended his commitment to students' access to higher education as a dedicated member of the Kennedy-King Memorial Scholarship Fund. He was instrumental in helping the Fund provide annual \$8,000 college scholarships to students from minority groups often under-represented at California's four-year colleges and universities. It is due to Ralph's commitment that so many of our brightest graduating high school stu-

dents have been able to continue on to higher education.

To Norma, their sons Stanford and Steven, and the entire Griffin family, I extend my heartfelt condolences. Your loss is shared not only by those who knew Ralph personally, but also by all of those touched by his work. I ask my colleagues to join me in remembering Mr. Ralph Griffin, a courageous and compassionate man who shared his time and talent freely for the betterment of our entire community.

**CONGRATULATING SAN JACINTO  
COLLEGE ON ITS 50TH ANNIVERSARY**

**HON. PETE OLSON**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. OLSON. Mr. Speaker, I rise today to congratulate San Jacinto College on its fiftieth anniversary. For fifty years, San Jacinto College has provided high quality education to the citizens and communities of East Harris County, Texas. Congratulations to San Jacinto College for a wonderful half-century of empowering students to achieve their goals.

San Jacinto College first opened its doors on Sept. 18, 1961, in a downtown Pasadena storefront, with an initial enrollment of 700 students. Thanks to their passion for helping students succeed, the college has grown to serve more than 30,000 students in 140 disciplines, and it continues to expand.

A leader in comprehensive learning, San Jacinto College recently earned recognition for being a veteran friendly college and was named an Achieving the Dream Leader College. This establishment plays a critical role in improving the educational experience of the hard working citizens in our communities.

Access to quality education is an important stepping stone to achieve the American dream of a better life. San Jacinto College provides a valuable opportunity for people throughout our communities to access higher education. As President Kennedy once said, "Our progress as a nation can be no swifter than our progress in education. The human mind is our fundamental resource."

The achievements of San Jacinto College bring pride to Houston and all of Texas. Congratulations to San Jacinto College for fifty years of excellence and to a bright future ahead.

**TRIBUTE TO MONTGOMERY,  
ALABAMA MAYOR EMORY FOLMAR**

**HON. JO BONNER**

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. BONNER. Mr. Speaker, I rise to give tribute to an Alabamian whose patriotism and devotion to country made him a leader early in life and carried him to prominence in business and public service in later years. I am speaking of former Montgomery Mayor Emory

Folmar, who passed away on November 11 at the age of 81.

Emory Folmar was born in Troy, AL, in 1930 and moved to Montgomery when he was fourteen. After graduating from Sidney Lanier High School in 1948, he attended The University of Alabama, receiving a BS in Business in just three years while serving as cadet colonel of the Army ROTC.

After college, he received an Army commission and went to Ft. Benning, GA for parachute training and instructors' schools where he was assigned to the 11th Airborne Division attached to the 2nd Infantry Division. He married Anita Pierce in February 1952 and was deployed to Korea that summer. Wounded in action, he received the Silver Star, the Bronze Star and the Purple Heart. At the rank of lieutenant, he received the French Croix de Guerre as a result of his actions with the 23rd Regiment of the 2nd Infantry Division and French troops.

Following his service in Korea, he was assigned to Ft. Campbell, Kentucky, as an Airborne Jump Master until 1954. He then moved to Montgomery to join his brother James Folmar and Henry Flynn in home construction. The Folmar brothers' business later expanded to include large commercial shopping center construction throughout the Southeast.

In 1975, he entered politics at the urging of his son David, first running for Montgomery city council. He was soon elected president of the city council and then became Mayor of Montgomery from 1977 till 1999. His time in office was marked by economic growth and an emphasis on law and order.

Mayor Folmar ran as Republican for governor in 1982 against former Democrat Governor George C. Wallace. Although he did not win the election, Emory made the strongest showing of any Republican running for governor since reconstruction to that time.

Very active in Republican politics on the state and national levels, he also served as campaign chairman for Ronald Reagan's finance committee in 1980; state chairman for President Reagan in 1984; and chairman for Bush-Quayle in 1988 and 1992. After retiring from politics, he was appointed Commissioner of the Alabama Beverage Control Board by then-Governor Bob Riley in 2003. During his time in that post, he streamlined and modernized the ABC to make it more efficient.

Mr. Speaker, on behalf of the people of Alabama, I wish to send my heartfelt condolences to his wife, Anita; their children, Wilson Bibb and Margaret; and their grandchildren; as well as his sisters, Miriam and Anne, and many friends. You are all in our thoughts and prayers.

**HONORING ALBERT BIERSTADT  
AND THE HUDSON RIVER  
SCHOOL OF PAINTING**

**HON. JARED POLIS**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. POLIS. Mr. Speaker, I rise today to call attention to a change in the Capitol Visitors Center. Two paintings by the prominent 19th

century painter Albert Bierstadt have recently been returned to the Capitol Complex by the Architect of the Capitol. Originally purchased after the Civil War, "Discovery of the Hudson River" and "Entrance into Monterey," are part of the first indigenous American school of painting, called the Hudson River School. This movement was not just restricted to beautiful landscapes—it also had an important influence on American culture, recreation, and conservation.

Though the Hudson River School originated in upstate New York, painters soon began traveling widely to study and capture new scenes. These travels took the painters to Europe, the Middle East, North Africa, South America, and the American West. Bierstadt is one of the most prominent artists of the Western United States, and has a strong connection to my district in Colorado.

In 1859, Bierstadt traveled to my home State of Colorado and to Wyoming, then territories, with a government surveyor. The large-scale landscapes he painted from his notes and sketches from this trip prompted the creation of many more paintings back in his studio. Bierstadt's depiction of the craggy peaks of the Rockies, the Sierra Nevada, and in Yosemite, among others, resulted in the christening of Mount Bierstadt in my district.

In the 1870s, Congress purchased several of Bierstadt's works, including the two that hang today in the CVC. These same paintings, and other Western landscapes by Hudson River School painters, coupled with a growing environmental conservation movement, inspired Congress to protect this natural beauty through the creation of Yellowstone and Yosemite National Parks. Later, these paintings were used again to prompt the formation of the National Park Service.

This is just one example of the Hudson River School of Painters' legacy. The School emphasized realistic, highly detailed scenes that were very popular over the 19th century. These works captured the beauty and variety of the American landscape.

Painters from the Hudson River School also had a hand in the foundation of the Metropolitan Museum of Art in New York City. Inspired by the artistic culture of the capitals of Europe, School painters joined other area businessmen and academics to form the Met in 1870. Bierstadt met with the President, and other painters of the School served as trustees or as members of the executive committee. Today, many of Bierstadt's works hang in the Met alongside works by many other Hudson River School painters, as well as other institutions like the Smithsonian American Art Museum, and the Museum of Fine Arts in Boston.

Mr. Speaker, I encourage Americans of all ages to take the time to view these paintings and consider the beauty and greatness of these landscapes, both on canvas and in the wilderness.

## THE FAILURE TO PROTECT FARMERS AND RANCHERS FROM CORPORATE ABUSES

### HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. KAPTUR. Mr. Speaker, I rise today to express my disappointment with the U.S. Department of Agriculture's (USDA) Grain Inspection, Packers & Stockyards Administration's (GIPSA) final rule that was supposed to protect our Nation's farmers and ranchers from abusive practices in the livestock industry.

Simply put, the final rule is inadequate and shows the power big corporate packers and processors have in this country. The final rule does not include about half of the protections it did in a previous draft.

Congress had to direct USDA in the 2008 farm bill to establish a set of comprehensive protection rules because the department was so slow in responding to the changing marketplace that has become so slanted toward corporate packers and processors that we are losing small farmers at a rapid pace.

The average American chicken grower makes 34 cents per bird while the processing corporation makes \$3.23 per bird. With a profit margin of 34 cents is it any wonder that we have lost over 460,000 small-scale farms since 1982.

USDA claims it is committed to ensuring a fair and transparent marketplace. How can we have a fair and transparent marketplace when we allow corporations to force farmers to sign production contracts where one farmer is paid less than another despite producing the same livestock because there is no way for farmers to determine fair product value since there is no contract disclosure requirement.

In addition, how can USDA claim it supports a fair marketplace when it fails to clearly define conduct that is a violation of law? How are farmers supposed to know when they are being taken advantage of when the governmental agency tasked with protecting them does not tell them what types of practices are a violation of the law?

This House has not helped our Nation's producers either. We recently passed legislation that withholds funding from USDA to move forward with establishing more comprehensive fairness rules. Ultimately, we set the USDA up to fail and farmers and ranchers will suffer because corporate special interests have a stronger lobby than America's producers.

While the final rule will prevent some of the most abusive practices in the poultry industry, it largely fails to protect farmers and ranchers specifically in the pork and beef industry. Nevertheless, I will continue to fight to protect our farmers and ranchers from further corporate abuses and urge the USDA to enforce existing laws designed to regulate corporate packers and processors.

## IN RECOGNITION OF JOHN M. DUGAN

### HON. JOHN GARAMENDI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. GARAMENDI. Mr. Speaker, I rise today in honor of Police Sergeant John M. Dugan, who is retiring after nearly 30 years of law enforcement service to the City of Fairfield. As his colleagues, friends and family gather together to celebrate the next chapter of his life, I ask all of my colleagues to join me in saluting this outstanding public servant and defender of peace and safety.

John started his career of service as a Firefighter for the California Department of Forestry and the City of Paradise. On March 19, 1982, he was hired as a Public Safety Officer with the Fairfield Police Department. As an officer, John worked in various capacities that included Patrol, Investigations, Special Operations, and Field Training.

John was promoted to Police Sergeant on July 22, 1994, and ultimately supervised a number of different units including Patrol, Traffic, Crime Suppression, and Youth Services. In 2000, he earned the California Highway Patrol's 10851 Award for recovering 12 stolen vehicles in eight months; three of which were occupied vehicles. Sergeant Dugan was a strong, decisive, professional, and respected leader. As a result of these superb traits, he received the Manager of the Year award in 1999 and 2006.

In 2007 and 2010, as the Police Department experienced changes in leadership and command staff, Sergeant Dugan stepped in and assisted the City management in filling the gaps. Over the last four years, he has assumed the Police Lieutenant's position twice and managed Patrol Operations. Sergeant Dugan has a can-do attitude and he consistently provides quality service to the community.

John has been a valued employee and his commitment to the community was evidenced on a daily basis. He was a loyal representative of the law enforcement community and admired for his hard work, dedication, and positive work ethic.

Mr. Speaker, I am truly honored to pay tribute to this dedicated public servant. I ask all of my colleagues to join with me in wishing John M. Dugan continued success and happiness in all of his future endeavors.

## IN RECOGNITION OF THE HANDLEY HIGH SCHOOL STATE FOOTBALL CHAMPIONSHIP

### HON. MIKE ROGERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. ROGERS of Alabama. Mr. Speaker, I would like to request the House's attention today to congratulate Handley High School of Roanoke, Alabama, on winning its first Alabama Class 3A championship football title in 90 years.

Rallying from a 14–7 deficit late in the fourth quarter, Handley came back to win the game

20–14 in stirring fashion with a goal-line stand in the final seconds. Led by their coach, Mike Battles, this team showed the type of grit and determination that we should all try to emulate during these difficult times.

Originally opened in 1848 as the Roanoke Academy, it was the first school in the city. After various changes through the years, the name of the school finally settled on Handley High School in 1910 to honor the memory of a Confederate soldier, Captain William Anderson Handley. The late Captain had gifted the land which supports the campus today in exchange for one dollar.

Known for its strong music, band and theatre department, Handley has always been known to offer its students excellent opportunities to pursue artistic endeavors. Now it has a football program it can brag about too.

Congratulations to Handley High School, Principal Gregory Foster, Superintendent Chuck Marcum and all their fans on their State Championship. Go Tigers!

#### SUPPORT OF TIME WARNER CABLE

#### HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mrs. MALONEY. Mr. Speaker, I rise today to commend Time Warner Cable, which is headquartered in my district, for its investment in local television news coverage, specifically for opening a Washington, D.C., news bureau that will cover stories and events here in Washington that are important to the communities served by its 14 local news channels throughout the country.

Mr. Speaker, Time Warner Cable is dedicating significant resources to high quality local news channels that provide critical local news, weather, traffic and sports coverage in the local communities that they serve. These stations are good for the public, and for our republic, at a time when many local television news budgets are being cut and local newspapers are cutting back, too. Thus it is important to note the rare times when we see new investment in local news coverage.

I applaud Time Warner Cable for recognizing the importance of local news, for investing in it, and creating jobs while providing this critical service to its customers—many of whom are my constituents. With more local news coverage, it's a certainty that we will have a better informed citizenry, which can only improve our nation.

#### CELEBRATING THE 200TH ANNIVERSARY OF THE FOUNDING OF CITRONELLE, ALABAMA

#### HON. JO BONNER

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. BONNER. Mr. Speaker, I rise to bring to the attention of this House a very special historical event in my home state, the 200th Year

of Celebration of the founding of Citronelle, Alabama.

Located in northwest Mobile County, Citronelle may not be a household name nationwide, but over a hundred years ago the friendly and charming small town was a popular stop for Northern vacationers. To the residents of such bustling Midwestern cities as Cleveland and Chicago, the name Citronelle conjured images of healing springs and bucolic Southern vistas.

In the early 20th century, Citronelle was known as the "Land of Healing Waters," owing to its mineral springs which a 1903 publication compared to the famous Poland Springs of Maine.

Located along the main line of the Mobile and Ohio Railway, for many years Citronelle was celebrated not only for its prized therapeutic waters, but also for its "salubrious" air which was reported to aid in the treatment of respiratory disorders. Indeed, the small town soon sported four very nice guest accommodations, including the Illinois Hotel, the Hygeia Hotel and the Hotel Citronelle. The Hygeia Hotel Cottage still stands today and is a local tourist attraction.

It is not surprising that Citronelle would have gained a reputation as a haven for rest and good health. In the late 1700's, the area was already destined for fame because of its curative properties. Native Americans in Southwest Alabama told European settlers about a unique plant thought to cure malaria. The miracle plant—which was named "Citronella"—was discovered growing in abundance along the hills that would eventually be known as Citronelle.

Along Citronelle's historic journey, the community also found improbable ways to add to its remarkable resume. For example, we all learned in school that Gen. Robert E. Lee surrendered to Gen. Ulysses S. Grant at Appomattox Court House, Virginia on April 8, 1865. What some may not have been told in class is that less than a month later, on May 4, Lt. Gen. Richard Taylor, son of President Zachary Taylor, surrendered his Confederate forces under the "Surrender Oak" in Citronelle, Alabama. Citronelle was, therefore, one of five Civil War surrender locations. The legendary oak tree was sadly lost to a hurricane many years ago, but the town's contribution to American history is undeniable.

In addition to being a site of the official end of the Civil War, Citronelle has also occupied the spotlight as a potential rival to America's Western oil fields. In 1955, Citronelle was dubbed the Oil Capital of Alabama and home to the largest oil discovery east of the Mississippi River at that time.

Over the years, the sometimes sleepy town has capitalized on its quaint atmosphere, touting its "delightful walks through the woods (that) always charm the man or woman who seeks rest and recreation away from the busy city." Today, Citronelle remains a beautiful place to live filled with hard-working, dedicated people who love their God, their country and their families. I am proud to represent this lovely city in Congress.

On December 10, 2011, I will join Mayor Loreta Presnell, and other city officials, along with the people of Citronelle, in celebrating the birthday of their historic city. Older than the

State of Alabama, Citronelle occupies a special place in our culture and in our hearts. Congratulations to the City of Citronelle on this special occasion and a very Happy 200th birthday! May there be many more good years ahead in the next chapter of your rich history.

#### PERSONAL EXPLANATION

#### HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. LEE of California. Mr. Speaker, had I been able to vote, I would have voted "yes" on the Democratic Motion to Recommit H.R. 10.

#### IN RECOGNITION OF JOHN KATZ

#### HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. YOUNG of Alaska. Mr. Speaker, I rise today to honor one of Alaska's most distinguished, faithful, and respected public servants, John Katz.

Fresh out of Berkley Law, he boldly moved to Alaska and made a decision to embark upon a life of selfless public service to the people of Alaska. Among his first few jobs in public service were being Alaska Commissioner of Natural Resources and special counsel on land-use issues, before being appointed the Governor's man in Washington, D.C. in 1983.

His departure can only be described as an enormous loss for our great state. For more than 40 years, and spanning eight governors, he has served Alaska with unwavering commitment, integrity, and with the utmost level of professionalism. Having worked with him for almost 30 of those years, I have little doubt that his loyalty to and knowledge of Alaska is second to none.

Through thick and thin, his dedication to Alaska was evident to everyone who worked with him. Over the years he has always put the needs of Alaska first, no more so than when he delayed his retirement at the request of Governor Frank Murkowski.

His reputation of being calm and cool under pressure is well known and his ability to work well with Republicans and Democrats alike should be emulated by others here in Washington. He once said his greatest disappointment was being unable to open up ANWR and I share that disappointment with him.

But despite ANWR, he was an integral part of every positive development to happen to Alaska in the last three decades including Alaska Native rights, fisheries management, protecting Alaska's sovereignty, and natural resource development. After all the work we've done together, I will do my utmost to continue this legacy for the good of Alaska.

He is exactly the kind of public servant who gives public service a good name. My staff and I will miss working with him, but I hope that our paths will continue to cross.

Thank you for your service to Alaska, John, and I wish you all the best in the future.

THE CENTENNIAL SEASON OF THE  
SAN FRANCISCO SYMPHONY

**HON. NANCY PELOSI**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. PELOSI. Mr. Speaker, it is with great pride and joy that I join my constituents in celebration of the centennial season of the San Francisco Symphony. Its illustrious history is marked by commitment to artistic excellence and innovation; its future is sustained by its large and loyal base of supporters.

One hundred years ago today, December 8, 1911, the Symphony gave its first performance. In recognition of this historic occasion, on September 7, 2011 we began a year-long celebration with a free outdoor concert at the Civic Center Plaza with Conductor Michael Tilson Thomas, pianist Lang Lang and violinist Itzhak Perlman. This concert demonstrated the San Francisco Symphony's value of making music available to everyone. The founders believed music was a source of enrichment and pleasure intended for all and not the province of the privileged few. Reaching broader audiences has always been a priority, from recordings and radio broadcasts in the 1920s to video and internet today. Today the San Francisco Symphony has accomplished one of its early goals, to offer music to a city, to a Nation and to the world.

To help commemorate the centennial over the next year, San Franciscans will welcome notable performers and six of our Nation's greatest orchestras will visit San Francisco: the Boston Symphony, the Chicago Symphony, the Cleveland Orchestra, the Los Angeles Philharmonic, New York Philharmonic and the Philadelphia Orchestra.

The centennial presents a wonderful opportunity to honor the Symphony's robust musical history, starting with the Barbary Coast. Over the past century, the Orchestra has grown in stature and acclaim under the leadership of eminent music directors, including Pierre Monteau, Seiji Ozawa, Herbert Blomstedt, and since 1995 Michael Tilson Thomas.

Michael Tilson Thomas has brought pride to all San Franciscans. He has served as Music Director for 15 years, and this is his 25th season as Artistic Director of the New World Symphony—an academy for training the next generation of orchestral musicians. A recipient of the 2010 National Medal of Arts, the highest award given to artists by the President, and winner of seven Grammy Awards, Thomas has been a remarkable mentor and supporter to many young artists, and he has educated millions about the joy of music.

The San Francisco Symphony provides the most extensive education and community programs offered by any American orchestra. Concerts for children have been part of the programming from the beginning and the groundbreaking Adventures in Music program, now over 20 years old, provides music education and free concerts to every first through fifth grader in San Francisco's public schools—75,000 children each year.

We offer special congratulations to John Goldman, the Symphony's President, whose generosity and family philanthropy have had a dramatic impact on the quality of life in the San Francisco Bay Area. The Symphony is blessed with an active board of governors with deep philanthropic and social ties to our City as well as tremendous public support. Thank you to the Symphony's brilliant musicians, dedicated staff and volunteers.

The first one hundred years of the San Francisco Symphony have been distinguished by outstanding concerts of the highest quality. Its second century is certain to be just as successful.

INTRODUCTION OF END RACIAL  
PROFILING ACT OF 2011

**HON. JOHN CONYERS, JR.**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. CONYERS. Mr. Speaker, I am pleased to introduce the End Racial Profiling Act of 2010, along with additional cosponsors. This legislation represents a comprehensive federal commitment to healing the rift caused by racial profiling and restoring public confidence in the criminal justice system at-large. This legislation is designed to enforce the constitutional right to equal protection of the laws by eliminating racial profiling through changing the policies and procedures underlying the practice.

This legislation can be traced back to the data collection efforts of the late 1990's that were designed to determine whether racial profiling was a fact versus an urban legend. Based upon the work around that legislation, by September 11, 2001, there was significant empirical evidence and wide agreement among Americans, including President Bush and Attorney General Ashcroft, that racial profiling was a tragic fact of life in the minority community and that the Federal government should take action to end the practice. Moreover, many in the law enforcement community have acknowledged that singling out people for heightened scrutiny based on their race, ethnicity, religion, or national origin had eroded the trust in law enforcement necessary to appropriately serve and protect our communities.

At a recent Judiciary Committee hearing on the issue of racial profiling, we approached the issue from the perspective of "smart policing" and what makes sense in a time of austerity in the face of the continuing need to protect public safety. I believe that it became clear during the hearing that enough agreement exists to allow us to re-open the bipartisan dialogue on racial profiling commenced by President Bush and Attorney General Ashcroft.

Despite the fact that the majority of law enforcement officers perform their duties professionally and without bias—and we value their service highly—the specter of racial profiling has contaminated the relationship between the police and minority communities to such a degree that federal action is justified to begin addressing the issue.

While the Department of Justice promulgated a series of guidelines in 2003 which

were designed to end the practice of racial profiling by federal law enforcement agencies, these measures do not reach the vast majority of racial profiling complaints arising from the routine activities of state and local law enforcement agencies. Further, the guidelines provide no enforcement mechanism or methods for identifying law enforcement agencies not in compliance and, therefore, fail to resolve the racial profiling problem nationwide. In this instance, there is no substitute for comprehensive federal anti-profiling legislation.

The End Racial Profiling Act is designed to eliminate racial, ethnic, religious, and national origin profiling that is well documented. First, the bill provides a prohibition on racial profiling, enforceable by declaratory or injunctive relief. Second, the bill mandates that training on racial profiling issues as part of Federal law enforcement training, the collection of data on all routine or spontaneous investigatory activities that is to be submitted through a standardized form to the Department of Justice. Third, the Justice Department is authorized to provide grants for the development and implementation of best policing practices, such as early warning systems, technology integration, and other management protocols that discourage profiling. Finally, the Attorney General is required to provide periodic reports to assess the nature of any ongoing discriminatory profiling practices.

Decades ago, with the passage of sweeping civil rights legislation, this country made clear that race should not affect the treatment of individual Americans under the law. However, recent events demonstrate that racial profiling remains a divisive issue that strikes at the very foundation of our democracy. When law-abiding citizens are treated differently by those who enforce the law simply because of their race, ethnicity, religion, or national origin, they are denied the basic respect and equal treatment that is the right of every American. With the cooperation of the Administration, we have the opportunity to develop a comprehensive approach to eliminating the practice of racial profiling through this legislative effort. I hope that we do not miss this historic opportunity to heal the rift caused by racial profiling and restore much of the community's confidence in law enforcement.

SUPPORT OF KAISER PERMANENTE'S INITIATIVE TO PROMOTE BREASTFEEDING AND PREVENT CHILDHOOD OBESITY

**HON. FORTNEY PETE STARK**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. STARK. Mr. Speaker, I rise in support of a new Kaiser Permanente initiative to encourage breastfeeding as an important component of preventing childhood obesity and promoting other health benefits. Kaiser is implementing a systemwide program to ensure mothers are provided ample breastfeeding education and support. They will track their successes as a measure of hospital quality.

Research suggests breastfeeding has multiple benefits for baby and mother alike.

Breastfed babies have a lowered risk of childhood obesity as well as allergies, asthma, and sudden infant death syndrome. Nursing reduces a mother's risk of post-partum depression, Type 2 diabetes, ovarian and breast cancer.

Family- and patient-centered prevention initiatives like this will play an enormous role in battling America's toughest health care challenges. Kaiser's new breastfeeding initiative is an example of how a commitment to prevention can positively impact health outcomes.

Health care in America must shift from its singular focus on treating disease to incorporating a strong commitment to prevention. I encourage other major health care providers to follow Kaiser's example.

**MOURNING THE LOSS OF MARTINA  
DAVIS-CORREIA, SISTER OF  
TROY ANTHONY DAVIS**

**HON. JOHN LEWIS**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. LEWIS of Georgia. Mr. Speaker, I come to the floor today with a heavy heart. Martina Davis-Correia, the older sister of executed Georgia prisoner, Troy Anthony Davis, died last week in Savannah. She was the most outspoken advocate of the "I Am Troy Davis" clemency campaign, which spread to countries all around the world. Correia traveled far and wide to any group that would give an ear in a strenuous effort to save her brother's life. Despite several commutations of his sentence, Davis was killed by lethal injection in Georgia in September of this year. The Davis case has helped turn the tide of public opinion in the struggle for repeal of the death penalty.

I am deeply saddened to hear about the passing of Martina Davis-Correia. The agony of this death sentence and execution has killed not just one man, but has decimated an entire nuclear family. After 22 years of struggle, Davis's mother died in the spring, her son was killed by the state of Georgia in September, and now her daughter has died. Correia was a brave and courageous woman who was her brother's most stalwart advocate for clemency. She was an angel of mercy who sacrificed her health to win her brother's life.

For a state which could have used its power to do what is right, the outcome is tragic. But for the Davis family, if it had to be this way, it is an elegant ending. God has finally accomplished what the state of Georgia could not. In his mercy he granted their prayers to be all together again—happy, healed and whole. They leave us the lessons of their lives and a legacy of struggle that strengthened a movement for repeal of the death penalty in this country. I send my deepest condolences to the Davis family and to Martina Correia's son, who needs our support in this time. May God richly bless you for the sacrifice you as a family have made in the long, hard struggle for justice in America.

**CAMP ASHRAF IN IRAQ**

**HON. DANIEL E. LUNGREN**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. DANIEL E. LUNGREN of California. Mr. Speaker, the clock is running down for the 3,400 residents of Camp Ashraf in Iraq. I share the concern of many of my constituents and others across our country and around the world for the status of those living in Camp Ashraf. It is my fear that if the Iraqi government follows through on their threat to shut down the camp that we could be facing a monumental human rights tragedy. I have joined many of my colleagues in calling for access to the camp by the United Nations High Commissioner for Refugees. It is indefensible that UNHCR has not been given access to those in Ashraf. This in itself seems to be a violation of international human rights law.

It is imperative that the government of Iraq revoke its year end deadline for the closure of Ashraf. UNHCR must be provided sufficient time to process each and every one of these individual cases. Regardless of the State Department's position concerning the legal status of MEK, the department has both a moral and legal responsibility to do everything in its power to ensure that UNHCR is provided access to the camp.

It is my hope that when Prime Minister Maliki visits with President Obama, that he will agree to remove the December 31 deadline for the closure of Camp Ashraf. There is still time to avoid a catastrophe and the Secretary of State should act with the assurance that decisive action will have the support of Members of Congress on both sides of the aisle.

**IN RECOGNITION OF MARY ANN  
CHRISTOPHER**

**HON. FRANK PALLONE, JR.**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. PALLONE. Mr. Speaker, I rise today to recognize Mrs. Mary Ann Christopher, who, after 29 years of service, will depart her position as President and Chief Executive Officer of the Visiting Nurse Association Health Group, Inc. to assume the same position at the Visiting Nurse Service of New York. Her dedication to the well-being of New Jerseyans in need deserves this body's recognition.

During her decade long-tenure as CEO, Mrs. Christopher spearheaded a geographic expansion which transformed the agency from a two-county provider to a statewide organization. Mrs. Christopher led the development of a continuum of services, including home-health care, hospice care, community-based prevention and outreach initiatives, clinics for the poor and school-based health care. In recent years, she skillfully steered the organization through a myriad of federal and state policy changes, directed a second capital campaign that resulted in the agency's new, modern headquarters, and launched a name change and comprehensive branding initiative.

Mrs. Christopher is a leading national voice on a wide range of health care issues. She regularly interacts with decision makers on Capitol Hill, and in Trenton to develop legislative and regulatory policies to enhance the quality of health care for New Jersey citizens. Her public policy work has included advancement of public-private partnerships to address the growing nursing shortage, expansion of telehealth services, ensuring adequate reimbursement for Medicare home-health care, and improving Medicaid care programs strengthening her state's human services system for the most vulnerable.

Mr. Speaker, once again, please join me in recognizing and thanking Mrs. Mary Ann Christopher for her 29 years of service to New Jersey and her dedication to providing healthcare to those in need.

**THE ATTAIN ACT**

**HON. LUCILLE ROYBAL-ALLARD**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. ROYBAL-ALLARD. Mr. Speaker, I rise today to introduce the Achievement Through Technology and Innovation Act of 2011 (ATTAIN).

Given the challenges facing job seekers in our current economy, technology skills are now more critical than ever. As a nation, we need to prioritize technology literacy, and it should begin with our educational system.

Whether students are preparing for college or planning to go straight into the workforce, we must provide them with the high tech skills employers and the economy demand. Obtaining these critical skills is of particular concern to low income and minority students who are falling further behind their higher income peers in terms of 21st century college and workplace skills.

Not only has technology literacy become a critical life skill, but studies show technology also has a tremendous impact on student learning. In this era of ever shrinking school budgets, overcrowded schools and over-extended teachers, technology provides an opportunity to improve academic outcomes for our students.

I had the opportunity to see this first hand at the LA School for Global Studies in my district. This school seamlessly integrates technology in the classroom and I was amazed to see students that were previously low performers academically and at risk of dropping out of school, engaged and eager to learn. My visit underscored the promise that initiatives like the ATTAIN Act hold for closing the student achievement gap.

The ATTAIN Act amends the current "Enhancing Education Through Technology" program in the Elementary and Secondary Education Act to better target federal education technology resources to raise student achievement, ensure high quality teaching and improve our education system while ensuring our students are college and career ready and prepared to compete in the digital economy.

The bill authorizes up to \$1 billion in annual funding to train teachers, purchase education

technology hardware and software, and to support student technological literacy.

Under the bill's provisions, if Congress appropriates more than \$300 million annually for ATTAIN, 60% would be used to purchase new technology and train teachers on how to effectively use these new tools.

The remaining 40 percent of ATTAIN funds would be distributed through competitive grants that encourage schools to undertake comprehensive, technology based reform initiatives that have been proven to increase student achievement.

However, should Congress appropriate \$300 million or less for this program annually, the Secretary of Education would allocate the entirety of the funding to conduct a competition and award grants to those states with the most promising initiatives to improve K-12 education through the use of technology. This provision is intended to ensure that there is adequate funding to impact student outcomes during lean fiscal years.

It is my hope that through this competition states and districts across the country will be compelled to evaluate their technology use and work to integrate it effectively throughout all classrooms, and especially those that are currently underserved by education technology.

Mr. Speaker, we know that when teachers are properly trained and schools are properly equipped with technology, students are engaged, eager to learn, and ultimately better prepared to meet the challenges of the 21st century. I believe that the ATTAIN Act is integral to our continued efforts to deliver all students the world class education they expect, need and deserve. I urge my colleagues to co-sponsor this important bill.

IN RECOGNITION OF MICHAEL B.  
MITCHELL

**HON. JOHN GARAMENDI**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. GARAMENDI. Mr. Speaker, I rise today in honor of Police Sergeant Michael B. Mitchell, who is retiring after nearly 30 years of law enforcement service, with 23 years of that service to the City of Fairfield. As his colleagues, friends and family gather together to celebrate the next chapter of his life, I ask all of my colleagues to join me in saluting this outstanding public servant and defender of peace and safety.

Michael started his law enforcement career as a Police Officer with the City of South San Francisco for six years. On September 5, 1988, he was hired as a Police Officer with the Fairfield Police Department. As an officer, Michael worked in various capacities that included Patrol, Traffic, and Investigations. In 1998, he completed the distinctive Peace Officer Standards and Training (POST)—Robert Presley's Institute of Criminal Investigation (ICI) certification course with a specialty in homicide investigation.

Michael was promoted to Police Corporal on September 8, 2000, and served in Patrol, Youth Services, and earned a City Manager's

Commendation in 2003 for his contribution and dedication to the City of Fairfield Driver's Training Program. On January 5, 2007 Michael was promoted to Police Sergeant and supervised teams on Patrol and then the Traffic Unit beginning in 2008. As the Police Department experienced changes in leadership and command staff, he stepped in and assisted city management by filling the gaps and acting as a Police Lieutenant and managing Patrol Operations when needed. In 2009, he earned the California Office of Traffic Safety's Award of Excellence for his outstanding motivational and leadership skills. His guidance and efforts dramatically increased the successful implementation and completion of traffic safety activities in the City of Fairfield.

Michael has been a valued employee and his commitment to the community was evidenced on a daily basis. He was a loyal representative of the law enforcement community and admired for his hard work, dedication, and positive work ethic.

Mr. Speaker, I am truly honored to pay tribute to this dedicated public servant. I ask all of my colleagues to join with me in wishing Michael B. Mitchell continued success and happiness in all of his future endeavors.

TRIBUTE TO MR. BOB NICKELSEN

**HON. GREG WALDEN**

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. WALDEN. Mr. Speaker, I rise today to recognize the 60 years of outstanding public and volunteer service of my fellow Oregonian and friend, Mr. Bob Nickelsen. I would like to celebrate and pay tribute to Bob's loyal service to my hometown of Hood River, Oregon and to pay tribute to a man who embodies the selfless spirit of service to others.

In 1951, Bob first joined the West Side Fire Department as a volunteer firefighter. In 1961, Bob was appointed fire chief of the department, a position that he held until 1980. During his tenure as fire chief, the West Side Fire Department expanded its services by erecting a second firehouse, which now bears his name. Under Bob's guidance, the fire department also began dispatching first responder personnel to aid emergency medical calls with the Hood River Ambulance Service.

For the past 30 years, he has also served as an elected member of the West Side Fire District Board of Directors. To this day, Bob continues to put himself in harm's way as a volunteer fire fighter. His leadership allowed this small rural volunteer fire district to stay in step with current developments in the fire sciences and provide the professional level of support that the community so richly deserves.

Mr. Speaker, Bob Nickelsen's civic responsibilities do not end at the firehouse doors. He was a commissioner for the Port of Hood River for over 15 years and has served on numerous local agricultural boards and committees. He was previously recognized as the Hood River Valley's "Orchardist of the Year." As a leader within the local farming community, Bob has contributed much of his time and effort to the economic development of Hood River and the Columbia Gorge.

On December 10, the West Side Fire Department will once again honor Bob with a banquet on his behalf I invite my colleagues to join me in praising Bob Nickelsen for 60 remarkable years of dedicated public service, his numerous contributions to his community, and for his outstanding character as a citizen of Hood River.

Theodore Roosevelt once said that "the first requisite for a good citizen is that he should be willing and able to pull his own weight." Bob continues to far surpass this noble standard.

IN RECOGNITION OF THE 50TH ANNIVERSARY OF THE ETHEL  
MACLEOD HART SENIOR CENTER

**HON. DORIS O. MATSUI**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Ms. MATSUI. Mr. Speaker, I rise today in recognition of the Ethel MacLeod Hart Senior Center, a popular gathering location for Sacramento's seniors. It is a great pleasure to recognize the center's 50th Anniversary, as it has provided a positive environment that enhances and affirms older adults' dignity and promotes their independence. As the Hart Center's supporters and patrons gather to celebrate this milestone, I ask all of my colleagues to join me in honoring the center's leadership and service to the Sacramento community.

The Sacramento Senior Center was formed in 1961, and was later renamed the Ethel MacLeod Hart Senior Center in honor of Hart's generous legacy to the city's senior community. From its earliest beginnings, the center has helped to foster a welcoming environment that supports older citizens' interests and needs, a place in which senior citizens feel a connection to each other and receive validation from the wider community.

Over the last fifty years, the Hart Center has provided a wide variety of recreational and health services. The center's programs include flu clinics, legal workshops, the Friendship Café, computer classes, and a hearing impaired club. In addition, the Center's staff publish a monthly newsletter called the Hart Cornerstone that announces community events, and provide fitness classes that promote physical exercise and encourage healthy aging. The Hart Center has also partnered with a number of organizations to meet the needs of local seniors, including the Gray Panthers, Older Women's League, Sacramento Senior Legal Hotline, California Health Advocates, Social Security, the Franchise Tax Board, and many others.

As a member of Congress, I have had the privilege of visiting the Hart Senior Center on numerous occasions. Earlier this year I had the opportunity to speak at an Older Women's League monthly meeting at the Center, and talk about legislative proposals that affect Sacramento's senior community. Additionally, last summer the Hart Senior Center hosted a Social Security 75th anniversary party where we celebrated the program and reflected on its importance.

Mr. Speaker, I am honored to pay tribute to the Ethel MacLeod Hart Senior Center on its 50th anniversary. I ask my colleagues to join me in honoring the Hart Center's role of providing the community with much needed services.

OUR UNCONSCIONABLE NATIONAL  
DEBT

**HON. MIKE COFFMAN**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. COFFMAN of Colorado. Mr. Speaker, on January 26, 1995, when the last attempt at a balanced budget amendment passed the House by a bipartisan vote of 300–132 the national debt was \$4,801,405,175,294.28.

Today, it is \$15,046,397,725,405.16. We've added \$10,244,992,550,110.88 dollars to our debt in 16 years. This is \$10 trillion in debt our nation, our economy, and our children could have avoided with a balanced budget amendment.

IN RECOGNITION OF MR. S.  
THOMAS GAGLIANO

**HON. FRANK PALLONE, JR.**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*

Mr. PALLONE. Mr. Speaker, I rise today to congratulate Mr. Thomas Gagliano, founder of the Jersey Shore Partnership. On December 14, 2011, members of this organization will gather to celebrate Mr. Gagliano's 80th birthday. Throughout his professional career, Tom Gagliano has demonstrated outstanding dedication to his community and trade. His services are truly worthy of this body's recognition.

Tom Gagliano is founder and former President of the Jersey Shore Partnership, Inc., a nonprofit coastal advocacy organization, active in Monmouth, Ocean, Atlantic and Cape May Counties. Jersey Shore Partnership has been instrumental on a national, state and local level for funding beach replenishment projects along the 127 miles of the New Jersey coastline. Mr. Gagliano's leadership has remained a catalyst in the organization's ability to maintain an active role in initiatives unique and important to the Jersey Shore community. Mr. Gagliano is also the Chairman of the Jersey Shore Partnership Foundation and remains a key figure in the organization's success. The Foundation was instrumental in creating the \$25 million per year "Shore Protection Fund", allowing the federal government to proceed with multiple beach replenishment projects throughout the state. Mr. Gagliano and the Jersey Shore Partnership remain an integral part to maintaining the health and beauty of New Jersey's shore region.

Mr. Gagliano is a lifelong resident of Jersey Shore, currently residing in Red Bank, New Jersey. He is a proud alumni of Brown University and earned his law degree from Georgetown University. Mr. Gagliano has also admirably served in the United States Navy from

1954 to 1956. He is a member of the New Jersey Bar and served as senior partner of his own law firm, located in West Long Branch, New Jersey until 1989. Mr. Gagliano was elected to the Oceanport Council in 1967. He also served as Monmouth County Surrogate from 1971 through 1976. Mr. Gagliano was first elected to the New Jersey Senate in 1977 and was re-elected three times, serving as Minority Leader and Ranking Member of the Transportation and Communications Committee. Governor Tom Kean appointed him Executive Director of New Jersey's NJTRANSIT Agency. In 1990, Mr. Gagliano was appointed by President George H.W. Bush to serve as commuter rail representative to the Commission on Railroad Retirement Reform, which he humbly accepted. In 2001, Mr. Gagliano accepted a position as Senior Vice President of Corporate Affairs at EPS corporate headquarters, the position he currently holds to this day.

Mr. Speaker, once again, please join me in congratulating Mr. Thomas Gagliano as members of the Jersey Shore Partnership gather to celebrate his 80th birthday. His outstanding service as an elected official and founder of the organization exemplifies his whole-hearted dedication and commitment to serving the residents of the Jersey Shore and New Jersey.

H. RES. 364, NAMING HVC-215 THE  
GABRIEL ZIMMERMAN ROOM

**HON. JARED POLIS**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 8, 2011*
